The creation of the Unified National GIS Database and Web Portal for Cultural Heritage is under way at the National Agency for Cultural Heritage Preservation of Georgia, with the support of Norwegian Ministry of Foreign Affairs and in partnership with the Cultural Heritage Directorate of Norway. The system was in the testing phase in 2015. It allows the improved online communication between the central and regional offices of the National Agency for Cultural Heritage Preservation of Georgia, as well as between the different state authorities, self-governments. The system also provides for improved access to information on the cultural heritage of Georgia for general public via online GIS portal.
