

Effective cooperation: Intensive program to face cyber threats

■ *The focus of cooperation (anticipating cyber risks)*

Continental cooperation Europe (Council of Europe) vs Africa (African Union) case study on existing models of cooperation (cybersecurity, multi legal assistance, law enforcement)

- How to organize and prepare different institutions to face and prevent future cyberattacks (short-term action)
- Institutional level: Ministry of Justice/Home and their related departments (improvement/modernization of justice : instruments and departments), upgrade the competencies of institutional users, to better implement law enforcement)
- Training and learning to fight cybercrime (implementation of a consistent program of cybersecurity to all stakeholders: from an earlier level until university)
- Public/private sector (capacity building with multiple stakeholders)
- Artificial intelligence vs cybersecurity (updated insight: concerns regarding responsibility considerations)
- Effective tools for strong cooperation (the crucial role of Law: Domestic and International Law)
- Is there any forensic cooperation between states?
