A. Terms of reference/Table of unit fees

Within the framework of the Council of Europe Action Plan for Ukraine 2018 – 2021, the Council of Europe is implementing the two-phases Project on “Supporting the transparency, inclusiveness and integrity of electoral practice in Ukraine”.

The Project activities during its Phase 2 (from 1 April 2020 to 31 December 2021) are aimed at:

- (1) more efficient and integral organization of electoral process and interagency electoral cooperation due to modernized approach and gender mainstreamed election management;
- (2) more participatory and inclusive political and electoral processes;
- (3) more enabling environment for increased women participation in political and public life.

With the support of the Council of Europe, the Central Election Commission of Ukraine is going to develop and launch its online learning and awareness raising platform about elections (“online Platform”). It will contain open interactive online training courses (basic level, advanced level) for different target audiences (voters, election commissioners, political parties, candidates, observers), as well as other educational materials (e.g. online courses for school and university students).

Herewith, on the eve of 2020 Local elections in Ukraine and in order to reach out more electoral stakeholders involved into the organisation and conduct of elections, as well as to reach out more Ukrainian voters, including first-time voters, it was decided to develop and produce the interactive online training courses on elections for voters (basic level; and advanced level on local elections) to be further placed on the online Platform of the Central Election Commission of Ukraine.

Upon the request of the Central Election Commission of Ukraine and with the expert and methodological support of the Council of Europe, content for 28 modules of the online training course on elections for voters (basic level), including scripts for videos, dialogues, simulations, tests, has been developed and ready to be used by a Service Provider for its further production (online programming and web-development). Respective content is also expected to be developed by a Service Provider for the production of the advanced level of the online training course on elections for voters. Number of modules to be developed for the advanced level training course for voters will be decided and agreed with the Central Election Commission of Ukraine. More details on the technical assignment are attached in Appendix 1 hereto.

In that context, the Council of Europe is looking for Provider(s) (see below) for the provision of services on the development and production of interactive online training courses on elections for voters (Basic Level; Advanced Level on local elections) to be requested by the Council on an as needed basis, in compliance with the ordering procedure defined below.

Each time an order form is sent, the selected Provider undertakes to take all the necessary measures to send it signed to the Council within 1 (one) working day after its reception.

Pooling

For each order, the Council will select from the pool of pre-selected tenderers for the lot concerned the Provider who demonstrably offers best value for money for its requirement when assessed – for the Order concerned – against the criteria of:

- quality (including as appropriate: capability, expertise, past performance, availability of resources and proposed methods of undertaking the work);
- availability (including, without limitation, capacity to meet required deadlines and, where relevant, geographical location); and
- price.

If a Provider is unable to take an Order or if no reply is given on his behalf within the above deadline, the Council may call on another Provider selected under that lot, using the same criteria, and so on until a suitable Provider is contracted.

The Tenderer declares that they submit a tender for the following lot/s:

Recommendations

Articulate Storyline 360, an e-learning authoring tool, is used for developing most e-learning modules at the Council of Europe. It is preferred that this tool, or other tool suggested by the Provider, is used rather than a bespoke web development. The Council of Europe is providing a Developer Toolkit <https://vdd.coe.int/>, which defines Norms and Standards as well as providing a set of document templates for deliverables. Graphics standards for web applications can be consulted on the following web-site: <http://static.coe.int/vdd/v1.3/index-site-en.html>
