## **CONVENTION DU CONSEIL DE L'EUROPE SUR LE PAYSAGE**

**SLOVÉNIE**

**RAPPORT NATIONAL SUR  
LA MISE EN ŒUVRE DE LA CONVENTION**

## 0. Informations générales

### 0.1.1.1. Informations générales

#### 1. Nom de l'Etat/Région concerné(e)

Etat  
Slovenia  
Région (pour les Régions concernées)  
...

#### 2. Responsable officiel de la Convention

Nom  
Jelena Hladnik  
Institution  
Ministry of the Environment and Spatial Planning  
  
Environment Directorate  
  
Nature Conservation Division  
Adresse  
Dunajska cesta 48  
Code postal  
1000  
Ville  
Ljubljana  
Courriel  
[jelena.hladnik@gov.si](mailto:jelena.hladnik@gov.si)  
Site web  
<http://www.mop.gov.si/>

#### 3. Responsable des réponses à ce questionnaire

Nom  
Jelena Hladnik  
Adresse  
Dunajska 48  
Code postal  
1000  
Ville  
Ljubljana  
Courriel  
[jelena.hladnik@gmail.com](mailto:jelena.hladnik@gmail.com)  
Site web  
<http://www.mop.gov.si/>

#### 4. L'Etat participe-t-il à la Conférence du Conseil de l'Europe pour la mise en œuvre de la Convention ?

Oui  Non

Nom des participants à la conférence

Nom du/des représentants(s)  
Jelena Hladnik

#### 5. La Convention a-t-elle été signée ou ratifiée par l'Etat ?

Oui  Non

Dans l'affirmative, précisez :

Date de la signature  
7.03.2001  
Date de la ratification dans l'État, titre et contenu du document  
15.06.2003  
Charger fichier PDF (max. 20 Mo)  
Document(s) complémentaire(s) disponible(s) sur le site  
Date du dépôt de la ratification au Conseil de l'Europe

25.09.2003

Existe-t-il différentes versions linguistiques officielles de la Convention ?

Oui  Non

...

Existe-t-il une ou des traductions officielles dans la ou les langues de l'Etat/régions ?

Oui  Non

<http://www.pisrs.si/Pis.web/pregledPredpisa?id=ZAKO3712>

Existe-t-il une ou des traductions non officielles dans la ou les langues de l'Etat/régions ?

Oui  Non

...

Y a-t-il des exceptions territoriales à l'application de la Convention, conformément à son article 15 ?

Oui  Non

...

## 6. Si le présent questionnaire est rempli par une autorité régionale, cette autorité a-t-elle adopté la Convention par un acte juridique spécifique ?

Oui  Non

## 7. Compétences des entités administratives en matière de paysage

Premier niveau administratif (nom de l'entité au niveau de l'Etat)

Ministry of the Environment and Spatial Planning

Responsabilité dans le domaine du paysage ?

Oui

Non

Responsibilities of the Ministry of Environment and Spatial Planning are in the field of environment and in the field of spatial planning. With regard to environment, the Ministry is responsible for protection of the environment, including water management, waste treatment, noise pollution, strategic environmental impact assessment, conservation of natural heritage and management of biological and landscape diversity. With regard to spatial planning, the Ministry is responsible for national strategic spatial planning documents, for conducting the preparation of detailed plans for the spatial arrangements of national significance, for approval of local spatial planning documents, for issuing the construction permits for objects of national importance, for housing policy and for geodetic data.

The main documents which include landscape issues are:

1. The Spatial Management Policy of the Republic of Slovenia, adopted by the Slovenian Government in 2001. One of the objectives of the Spatial Management Policy is preserving significant features of landscapes. It includes guidelines for harmonious development of rural areas and preservation of agricultural areas and active protection of cultural landscape.

2. The Spatial Development Strategy of the Republic of Slovenia, adopted by the Slovenian Parliament in 2004, which defines spatial development through three interrelated segments, namely settlement, infrastructure and landscape. It defines landscape quality parameters, national landscape areas, guidelines for sectoral use of landscape and guidelines for local spatial planning.

3. Biodiversity Conservation Strategy of Slovenia. It defines the characteristics of biological and landscape diversity in Slovenia, sets the conservation aims and provides general guidelines for achieving them.

4. National Environment Programme

Deuxième niveau administratif (nom de l'entité)

Ministry of Economic Development and Technology

Responsabilité dans le domaine du paysage ?

Oui

Non

Although there are no regional authorities in Slovenia, there are 12 statistical (functional) regions and 12 Regional Development Agency, which represent the basis for the implementation of national "balanced regional development policy". Ministry of Economic Development and Technology coordinate the work of the Public fund of the Republic of Slovenia for regional development and rural development and coordinate the work of 12 regional development agencies in the Slovenian regions in field of the system and legislation of harmonious regional development, preparation of the national development programme and the coordination of the 12 regional development programmes.

Regional Development Agency prepare regional development programmes which have to be confirmed by the governmental office responsible for regional development. These programmes must be prepared on the basis of partnership principle and need to get broad public endorsement in the regions and localities, which makes them one of important policy tools for the implementation of development policy of Slovenia.

Regional plans are harmonized with the spatial development plans, adopted at the local level, because the investments in regional development must be harmonized with the goals of spatial development, set out in spatial planning documents. Regional development programs also contain elements of the landscape, mainly in relation to the tourist orientation, rural development, or as part of the objectives of quality of life.

Troisième niveau administratif (nom de l'entité)

Local level:

Municipality

Slovenia is divided into 212 municipalities

**Responsabilité dans le domaine du paysage ?**

- Oui
- Non

The responsibilities of the local level, i.e. municipalities are numerous (212). In the field of spatial planning, the municipality has a responsibility for spatial planning and management on its territory. Spatial development is regulated through spatial planning documents which include landscape, following the guidelines from policy documents and guidelines of national institutions which collaborate in the process of preparation of municipalities' spatial planning documents as stakeholders. In practice, on the basis of request from the municipality the guidelines for specific spatial planning document are provided by Directorate for Spatial Planning, Natural conservation office, Cultural heritage office.

## 1. Dispositions générales

### 1.1. Définitions

#### 1.1.1. Paysage

##### 1.1.1.1. Paysage

###### 8. Le terme 'paysage' est-il défini dans votre langue ?

Oui  Non

Dans l'affirmative, décrivez la signification et l'usage courants de tout autre mot signifiant « paysage » ; donnez le contexte précis dans lequel chaque mot est utilisé (p. ex. aménagement du territoire)

Langue

Slovenian.

Mot

Krajina

Signification

The term "landscape" is defined in three laws.

In the Spatial planning Act (2017, Article 3) it is defined as: "Landscape" is an area as perceived by people and has recognizable natural, cultural or settlement characteristics that are the result of the action and interaction of nature and man. The landscape is recognized as a natural, cultural and landscape in the urban area."

<http://www.pisrs.si/Pis.web/pregledPredpisa?id=ZAK07341>

The Cultural Heritage Protection Act (2018, Article 3) defines term cultural landscapes as open space including natural and artificially made components, whose structure, development and functions are chiefly controlled by human operations and activities. <http://pisrs.si/Pis.web/pregledPredpisa?id=ZAK04144>

In the Nature Conservation Act (2018, Article 35) the landscape is defined as: Landscape shall be a spatially explicit part of nature with specific distribution of landscape components resulting from the characteristics of living and non-living nature and human activity. <http://pisrs.si/Pis.web/pregledPredpisa?id=ZAK01600>

###### 9. La définition juridique du terme 'paysage' dans l'Etat/la Région est-elle différente de celle de la Convention ?

Oui  Non

#### 1.1.2. Politique du paysage

##### 1.1.2.1. Politique du paysage

###### 10. La définition juridique de 'politique du paysage' dans l'Etat/la Région est-elle différente de celle de la Convention ?

Oui  Non

#### 1.1.3. Objectif de qualité paysagère

##### 1.1.3.1. Objectif de qualité paysagère

###### 11. La définition juridique de 'objectif de qualité paysagère' dans l'Etat/la Région est-elle différente de celle de la Convention

Oui  Non

#### 1.1.4. Protection des paysages

##### 1.1.4.1. Protection des paysages

###### 12. La définition juridique de 'protection des paysages' dans l'Etat/la Région est-elle différente de celle de la Convention ?

Oui  Non

#### 1.1.5. Gestion des paysages

##### 1.1.5.1. Gestion des paysages

###### 13. La définition juridique de 'gestion des paysages' dans l'Etat/la Région est-elle différente de celle de la Convention ?

Oui  Non

#### 1.1.6. Aménagement des paysages

##### 1.1.6.1. Aménagement des paysages

###### 14. La définition juridique de 'aménagement des paysages' dans l'Etat/la Région est-elle différente de celle de la Convention ?

Oui  Non

**1.2. Champ d'application**

**1.2.1. Champ d'application**

**1.2.1.1. Champ d'application**

**15. Le champ d'application de la Convention est-il repris dans un document formel de l'Etat/la Région ?**

Oui  Non

Décrivez brièvement le champ d'application du 'paysage' énoncé dans le présent document et indiquez s'il est fait spécifiquement référence à des espaces particuliers (p. ex. naturel, rural, urbain, périurbain, etc., et aux espaces terrestres, aquatiques - eaux intérieures et maritimes - et aériens).

...

**1.3. Objectifs**

**1.3.1. Objectifs**

**1.3.1.1. Objectifs**

**16. Une politique du paysage a-t-elle été définie ?**

Oui  Non

## 2. Mesures nationales

### 2.4. Répartition des compétences

#### 2.4.1. Gouvernement

##### 2.4.1.1. Gouvernement

17. Dans la structure du gouvernement, la compétence afférente à la Convention appartient-elle à un seul ministère ?

Oui  Non

18. Existe-t-il dans ce ministère un service spécial consacré au paysage ?

Oui  Non

19. Y a-t-il des consultations et des échanges réguliers entre le ministère/autorité chargé de la politique du paysage et d'autres ministères/autorités chargés des politiques territoriales et autres ?

Oui  Non

20. En l'absence de ministère/autorité unique responsable de la politique du paysage, quels ministères/autorités exercent conjointement les tâches relatives aux différents éléments de la politique du paysage ? (plusieurs choix possibles)

- Agriculture
- Changement climatique
- Communautés
- Patrimoine culturel
- Culture (général)
- Ecologie (biodiversité)
- Economie
- Education
- Energie
- Environnement (général)
- Affaires étrangères
- Forêts
- Infrastructure
- Affaires intérieures
- Loisirs et détente
- Extraction minérale
- Patrimoine naturel
- Conservation et protection de la nature
- Travaux publics
- Recherche
- Développement rural
- Aménagement du territoire
- Développement durable
- Tourisme
- Transport
- Gestion de l'eau
- Publicité
- Autre (précisez)

21. Y a-t-il des consultations formelles et des échanges réguliers entre les différents ministères/autorités qui peuvent se partager des compétences en matière de politique du paysage ?

Oui  Non

Ajoutez toute information utile sur la façon dont les compétences en matière de politique paysagère sont exercées au sein du gouvernement national.

...

#### 2.4.2. Autres acteurs (organisations et institutions)

##### 2.4.2.1. Autres acteurs (organisations et institutions)

22. Existe-t-il des organisations et des institutions publiques (ou équivalent) actives et/ou responsables dans le domaine du paysage (observatoires du paysage, conseils du paysage, centres ou instituts du paysage, etc.) ?

Oui  Non

Si oui, répertoriez les organisations clés aux différents niveaux administratifs

#### Organisation

Slovenian Association of Landscape Architects

#### Niveau administratif

- National
- Régional
- Local

#### Type d'organisation

Slovenian Association of Landscape Architects is a professional association of landscape architects. It was founded in 1992 and operates as a non-governmental organisation.

Objectives of the association are:

- association of landscape architects,
- improvement of the legislative framework,
- commitment to the promotion and development of landscape architecture,
- commitment to developing culture of space,
- protection of natural and cultural values of landscapes,
- professional development,
- connectivity, cooperation, exchange of ideas and experiences,
- constant care for the improvement of regular professional and scientific training of landscape architects (study programs, methodology and others).

The aim of association is promotion and development of landscape architecture, sustainable design, preservation and protection of landscape, nature and human environment, and to increase the quality of life and culture.

#### Activités

The association organises educational, promotional and expert events, workshops, meetings and exhibitions, exchange of professional information on legal acts, competitions and other fields of interest with task to coordinate the professional interests of landscape architects in the Republic of Slovenia and to establish relationships with other national and international organizations and institutions in order to promote, affirm and advance the profession. The association organises a series of national and international conferences, which were always documented in the thematic publications.

Nature parks represent the most valuable areas of Slovenian territory from the viewpoint of long-term of nature conservation, biodiversity and unique landscape features. Protected areas consist of one national park, three regional and 34 landscape parks and 66 nature reservations and over 1200 natural monuments which cover 13% of Slovenian territory. In addition, Slovenia has 2 geoparks, some botanical gardens and 144 monuments of designed nature. There are also some extraordinary areas that would deserve official conservation and are worth visiting.

#### 2.4.4. Relations entre les différents acteurs

##### 2.4.4.1. Relations entre les différents acteurs

#### 26. Le ministère chargé de la politique en matière de paysage est-il en interaction avec d'autres acteurs dans le domaine du paysage ?

Oui  Non

Dans l'affirmative, quels types de consultation ont été établis entre les différents acteurs concernés par le paysage ?

#### 27. Le ministère chargé de la politique en matière de paysage organise-t-il des conférences officielles sur le paysage ?

Oui  Non

Law on Heritage Protection

**Date**  
2018

**Objet**  
cultural heritage, cultural landscapes

**Description**  
The main elements and objectives of cultural heritage protection, including the cultural landscape, comprise the maintenance and restoration of the cultural heritage, prevention of threats to its preservation, public presentation and fostering awareness of its values. An area of cultural landscape can be listed in the heritage register if it has heritage value as a whole and if it is sufficiently interconnected to compose a topographically identifiable entirety of immovable heritage.

The Architectural Policy of Slovenia

**Description**

Good architecture is sustainable quality, which means that it is useful, safe, healthy, environmentally friendly, well-designed, inclusive and economical. Such architecture facilitates the quality of life for residents, and it results in well-being and motivation. Architecture and space significantly affect the shaping of a person's identity and creativity in society. The quality of the built environment has a key influence on the process of a person's identification with the society they belong to, whereby other architectural aspects – functional aspects, design, requirements for comfort and health, and the inclusion of cultural heritage – also play an important role in addition to urban and landscape integration in space. Due to the aforementioned, good architecture is in the public interest.

Space in Slovenia is recognised for its diverse cultural landscape and heritage, and diverse and extensive natural systems. Forest cover, the high volume of water, the preservation of watercourses and biodiversity are important. Exceptional architectural heritage is found in numerous communities surrounded by the cultural and natural landscape, while on the other hand, Slovenia is also a leader for its integration into internal space with infrastructural axes. These features should be included in development measures to promote economic growth and sustainable development. At the same time, we must be aware of the fact that space is limited, so we should manage it in a way that preserves it and protects it from irrational developments with short-term effects.

Description

Preparation of the spatial plan: According to the Spatial Planning Act the public debate has to be organized during the preparation of the spatial planning document. The draft spatial plan, together with its background studies and environmental report, if the plan is subject of SEA, is presented to the public at least for 30 days. Within that time the public debate is organized. The administrative body, responsible for the preparation of the spatial plan prepares the public debate in the local community, where the aims, objectives, spatial proposals and impacts are presented and discussed.

Establishment of protected area: According to the Nature Conservation Act the public debate has to be organized during the establishment of protected area and the preparation of its management document. The establisher shall inform the public of the draft instrument of protection by which a protected area is established at the public presentation. The public presentation shall include public discussion and public presentation of reasons for the protection, of the draft instrument of protection and of the cartographic documents. The public presentation shall last at least 60 days. Within that time the public debate is organized. The administrative body, responsible for the establishment of protected area prepares the public debate in the local community, where the aims, objectives, proposals and impacts are presented and discussed.

According to the Culture Heritage Proclamation Act the public debate has to be organized during the establishment protected area of cultural heritage landscape. The administrative body, responsible for the establishment protected area prepares the public debate in the local community, where the aims, objectives, reasons for the protection, draft instrument of protection and the cartographic documents are presented and discussed.

Titre

Slovene rural development programme provides the agricultural measures for stimulating the maintenance of the cultural landscapes for the integrated development of rural areas according to the provisions in the Agricultural Act (2008), Agricultural Land Act (2003) and other sectoral policy documents. Slovene rural development programme is conducted by the Ministry of Agriculture, Forestry and Food.

Description

Agriculture plays an important role in the habitat, biodiversity and landscape conservation. The most important policy document in this regard is: Rural Development Programme of the Republic of Slovenia 2014 - 2020(RDP). It consists of 4 axes.

Above all axis 2 measures of the RDP put emphasis on landscape conservation with the aim of preventing farming abandonment in marginal and in less favoured areas and curbing intensification of agricultural production. The measure compensatory allowances for less favoured areas are thus meant to prevent the agricultural land abandonment and the corresponding negative consequences. Moreover compensatory allowances shall contribute to the maintenance of the cultural landscape. Preservation of cultural landscape is also one of the main goals of agri-environmental payments. Agri-environmental payments support agriculture in its environmental function and, by means of sustainable farming methods, contribute towards the reduction of environmental pollution, the conservation of biodiversity and specific values of Slovenian countryside, such as traditional farming methods and the conservation of cultural heritage and typical Slovenian landscapes related thereto. In this regard the following submeasures are of great importance: mountain pastures, steep slopes mowing, humpy meadows mowing, meadow orchards, rearing of autochthonous and traditional domestic breeds, production of autochthonous and traditional agricultural plant varieties, sustainable rearing of domestic animals and extensive grassland maintenance. Another contributor to the conservation of landscape features and areas intended for biotope development are those agri-environmental payments intended for submeasures supporting protection areas (water reserves, national and landscape parks, natural reserves, natural heritage sites and ecologically important areas), such as animal husbandry in central areas of appearance of large carnivores, preservation of special grassland habitats, preservation of grassland habitats of butterflies, preservation of litter meadows, bird conservation in humid extensive meadows in Natura 2000 sites and permanent green cover in water protection areas.

Indirect measures for landscape management in the rural development programme:

- Through agro-environmental measures used for management of different types of habitats, steep meadows etc.
- Through the measures of axis 3 and LEADER. helps to sustain better living in the rural areas, which has also indirectly positive implications for the landscape.

Titre

The Strategy for Biodiversity Conservation in Slovenia 2015 - 2025

Natura 200 Site Management Programme

Description

The following terms are defined: landscape, landscape characterization, cultural landscape, natural landscape, landscape diversity, landscape element, landscape types

The general and specific goals of protection of landscape diversity are defined, as well as indicators for monitoring the realization of sustainable use of protected areas, biodiversity, geodiversity and landscape diversity.

Disposition

...

Règles

...

Instruments

- Protected areas of nature conservation : The protected areas of Slovenia could be: a natural monument, strict nature reserve, nature reserve and a national, regional and landscape park. A landscape park is an area with emphasised, high-quality and long-term interaction of people and nature and with a high ecological, biotic and landscape value. The national and regional park could include landscape areas that are culturally or naturally important.

- Ecological important areas and Natura 2000 sites : Another way of integrating landscape concerns are ecological important areas and Natura 2000 sites. In many cases the reason for designation of ecological important areas and Natura 2000 sites are seminatural areas which are part of the traditional landscape. Beyond that, Natura 2000 is aiming for a coherent ecological network which requires functional corridor areas which can be greatly achieved in a traditionally maintained landscape.

- A protected area management plan: Is a programme document by which the development orientations, the manner of protection, use and management of the protected area and the detailed orientations for the protection of valuable natural features in the protected area are laid down while taking into account the development needs of the local community. In the protected area it is usually prohibited to carry out activities affecting nature in a manner that might worsen the state of a valuable natural feature or change, damage or destroy it and to change the conditions or status so that the valuable natural feature is changed, damaged or destroyed or that its aesthetic value is reduced.

Titre  
Nature Conservation Act

Biodiversity Conservation Strategy of Slovenia

Protected areas of nature conservation

Description

The landscape matters are integrated through nature conservation documents of different types, prepared at national and local levels. In this way, biodiversity conservation is contributing to the maintaining of typical landscapes through specific management of the area that is preserving specific habitat types (e. g. meadows) and species. Landscape is included among objectives and directions of Biodiversity Conservation Strategy of Slovenia and of Protected areas of nature conservation with a view that a specific human activity is required in order to achieve biodiversity and landscape conservation targets.

1. The basic guidelines for landscape development and preservation are:

- To conserve the traditional low intensity and sustainable land use forms that maintain the high level of biodiversity, and the diversity and cultural identity of landscapes
- To reduce the harmful impacts of activities on the landscape and its valuable natural and cultural features through spatial planning and control over the unsuitable development

Disposition

Through the protection of the landscape of exceptional features that can be natural or cultural landscapes

Règles

...

Instruments

- Protected areas of nature conservation : The protected areas of Slovenia could be: a natural monument, strict nature reserve, nature reserve and a national, regional and landscape park. A landscape park is an area with emphasised, high-quality and long-term interaction of people and nature and with a high ecological, biotic and landscape value. The national and regional park could include landscape areas that are culturally or naturally important.
- Ecological important areas and Natura 2000 sites : Another way of integrating landscape concerns are ecological important areas and Natura 2000 sites. In many cases the reason for designation of ecological important areas and Natura 2000 sites are seminatural areas which are part of the traditional landscape. Beyond that, Natura 2000 is aiming for a coherent ecological network which requires functional corridor areas which can be greatly achieved in a traditionally maintained landscape.
- A protected area management plan: Is a programme document by which the development orientations, the manner of protection, use and management of the protected area and the detailed orientations for the protection of valuable natural features in the protected area are laid down while taking into account the development needs of the local community. In the protected area it is usually prohibited to carry out activities affecting nature in a manner that might worsen the state of a valuable natural feature or change, damage or destroy it and to change the conditions or status so that the valuable natural feature is changed, damaged or destroyed or that its aesthetic value is reduced.

## 2.6. Mesures particulières

### 2.6.1. Sensibilisation

#### 2.6.1.1. Sensibilisation

68. Des mesures ont-elles été prises pour accroître la sensibilisation sur la valeur des paysages, leur rôle et les transformations qui peuvent leur être apportées ?

Oui  Non

Dans l'affirmative, donnez des précisions sur les initiatives de sensibilisation concernant chaque secteur

#### Initiative

Public awareness is raised also through public consultation conducted by public authorities within various procedures. The public consultation in accordance with Article 5.c in the case of protection of the cultural heritage landscape is included into:

1. Procedure of preparing the spatial planning acts: the public during the public exhibition and public debate is invited to express its opinion and observations concerning spatial planning proposal relating to the preservation, maintenance and conservation of the landscape. This activity must be assured by the preparer of the spatial planning document(during the 30 – day presentations and public hearings) . The preparer shall consider all the proposals and suggestions given orally or in writing as a basis for an amended spatial planning document.
2. With in the procedure on the proclamation of a cultural monument. When a site of cultural landscape has elements which prove the continuity or an individual stage of cultural and civilizational development, or which represent a quality achievement of creativity, it can obtain the status of national or local cultural monument. An act on the proclamation of a monument of local importance is adopted by the local community; an act on the proclamation of a monument of national importance is adopted by the Government of the Republic of Slovenia. The proclamation of an immovable monument shall be noted in the land register. The owner must preserve the monument at his own expense, allow it to be researched and provide access to it in accordance with its purpose of use and the protection regime, and use it in such a way that its cultural function is consistently taken into account. The owner is entitled to compensation if the protection regime adversely affects conditions for the commercial exploitation of the monument and this cannot be substituted by another activity within the framework of the protection regime. If maintenance or interventions necessary to protect or restore the monument require extraordinary costs which exceed the economic benefit and the usual costs of maintenance, the state or local community may contribute public funds to this end.
3. With presentations of the value of heritage landscapes, their role, changes and possibilities of their conservation at local workshops on different themes like rural development, education, conservation, development of infrastructure, identity, tourism.
4. By preparing and supporting special research on topic themes – for example: Guidelines for integrated conservation of heritage landscapes (2005)
5. By preparing the brochure for raising awareness on implementation of the convention among local authorities, sectors and planning practitioners (2008).

#### Exemples

With the purpose to enhance the knowledge of Slovenian landscape heritage and raise awareness to the need to preserve landscape values and understand the action of humans on natural surroundings we have in Slovenia different courses in primary and secondary education, seminars and workshops and several initiatives such as:

1. The project "We are Making Landscapes" which was aimed at disseminating knowledge about landscapes, learning about Slovenian landscapes and motivating children and adults to observe the environment and better perceive qualities in the landscape (2005 – 2005; Slovenian Association of Landscape Architects). This helped the public develop a more informed attitude towards the landscape, space and environment around them. The objective of the project was to educate and raise awareness of public in general about the landscape. The project focused on education of the pedagogues, mentor teachers, children and their parents, as well as the general public. Activities and events in the framework of the We are Making our Landscape project was: publication of five posters Slovenian Landscapes, which defines five landscape regions in Slovenia; a seminar with a workshop to inform teachers about the project, a competition

for art and photographic works and selection of the best. The competition was attended by 90 primary schools and 43 kindergartens. Submitted were 1029 art and photographic works including 797 drawings and paintings, 22 models and 210 photographs. The motifs were mainly natural and cultural landscapes, city and urban landscapes, landscape patterns that were presented also in an abstract manner, children and school playgrounds, private gardens, individual landscape elements (trees, flowers, houses, hayracks, mills), and of course, people and animals as landscape components.), exhibition of the best works and the ceremony of awards presentation to the best participants.

2. The project "Raising Awareness of Values of Space through the Process of Education (R.A.V.E. Space)" which was dealing with problems of education about spatial planning and sustainable development in primary and secondary schools (2005 – 2007; ). The main purpose of the project R.A.V.E. Space was to raise the awareness of primary and secondary school pupils about the values of space and the importance of spatial planning for sustainable development. Under the aegis of the Slovenian Ministry of the Environment and Spatial Planning and the R.A.V.E. Space project, three two-day seminars were held for teachers in which we wished to present certain not-yet-established forms and methods of work and teaching materials that could more effectively orient students to recognize the values of space, engage in proper environmental management, comprehensively understand the causes and effects of human interventions in space, and realize the importance of spatial planning.

3. The project "Vital Landscapes" which aims in the area of Ljubljansko Barje (Ljubljana Marsh) were focused on exploring the possibilities of marketing and economic development of Ljubljansko Barje area, in a close collaboration with local community as well as potential new stakeholders (2010 – 2013). Ljubljana Marsh is an exceptional landscape, area of nature conservation, rich cultural heritage and specific aquatic habitats but it does not possess the attributes of an area with classic successful economic development. Amongst others Slovene project partners organized a number of workshops dedicated to searching for the local identity and ways to unify, harmonize and link the existing local products and services. The workshops hosted local stakeholders as well as students, involving faculties that share interests with the subject in question. Amongst others, a key aim of the project is to form suggestions for a common platform for the tourist, recreational, educational, cultural and other attractions; as well as the selection of farm, arts, crafts and similar products available locally.

4. The project "Landscape variety" (2014 – 2015) which aim was to prepare guidelines for landscape features, important for biodiversity conservation in Slovenia. The list of landscape features, important for biodiversity was made and consists of 18 vegetation, geomorphologic, built and water features. The general recommendations for conservation and management of landscape variety include protection of the identified features and the extensive use of their surroundings especially on the intensively used agricultural land and they can be implemented through nature conservation and agricultural policy. The aim of the project were also dissimilated the knowledge and to familiarize professional services with the system of landscape features.

5. The project "Landscape areas with identifiable features at the national level" (2017 – 2019) which aim is among others involvement of the expert and the general public in the design of criteria for determining the landscape features of national identity.

6. The project "Landscape Policy" (2018 – 2019) which aim is among others involvement of the expert and the general public in the shaping of objectives and measures for preparation the landscape policy.

Description

University of Ljubljana, Biotechnical Faculty in Ljubljana, Department of Landscape Architecture, Academic Study Programme in Landscape Architecture

Lecturers from various other schools of the University of Ljubljana, such as the Faculty of Architecture, Faculty of Arts, Faculty of Social Sciences and the Faculty of Civil and Geodetic Engineering, teach within the study program of landscape architecture. These bring to the study a variety of knowledge and different points of view and thus contribute to shaping the broad vision that is essential for an activity such as landscape architecture, since landscape architecture must seek planning harmony in space and as balanced relationships as possible among the various conservation and development interests.

Study is diverse and content rich and, similarly, also diverse in forms of study activity. The bulk of learning takes place in seminars, which enable students to play an active role, and to prepare individual projects and seminar tasks. An appreciable extent of study is also devoted to fieldwork, which is intended for the recognition of natural characteristics, sketching in the open, familiarization with Slovene landscapes and the settlement heritage at home and abroad.

Oui  Non

Description

University of Ljubljana, Biotechnical Faculty in Ljubljana, Department of Landscape Architecture, Master Study Programme in Landscape Architecture (Second cycle)

Second cycle study of landscape architecture is a direct continuation of first cycle study and retains the characteristic interdisciplinarity of the profession, with a range of obtained knowledge from landscape or environmental planning to landscape design. The main contents of the program are focused around project seminars – i.e., studios, planning or design, which supplement with their content other compulsory and especially elective subjects.

Oui  Non

Dans l'affirmative, précisez :

**Session 1 (2008-2009)**

Regional distribution of landscape types in Slovenia" – made by: University of Ljubljana, Biotechnical Faculty, Department of Landscape Architecture. The aims of the project were:

- to categorize Slovenian cultural landscapes according to visual appearance;
- to prepare the basis for establishing direct protection of outstanding Slovenian landscapes;
- to prepare guidelines for landscape development and conservation.

The first step in the work process was the categorization of Slovenian regions into broad landscape units. The first level of classification was based primarily on climatic and geological properties, the second level included macro-relief criteria, and the most important criterion of the last two levels was landscape image. The results of the research project were presented in six notebooks that were published in 1998.

The results have been already used in the preparation of the Spatial Development Strategy of Slovenia, Spatial Planning Order, environmental impact assessments and in analytical phases of numerous studies.

**Session 2 (2010-2011)**

„We are Making our Landscape“ – made by the Slovenian Association of Landscape Architects (NGO). The aims of the project was to disseminating knowledge about landscapes and motivating teachers, children and adults to observe the landscape.

Activities and events in the framework of the project took place over a period 2004 – 2005 were:

publication of a series posters Slovenian Landscapes, a seminar with a workshop to inform teachers about the project, competition for art and photographic works, exhibition of the best works and ceremony of awards, publishing of a brochure about the project

**Session 3 (2012-2013)**

Landscape and water-management restoration of Škocjanski zatok Nature Reserve“ – made by the BirdLife Slovenia (NGO). The aims of the project took place over a period 2001 – 2007 were: restored semi-natural coastal wetland ecosystem, restored natural landscape on coastline, enabling education, recreation and nature experience. The Škocjanski zatok restoration is one of the best examples of successful co-operation among governmental and non-governmental sectors in Slovenia.

**Session 4 (2014-2015)**

In 2014 the competition for Landscape Award was announced, unfortunataly no application werw submitted.

**Session 5 (2016-2017)**

In 2016 the competition for Landscape Award was announced, unfortunataly no application werw submitted.

**131. Quel est le mode de sélection des candidats au Prix du paysage du Conseil de l'Europe ?**

Mode de sélection et règlement Public Call was announced through the website of the Ministry of the Environmental and Spatial Planning. Minister of the environment and spatial planning created a jury that had selected the projects for the Landscape Award.
