CHAT ROOMS

Pedophiles are meeting in chat rooms, supposedly created for children, where they exchanged emails.

STORAGE TECHNICS AND DISTRIBUTION THROUGH PROGRAMS P2P (PEER TO PEER)

Consumers of child pornography use peer to peer programs to share these files as they are fast, there is greater anonymity and downloadable video files of long duration, in addition to using certain keywords to search specific child pornography files. Within the programs used by these users are the programs Ares, Emule and Edonkey.

It creates a large database, with the seized material obtained in previous cases; it is generate a hash code (alphanumeric) to each file, which makes it unique, no matter the name of the file.

Entering this code to the hash program, this makes a global search of which user has that particular file and if it is available to share. Our Police Force doesn't make the file available to another user or promotes the crime whatsoever.
