

Criminal justice statistics & Cybercrime reporting

Agenda :

- How can criminal statistics have influence on the allocation of resources to law enforcement ?
- How to categorise and record cases in a way that includes cybercrime ?
 - Examples : how to report sexual abuse after initial contact online? Buying, detaining and using malware count for 1 or 3 offenses ?
- How threat intelligence can also contribute to the allocation of resources to law enforcement?

From action to reaction

From Emotion to Measurement to Resources

Activities to get more resources from decision makers

Decision makers : allocate resources

Management : ask for resources

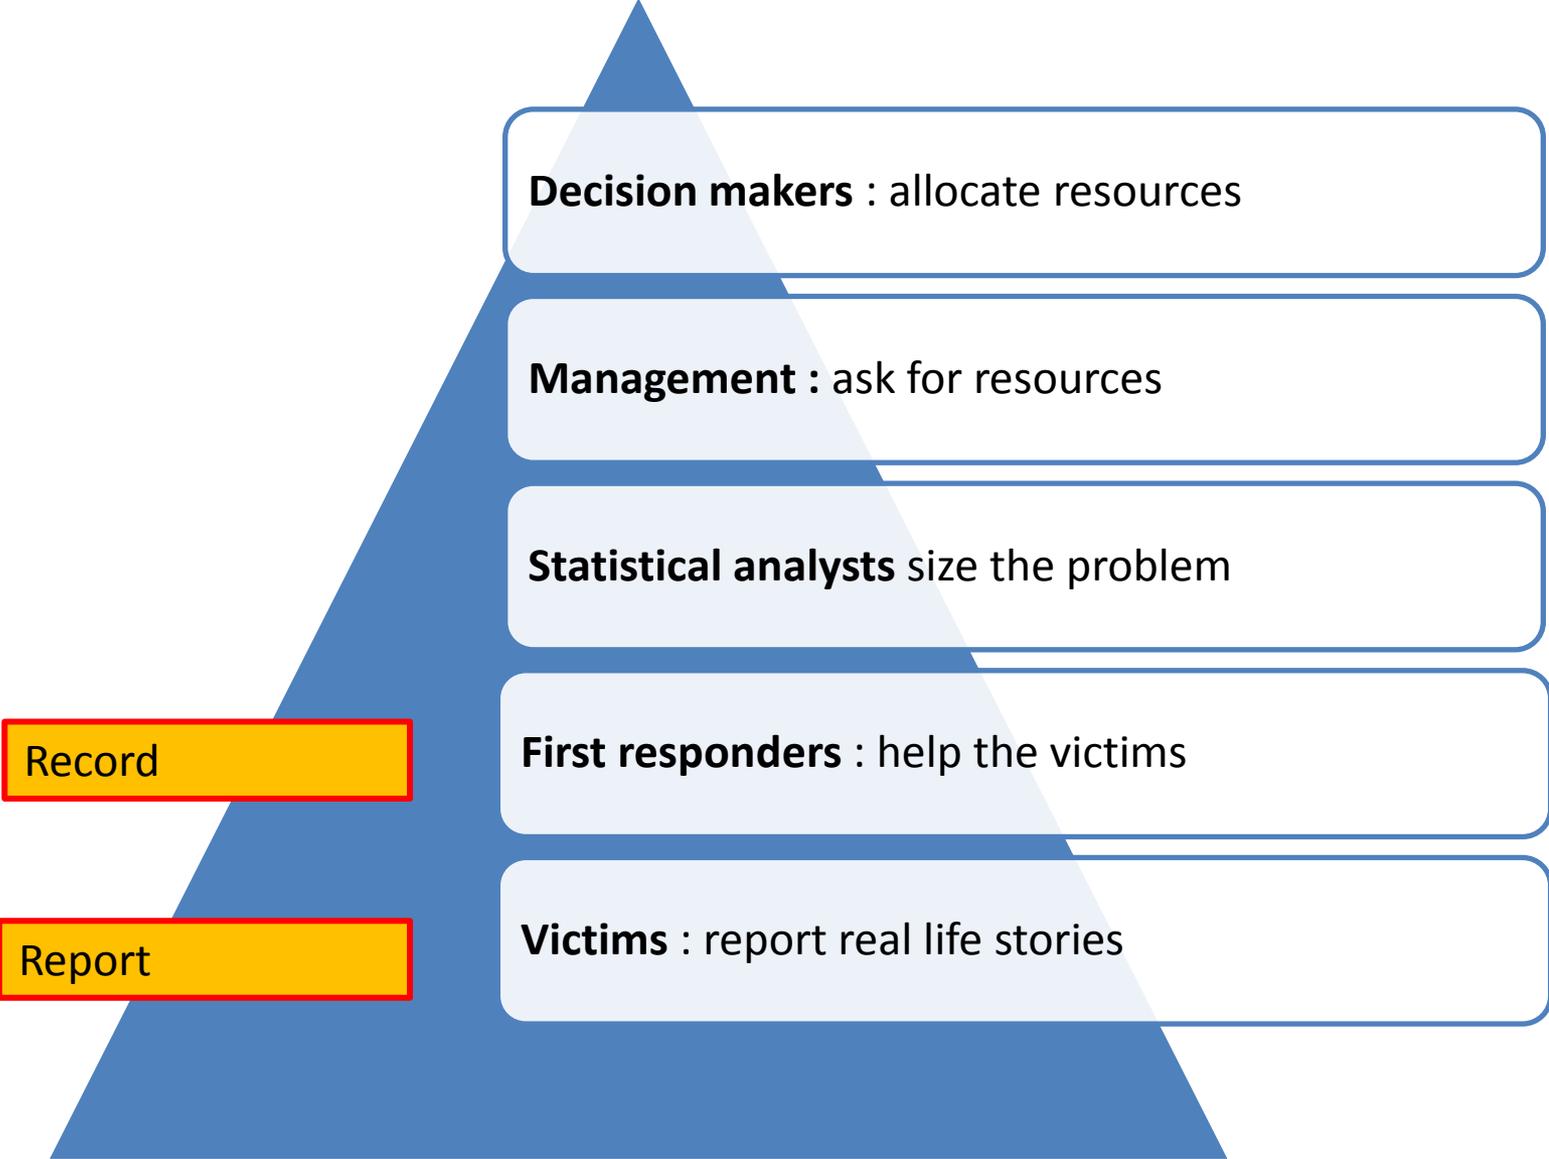

Statistical analysts size the problem

First responders : help the victims

Victims : report real life stories
