Concerning the paragraph 15 of the Report

In connection with the "passive attitude" of the judges, when finding some injuries in respect to the citizens, it must be mentioned, that the judges are not the bodies who conducts the criminal prosecution. The articles 41 and 42 of the Criminal Procedure Code limit their powers, and it is inadmissible to carry out other powers then indicated in abovementioned articles.

According to the 4 clause of the 41st article of the Criminal procedure code, the court, in cases provided by criminal procedure law has the right to address to the prosecutor with to solicit for institute legal proceedings. But it is obvious, that in this stage the court has not enough legal evidences for solicitation of the legal proceedings. Additionally, according to the 243 article of criminal procedure code of the RA accord a right to take a decision of assignment an expertise to the organs of inquiry, and the court is not regarded as such an organ. It means that the court can address to law competent organs in case he reveal injuries of citizens, which will take appropriate measures. In practice it is more often and, of course, more logical, that the person informs personally about the violation of his rights.

No one from the arrested persons submitted the complaint concerning the actions of state officers.

By the decisions of the court, 11 persons were subjected to the administrative detention, by the articles 172 and 182 of the Code of Administrative Offences; they passed the medical examination and were searched during their arrival. There was no body injuries recorded in respect to those persons neither on their arrival, nor during the detention.

Except for that, the head of the Penitentiary Department of the Ministry of Justice had the discussion with the medical staff members in 25 August 2004, during that discussion all the recommendations made in the Report, which concerns to the medical service, were discussed, in particular, it was ordered to carry out the medical examinations of the prisoners, as a rule excluding the participation of the police officers and other persons. The medical staff was explained that, only in case of their request other persons could take part in examination. This rule was also formulated in the written direction of the head of the Penitentiary Department, and also it was involved in the decree, which regulates the activity of the medical services. Concrete measures were taken to maintain and conduct the files of the medical services in accordance with the secrecy regime. In order to inform about the abovementioned measures the prisoners, the booklets and boards about their right were being changed.

In practice a proper attention is given to the records of the statements of prisoners about their injuries. At the time the appropriate guidelines are given permanently to medical stuff of the criminal executive servants about indicated problem.
