*13:00 Lunch*

*FREE AFTERNOON*

*19:00 Dinner*

### **Saturday, 2 April**

*Departures*

## **Aim and objectives**

**Aim:** The course aims at strengthening the capacity of the youth sector to contribute to AI literacy and governance issues by developing the competences of multipliers and youth leaders to explore the impact of Artificial Intelligence on young people's lives and access to human rights, and to support young people in being participants in Internet governance and multipliers of AI literacy.

### **Objectives:**

- To explore AI's impact on participation, engagement decision-making opportunities of young people and the connection and interaction between existing human rights frameworks and AI practises
- To introduce principles and approaches of literacy and advocacy on matters of Artificial Intelligence and Internet Governance based on Council of Europe standards in the fields of human rights, democratic participation and non-formal education
- To support young people in identifying the presence and use of AI technologies where they exist in their everyday lives, in order to facilitate action-taking
- To support the preparation of the youth campaign on revitalising democracy, in particular concerning engagement on the impact of digitalisation in democracy.
- To assess the relevance and adequacy of current resources on AI literacy and Internet governance in view of their further development and dissemination and to prepare multipliers to undertake activities on AI literacy with young people
