Architectural Heritage

Bebyggelseregistret, BBR (Data Base of Built Heritage) is a national registry holding information about the built heritage. The represented data ranges from traditional log cabins and old industrial quarters to modern city buildings. As of October 2011 there are approximately 80 000 searchable building records, with around 13000 listed as National Monuments, Historical Buildings and Church Monuments. Updates and new entries are made continually.

Records and data are compiled from surveys, documentations, archives and printed materials and then correlated by County Museums, The Swedish Church, County Administrative Boards, and Universities in collaboration with The Swedish National Heritage Board.
