

iPROCEEDS

Project on targeting crime proceeds on the Internet in
South-eastern Europe and Turkey

Activities outline 3.7.2 and 7.3.3

Workshops on inter-agency and international cooperation for search, seizure and confiscation of online crime proceeds

16 – 17 February 2017, Sarajevo, Bosnia and Herzegovina

BACKGROUND

The issues of cybercrime, electronic evidence, crime proceeds and money laundering cut across different institutions and involve, in particular, cybercrime units, financial investigation units, Financial Intelligence Units (FIUs) and prosecution services. However, cybercrime investigations are rarely accompanied by financial investigations and vice versa, investigations of financial or other crimes are rarely accompanied by cybercrime investigations. To this end there is a need for more effective inter-agency cooperation between all these institutions, which is expected to have the strongest impact on the search, seizure and confiscation of online crime proceeds.

Cybercrime and the criminal money flows on the Internet do not stop at geographical borders. Therefore, to address these phenomena in a comprehensive way, investigative activities should span across the borders and also operate within different jurisdictions. Therefore, effective international cooperation is also crucial for the search, seizure and confiscation of online crime proceeds. Linking up tracing of proceeds of crime, anti-money laundering and countering terrorist financing measures with investigations on cybercrime and computer forensics offers added opportunities. For example, provisional measures to freeze assets should be accompanied by requests for the expedited preservation of electronic evidence.¹ This is one of the reasons that Recommendation 36 of the Financial Action Task Force proposes implementation of the Budapest Convention on Cybercrime and the 2005 Warsaw Convention.

Putting in place domestic protocols on information sharing according to relevant regulations and permissible less formal alternatives represents one of the tools that would enhance in an efficient way cross-sector information sharing and international cooperation between cybercrime units, financial investigation units, FIUs and prosecution services in the search, seizure and confiscation of online crime proceeds.

Under **Expected result 3 and 7** the iPROCEEDS project will work toward strengthening inter-agency cooperation and international cooperation and information sharing between cybercrime units, financial investigation units and financial intelligence units as well as between competent authorities for judicial cooperation in search, seizure and confiscation of online crime proceeds.

Implemented
by the Council of Europe

In this context, the iPROCEEDS will organise a workshop on inter-agency and international cooperation for search, seizure and confiscation of online crime proceeds in Bosnia and Herzegovina and will assist the national authorities in the preparation of inter-agency cooperation protocols and domestic protocols for international sharing of intelligence and evidence.

EXPECTED OUTCOME

By the end of the workshops participants should have a clear picture on how to combine financial and cybercrime investigations at domestic and international level and understand the benefit of putting in place structured and documented procedures (domestic protocols) for inter-agency and international sharing of information and evidence that are auditable, simple and applied by Cybercrime unit, Financial Investigation Unit, FIU and Prosecution service in the search, seizure and confiscation of online crime proceeds.

PARTICIPANTS

Representatives of the Cybercrime Unit, Financial Investigation Unit, Financial Intelligence Department (FID), Prosecution service and competent authorities for judicial cooperation (MLA authority).

LOCATION

Hotel Europe, Vladislava Skarića 5, Sarajevo.

Programme

Thursday, 16 February 2017	
Workshop I on inter-agency cooperation for search, seizure and confiscation of online crime proceeds
