Study on human rights dimensions of algorithms

Proposed structure of study

Rapporteur: Ben Wagner

A) Defining Algorithms and automated data protection techniques

B) Characteristics, Traits, Limitations of Algorithms and Automated Data Processing

C) Empirical Dimensions

- 1) *Content filtering and website blocking*
- 2) *Terrorism and crime prevention*
- 3) *Search algorithms and search functionality more generally*
- 4) *Surveillance, Online Tracking, Profiling and "Social Sorting"*
- 5) *Insurance and Credit Scoring*
- 6) *Cloud providers and data storage*
- 7) *Mobility and cars*
- 8) *Elections & implications for democracy*
- 9) *Internet of Things and Smart Cities*
- 10) *Digitisation of Public Sector & government services*

D) Ethical & legal & human rights dimensions

E) Mechanisms of Governance, Regulation, Transparency & Accountability
