**Belvedere approach:
an example of intergrated
landscape development with
cultural heritage**

Examples of preservation by protection

Classic project development (Fuck the Context: Rem Koolhaas)

Is there something in between?

Preservation by
protection

Development

In between old & new

Classic approach: past and future back to back

PAST <-> FUTURE

Preservation by Development:
past & future side by side, grasping the axis of time

PAST & FUTURE

Preservation by ...

Protection

Interdisciplinary

Spatial planning

Integrating interests

Functional

Preservation by protection
&
Preservation by development
Adaptive Re-use

are an addition to one another;
Just different strategies

Explaining more

In Netherlands we developed **Belverder policy** which started in 1999

<https://www.youtube.com/watch?v=bmPD4UMOumQ>

Preservation by Development an urban example: the city walls of Den Bosch

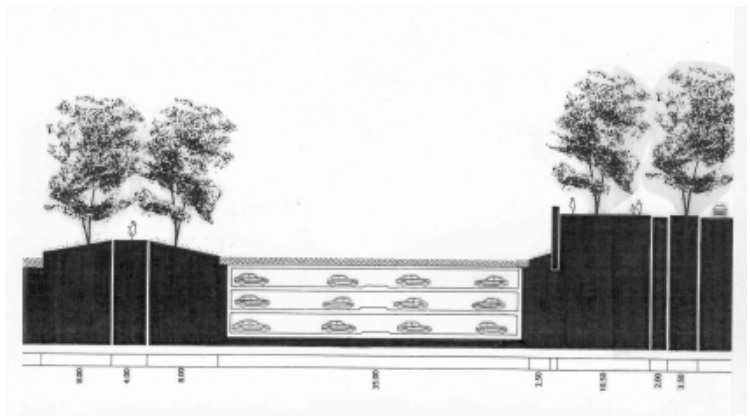

The city walls of Den Bosch in decay But authenticity alone didn't pay the bill

78 projects linked at the city walls of Den Bosch; a restoration deficit turned into a economic program with several funders

Fortified walls of Den Bosch connect to the surrounding countryside, tourism, waterstorage, parking solutions & nature development

And off course: the restoration of the walls

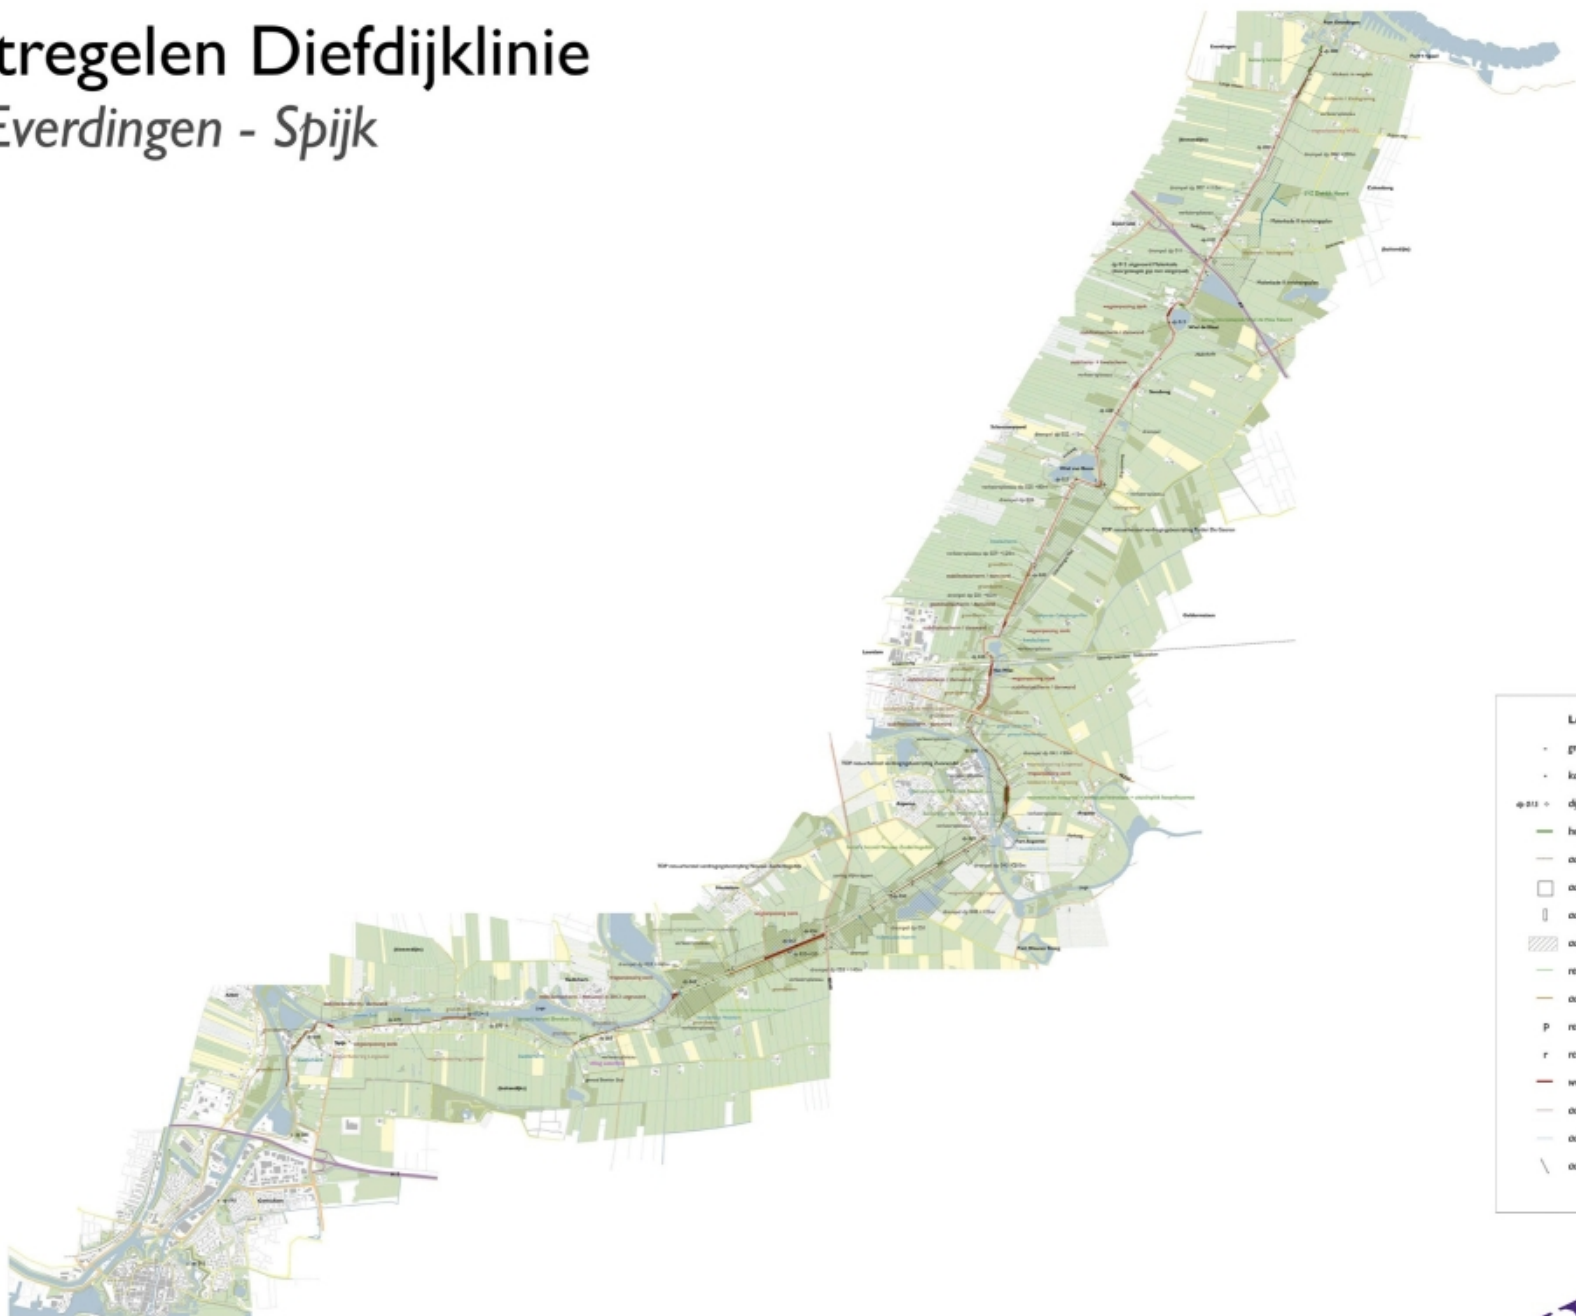

Preservation by Development an rural example: the Diefdijk

Kartering XI / nr 2873

Fort bij Everdingen,
Werk a/h Spoel

Maatregelen Diefdijklinie Fort Everdingen - Spijk

- Legenda**
- groepschuilplaats
 - kazernet
 - ⊕ 212 = dijkpaal (om 250m.)
 - herstel batterij / groepsnest
 - aanbrengen kleibak in wegdek
 - aanbrengen verkeerplateau
 - ▭ aanbrengen drempel
 - ▨ aangrenzend projectgebied / inrichtingsplan
 - reconstructie bestaande berm
 - aanbrengen kleibern / kleingroei / grondberm
 - P realiseren parkeerverzorging
 - r realiseren recreatief punt
 - wegpaspassing zand
 - aanbrengen stabiliteitschem / damwand
 - aanbrengen kwetschem
 - aanleggen dijktroepen

Preservation by Development an example: the redevelopment of the Liniedijk

Goal of the project

- Improvement of the quality of the dike (dike plays role in protection of the land against river flooding)
- Roadsafety (the amount of traffic)
- History: redevelopment of the 19^e century New Dutch Water defence line in to a Landscape park and Unesco (historical value of the dike)

Advantages of cooperation

- Cooperation between the 3 spatial task (dike quality, road safety, heritage)
- Financial contribution from infrastructure investment
- Without making the combination the investments in the landscape and heritage would not have happened

Military function in the 19th century

Protection against floods 13th century against river Waal

Traffic safety

New infrastructure

Landscape projects

- Bunker

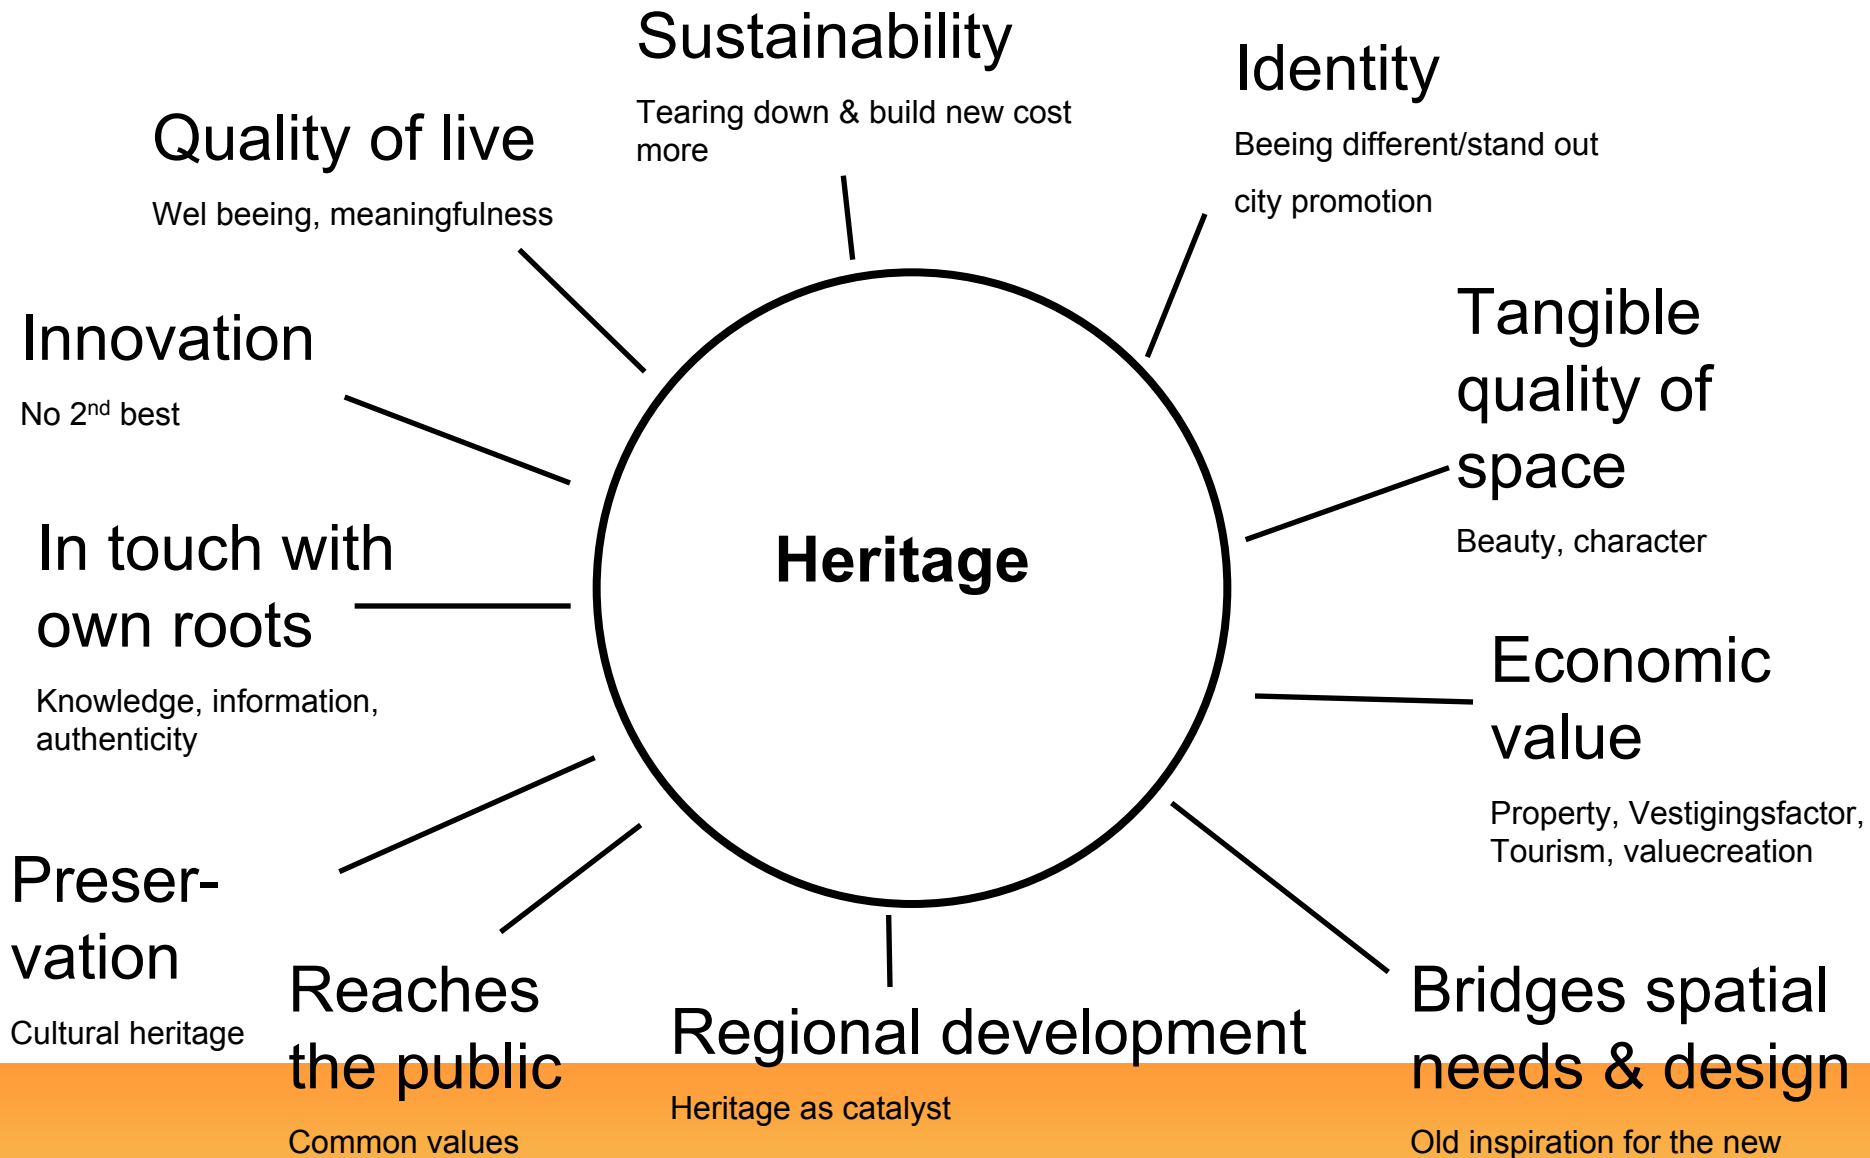

The power of heritage

National parks: looking for knowledge

National programm on redeveloping national parks

Looking for knowledge on:

- Governance models
- Marketing
- Quality of landscapes
- Economic Models
