

Ministero Agricoltura e Foreste
Corpo Forestale dello Stato

Riserva naturale

“Isola di Montecristo”
Vietato:

Allontanarsi dalle guide e dai sentieri segnati
Danneggiare piante e animali

Attraccare al molo se non autorizzati, salvo
avarie e, per i pescherecci, rifornimento di acqua

Pesca e balneazione nel raggio di mt. 1000 dall'Isola.

1. Explore , with the help of the IUCN Species Survival Commission, the status of the “Montecristo Goat”, the needs for its preservation and in the case its in situ conservation is needed, the ways and means of its integration and conservation within the Island’s ecosystems.

2. Continue the monitoring of the Island's flora, fauna and vegetation units, and evaluate the management activities that are necessary for the conservation of the species and the restoration of the native vegetation.

3. Continue the ecological surveillance of the Island in order to detect undesirable alien species early enough to ensure their eradication.

4. Complete the remote surveillance system as far as necessary and feasible in order to be able to detect and impeach any illegal activities on and around the island.

5. Explore any sensible arrangements for the visitors as a possible alternative to the existing rule of the quota of 1000 per year, including possible improvements of the awareness raising and education of the public visiting the Island.

6. Ensure that the resources are secured in a sustainable way to maintain the management of the Reserve and to further develop its long term management plan.
