5th Session – 2016-2017**

***Education of Children in Heavily Industrialised Landscapes
Elementary School in the city of Most, Czech Republic***

On 27 September 2017, the Committee of Ministers of the Council of Europe acknowledged and praised the great value of the project and recommended making it well-known to the general public for its exemplary value, and as a source of inspiration.

The project, “Education of Children in Heavily Industrialised Landscapes”, is an exemplary model of education and awareness-raising of pupils living in highly industrialised areas. The outcome is to develop a sense of belonging to a landscape, and a responsible attitude towards the environment and future generations. Founded on raising awareness and active participation, this educational approach encourages children to act as citizens who care for the future of the landscape.

Thorbjørn Jagland, Secretary General
