

## Final Conclusions on the representation of bird species from Res. No. 6 (1998) of the Bern Convention in proposed Emerald sites in Armenia, Azerbaijan and Georgia

Remark: "During the seminar (Kyiv, 4-5 September 2016), we were not able to discuss marine features (sea birds, sea turtles, dolphins, seals, anadromous fish in their marine period) and certain habitats (mainly: A1.11, A1.141, A1.22, A1.44, A2.61, A2.621, A3, A4, A5 and A6.911) due to almost complete absence of Marine Emerald sites proposed so far. It is planned that such discussion will be held in a dedicated marine seminar in coming years. If necessary, additional guidelines on designation of marine sites will be prepared and disseminated."
