**the state of emergency**

Considering the evolution of the international epidemiological situation caused by the spread of the SARS-CoV-2 coronavirus, as well as the declaration of a "Pandemic" by the World Health Organization, on 11 March 2020,

noting the Decision of the Supreme Council for the Defence of the Country no. 30/2020 on the necessity to establish the state of emergency and the plan of action on the establishment of the state of emergency,

considering the establishment of the state of urgency on the entire territory of Romania by the Decree no. 195/2020 on the establishment of the state of emergency on the territory of Romania,

taking note of the evolution of the epidemiological situation on the territory of Romania and of the assessment of the risks for the public health in the immediate future, which indicates an increase of the number of persons infected with the SARS-CoV-2 coronavirus,

taking into account that noncompliance with or lack of implementation of the measures stipulated in the Emergency Ordinance no.1/1999 on the regime of the state of siege and of the state of emergency, approved with amendments and additions by Law no. 453/2004, with subsequent amendments and additions, in the related normative acts, in the military ordinances or in orders, relevant for the established state, would have an extremely serious impact, primarily on the right to life, and, in subsidiary, on the right to health of persons, contributing to an obstruction of the efforts of the competent authorities to fight against the spread of the SARS-CoV-2 coronavirus,

taking into account the stringent and immediate necessity to ensure an adequate preventive and coercive character in respect of the liability for contraventions in the case of noncompliance or lack of immediate application of the stipulated measures,

observing the experience of the countries seriously affected by the evolution of the virus in respect of the rapidity of decision-making and noting that it is necessary to continue to adopt in Romania, gradually and in real time, measures in order to limit the spread of the virus, which should concern actions both in the field of public health and in other fields of social and economic life,

understating the fact that in order to manage the consequences in the social and economic field of the situation determined by the danger of the spreading of the virus the adoption of normative acts is also necessary,

underlining that certain procedures that are part of the decision-making chain, namely the procedures related to the transparency of decision-making in the public administration and the

procedures related to the social dialogue, as provided by the legislation in force, are of such nature as to affect the rapidity with which the normative measures applicable during the established state, or which are a consequence of the establishment of this state, can be taken,

given the character of the state established by the Decree no. 195/2020, a failure to regulate the features referred to above has the effect of limiting the capacity of the public authorities to establish and implement, in the shortest delay, the necessary measures, an aspect which affects the general public interest, and in the given context, constitutes a threat in respect of the public health and of the economy,

considering that the elements mentioned above define an exceptional context that could not have been predicted, which concerns the general public interest and amounts to an extraordinary, emergency situation the regulation of which cannot be postponed,

on the basis of article 115 paragraph (4) of Romania's Constitution.

**The Government of Romania** adopts the following Emergency Ordinance:
