INTRODUCTION

Legislation

Nature and landscape protection in the Czech Republic is ensured by the Act of the Czech National Council No. 114/1992 Coll., on the Nature and Landscape Protection, as amended. The Act is based on the approach that not only specially protected parts of nature should be conserved for the future but that it is also important to maintain basic natural processes in the landscape, stressing both diversity and stability of various biological systems. The species protection is covered by the Section 56 of the Act on the Nature and Landscape Protection. The provisions of the Section specify reasons and conditions for permitting the exemptions from prohibitions for the protected plant and animal species. The Section 5a of the Act is focused on the Protection of Wild Birds and lists activities prohibited in relation to wild birds protection and the Section 5b sets conditions under which the responsible authority can issue a derogation. This applies for all wild birds species in the Czech Republic. The last amendment of the Act was adopted in the year 2009 and therefore the Act has remained in full compliance with the Bern Convention since last reporting period (for more details on the legislation see the biennial reports 2009 - 2010).

The Decree of the Ministry of the Environment of the Czech Republic No. 395/1992 Coll., as amended, aims the implementation of the above mentioned Act. The Annex of the Decree lists the specially protected species of wild fauna and flora into three categories: i) critically endangered; ii) severely endangered; iii) endangered species.

Data collection

At the 31st meeting of the Standing Committee of the Bern Convention the updated model form for biennial reports was adopted. Pursuant to the conclusions of the Standing Committee of the Bern Convention the EU Member states are allowed to use reports elaborated according to the provisions of the Birds and Habitats Directives for the purposes of the biennial report under the Bern Convention in order to decrease reporting burden and streamline the reporting obligations. Therefore the report of the Czech Republic has been prepared on the basis of the HaBiDes report and used the conversion via HaBiDes reporting tool.

The data on the exemptions and derogations were gathered by the Ministry of the Environment from the competent nature protection authorities as follows:

- Administrations of the protected areas (Nature Conservation Agency) granting exemptions and derogation pursuant to the provision of the Section 5b within the area of Landscape Protected Areas and National Parks
- Regional nature protection authorities granting exemptions and derogation pursuant to the provision of the Section 5b within their administrative district
- Municipality nature protection authorities granting derogations pursuant to the provision of the Section 5b of the Act in their administrative district

1. EXCEPTIONS CONCERNING STRICTLY PROTECTED FLORA SPECIES (ART. 5 - APPENDIX I)

Name of the species	No. of specimens involved (when practical)	No. of licences	Reasons for issuing of licences (art. 9, i. to v.) ¹	Impact on population
Coleanthus subtilis	2	-	C	no
Cypripedium calceolus	1	-	C	insignificant
Liparis loeselii	1	12	A	insignificant
Pedicularis sudetica	1	-	C	low - temporary
Pulsatilla patens	3	-	A	insignificant

2. EXCEPTIONS CONCERNING STRICTLY PROTECTED FAUNA SPECIES (ART. 6 - APPENDIX II)

Name of the species	No. of specimens involved (when practical)	Authorised action (art. 6, a. to f.) ²	No. of licences	Reasons for issuing of licences (art. 9, i. to v.) ³	Impact on population
Accipiter gentilis	17	c, d	14	i, iv, v	low - temporary insignificant disturbance, insignificant, no influence on favourable conservation status
Accipiter nisus	18	c, d	12	i, iii, iv, v	no or low - temporary insignificant disturbance, insignificant, no influence on favourable conservation status

¹ i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

² A: Deliberate killing

B: Deliberate damage to or destruction of breeding or resting sites

C: Deliberate capture and keeping

D: Deliberate disturbance of wild fauna

E: Deliberate destruction or taking of eggs

F: Possession and internal trade

³ i.: protection of flora /fauna
