On 27 September 2017, the Committee of Ministers of the Council of Europe acknowledged and praised the great value of the project and recommended making it well-known to the general public for its exemplary value, and as a source of inspiration.

“Landscape inventory of Galicia: public participation for landscape characterisation and planning” has seen strong public participation in a process of identifying and characterising landscapes with a view to developing a landscape atlas of the Galicia region. It is a decisive step towards the development of landscape action strategies.
