Tool deployment rate: A slight majority of the Länder answered "100 %". Half of the remaining Länder answered "50-99%" while the other half answered "10-49%". One of the Länder answered "NA".
Data consolidated at national level: The Federal Ministry of Justice has answered this question with "yes" with regard to the courts at federal level. The majority of the Länder answered "no". 2 Länder could not provide an answer.
"Other"
Tool deployment rate: The vast majority of the Länder answered "NA".
"Other" tools that are in use in the remaining Länder are tools for medium term fiscal planning (consolidated on national level: yes; communicating with other ministries: yes) and case management at the finance courts (consolidated at national level: no; communicating with other ministries: no)

(2020): Since "Other" was answered with "NA" by most of the Länder, Tool deployment rate, consolidated data and system communicating were also answered "NA".
Information on "other" budgetary and financial management systems submitted by Baden Württemberg:
Justice budget and budget calculation, medium term fiscal planning
Deployment rate: 100%, System communicating with other ministries: yes

(2018): Name of the tool: HV SAP

Greece

(2021): The answer was given by the Directorate of Budget and Financial Management.

Hungary

(2021): NEXON HR - budgetary aspects of human resource management, KIRA - management of wages.

(2020): NEXON HR - budgetary aspects of human resource management, KIRA - management of wages.

(2019): Other: NEXON HR - budgetary aspects of human resource management, KIRA - management of wages.

(2018): NEXON HR - budgetary aspects of human resource management, KIRA - management of wages.

Latvia

(2015): Q63.6. - With both financial management system and system for budget planning and budget performance monitoring works only staff from Court Administration

Poland

(2020): 1. The ZSRK system (Integrated Accounting and Personnel System) was implemented in common courts, which is a key system supporting all common court units in the field of keeping broadly understood accounting, personnel records, budget reporting and statistical reporting.
2. IT System for the Handling of the State Budget (TREZOR) facilitating the flow of information between the holders of budget funds and the Ministry of Finance in the implementation of the following budget processes: budget planning and execution.
In relation to the "system of communication with other ministries (including the Ministry of Finance)", the basis for giving a positive answer is the functioning TREZOR system, which improves the flow of information between the administrators of budget funds and the Ministry of Finance in the implementation of the following budget processes: planning and budget execution. Justice expenses managment. With reference to "Data Consolidated at National Level" in scope "Court budget and finance management systems" the basis for giving a positive answer is the implementation of the ZSRK system (Integrated Accounting and Personnel System) in common courts, which is a key system supporting all common court units in the field of keeping broadly understood accounting, personnel records, budget reporting and statistical reporting.

(2019): 1. The ZSRK system (Integrated Accounting and Personnel System) was implemented in common courts, which is a key system supporting all common court units in the field of keeping broadly understood accounting, personnel records, budget reporting and statistical reporting.
2. IT System for the Handling of the State Budget (TREZOR) facilitating the flow of information between the holders of budget funds and the Ministry of Finance in the implementation of the following budget processes: budget planning and execution.

(2018): There is a special system called ZSRK.

Slovak Republic

(2020): The SAP (human resources) system is deployed at the Ministry of Justice of the Slovak republic and regional level. The SUP (accounting system) system is deployed at the district court level.

(2015): We are still in phase of implementing new complex economic system (SAP). We have several partial systems implemented within the Ministry which operate individually-payroll system for budget, etc.

Spain

(General Comment): - There is the electronic system to manage the bank account of the Court. The system includes an application for the
management of judicial auctions. - Public Administrations are subject to an electronic invoice system. Legal persons are obliged to use it. It imposes a structured format, and they must be signed with an advanced electronic signature. - The General Subdirectorate for Programming and Economic Management of the Public Justice Service (and similar bodies of the Autonomous Regions) manage other applications for salaries and other payments.

(2020): - There is an electronic system to manage the bank account of the Court. The system includes an application for the management of judicial auctions. - Public Administrations are subject to an electronic invoice system. Legal persons are obliged to use it. It imposes a structured format, and they must be signed with an advanced electronic signature. - The General Subdirectorate for Programming and Economic Management of the Public Justice Service (and similar bodies of the Autonomous Regions) manage other applications for salaries and other payments.

(2019): There is an electronic system to manage the bank account of the Court. The system includes an application for the management of judicial auctions. This system is under the responsibility of the 'Letrado de la Administración de Justicia'.
The General Subdirectorate for Programming and Economic Management of the Public Justice Service (and similar bodies of the Autonomous Regions) manage other applications for sallaries and other payments.

(2018): There is an electronic system to manage the bank account of the Court, and in this system has an application for the management of judicial auctions, this system is responsibility of the Judicial Counsellor.
The Sub-Directorate General of Economic Resources of the Administration of Justice (and similar bodies of the Autonomous Regions) manage other applications for sallaries and other payments.

Question 063-7

Austria

(2019): The data for the measurement tools is provided by the CMS, but there is no way get Access to this data directly by using the CMS.

(2018): The data for the measurement tools is provided by the CMS, but there is no way get access to this data directly by using the CMS.

Belgium

(2019): The Aris tool has been launched as a pilot project by the prosecution to measure workload both at central and local level, both for prosecutors of non-prosecutor staff.

(2018): A pilot project is being launched by the Public Prosecutor's Office for an instrument to measure workload at both central and local levels. The Aris instrument will be tested in pilot courts.

Bulgaria

(2020): With a decision of the Prosecutors Chamber with the Supreme Judicial Council of Bulgaria (SJC) dated 18.12.2019, as of 01.01.2020, Rules for measuring the workload of the prosecutor's offices and the individual workload of each prosecutor and investigator have been adopted. With a decision of the SJC of 16.12.2015, Rules for assessment of the workload of judges have been adopted.
The instruments do not refer to court employees, but only to judges, prosecutors and investigators within the prosecutor's offices and courts in the Republic of Bulgaria.

(2018): By decision of the Supreme Judicial Council of Bulgaria (SJC) of 11.12.2014, as of 01.01.2015, Rules for measuring the workload of the prosecution offices and the individual workload of each prosecutor and investigator were adopted. By decision of the SJC of 16.12.2015, as of 01.04.2016, Rules for assessment of the workload of judges were adopted. The instruments do not refer to judicial officers, but only to judges, prosecutors and investigators within the prosecutor's offices and courts in the Republic of Bulgaria.

Czech Republic

(2020): The measurement tool is only available to assess the workload of judges and public prosecutors.

Denmark

(General Comment): We measure how much time each judge or staff on different categories of work (civil cases, criminal cases, administration etc.). We calculate the activity a court creates in weighted cases. We therefore measure productivity. For prosecutors: There is a well-implemented time recording system where the Prosecution Service´s staff weekly report their time spent on specific tasks, e.g. court work, formal charging, dropping of cases/withdrawal of charges, transport time to and from court, training etc. The time recording system is also used to report work outside normal working hours (overtime), including shifts for which a separate fee is paid. In addition, the number of prosecutions and withdrawal of charges is measures, with each charge weighted according to a specific system. Time recording data is used in calculations of the Prosecution Service´s case production and efficiency – and thus also in the management information in QlickView that is available on the Prosecution Service at national level as well as for the individual police districts and State Prosecutor´s offices.

(2021): Judges above: Danish Court Administration has chosen 10-49 %. It might be higher. The point is that on district courts, all judges either fill out how time is spend on a daily basis, or - for appointed judges - on a half-yearly basis. At some courts, the court has decided that the judges despite Danish Court Administration does not demand it, anyway fill out this daily information. At a High Court and Supreme court level this is not done though. So it is not an absolute. Therefor 10-49 %. Data are used by Danish Court Administration. It is up to the individual court, how they use and how closely they monitor the staff (Judges). The same counts for non-judge staff. Danish Court Administration has no data re prosecutor staff. Overall, there has not been changes to the systems that help assess how the workload is for public prosecutors but due to ongoing interest in how the workload is distributed – not only for the single employee but also the districts between – it is estimated that there has been an increase in the percentage. The workload is monitored in more general terms centrally through the Attorney General's office and locally the districts/local prosecution monitor their prosecutors and the workload more closely. The estimate of 50-99% is therefore not an absolute but an estimate since there has been an increase in the focus on monitoring the workload. For prosecutors: There is a well-implemented time recording system where the Prosecution Service´s staff weekly report their time spent on specific tasks, e.g. court work, formal charging, dropping of cases/withdrawal of charges, transport time to and from court, training etc. The time recording system is also used to report work outside normal working hours (overtime), including shifts for which a separate fee is paid. (2014): Equipment rate is not really defined in this context. We have defined it as "There is a set up i.e.to measure and calculate number of judges, weighted cases etc. And it is being used"

Finland

(2021): There is a system for collecting data on handling cases and this is deployed to all courts.
In administrative courts Power BI software is compatible with the new case management system, HAIPA. During the transition period,
the administrative courts also use the Business Objects Board software (BOBI) the cases still pending in the old case management
system.
The general courts are also transitioning to a new case management system, AIPA. However, the number of cases in the new system was much lower than in the administrative courts. Similarly, during the transition period, the general courts also use the Business Objects Board software (BOBI) the cases still pending in the old case management system.
Due to data protection, only the court were the judge / staff member works, looks at the data related to an individual. The heads of courts are able follow the number of cases resolved by the judge. Often, this data is not used on detailed/short term manner. Rather, it may be used at a court level (for example in budget negotiations) and as a long term indicator, or in case of a sudden and radical change in judges output (but even then not as a tool for disciplinary measure). In addition, there is a tool for reporting the working hours is 'deployed' to the courts 100% in the sense that it is available and accessible. We estimated the use to correspond '50-99%'.

(2020): There is a system for collecting data on handling cases and this is deployed to all courts.
In administrative courts Power BI software is compatible with the new case management system, HAIPA. During the transition period, the administrative courts also use the Business Objects Board software (BOBI) the cases still pending in the old case management system.
The general courts are also transitioning to a new case management system, AIPA. However, the number of cases in the new system was much lower than in the administrative courts. Similarly, during the transition period, the general courts also use the Business Objects Board software (BOBI) the cases still pending in the old case management system.
Due to data protection, only the court were the judge / staff member works, looks at the data related to an individual. The heads of courts are able follow the number of cases resolved by the judge. Often, this data is not used on detailed/short term manner. Rather, it may be used at a court level (for example in budget negotiations) and as a long term indicator, or in case of a sudden and radical change in judges output (but even then not as a tool for disciplinary measure). In addition, there is a tool for reporting the working hours is 'deployed' to the courts 100% in the sense that it is available and accessible. We estimated the use to correspond '50-99%'.
For prosecutors: The data is used for monitoring at national level and at local level. The tool used (BOBI) is not connected to the CMS. PowerBI software will be introduced in 2021 for statistical and monitoring purposes, and the preparation were done in 2020. Similarly, the introduction of the new case management system AIPA and the new administrative register HILDA in 2021 were prepared in 2020.

(2019): The courts and the prosecutors' offices use Business Objects XI software (BOXI) which is now updated to Business Objects
Board software (BOB). In administrative courts Power BI software is integrated to case management system.
The tool is 'deployed' 100% in the sense that it is available and accessible. However, judges are not required to use the tool, so it is not used 100%. We estimated the use to correspond '10-49%'. The heads of courts are able follow the number of cases resolved by the judge. However, this is usually not used on detailed/short term manner. Rather, it may be used at a court level (for example in budget negotiations) and as a long term indicator, or in case of a sudden and radical change in judges output (but even then not as a tool for disciplinary measure). Similarly to judges, the process servers record their hours in a different manner, and we estimated the use to correspond '50-99%'.

(2018): The courts and the prosecutors offices use Business Objects XI software (BOXI) which is now updated to Business Objects Board software (BOB). In administrative courts, Power BI software which is integrated to case management system is being tested.

France

(2021): As regards administrative justice, the answer is no, source: Council of State
Concerning civil and criminal justice: The answer is yes, partially. Yes for non-judge staff. In fact: the Management and Distribution Tool for Civil Servants (OUTILGREF) was created in 1992. It has been online via the private Justice network since 2006. It measures the workload of registry officials (i.e. excluding legal assistants and specialised assistants) and assesses the need for registry staff (FTE) in the courts and regional administrative services (RAS) in relation to the activity of these structures, the need being understood as the volume of staff required to process the annual flow of cases so as not to generate any stock. This is a single tool for all courts and RAS, which exhaustively lists the court and administrative activities of the registry. It also includes an assessment of the workload of the common or support services. It is regularly updated in line with reforms and changes in working methods, in particular, to ensure its reliability and accuracy. A data collection exercise is carried out each year to feed it. See table 63.7.1.
As regards judges and prosecutors, the answer is currently no. However, since December 2019, the Directorate of Judicial Services (DSJ) has been working on a more effective management tool to measure the activity of judges, based on a case weighting system (SPA).
Operational case weighting tables should be available by the end of 2022 for the first instance, once the results of the survey conducted in the pilot courts have been analysed.
This is an ambitious, long-term project, as the quality of the tool developed is a necessary condition for its acceptability within the judicial institution but also for its credibility outside the Ministry of Justice, particularly during budget negotiations. The objectives of this work are as follows: 1) To gain a more rapid and detailed understanding of changes in judicial activity and the national need for judges and prosecutors to deal with them, i.e.: to give greater objectivity to staffing requests made during budget negotiations in the context of the preparation of a finance bill; more accurately assess the impact of reforms or changes in public policy on the national need for magistrates.
2) Promote greater equity in the distribution of staff allocated by the Finance Act among the courts in the country.
At the national level, the DSJ has drawn on previous work carried out on this subject within the directorate, but also on the recommendations made by the Court of Auditors in its December 2018 report entitled "Methodological approach to the costs of justice", asking the Ministry of Justice to build a system for allocating resources associated with a "case weighting system inspired by foreign models based on a typology of court cases allowing for an efficient allocation of resources and better management of justice".
It also drew on the work of the Council of Europe's Commission for the Efficiency of Justice (CEPEJ) which, on 2 July 2020, adopted a report on the weighting of court cases, encouraging the member States of this European organisation to adopt a system for measuring the activity of the courts based on a weighting by type of case in order to improve the efficiency of the management of justice.
A weighting table must therefore be drawn up for each judicial function performed within the courts and courts of appeal. This table will be organised around jurisdictional activity but also support activity.
To achieve this, the DSJ has favoured peer-to-peer working meetings (the so-called Delphi method). A working group (WG), made up of representatives of the conferences of heads of court and jurisdiction, professional associations of judges (investigation judges, enforcement judges, juvenile judges, judges specialised in protection litigation, etc.), trade unions and

(2020): "For non-judge staff: the Civil Servant Job Management and Distribution Tool (OUTILGREF) was created in 1992. It has been online via the private Justice network since 2006. It measures the workload of court registrars (i.e., excluding legal assistants and specialized assistants) and evaluates the need for court clerks (etpE) in the courts and regional administrative services (SAR) with respect to the activity of these structures, the need being understood as the volume of agents necessary for the annual processing of the flow of cases in order to not generate any stock. This is a single tool for all the courts and the regional administrative services, which exhaustively lists the court and administrative activities of the registry. It also includes an evaluation of the workload of the common or support services. It is regularly updated according to the reforms and the evolution of working methods in particular, to guarantee its reliability and sincerity. A data collection operation is carried out each year to feed it.
With regard to magistrates (judges and prosecutors), the French Ministry of Justice is currently conducting work to better measure their workload. A system for evaluating their activity, based on the weighting of court cases, is being developed and should, by the end of 2022, provide a better understanding of the activity of courts and tribunals, as well as a more accurate allocation of resources between jurisdictions and within the departments of the same jurisdiction. With this in mind, a working group has been set up and has met more than ten times since December 2019, with the Ministry favouring peer-to-peer meetings (Delphi method), which is based on an estimate of time in order to establish the weighting table.
[2] For non-judge staff, the Outil de Gestion et de Répartition des Emplois de Fonctionnaires (OUTILGREF) was created in 1992. It has been online via the private Justice network since 2006. It measures the workload of court registrars (i.e., excluding legal assistants and specialized assistants) and evaluates the need for court registrars (etpE) in the courts and regional administrative services (SAR) with respect to the activity of these structures, the need being understood as the volume of agents necessary for the annual processing of the flow of cases in order to not generate any stock. This is a single tool for all the courts and the regional administrative services, which exhaustively lists the court and administrative activities of the registry. It also includes an evaluation of the workload of the common or support services. It is regularly updated according to the reforms and the evolution of working methods in particular, to guarantee its reliability and sincerity. A data collection exercise is carried out each year to feed it.
On the other hand, the answer given by the administrative justice is "no".

(2014): As regards the judiciary, the software “Outil de Gestion et de Répartition des Emplois de Fonctionnaires” (OUTILGREF) measures the workload of court clerks, and assesses the specific needs of the jurisdictions. This workload is calculated based on indicators which measure the average flow of new cases filed by a jurisdiction for a period of one year. Evaluations made through the OUTILGREF tool help monitor the localisation of court clerks vacancies in jurisdictions. This monitoring operation takes place once a year, and comparable operations exist for the completion of impact studies of draft legislation and regulation which may affect clerks. OUTILGREF is a tool shared by both the central administration and decentralised departments to analyse the activity of jurisdictions.

As regards the administrative courts, equipment rate of tools used to measure workload is evaluated to 10-49%.

Hungary

(2021): A methodology to conduct workload assessment was developed at the General Prosecutor's Office; however, it has not yet been finalised. The methodology can be summarized as follows:
I. ACTIVITY INDICATORS ("TM")
- In the system of criminal prosecution indicator, a weight is assigned to each outcome available in the criminal prosecution case management system, between 0 and 5. For instance, 1 is assigned when a decision rejecting a report of crime is ordered to be amended, 3,5 is assigned in case of raising charges.
- The system also allocates a weight to each criminal offense (the most significant offense within a case, and regardless of aggravated circumstances), between 1 and 9. For instance, driving under the influence of alcohol is given 2,8 points, while money laundering is given 8,5. - The system weighs the number of the defendants involved in a case, depending on whether the outcome related to the whole case or a to a person involved. In cases involving not more than 20 defendants, 1 point is given to one defendant, and 0,1 point is given to each additional defendant. The activity indicator is calculated as follows: the system records the weight assigned to the outcome, multiplies it with the weight assigned to the offense, and that result is multiplied again with the weight assigned to the number of defendants. If the outcome is related to a whole case, the weight numbers aligned with the number of defendants are applied. If the outcome concerns one particular person, the calculation is repeated according to the number of defendants, without using the weight numbers aligned with the number of defendants. The organizational activity indicator is an aggregate of all the activity indicators calculated by the above method.
II. STAFF NUMBER ("L")
Staff numbers are calculated on the basis of the weighed staff number of each organizational unit on the last calendar day of a given month, by taking into account actually filled positions, except for chief prosecutors, deputy chief prosecutors and heads of department. Staff numbers are weighed according to the weekly worktime and the field of activity.
III. WORKLOAD INDICATOR ("MT")
Activity indicators are aggregated on a monthly basis at each organizational unit. After that, the aggregate number is divided by the staff number of the month in question. So, the workload indicator of an organizational unit is the result of the division of the aggregated activity indicator by the staff number: MT = TM / L
By adding up the monthly workload indicators, quarterly and yearly figures can be calculated in respect of each unit. Nevertheless, adding up the workload indicators of several organizational units will unduly distort, i.e. multiply the result. So, it is impossible to determine the workload of a high prosecution service by adding up the already calculated workload indicators of the district prosecution services within the area of jurisdiction of the high prosecution service, as well as the workload indicator of the high prosecution service itself. To get the correct result, one must add up the activity indicators (TM), respectively the staff numbers, and then one must carry out the division.
The above system is capable of (1) showing the changing trends of workload in respect of a particular organizational unit, as well as of comparing the workload of several organizational units in respect of the same field of activity.
The system, however, is incapable of measuring a prosecutor's individual workload. The distribution of workload within a unit can be measured still by the detailed examination of case files. Furthermore, the system is not really capable of comparing workloads concerning different fields of activity.

Ireland

(2021): The Judicial Council was established in 2019 pursuant to the Judicial Council Act 2019. Further information is available on their website.
https://www.irishstatutebook.ie/eli/2019/act/33/enacted/en/html?q=judicial+council+act https://judicialcouncil.ie/about-the-judicial-council/

Italy

(2021): The same tool might potentially be used to assess the workload of both magistrates and their staff. The monitoring of the activity of judges/prosecutors is eventually used to assess their evaluation. The same doesn’t apply to court staff, hence the answer 0 provided in the previous cycle.

Luxembourg

(2014): Luxembourg does not use tools to measure the workload of magistrates to monitor their activity, but merely for statistical purposes.

Poland

(2019): This kind of tools exist only for prosecutors. For judges and in courts there is only software used for registering judicial proceedings and their management. ZSRK system does not cover: units of the prosecutor's office, administrative judiciary, military judiciary, Supreme Court, Tribunal Constitutional and the National Council of the Judiciary.

Portugal

(2021): There is no specific general management tool to access the workload of non-judge staff/non prosecutor staff. The information is collected directly from the case management system and then it is organized by the General Directorate of Administration of Justice/Ministry of Justice.

(2020): There is no specific general management tool to access the workload of non-judge staff/non prosecutor staff. The information is collected directly from the case management system and then it is organized by the General Directorate of Administration of Justice/Ministry of Justice.

Romania

(2015): STATIS – tool for statistical measurements and analysis both local and national

Slovak Republic

(2020): Application/tool collecting the time information about the activities of the judges, can be used for senior judicial officials in the future as well. The tool is part of the project Case weighting analyses (CWA) and the result should be used to assess the workload of the judges in the future. In 2020 the cellecting data for the CWA project was stoped becuase of covid pandemic situation.

(2019): Still in development. Application/tool collecting the time information about the activities of the judges, can be used for senior judicial officials as well. The tool is part of the project Case weighting analyses and the result should be used to assess the workload of the judges in the future. The tool is not connected to CMS and was still not developed at the full scale in 2019 (hence the deployment rate is 50-99%).

Question 063-7-1

Denmark

(General Comment): Judges above: Danish Court Administration has chosen 10-49 %. It might be higher. The point is that on district courts, all judges either fill out how time is spend on a daily basis, or - for appointed judges - on a half-yearly basis. At some courts, the court has decided that the judges despite Danish Court Administration does not demand it, anyway fill out this daily information. At a High Court and Supreme court level this is not done though. So it is not an absolute. Therefor 10-49 %. Data are used by Danish Court Administration. It is up to the individual court, how they use and how closely they monitor the staff (Judges). The same counts for non-judge staff. Danish Court Administration has no data re prosecutor staff. Overall, there has not been changes to the systems that help assess how the workload is for public prosecutors but due to ongoing interest in how the workload is distributed – not only for the single employee but also the districts between – it is estimated that there has been an increase in the percentage. The workload is monitored in more general terms centrally through the Attorney General's office and locally the districts/local prosecution monitor their prosecutors and the workload more closely. The estimate of 50-99% is therefore not an absolute but an estimate since there has been an increase in the focus on monitoring the workload.

Indicator 7: Professionals of justice

- Professional Judges and Non-judge staff

- Public prosecutors and Non-prosecutor staff

- Salaries of judges and public prosecutors

- Disciplinary proceedings against judges and prosecutors

- Lawyers

- EC Templates

Professional judges and non-judge staff

Austria: The administrative courts were established January 1st 2014. Data on administrative justice is introduced for 2016 cycle for the first time.

Belgium: Starting from 2021, data include also administrative judges (judges of the Council of State and the Aliens Litigation Council). The latter are counted as first instance judges, even though the Council of State intervenes also as last instance court.

Bulgaria: For 2020, judges who administer judges in the appelate panels of regional and administrative courts are counted as second instance judges.

Czech Republic: The country has a four-tier system and since 2013 have included the number of judges of the high courts in the number of the second instance judges.

Greece: Unlike 2014 and 2015 data, since 2016 data on number of professional judges includes all the ranks for second instance criminal as well as administrative judges.

Italy: Administrative justice is taken into account since 2018

Poland: Starting from 2020, the number of Supreme Court judges include also judges of the Supreme Administrative Court.

Table 7.1.3 Total number of professional judges by instance in 2012, 2020 and 2021 (abosolute number) and their variations(Q46)

Romania: Since there are 4 level of courts in Romania, judges of 2nd instance are the sum up of the judges from tribunal and of court of appeals. The variation between first instance and second instance courts is the result of different methods of calculation. In 2013, in first instance judges from 1st instance courts and from tribunals were summed up together.

Table 7.1.3a Professional judges by instance in 2012, 2020 and 2021

Austria: The administrative courts were established January 1st 2014. Data on administrative justice is introduced for 2016 cycle for the first time.

Belgium: Starting from 2021, data include also administrative judges (judges of the Council of State and the Aliens Litigation Council). The latter are counted as first instance judges, even though the Council of State intervenes also as last instance court.

Bulgaria: For 2019, only magistrates working in the 7 courts of appeal are counted as 2nd instance judges, while all judges in regional courts (sitting in both 1st and 2nd instance departments) are listed as first instance judges

Czech Republic: The country has a four-tier system and since 2013 have included the number of judges of the high courts in the number of the second instance judges.

Greece: Unlike 2014 and 2015 data, since 2016 data on number of professional judges includes all the ranks for second instance criminal as well as administrative judges.

Italy: Administrative justice is taken into account since 2018

Poland: Starting from 2020, the number of Supreme Court judges include also judges of the Supreme Administrative Court.

Romania: Since there are 4 level of courts in Romania, judges of 2nd instance are the sum up of the judges from tribunal and of court of appeals. The variation between first instance and second instance courts is the result of different methods of calculation. In 2013, in first instance judges from 1st instance courts and from tribunals were summed up together.

Table 7.1.4 Total number of judges (FTE) by case category in 2021 (Q46-2)

Austria: The administrative courts were established January 1st 2014. Data on administrative justice is introduced for 2016 cycle for the first time.

Belgium: Starting from 2021, data include also administrative judges (judges of the Council of State and the Aliens Litigation Council). The latter are counted as first instance judges, even though the Council of State intervenes also as last instance court.

Czech Republic: The country has a four-tier system and since 2013 have included the number of judges of the high courts in the number of the second instance judges.

Greece: Unlike 2014 and 2015 data, since 2016 data on number of professional judges includes all the ranks for second instance criminal as well as administrative judges.

Italy: Administrative justice is taken into account since 2018

Romania: Since there are 4 level of courts in Romania, judges of 2nd instance are the sum up of the judges from tribunal and of court of appeals. The variation between first instance and second instance courts is the result of different methods of calculation. In 2013, in first instance judges from 1st instance courts and from tribunals were summed up together.

Austria: The administrative courts were established January 1st 2014. Data on administrative justice is introduced for 2016 cycle for the first time.

Czech Republic: The country has a four-tier system and since 2013 have included the number of judges of the high courts in the number of the second instance judges.

Greece: Unlike 2014 and 2015 data, since 2016 data on number of professional judges includes all the ranks for second instance criminal as well as administrative judges.

Romania: Since there are 4 level of courts in Romania, judges of 2nd instance are the sum up of the judges from tribunal and of court of appeals. The variation between first instance and second instance courts is the result of different methods of calculation. In 2103, in first instance judges from 1st instance courts and from tribunals were summed up together.

Poland: Starting from 2020, data includes also employees of the Supreme Administrative Court.

Austria: The administrative courts were established January 1st 2014. Data on administrative justice is introduced for 2016 cycle for the first time.

France: There is no differenciation between non-judge staff attached to judges and prosecutors, except for the subcategory "Other".

Italy: Administrative justice is taken into account since 2018.

Poland: In 2020, data includes also employees of the Supreme Administrative Court.

Austria: The administrative courts were established January 1st 2014. Data on administrative justice is introduced for 2016 cycle for the first time.

Greece: Unlike 2014 and 2015 data, since 2016 data on number of professional judges includes all the ranks for second instance criminal as well as administrative judges.

Italy: The administrative courts' judges have been included since 2018.

Poland: Starting from 2020, the number of Supreme Court judges include also judges of the Supreme Administrative Court.

Table 7.8 (EC) Number of lawyers* per 100 000 inhabitants from 2012 to 2021 (Q1, Q146, Q147)

States	EC Code	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021

***Before 2017, Cyprus also included "legal advisors", who cannot represent clients in court.**

Finland: Since 2015, the number of lawyers provided includes both the number of lawyers working in the private sector and the number of lawyers working in the public sector. Before 2015 the number given only included the members of the Finnish Bar Association who are entitled to use the professional titles advokat (advocate).

Indicator 7: Professionals of justice

comments provided by the national correspondents

organised by country

Question 004. Average gross annual salary (in €) for the reference year

Question 046. Number of professional judges sitting in courts (if possible on 31 December of the reference year). (please give the information in full-time equivalent and for posts actually filled for all types of courts - general jurisdiction and specialised courts)

Question 046-2. Number of judges (FTE) by case type:

Question 052. Number of non-judge staff who are working in courts (if possible on 31 December of the reference year) (this data should not include the staff working for public prosecutors; see question 60) (please give the information in full-time equivalent and for posts actually filled)

Question 052-1. Number of non-judge staff by instance (if possible, on 31 December of the reference year) (this data should not include the staff working for public prosecutors; see question 60) (please give the information in full-time equivalent and for posts actually filled).

Question 055. Number of public prosecutors (on 31 December of the reference year). (Please give the information in full-time equivalent and for posts actually filled, for all types of courts – general jurisdiction and specialised courts).

Question 060. Number of staff (non-public prosecutors) attached to the public prosecution services, if possible, on 31 December of the reference year and without the number of non-judge staff, see question 52 (in full-time equivalent and for posts actually filled).

Question 132. Salaries of judges and public prosecutors on 31 December of the reference year:

Question 133. Do judges and public prosecutors have additional benefits?

Question 144. Number of disciplinary proceedings initiated during the reference year against judges and public prosecutors. (If a disciplinary proceeding is undertaken because of several reasons, please count the proceedings only once and for the main reason.)

Question 145. Number of sanctions pronounced during the reference year against judges and public prosecutors:

Question 146. Total number of lawyers practising in your country:

Question 147. Does this figure include "legal advisors" who cannot represent their clients in court (for example, some solicitors or in-house counsellors)?

Question 148. Number of legal advisors who cannot represent their clients in court:

Austria

Q004 (General Comment): Since the 2010 evaluation, the provided figure corresponds to the average gross income including taxes and social expenses borne by the employee, but not employer's contribution for social insurance. This is in line with the figures given in question 132 (gross annual salary of judges and prosecutors).

Q004 (2021): Not available yet.

Q004 (2019): 2018 data has been communicated, pending 2019 data.

Q046 (General Comment): For the all exercises, data have been provided in full time equivalent. The first instance judges sit in District and partly regional courts. The second instance judges sit in partly regional courts and Courts of appeal. The last instance includes judges sitting in the Supreme Court and the Supreme Administrative Court.

Q046 (2019): Data in full time equivalent
1.: district courts and partly regional courts + administrative courts 2.: courts of appeal and partly regional courts

Q046 (2018): Data in full time equivalent
1.: district and regional Courts + administrative court
2.: courts of appeal

Q046 (2017): The data also include those of administrative courts.

Q046 (2016): This cycle admnistrative courts were taken into account for the first time.
The administrative courts were established January 1st 2014. After their establishment the data of the administrative courts is introduced this cycle for the first time.

Q046 (2015): The right (not rounded) numbers are:

TotalMalesFemales
Total number of professional judges (1 + 2 + 3)1620,65 - 790,52 - 830,13
1. Number of first instance professional judges1222,95 - 559,08 - 663,87
2. Number of second instance (court of appeal) professional judges 330,35 - 187,75 - 142,60
3. Number of supreme court professional judges 67,35 - 43,69 - 23,66

Data in full time equivalent
1.: district and partly regional courts
2.: partly regional courts and courts of appeal

Q046 (2014): For 2014, the numerical values in the table have been rounded. The most exact replies would be: Total: 1 620,04 (789,68 Male, 830,36 Female); first instance professional judges: 1 224,36 (556,01 Male, 668,35 Female); second instance professional judges: 329,63 (190,78 Male, 138,85 Female); Supreme court professional judges: 66,05 (42,89 Male, 23,16 Female). In 2014, some judges entitled to adjudicate in different law fields have been counted twice.

Q046 (2013): In 2013, the different tasks had been assigned to the full time equivalent judges, distinguishing between dealing with first and second instance court proceedings on the one hand and administrative tasks on the other hand.

Q046 (2012): In 2012, in contrast with previous evaluations, the different tasks had been more exactly assigned to the full time equivalent judges, distinguishing between dealing with first and second instance court proceedings on the one hand and administrative tasks on the other hand.
Q052 (General Comment): Starting from 2021, the “Kanzlei” who are responsible for handling of case files are counted as “staff in charge of different administrative tasks and of the management of the courts”. “Other staff” only includes trainees (including trainees for Rechtspfleger) and staff representation. Moreover, starting from 2021, “technical staff” also includes staff working at the courts‘ IT departments.
Q052 (2021): Starting from 2021, the “Kanzlei” who are responsible for handling of case files are no more counted as “other staff”, but as “staff in charge of different administrative tasks and of the management of the courts”. “Other staff” only includes trainees (including trainees for Rechtspfleger) and staff representation. Moreover, starting from 2021, “technical staff” also includes staff working at the courts‘ IT departments, therefore the number is higher than in previous years.

Q052 (2020): "Other": Handling of case files (“Kanzlei”)
2. Non-judge (judicial) staff whose task is to assist the judges: the increased number concerns administrative courts.

Q052 (2019): Non-judge staff whose task is to assist the judges: more staff at the administrative courts
Staff in charge of different administrative tasks and of the management of the courts: more staff
Other: Handling of case files (“Kanzlei”)
Q052 (2018): Handling of case files (“Kanzlei”)

Q052 (2017): The data also include those of administrative courts.

Q052 (2016): This cycle admnistrative courts were taken into account for the first time.
The administrative courts were established January 1st 2014. After their establishment the data of the administrative courts is introduced this cycle for the first time.

Q052 (2015): The right (not rounded) numbers are:
Total non-judge staff working in courts (1 + 2 + 3 + 4 + 5) 4734,55 - 1407,08 - 3327,47
1. Rechtspfleger (or similar bodies) with judicial or quasi-judicial tasks having autonomous competence and whose decisions could be subject to appeal798,11 - 331,63 - 466,48
2. Non-judge staff whose task is to assist the judges such as registrars (case file preparation, assistance during the hearing, court recording, helping to draft the decisions) 19,05 - 1 - 18,05
3. Staff in charge of different administrative tasks and of the management of the courts (human resources management, material and equipment management, including computer systems, financial and budgetary management, training management)439,56 - 155,86 - 283,70
4. Technical staff21,70 - 9,85 - 11,85
5. Other non-judge staff3456,13 - 908,74 - 2547,39

Q052 (2014): The numerical values in the table have been rounded. The most exact replies for this period would be: total non-judge staff: 4 704,51 (1 388 Male, 3 316,51 Female); Rechtspfleger: 784,78 (320,21 Male, 464,57 Female); non-judge staff whose task is to assist the judges: 19,18 (1 Male, 18,18 Female); staff in charge of different administrative tasks: 438,97 (159,85 Males, 279,12 Females); technical staff: 23,05 (9,95 Males, 13,10 Females); other non-judge staff: 3 438,53 (896,99 Males, 2 541,54 Females).

Q055 (General Comment): Data is presented in full time equivalent.

Q055 (2014): The numerical values provided in the table are rounded. The accurate figures are: total – 344,83 (171,52 males and 173,31 females); prosecutors at first instance level – 308,69 (147,13 males and 161,56 females); prosecutors at second instance (court of appeal) level – 20,94 (13,04 males and 7,90 females); prosecutors at Supreme Court level – 15,20 (11,35 males and 3,85 females).

Q055 (2012): In 2012, the various tasks were more exactly assigned to the number of full time equivalents - dealing with tasks of the prosecution on the one hand and the administrative tasks on the other hand.

Q132 (2021): Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 75700
Net annual salary: EUR 46900
Judge of the Administrative Supreme Court: Gross annual salary: EUR 133000

Q132 (2020): Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 75000
Net annual salary: EUR 46600
Judge of the Administrative Supreme Court: Gross annual salary: EUR 130000

Q132 (2019): Administrative Courts - First instance professional judge at the beginning of his/her Career:
Gross annual salary, in €: 72.900 Net annual salary, in €: 45.100

Q132 (2018): Gross annual Salary in € on 31 Dec 2018 First instance professional judge at the beginning of his/her career 53 865
Judge of the Supreme Court or the Highest Appellate Court : 131 227,88
Public prosecutor at the beginning of his/her career: 57 158,80
Public prosecutor of the Supreme Court or the Highest Appellate Instance : 131 227,88
Administrative court:
first instance professional Judge at the beginning of his/her Career: 69 600,00
Judge of the Supreme Court or the Highest Appellate Court: 126 000

Q132 (2016): Because of the requirement of numerical values the numerical values in the table above are rounded. the correct and exact answer is:
Gross annual Salary in € on 31 Dec 2016 (= Gross annual Salary in local currency on 31 dec 2016):
First instance professional judge at the beginning of his/her career: 59 962,40
Judge of the Supreme Court or the Highest Appellate Court (please indicate the average salary of a judge at this level, and not the salary of the Court President): 126 594,16
Public prosecutor at the beginning of his/her career: 55 139
Public prosecutor of the Supreme Court or the Highest Appellate Instance (please indicate the average salary of a public prosecutor at this level, and not the salary of the Public prosecutor General): 126 594,16

Q132 (2014): For 2014, the numerical values in the table are rounded. The correct and exact reply concerning the gross annual salary in Euros on 31 December 2014 is: first instance professional judges at the beginning of their career: 50 402,80 Euros; judges of the Supreme Court or the Highest appellate Court: 121 651,25 Euros; public prosecutors at the beginning of their career: 53 485,60 Euros; public prosecutors of the Supreme Court or the Highest appellate instance: 121651,25 Euros.

Q133 (General Comment): Judges at Administrative Courts get the same benefits as functionaries (e.g. anniversary reward, child allowance, possibly cost of living bonus, travel fees of transportation allowance)

Q133 (2018): Judges at Administrative Courts get the same benefits as functionaries (e.g. anniversary reward, child allowance, possibly cost of living bonus, travel fees of transportation allowance)

Q133 (2016): Judges at Administrative Courts get the same benefits as officials (i.e. anniversary reward, child allowance, possibly costs of living Bonus, travel fees or Transportation allowance).

Q144 (General Comment): .

Q144 (2021): 2 disciplinary proceedings concern administrative judges, it was not possible to distinguish between different subtypes or categories of grounds. Therefore, only the total of disciplinare proceedings can be provide.

Q144 (2020): 2 disciplinary proceedings concern administrative judges, it was not possible to distinguish between different subtypes or categories of grounds. Therefore, only the total of disciplinare proceedings can be provide.

Q144 (2016): Austria does not differentiate between the categories mentioned above (numbers 1 to 4). Therefore, we can only refer to the number of disciplinary cases as a whole.

Q145 (General Comment): The difference between the data of disciplinary proceedings/sanctions against judges and prosecutors is mainly a result of the fact that there are much more judges than prosecutors in Austria. The bulk of disciplinary proceedings against judges are conducted on the ground of the long term of making out/transcription of judgments.

Q145 (2016): ---

Q145 (2012): In the frame of the 2010 and 2012 exercise, it was specified that “other” does apply to conviction and the order for costs of proceedings. Besides, it was stressed that 16 disciplinary (judge) cases were pending, partly because of pending penal cases, partly because of other reasons, while 3 disciplinary (public prosecutors) cases were pending mainly due to pending penal cases.

Q146 (2021): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31 December 2021 (available at www.rechtsanwaelte.at). The data only include lawyers registered in the list of Austrian lawyers, lawyers registered in the list of established European lawyers according to the Lawyers' Directives registered by 31 December 2021. It does not include legal advisors as such a professions/type of service provider does not exist in Austria.

Q146 (2017): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2017 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.238), lawyers registered in the list of established European lawyers (87) registered by 31st of December 2017. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q146 (2016): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2016 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.132), lawyers registered in the list of established European lawyers (84) registered by 31st of December 2016. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q146 (2015): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2015 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.057), lawyers registered in the list of established European lawyers (81) registered by 31st of December 2015. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q146 (2014): The 2014 data includes lawyers registered in the list of Austrian lawyers (5940), lawyers registered in the list of established European lawyers (80) and trainee lawyers (2072) registered by 31 December 2014. It does not encompass solicitors or legal advisors as such professions do not exist in Austria.

Q147 (2017): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2017 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.238), lawyers registered in the list of established European lawyers (87) registered by 31st of December 2017. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q147 (2016): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2016 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.132), lawyers registered in the list of established European lawyers (84) registered by 31st of December 2016. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q147 (2015): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2015 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.057), lawyers registered in the list of established European lawyers (81) registered by 31st of December 2015. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Belgium

Q004 (2021): The average gross annual salary is 44022,8 euros, source National Bank of Belgium.

Q004 (2020):
Answer provided based on the latest data published by the National Accounts (April 2021).

Q004 (2019): Average gross annual salary for employees (both full-time and part-time).

Q004 (2016): Average gross salary for a full-time employee (without exceptional bonuses and vacation pay)

Q046 (General Comment): There is no particular reason for the increase in the number of female second instance judges; it is related to the natural evolution (more women at the first instance implies, after some time, a larger base for recruitment at the appeal level).
The table contains data for civil and criminal courts, as well as for the Council of State (44 members) and the Aliens Litigation Council (55 judges).

Q046 (2021): Source: FPS Justice, Directorate-General for the Judiciary, HR Department Judiciary, Notaries and Enforcement agents.
Point 3 concerns judges of the Court of Cassation.
As for the previous cycles, the table contains data for the civil and criminal courts. For this cycle, the (administrative) judges of the Council of State and of the Aliens Litigation Council (41 and 55 judges respectively) have been added to the table. With regard to the administrative judges of the Council of State (as for the Aliens Litigation Council), it is decided to count them as first instance judges. It should be noted, however, that judges of the Council of State intervene both at first and last instance. The number of judges at the Council of State is 44 members and for the Aliens Litigation Council it is 55. For the Aliens Litigation Council, the total of 55 is broken down as follows: 32 female judges - 23 male judges, of whom the first president and the president are men. For the Council of State, the situation is as follows: in principle, the Council is composed of 44 members (1 first president, 1 president, 14 chamber presidents and 28 councillors of State); in practice, 41 members are currently in office (two recent retirements and one death); 20 Dutch-speaking and 21 French-speaking; 12 women and 29 men. It is worth mentioning that an extension of the framework of the Council of State is provided for by a law of 6 September 2022 (which amended article 69 of the laws on the Council of State, coordinated on 12 January 1973). The Council will now consist of 58 members. These new members have not yet been recruited.

Q046 (2020): "No particular reason for the increase in the number of female second instance judges; related to natural evolution (more women in the first degree means, after a while, a larger base for recruitment to the appellate degree).
As in previous cycles, the table contains data for the judicial courts. The number of judges in the Council of State is 44 members and for the Council of Foreigners' Disputes it is 54 judges. "

Q046 (2019): Number of judges in courts within the ambit of the Federal Public Service of Justice (ordre judiciaire)

Q046 (2018): As a result of the reform of the cantons of justice of the peace, the number of places for justices of the peace has decreased by 25.

Q046 (2014): For 2014, the number of professional judges includes presidents of courts.

Q046 (2013): The 2013 data on the number of professional judges reflects the situation as at 18 January 2014.

Q046-2 (2020): The system does not allow part-time work for judges. Data by type of case are not known. Judges are appointed at the court level, and the head of the court assigns them to the different chambers of the court and allocates cases.

Q052 (2019): "Technical personnel": the slight increase observed between 2018 and 2019 results from investments in personnel.
Q052 (2013): The number of women per category is as follows: Total: 3839,45; category 2: 1212,62; category 3: 2031,93; category 4: 594,90.
Q052 (2012): The 2d category "non-judge staff whose task is to assist the judges such as registrars" covers clerks and referendaries; the 3d category "staff in charge of different administrative tasks" includes HRM staff, seconded staff to specific authorities of the judicial organisation and administrative staff of the court registry. This distribution can be presented with the following figures: Total: 5457,95 (3930,35 women); 2: 1707,72 (1166,52 women); 3: 2766,23 (2075,73 women); 5: 984 (688,10 women).
Q052-1 (2021): Source: Directorate P&O - HR Department Judicial staff - Directorate General Judicial Organisation, Federal Public Service Justice (FPS Justice)
Q052-1 (2020): Source: HR Service Judicial Personnel-Directorate General Judicial Organization, FPS Justice

Q055 (2021): Source: FPS Justice - Directorate General for the Judiciary, HR Department of the Judiciary, Notaries and Enforcement agents
Q055 (2020): Support Service of the College of Public Prosecutors

Q055 (2014): In 2014, the number of professional prosecutors includes the heads of division of the 15 public prosecutors' offices and the heads of the 8 prosecution offices within labour courts.
Q060 (2020): V: 1694
M: 730
Q132 (General Comment): Elements taken into account for salaries: judge at the first instance court or deputy king public prosecutor, with three years' seniority (beginning of career), married with two dependent children. Councillor at the Court of Cassation with 24 years' seniority, married, no dependent children. Advocate General at the Court of Cassation, with 24 years' seniority, no dependent children.
Q132 (2019): Judge at the court of first instance or deputy king's prosecutor, with three years of seniority (beginning of career) married and two dependent children.
Advisor to the Supreme Court with 24 years of seniority, married and no dependent children.
Advocate General at the Supreme Court, with 24 years of service and no dependent children.

Q132 (2016): Judge at the Court of First Instance or Deputy Crown Prosecutor, with three years seniority (beginning of career) married and two dependent children
Councillor at the Court of Cassation with 24 years seniority, married, no dependent children
Advocate General at the Court of Cassation, with 24 years seniority, no dependent children

Q133 (2021): Judges and prosecutors have a specific pension scheme (age limit at 67 + preferential rate).

Q133 (2020): Magistrates have a specific pension scheme (age limit at 67 + preferential rate).

Q144 (General Comment): These are proceedings before the disciplinary courts competent for major sanctions. There is no consolidated register for disciplinary proceedings at the level of the courts or public prosecutor's offices that have resulted in a dismissal or a minor sanction. The disciplinary sanctions applicable to judges and public prosecutors are set out in Article 405(1) of the Judicial Code. According to this article, minor disciplinary sanctions are: a call to order; a reprimand. Major disciplinary sanctions are: reduction of salary; disciplinary suspension; regression in salary scales or loss of the last salary supplement; position downgrade or withdrawal of the mandate referred to in Article 58 bis; ex officio resignation; removal from office or dismissal.

Q144 (2014): A new legislation entered into force in September 2014, establishing disciplinary courts. As a result, the number of disciplinary proceedings initiated against judges decreased between 2012 and 2014.

Q145 (General Comment): Number of major disciplinary sanctions pronounced by disciplinary courts and disciplinary courts of appeal. There is no consolidated register of minor sanctions (call to order and reprimand) pronounced by local heads of corps.

Q145 (2021): Clarification for one case of suspension: it is a one-month suspension with a 3-year carry-over. Sources: the Dutch-speaking Disciplinary court in Ghent, the French-speaking Disciplinary court in Namur, the Dutch-speaking Disciplinary court of Appeal in Brussels and the French-speaking Disciplinary court of Appeal in Brussels
Disciplinary sanctions foreseen by the Judicial Code (Article 405 §1).

Q145 (2020): The number of new disciplinary cases may differ from the number of completed disciplinary cases because some cases are completed in a calendar year later than the year the case was opened.

Q146 (2021): The figures are for the Orde Van Vlaamse Balies, 10 973, and for the Order of the French-speaking and German-speaking Bars, 8 188 as of 1 December 2021: a total of 19 161 lawyers.
Unfortunately, none of the Bars was able to provide figures by gender. The Bars report a stable annual increase. According to the latest "barometers of the profession" carried out by the Bar Associations (in 2018 and 2020), it seems that the legal profession is becoming more and more feminised, and the age pyramid suggests that this feminisation will increase in the years to come.

Q146 (2020): For the Order of the French- and German-speaking Bars: 8,160 and for the Orde van Vlaamse Balies (Order of the Flemish Bars) 10715--> total 18,875. According to a recent study (2020), in December 2019, 64.8% of trainee lawyers were women. On the other hand, 57.6% of the lawyers on the roll (who have completed the traineeship) were men. However, if these percentages are compared with those in previous similar studies, it must be concluded that the legal profession in Belgium is becoming more female.

Q146 (2019): The data correspond to the number of lawyers registered with the Belgian bars on September 1, 2019, therefore at the start of the judicial year 2019-2020. This number fluctuates during the judicial year.
Number of lawyers registered with Flemish bars: 10,862.
Number of lawyers registered with French and German speaking bars: 8,043.

Q146 (2018): 8002 for the French and German-speaking Bar Association
10656 for the Flemish Bar Association (OVB)

Q146 (2017): 7 939 lawyers for the French and German-speaking Bar Association on 1 December 2017
10 665 lawyers at the Flemish Bar (OVB)

Q146 (2016): 7,930 lawyers for the French- and German-speaking Bar Association on 1 December 2016
10,602 lawyers at the Flemish Bar (OVB)

Q146 (2015): As at 1 December 2015, there were 7,882 French-speaking and German-speaking lawyers (avocats.be) and 10,520 Dutch-speaking lawyers (Orde van Vlaamse balies).

Bulgaria

Q004 (2021): Preliminary data.
The minimum wage in the country has been risen with 6.6%. In section “Human health and social work activities” the average annual wage increased with 25.7% due to additional wage payments related with the health crisis. In section “Education” there was an increase of the teachers' wages and salaries and the increase in the section was 17.0%. High growth rate of wages and salaries in 2021 compared to 2020 (17.7%) was recorded in “Accommodation and food service activities” as the section started to recover after 2020 lockdowns.

Q004 (2018): NSI data

Q004 (2016): No explanation.

Q046 (General Comment): The number of the first instance professional judges encompasses the judges of the first instance courts as follows - 113 district, 28 administrative, 3 military-district and the Specialized Criminal Court;
The number of the second instance (court of appeal) professional judges encompasses the judges of second instance courts as follows - 28 regional/provincial, 5 appellate, The Military Court of Appeal and the Specialized Criminal Court of Appeal.
The number of Supreme Court professional judges encompasses the judges of the Supreme Court of Cassation and the Supreme administrative court.

Q046 (2021): First instance courts – district, administrative, military district and Specialized Criminal Court.
Second instance courts (courts of appeal) – regional, appellate, Appellate Specialized Criminal Court and Military Appellate Court.
Supreme Courts – Supreme Court of Cassation and Supreme Administrative Court

Q046 (2020): Number of professional judges from district courts - 959, incl. men - 354 and women - 605. Annex: Summary information on the data as of 31.12.2020, received by all regional courts and all administrative courts, regarding the number of judges working in the first instance panels and the number of judges, who administer justice in the appellate / cassation panels, as well as data on how many of them are men and how many of them are women. It should be borne in mind that, according to the information received, in almost all courts, a large number of judges sit both at first instance and as second instance judges. Therefore, the sum of the number of first instance judges and the number of second instance judges should not give the total number of magistrates in the respective region/ administrative court. Number of professional judges from the Court of Appeal - 124, incl. men - 43 and women - 81.

Q046 (2019): 046/2. The indicated number of 134 judges refers only to the magistrates appointed and working in the 7 courts of appeal in Bulgaria. The calculation is made on the basis of the question itself, which draws attention only to the number of appellate judges (judges working in a court of appeal), as is evident from it - "professional judges of second instance / appellate court /". In almost all regional courts, most judges sit in both the first and second instance departments of the courts and this makes it difficult to differentiate them. This year all judges in regional courts are listed in 046/1 - Number of first instance professional judges.

Q046 (2017): P. 1 – The number of first instance professional judges consists of judges in 27 Regional courts within regional centres; 86 out of regional centres; 28 Administrative courts; 1 Specialized Criminal Court; 3 Military courts; and the number of the first instance judges in District courts has been added to them;
P.2 – The number of the second instance judges consists of judges in 27 District courts; Sofia City Court; 5 Courts of Appeal; 1 Military court of appeal and 1 Appealate Specialized Criminal Court. This number does not include the second instance judges who have adjudicated in first instance pannels.
P.3- The number of working judges in the Supreme Court of Cassation and Supreme Administrative Court at 31.12.2017

Q046 (2016): P. 1 – The number of first instance professional judges consists of judges in 27 Regional courts within regional centres; 86 out of regional centres; 28 Administrative courts; 1 Specialized Criminal Court; 3 Military courts; and the number of first instance judges in District courts has been added to them;
P.2 – The number of second instance judges consists of judges in 27 District courts; Sofia City Court; 5 Courts of Appeal; 1 Military court of appeal and 1 Appealate Specialized Criminal Court. This number does not include the second instance judges who have served in first instance courts. P.3- The number of working judges in the Supreme Court of Cassation and Supreme Administrative Court at 31.12.2016

Q046 (2015): 1.The figure 1760 includes the number of judges, employed at the 1st instance courts ((113 regional courts (27 Regional courts in the district centers and 86 regional courts outside the district centers); 28 Administrative courts; 1 Specialized criminal court; 3 Military courts) including the number of the first instance judges` (524) working in the first instance court formations in the District courts as from 31.12.2015. The number of Military courts has been reduced after decision under protocol ? 44/13.12.2013 of the Supreme Judicial Council from 5 to 3.

2.The number of judges, employed at the 2nd instance courts as from 31.12.2015 and the Courts of Appeal is 277. This figure is a result from the addition of the judges in the 28 District courts; 6 Courts of appeal and 1 Specialized criminal court of appeal – 801 judges in total, where the number of the first instance judges in the District courts (524) have been deducted.

3.The number of judges, employed in the Supreme Court of Cassation and the Supreme Administrative courts as from 31.12.2015 is 188.

Q046 (2014): In 2014, the number 1753 shows the number of judges employed in the first instance courts (113 regional, 28 administrative and 3 military courts) and 550 first instance judges, working in the district courts. The number of military courts was reduced from 5 to 3. The number of second instance judges is 277 and does not encompass first instance judges, working in the first instance chambers of the district courts.

Q046-2 (2021): The total number of first-instance judges is 1258. It includes 991 district (first instance) judges, for whom there is no available information regarding the specialization, 236 administrative, 10 other (military) and 21 - judges at first instance Specialized Criminal Court.
The total number of second-instance judges includes also 59 junior judges, adjudicating at regional courts (second instance), for whom information on specialization is not available. 5 other are military judges.
The total number of supreme judges includes the president of the Supreme Court of Cassation, for whom there is no available information regarding the specialization.

Q046-2 (2020): The column "others" in question 46-2 refers to the military judges - 12 regional/provincial and 5 appellate - a total of 17.
The total number of judges in the district courts is 959, and the same, with the exception of the Sofia District Court, are not divided by subject matter. Therefore, data related to the number of first instance judges dealing with civil / commercial and criminal cases are not available. Appendix: Summary information on the data as of 31.12.2020, received by all regional/provincial courts (first and second instance) regarding the number of judges in them, who work in the civil, commercial and criminal divisions. It should be borne in mind that, according to the information received, in almost all courts, a large number of judges sit in more than one division, therefore the summation of the number of judges from the three divisions should not give the total number of judges in the respective court. Total number of judges in the Court of Appeal (second instance) - 124, of which in the civil division - 36, in the commercial division - 38 and in the criminal division - 50.

Q052 (General Comment): Since 2012, the category “other” encompasses the number of non-judge staff employees working in the recreational field, while in 2010 it subsumes the number of court assistants. The Judicial Administration Commission does not keep statistics of those who are trained, as well as of trainee judges. There are junior judges in the courts in the country, for whom Judicial Administration Commission has no relation, no data. Accordingly, the total number of judicial employees in the courts does not include trainee judges.

Q052 (2019): Since 2012, the category “other” encompasses the number of non-judge staff employees working in the recreational field, while in 2010 it subsumes the number of court assistants.
Q052 (2017): These are the staff employed in the recreational establishments of the Supreme Administrative Court and the Supreme Court of Cassation such as: manager of the training center, chefs, worker in the kitchen, bartender, waiter, tendant.

Q052 (2015): Unlike the previous evaluation cycles, now we indicate the figure 502 – technical staff (it includes drives, cleaning staff, guards, etc.), which reduce the number of the employees engaged with administrative tasks and court management under number 3.
Other non-judge staff includes 55 court servants working in recreation department.
Q052 (2013): The number of non-judge staff assisting judges includes the number of all court staff from the so called specialized administration supporting judges, including court secretaries and court assistance, while for 2010 it subsumes only court secretaries. The category “staff in charge of different administrative tasks” subsumes the number of non – judge staff of general administration.
Q052 (2012): The number of non-judge staff assisting judges includes the number of all court staff from the so called specialized administration supporting judges, including court secretaries and court assistance, while for 2010 it subsumes only court secretaries.
Q052-1 (General Comment): The regional courts in Bulgaria are first and second instance so this is a problem when giving data according to CEPEJ criteria, so this can explain the discrepancies here.
Item 1 "Total non-judge staff working in courts at first instance" includes staff from district and administrative courts. Item 2 "Total non-judge staff working in courts at second instance (court of appeal) level" includes staff from regional and appellate courts although in some types of cases the regional court is first instance.

Q052-1 (2021): 2. "Total non-judge staff working in courts at second instance": the increased number is due to newly opened vacancies for non-judge staff in view of strengthening the courts' activities.
Q052-1 (2020): This answer 5 204 - item 1 "Total number of court employees working in the courts of first instance" includes all employees of the district, regional and administrative courts, although in some types of cases the regional court is the second instance. The number 716 - item 2 "Total number of court employees working in the courts of second instance (appellate court)" includes all employees working in the courts of appeal in the country.

Q055 (General Comment): The provided data refers to the actual number of employed persons for the year of reference.

Q055 (2016): 1511 is the total number of working prosecutors at 31.12.2016; 888 prosecutors at first instance level includes – the prosecutors from 113 Regional Prosecutor`s Offices and 1 Specialized Prosecotr`s Office; 500 prosecutors work in 28 District Prosecutor`s Offices, 7 Appelate Prosecutor`s Offices and 3 Military District Prosecutor`s Offices; 123 are the prosecutors working in Supreme Prosecutor`s Office of Cassation and Supreme Administrative Prosecutor`s Office and 1 Prosecutor General. (The indicated numbers do not include the number of the investigative magistrates in the investigative departments at District Prosecutor`s Offices and National Investigation Service and their administrative heads.

Q055 (2014): For 2014, the number of prosecutors acting at 1st instance includes prosecutors of the regional prosecutor's offices, specialized prosecutor's offices and the military prosecutor's offices. The number of prosecutors acting at 2nd instance includes prosecutors from district and appellate prosecutor's offices. The number of prosecutors at Supreme Court level includes prosecutors from the Supreme Prosecutor's Office of Cassation, Supreme Administrative Public Prosecutor's Office, and the Prosecutor GeneralIn contrast with the 2012 evaluation, the number of investigators in the District Investigation Departments at the District Prosecutor's Offices and the National Investigation Service is not taken into consideration for 2014.

Q055 (2012): For 2012, the total includes 512 magistrates with position of "investigator in the Investigation Department at the District Prosecution Office". Conversely, these 512 magistrates are not subsumed in the number of prosecutors at 1st instance level. The number of prosecutors at 2nd instance level including Prosecutor's Office of Appeal and Military District Prosecutor's Office encompasses 451 prosecutors and 433 investigators in the Investigation Departments at the District Prosecution Offices and military investigators. The number of prosecutors at Supreme Court level includes 128 prosecutors and 79 investigators at the National Investigation Service.

Q060 (2021): The decrease in the number of staff (non-public prosecutors) in the prosecutor's offices is due to the closing of the majority of the first-instance prosecutor's offices and their merger with those in the regional centers. Thus, the managing and duplicating positions in the closed prosecutor's offices were cut.
Q060 (2014): For 2014, the number of actually working servants in the Prosecutors office at 31 December 2014 (2918,5) includes also 66 servants working in the field of recreational craft. The main source of this data is the establishment plan of the Prosecutors office of the Republic of Bulgaria for the number of prosecutors and investigators and a reference for the number of employees in the Prosecutors office of the Republic of Bulgaria at December 2014.

Q060 (2012): For 2012, the number of actually employed servants in the Prosecutors Office at 31 December 2012 (2989,5) includes 177 servants in the recreation department.
Q132 (2021): In the data for Q 132, the line "Prosecutor at the beginning of his/her career" is correct, but refers to the salaries of a district (first instance) prosecutor at the beginning of his/her career. The data for judges and prosecutors is calculated from the salary report collected and summarized by the Judiciary as of December 2021. The gross salary of the lowest judicial/prosecutor level, i.e. district judge and district prosecutor, is calculated. The system also has the position of "junior judge", but at the beginning of their career, they work in second-instance courts (regional courts), and based on the Questionnaire, information is requested about the lowest position in the first instance. The salary of a district judge and a district prosecutor according to "Table No. 1 of the SJC for Determining the Maximum Basic Monthly Salaries of Judges, Prosecutors and Investigators" is the same.
The data for question 132, line "Prosecutor of the Supreme Court or the Highest Appellate Instance" for the supreme judges and supreme prosecutors is calculated from the salary report provided by the supreme judicial bodies as of December 2021. The gross salary of a magistrate in the supreme judicial body was calculated. According to "Table No. 1 of the SJC for Determining the Maximum Basic Monthly Salaries of Judges, Prosecutors, and Investigators", the determined remuneration of a supreme judge and a supreme prosecutor is the same.

Q132 (2020): In 2019, with a decision of the Plenum of the SJC under item 6 of Protocol № 2 / 24.01.2019, an updated Table № 1 of the SJC was approved to determine the maximum basic monthly salaries of judges, prosecutors and investigators pursuant to Art. 218, para 2 and para 3 of the JSA with an increase of 10%, as of 01.01.2019. With the same decision the ranks for magistrates were increased by BGN 100 per rank, as of 01.03.2019.
In 2020, with a decision of the Plenum of the SJC under item 2 of Protocol № 2 / 30.01.2020, an updated Table 1 of the SJC was approved for determining the maximum basic monthly salaries of judges, prosecutors and investigators on the grounds of Article 218. , para 2 and para 3 of JSA with an increase of 10%, as of 01.01.2020. With the same decision the ranks for magistrates were increased by BGN 50 per rank, as of 01.03.2020.

Q132 (2018): The sums shown do not include the amount of the social security contributions, in order to be made comparable to the data given in the previous assessment cycle when they were not included either in the amount of the gross salary for the relevant position. The source of the data was information summarized and analyzed in the "Financial planning and analysis" Department of Supreme Judicial Council of Bulgaria

Q132 (2016): Under the provisions of Art. 218 (2) of the Judiciary System Act, the basic monthly remuneration for the lowest judicial, prosecutorial or investigating magisterial position shall be set at the double amount of the average monthly salary of employees in the public-financed sphere according to data of the National Institute of Statistics.
The increase in the salaries of the magistrates that occupy the lowest position is in line with the increase of the average monthly salary of the employees in the public-financed sphere, according to data of the National Statistical Institute and the financial resources of the budget of the judiciary.
Under the provisions of Art. 218, (3) of the Judiciary System Act, the remuneration of the other positions, including judges and prosecutors in the Supreme Court / Supreme Prosecution Office in the bodies of the judiciary, shall be determined by a decision of the SJC Plenum and taking into account the financial possibilities on the budget of the judiciary.

Q132 (2014): For 2014, the indicated amounts do not include the insurance contributions for the purpose of data comparability in respect of the previous evaluation scheme, when these amounts have not also been taken into consideration.

Q132 (2012): For 2010, the basis for assessment were the data from Table 1 of the Supreme Judicial Council determining the maximum amount of the monthly salary of judges, prosecutors and investigators, while for 2012, the basis for assessment were the data from the Information for the funds for salaries from the establishment plans and the average salary by positions, which is prepared by all the bodies of the judiciary and is summarized in the SJC. This information file reflects the actually received gross salaries, which include the basic salary and additional remuneration for grade and service.

Q133 (2021): Pursuant to Article 223 of the Judiciary System Act, judges and prosecutors may use dwellings from the institutional housing stock of the judiciary.

Q133 (2020): Pursuant to Article 223 of the Judiciary System Act, judges and prosecutors may use dwellings from the institutional housing stock of the judiciary

Q133 (2019): Persuant to art. 223 of the Judiciary System Act, judges and prosecutors may use housing of the departmental housing fund of the judicial authorities.
Q144 (General Comment): Professional inadequacy refers to "systematic non-compliance with the time limits provided for in the procedural laws", "action or inaction that unjustifiably delays the proceedings", "action or inaction that damages the prestige of the judiciary", "Failure to perform official duties".

Q144 (2021): Concerning the category "Professional inadequacy": with regard to judges: in 2021, disciplinary proceedings were initiated for culpable failure to fulfil other official duties, resulting in not appearing at work for two consecutive working days. With regard to prosecutors: in 2021, 1 (one) proceeding was instituted for "systematic failure to comply with the deadlines provided for in the procedural laws"; 5 (five) proceedings were instituted for "action or inaction which unjustifiably delays the proceedings".

Q144 (2020): Others - 2 / two / disciplinary proceedings have been instituted for culpable non-fulfillment of official duties, expressed in systematic non-observance of the terms, provided in the procedural laws; 1 / one / disciplinary proceeding is instituted for action or inaction, which damages the prestige of the judiciary and 1 / one / disciplinary proceeding is instituted for action or inaction, which unjustifiably delays the proceedings and non-fulfillment of other official duties.
Others - "systematic non-compliance with the time limits provided for in the procedural laws"; "action or inaction that unjustifiably delays the proceedings"; "action or inaction that damages the prestige of the judiciary"; "Failure to perform official duties".

Q144 (2018): Other – „ any systematic failure to keep the deadlines provided for in the procedural laws “; „ any act or omission that unjustifiably delays the proceedings“; „any act or omission, which damages the prestige of the Judiciary“; „failure to discharge the official duties“
Q144 (2016): "Other": Systematic failure to comply with the deadlines provided for in procedural laws and / or action or omission which unduly slows down proceeding; non-performance of other official duties.
Q144 (2014): For 2014, the category “other” refers to “consistent non-observance of the deadlines provided for in the procedural laws”, “action or inaction, which unduly delays the proceedings”, “action or inaction, which undermines the prestige of the judiciary”, “non-observance of the official duties”.
Q144 (2012): For 2012, the category “other” refers to “consistent non-observance of the deadlines provided for in the procedural laws”, “action or inaction, which unduly delays the proceedings”, “action or inaction, which undermines the prestige of the judiciary”, “non-observance of the official duties”.

Q145 (General Comment): The temporary suspension from office (temporary suspension of functions) is not a disciplinary sanction, and for that reason the number of such suspensions is not included in the total number of imposed sanctions. The difference between the number of the initiated disciplinary proceedings and the number of the imposed disciplinary sanctions is due to the fact that part of the imposed sanctions are under proceedings, initiated during the preceding reporting period or are imposed by order of the administrative head.

Q145 (2021): There is no such sanction "reprimand" in Article 308 of the Judiciary System Act, since the lightest disciplinary punishment is a "remark". With regard to judges: - a total of 6 /six/ disciplinary proceedings, initiated in previous periods, were concluded, and the Judges' College of the Supreme Judicial Council (SJC) ruled on them as follows:
- "remark" penalty imposed - 1 /one/ disciplinary proceeding;
- imposed sanction "reduction of basic remuneration" - 1 /one/ disciplinary proceeding;
- 1 /one/ disciplinary proceeding was terminated
- in 2 /two/ disciplinary proceedings, the proposals to impose a disciplinary penalty were not accepted.

With a decision of the Judges' College of the SJC, the judge's "remark" imposed by order of the administrative head was confirmed.
Regarding prosecutors:
In 2021, a total of 11 (eleven) disciplinary proceedings were concluded, on which the Prosection College of the SJC ruled as follows:
- Imposed disciplinary punishment "remark" - 8 items (the Prosection College of the SJC issued decisions by which it confirmed on the basis of Art. 314, para. 4 of the Judiciary System Act, 8 (eight) orders of administrative heads to impose disciplinary punishment "remark");
- imposed disciplinary penalty "reduction of basic remuneration by 10 (ten) percent for a period of 7 (seven) months" - 1 ";
- in 2 (two) disciplinary proceedings, the collegium did not impose disciplinary punishments, having accepted that in one case the magistrate did not commit a disciplinary violation, and in the other case, due to the absence of committed disciplinary violations;

For the specified period, 4 (four) disciplinary proceedings have been suspended.

Q145 (2020): In 2020 a total of 11 / eleven / disciplinary proceedings, initiated in previous periods, have been completed, and the Judges' College of the SJC has ruled as follows:
- imposed penalty "remark"/"reprimand" - 4 / four / disciplinary proceedings /;
- imposed penalty "disciplinary dismissal" - 1 / one / disciplinary proceedings;
- 6 / six / disciplinary proceedings have been terminated.

In 2020, a total of 9 (nine) disciplinary proceedings were completed, on which the Prosecutors' College of the SJC ruled as follows:
- Imposed disciplinary sanction "remark" /"reprimand"- 4;

(The PC of the SJC has ruled, on the basis of Article 314, paragraph 4 of the JSA, on 3 (three) orders of administrative heads for imposing a disciplinary sanction "remark", and 1 (one) disciplinary proceedings on the list of the Supreme Judicial Council was completed with a decision of the PC of the SJC to impose a disciplinary sanction "remark"/"reprimand")
- 2 (two) disciplinary proceedings have been terminated due to dismissal of the magistrate and death of the magistrate;
- in 2 (two) disciplinary proceedings the college did not impose disciplinary sanctions by assuming that in one case the magistrate had not committed a disciplinary violation,and, on the other, that the subjective element of the infringement was missing, since the magistrate could not understand the nature and significance of what had committed and direct his actions during the period in which the acts had been committed;
- imposed disciplinary sanction "reduction of the basic salary by 20 percent for a period of one year" -1.

Q145 (2018): Transfer to another geographical (court) location- in our legal system there is no such sanction, but it's possible the position downgrade to lead to transfer to another geographical (court) location. For 2018 there are no such cases.

Q145 (2016): There are imposed sanctions "reprimand" and "removal from post of administrative head and deputy administrative head". The disciplinary proceedings initiated in previous years have been completed. "Suspension" is possible when a judge, prosecutor or investigating magistrate is constituted as a party accused of a publicly prosecutable offence but it is not a disciplinary sanction.

Q145 (2014): For 2014, the category "other" subsumes the following disciplinary sanctions: reprimand, demotion in rank at the same judicial system body for a term of one to three years, relief from office as administrative head or deputy of an administrative head.

Q145 (2012): For 2012, the category "other" subsumes the following disciplinary sanctions: remark and reprimand.

Q148 (2019): With a comment that legal advisors, other legal educated staff at institutions, businesses, legal entities and sole traders who are hired employees represent only their employer in court ("as a client")

Q148 (2018): With a comment that legal advisors, other legal educated staff at institutions, businesses, legal entities and sole traders who are hired employees represent only their employer in court ("as a client").

Croatia

Q004 (2021): Average monthly gross salary for 2021 for person in paid employment in legal entities in the Republic of Croatia is available at web page of the Croatian Bureau of Statistics (https://podaci.dzs.hr/2021/en/10583).
This monthly gross salary (9599 Croatian Kuna) has been multiplied by 12 and then divided by Croatian Kuna / Euro average annual medium exchange rate published by the Croatian National Bank (7,52418 Croatian Kuna for 1 Euro; this information is available at https://www.hnb.hr/temeljne-funkcije/monetarna-politika/tecajna-lista/tecajna-lista.)

Q046 (General Comment): In the total number of judges, only data on actually working judges is presented (the total does not include judges on unpaid leave; judges on maternity leave; judges suspended after the disciplinary procedure; judges transferred to other State bodies- for example to Ministry of Justice or Judicial Academy). Moreover, two judges working half-time (for the reason of care for a child with special needs) are counted as 1 judge. Data refer to all judges: presidents of courts, judges authorised to perform judicial administration and judges.

Q046 (2018): Source: Ministry of Justice of the Republic of Croatia
The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

Q046 (2017): The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

Q046 (2016): Source: Ministry of Justice of the Republic of Croatia
The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

Q046 (2015): The Republic of Croatia submits now correct numbers of professional judges sitting in courts for previous cycles (2013 and 2014), because in the previous cycles this number did not include court presidents, while there were excluded in the separate questions. Therefore, the correct numbers for these cycles is now provided.

Q046 (2014): In 2014, the number of professional judges in first instance courts includes judges of municipal, commercial, administrative and misdemeanour courts. The number of judges in second instance courts includes judges of county courts, the High Commercial Court, the High Misdemeanour Court and the High Administrative Court. The number of 3rd instance judges refers to the Supreme Court. Four first instance administrative courts became operational in 2012, while the Administrative Court of the Republic of Croatia became the High Administrative Court.

Q046-2 (General Comment): The difficulty to provide the data lays in mixed specialization of judges in courts, so exact data cannot be extracted.
Q052 (General Comment): The total number of non-judicial staff is a result of a deduction and subsumes only actually working staff. Thus, the total does not include staff on unpaid leave; staff on maternity leave; staff suspended after disciplinary procedures; staff transferred to other State bodies (for example the Ministry of Justice or Judicial Academy). Besides, two non-judicial officials working half-time (for the reason of care for a child with special needs) are counted as 1 non-judicial official. The reason for fluctuation and differences in the number of Rechtpflegers in Republic of Croatia is that they work for 2 years, then prolonged 5 years and then they get a permanent post or not.

Q052 (2015): The Republic of Croatia submits correct numbers of non-judge staff who are working in courts for previous cycles (2012, 2013 and 2014), because in the previous cycles this number included the staff working for public prosecutors. Therefore, the correct numbers for these cycles are now provided.
Q052 (2014): In 2013, the number of "Rechtspfleger" included judicial advisors because they work autonomously on cases, on the one hand, and staff who are not judges, but who can enact decisions (land registry officials and court registry officials), on the other hand. In 2014, the interpretation changed and judicial advisors were moved to the category "non-judicial staff whose task is to assist the judges", since they work autonomously but their decision must be signed by a judge.

Q052 (2013): The variations between 2012 and 2013 in respect of certain sub-categories are due only to a different methodology of classification. The total is slightly different for the two years.
Q055 (General Comment): The provided data encompasses all officials in the public prosecutors' offices, including heads of the public prosecutors' offices (the Public Prosecutor of the Republic of Croatia, county and municipal public prosecutors, the head of the Bureau for Combating Corruption and Organised Crime) and all public prosecutors deputies. The number of prosecutors at the first instance level includes all municipal public prosecutors, their deputies, as well as the head of the Bureau for Combating Corruption and Organised Crime and his deputies. The number of prosecutors at the second instance (court of appeal) level includes all county public prosecutors and their deputies. The number of prosecutors at the Supreme Court level includes the Public Prosecutor and his deputies.

Q055 (2018): The above information includes all officials in the public prosecutor's offices – all public prosecutors (heads of prosecution offices) and public prosecutors' deputies (deputies of the Public Prosecutor, deputies of the Head of the Bureau for Combating Corruption and Organised Crime and deputies of the county and municipal public prosecutors).
The number of prosecutors at the first instance level includes all municipal public prosecutors (heads of municipal prosecution offices and Head of the Bureau for Combating Corruption and Organised Crime), their deputies, as well as the deputies of the Head of the Bureau for Combating Corruption and Organised Crime. The number of prosecutors at the second instance level (court of appeal) includes all county public prosecutors (heads of the county prosecutors' offices) and their deputies. The number of prosecutors at the supreme court level includes the Public Prosecutor General and his deputies.

Q055 (2012): In 2012, the public prosecutors' Office of the Republic of Croatia employed 21 officials. The county public prosecutors' offices employed 155 officials, and the municipal public prosecutors' offices employed 410 officials. Out of 617 officials, 385 or 62.4% were women. The number of officials remained the same as in 2011. As of 31 December 2012, 7 public prosecutor's posts and 130 deputy public prosecutor's posts were vacant.
Q132 (2021): Salaries of judges and other judicial officials are determined by multiplying the base for calculating the salary by the coefficient for a particular official, which are proscribed by the Judges' and other Judicial Officials' Salaries Act (Official Gazette No. 10/99, 25/00, 01/01, 30/01, 59/01, 114/01, 116/01, 64/02, 153/02, 154/02, 17/04, 08/06, 142/06, 34/07, 134/07, 146/08, 155/08, 39/09, 155/09, 14/11, 154/11, 12/12, 143/12, 100/14, 147/14, 120/16, 16/19). Determined salaries are increased by 0.5% for each completed year of service, by a maximum of 20%.

Q132 (2020): Salaries of judges and other judicial officials are determined by multiplying the base for calculating the salary by the coefficient for a particular official, which are proscribed by the Judges' and other Judicial Officials' Salaries Act (Official Gazette No. 10/99, 25/00, 01/01, 30/01, 59/01, 114/01, 116/01, 64/02, 153/02, 154/02, 17/04, 08/06, 142/06, 34/07, 134/07, 146/08, 155/08, 39/09, 155/09, 14/11, 154/11, 12/12, 143/12, 100/14, 147/14, 120/16, 16/19). Determined salaries are increased by 0.5% for each completed year of service, by a maximum of 20%.

Q132 (2012): Due to the different calculation of tax rates and changes in the amounts of tax reliefs, there is a difference between calculation of salaries in 2010 and 2012.
Q133 (2019): Additional benefits was recently introduced by the Law amending the Law on Salaries of Judges and Other Judicial Officials (Official Gazette 16/19).
Q144 (General Comment): Pursuant to the State Judiciary Council, disciplinary offences are: careless performance of judicial office; failure to act pursuant to a decision regarding the right to trial within a reasonable time; performance of any other service or job incompatible with a judicial function; performance of any service, tasks or activities incongruent with judicial office; causing of disruptions in the work of a court which have a significant impact on the exercise of judicial power; disclosure of an official secret concerning the performance of judicial office; damaging of the reputation of the court or of judicial office in any other way; failure to submit a declaration of assets or the untruthful presentation of data in the declaration of assets; failure to subject to the physical and mental evaluation in order to assess the ability to perform judicial duties.

Q144 (2021): One disciplinary proceeding against a judge because of damage to the reputation of the court.

Q144 (2020): Two disciplinary sanctions against judges because of damage to the reputation of the court.

Q145 (2016): Conditional dismissal

Q145 (2014): In 2014, the following disciplinary sanctions have been declared against judges for committed disciplinary acts: suspended sentences of dismissal from office (5), reprimand (1), temporarily salary reduces (11). In 2 cases, disciplinary proceedings ended with a dismissal, while 3 ended with an acquittal.
In 2014, 2 disciplinary sanctions have been declared against State attorneys for the committed disciplinary acts: one relating to the disciplinary proceeding initiated in 2014 and the second relating to the disciplinary proceeding initiated in 2013, which ended in 2014. For this reason, the number of sanctions imposed in 2014 increased in comparison to the number of disciplinary proceedings initiated in 2014.

Q147 (2020): Not applicable

Q148 (2020): Not applicable

Cyprus

Q046 (General Comment): Cyprus has a two tier system. The Supreme Court is the second and final instance court. All judges of the Supreme Court hear appeals.
Q046 (2020): Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.
Q046 (2015): From 2014, following the retirement of male judges at last instance, female judges were appointed.

Q046-2 (General Comment): Cyprus has a two-tier system; therefore, the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court is included in the second instance cases (questions 97 and 98).

Q046-2 (2021): All 13 Supreme court judges hear all cases. District court judges are dealing with criminal and civil cases, and they were previously included in the 'Other' cases. We have now limited this to judges of special jurisdiction courts.

Q046-2 (2020): This includes the supreme court judges who deal with all types of cases, first instance family court judges, labour court judges, rent control court judges and military court.
Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.

Q052 (General Comment): The total number of non-judge staff includes clerical staff and also court bailiffs.

Q052 (2021): court baillifs

Q052 (2020): Other non-judge staff includes court bailiffs. Differences in number of staff compared to previous year come from new appointments and retirements.
Q052 (2018): Court bailiffs are included in category Other.

Q052 (2017): court bailiffs

Q052 (2016): court bailiff
in 2014 the correct number for male no judge staff assisting the judge should be 9
Question 52: if we change the number of male non judge staff assisting the judge for 2014 from 23 to 9, we must also change the number of non-judge staff assisting judges from 143 to 129 and also the total from 462 to 448. Do you agree on up-dating in this way 2014 data in order to ensure the consistency of the table? the numbers for 2014 must also be changed

Q052 (2015): Between 2014 and 2015, there was a change in the distribution of non-judge staff. In 2014, in the category "staff in charge of administrative tasks", only the number of high-level administrative staff was included. The other administrative staff were included in the category "other non judge staff". Whereas in 2015, all administrative staff were included in the category "staff in charge of administrative tasks". This change of distribution leads to significant variations.

Q052 (2014): Variations concerning data on different categories of non-judge staff are due to different methodology of presentation of data used for 2014 and the previous evaluations.
Q052-1 (2021): Positions that were vacant had been filled.

Q052-1 (2020): Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.
Q052-1 (2018): The Court of Appeal is also the Supreme Court

Q055 (2020): The number includes also legal advisors to the Attorney General's office.
The number increased because more positions of prosecutors were approved.
Q055 (2014): All prosecutors appear before all courts.

Q060 (2021): In 2021, a significant number of public prosecutors were appointed, as new posts have been approved and vacant posts have been filled.
Q060 (2020): trainees are not included

Q145 (2014): In 2014, there were no sanctions pronounced against judges.

Q147 (2018): This figure represents the Lawyers who are registered and have a license for registering practicing advocates

Q147 (2017): the lawyers who do not renew their license are not included in this number

Czech Republic

Q004 (2021): The gross salary is constantly growing.

Q004 (2020): The gross salary is constantly growing.

Q004 (2019): Positive trends in Czech economy and the exchange rate have had an influence on the rise of average gross annual salary (in €).

Q004 (2016): The Czech economy is doing well + the exchange rate.

Q046 (General Comment): The Czech Republic has a four-tier system. The number of judges of the two High Courts is included in the number of second instance judges. This methodology of presentation of data is applied since 2013, while for the previous evaluations, magistrates of the High Courts were considered as third instance judges.

Q046 (2016): The Czech Republic has a four-tier system. The number of judges of the two High Courts is included in the number of second instance judges.

Q046-2 (2021): Insolvency proceedings and Guardianship proceedings

Q046-2 (2020): Insolvency Proceedings

Q052 (General Comment): The category “other” encompasses for 2010 judicial trainees or staff in charge of court documentation. For 2012, 2013 and 2014, besides the already mentioned components, it subsumes also press centre and telephone exchange.
The judicial trainee is entitled to perform the acts of the court under the conditions and to the extent specified in factual and time plan of the preparatory service which is compiled by the chairman of the regional court after consultation with the advisory board for the education of trainees. The plan must be focused in such a way that the training for the performance of the function of a judge serves in particular to:
a) deepening the trainee's professional knowledge of substantive and procedural law,
b) developing the trainee's ability to apply legislation in a specific matter,
c) gaining knowledge of individual agendas maintained by courts and their implementation,
d) acquisition of procedural procedures and habits necessary for the performance of the function of a judge,
e) acquaintance with ethical principles related to the performance of the function of a judge.
In accordance with the preparatory service plan, the trainee performs preparatory service at a district or regional court. The trainee is usually assigned to one judge. Familiarization with individual court agendas is ensured by the fact that the president of the court where the judicial trainee is currently located gradually assigns the trainee to individual court departments.
The preparatory service includes adaptation courses, seminars and lectures organized by the Judicial Academy and educational activities organized by court for at least 2 days per month.
Nowadays, there are few judicial trainees and in 2022 the title will be replaced by a „judicial candidate“.

Q052 (2017): Other - judicial trainees, staff in charge of court documentation, press centre and telephone exchange.

Q052 (2016): Other - judicial trainees, staff in charge of court documentation, press centre and telephone exchange.

Q052 (2015): In 2015, compared to 2014, the number of non-judge staff increased due to a project financed from the European social fund and state budget: “Project on improvement of the efficiency of courts by strengthening of the administrative capacities”. The project is running until 30th December 2015.

Q052 (2014): In 2014, the number of non-judge staff increased due to a project financed from the European social fund and State budget: “Project on improvement of the efficiency of courts by strengthening of the administrative capacities”. The project is running until 30th December 2015.

Q055 (General Comment): The Czech Republic is endowed with a system of 4 levels of State prosecution offices: district, regional, high and supreme. The number of high public prosecutors is included in the number of prosecutors at second instance level.

Q132 (2020): the salaries have risen generally + exchange rate

Q132 (2012): In 2012, the salary of public prosecutors was increased in order to bring it closer to the judges’ salary.

Q133 (2018): Judges and prosecutors are entitled to obtain housing only if they are temporarily transferred to another court/prosecution office.

Q133 (2016): Judges and prosecutors are entitled to obtain housing only if they are temporarily transferred to another court/prosecution office.
Q144 (2021): Other: Judges:
- professional incompetence
Prosecutors:
- alcohol consumption

Q144 (2020): alcohol consumption

Q145 (2021): Other:
Judges:
1 discharging from sanction
1 acquittal of disciplinary charges
1 discontinuance of disciplinary proceeding
3 proceedings are not finished.
Prosecutors: 1 acquittal of disciplinary charges

Q145 (2018): Other:
Judges:
1 acquittal of disciplinary charges
2 discontinuance of disciplinary proceeding
1 dismissal of a motion for a new trial
2 proceedings are not finished.
Prosecutors: 1 acquittal of disciplinary charges
1 discontinuance of disciplinary proceeding

Q145 (2016): Judges:
1 removing a judge from the office
1 acquittal of disciplinary charges
1 discharge from disciplinary punishment 5 discontinuance of disciplinary proceeding
3 proceedings are not finished.
Prosecutors: 2 acquittal of disciplinary charges.

Q145 (2014): In 2014, the following other disciplinary sanctions have been pronounced against judges: 2 discharges from disciplinary punishment; 1 acquittal of disciplinary charges; 6 discontinuances of proceedings. As for public prosecutors, there were 1 acquittal of disciplinary charges and 3 discharges from disciplinary punishment.

Q145 (2012): In 2012, the following other disciplinary sanctions have been pronounced against judges: 2 discharges from disciplinary punishment; 4 acquittals of disciplinary charges; 12 discontinuances of proceedings. As for public prosecutors, there were 5 acquittals of disciplinary charges and 7 discharges from disciplinary punishment.

Q146 (2020): Data to: 31.12.2020

Q146 (2018): Data to: 31.12. 2018

Q146 (2017): There are 11587 active lawyers and 1496 inactive.

Q146 (2015): From the above mentioned number of lawyers there are 11011 active practising and 1289 temporary inactive.

Q146 (2013): In 2013, 10 255 lawyers are practicing in an active manner, while 1 141 lawyers discontinued their practicing.

Q147 (2016): There are no legal advisors (as decribed in the question above) in the Czech Republic.

Q148 (2016): There are no legal advisors (as decribed in the question 147) in the Czech Republic.

Denmark

Q046 (2017): The figures above show the numbers of appointed judges in the Danish judicial system. Thus, the figures also include the Court of Greenland, the High Court of Greenland and the court of the Faroe Islands.
Q046-2 (General Comment): We cannot answer this question by case type as all judges make decisions in all types of cases in Denmark.
Q052 (2020): -

Q052 (2019): information NA

Q052 (2017): "other non judge staff" - in 2017 there was no staff to fit into this category.

Q052 (2016): The 2016 data on the number of rechtspflegers is correct. The discrepancy that occurs compared to 2014 data is due to a mistake in the 2014 numbers.
Q052-1 (2020): -

Q055 (General Comment): The public prosecutors are the Director of Public Prosecutions, the state prosecutors, the police directors as well as the persons who are assumed to assist them in the judicial processing of criminal cases.
Organizationally, the Prosecution Service consists of the Director of Public Prosecutions and state prosecutor's offices (central prosecution service) with associated police districts (local prosecution service).
The Director of Public Prosecutions and selected employees appear before the Supreme Court. At the end of 2021, 58 prosecutors were employed at the Director of Public Prosecutions office. 6 of them appear before the Supreme Court. The Director of Public Prosecutions is superior to the other public prosecutors and supervises them and handles complaints about decisions made by the state prosecutors office as the first instance. The state prosecutors' offices appear before the high courts (second instance – court of appeal). The state prosecutors supervise the police directors' handling of criminal cases and handle complaints about decisions made by the police directors regarding criminal prosecution.
The directors of police and the public prosecutors who are employed by them appear before the district courts.
The number is the actual number of employees in full-time equivalent as of December 2021. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2021 and scaled up to a full year. The actual numbers of full-time equivalents are calculated as digitals numbers which is not possible to add in the questionnaire. This is why the total number of prosecutors does not add up when compared to the number of males and females.

Q055 (2021): The number is the actual number of employees in full-time equivalent as of December 2021. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2021 and scaled up to a full year. The actual numbers of full-time equivalents are calculated as digitals numbers which is not possible to add in the questionnaire. This is why the total number of prosecutors does not add up when compared to the number of males and females.

Q055 (2016): The observed discrepancies are due to ordinary changes in staffing.

Q055 (2014): The variations over the period 2012-2014 are due to the fact that in 2012, information was missing about prosecutors engaged in tasks concerning administrative cases (Ledelsessekretatiat) and prosecutors employed by the national police (Rigspolitiet).

Q060 (General Comment): In Denmark, the staff attached to the public prosecution service (non-public prosecutors) are shared between the police and the prosecution offices (first instance level).

Q060 (2021): The number is the actual number of employees in full-time equivalent as of December 2021. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2021 and scaled up to a full year. The actual numbers of full-time equivalents are calculated as digitals numbers which is not possible to add in the questionnaire.

Q060 (2020): In 2020, lawyers and police personnel attached to the Prosecution Service are included in the figures.

Q060 (2018): The staff attached to the public prosecution service (non-public prosecutors) are shared between the police and the prosecution offices (first instance level).

Q132 (General Comment): We are not able to inform the net salary. The Danish tax system is progressive. That means that the percentage of tax depends on the income and the municipal tax varies from municipality to municipality.

Q132 (2021): The annual salaries are specified without pension. The annual salary for a Public prosecutor of the Supreme Court or the Highest Appellate is specified based on the average salary for Senior Prosecutors, Special Prosecutors and the Deputy State Prosecutor at The Supreme Court Unit with the Director of Public Prosecutions.

Q144 (2021): Decorum

Q144 (2018): Of the two disciplinary proceedings mentioned regarding judges; one was against a judge and the other was against a deputy judge.
Of the five disciplinary proceedings mentioned regarding prosecutors as "other"; includes 3 breaches of personal data due to loss of documents / files (2) and loss of work computer (1) that was left in court by mistake. Furthermore, it includes incorrect registration of working hours (1) and unacceptable communication with co-workers and leader (1).

Q145 (2018): Of the two sanctions mentioned regarding judges; one was against a judge and the other was against a deputy judge.
Of the 9 sanctions mentioned regarind prosecturs as other: 2 cases are yet to be resolved. 7 cases were resolved by a meeting between Human Resources and the employee. The meetings were not a reprimand (disciplinary), however the importance of preventing a similar incident in the future was emphasized. The minutes of the respective meetings have been made part of the personal file of the individual employees.

Q145 (2016): Prosecutors: In the reference years, there have been two disciplinary proceedings initiated against public prosecutors, but there have not yet been any sanctions pronounced against public prosecutors.

Q146 (2021): The figures given above are the number of lawyers at the end of 2021.

Q146 (2013): The 2013 data corresponds to the statistical data for September 2014.

Q146 (2012): The 2012 data does not include assistant attorneys.

Q147 (2019): License to practice as an "advokat" is mandatory in Denmark.

Q148 (2019): This number include lawyers who have deposited their Danish license to practice as a lawyer. The number is limited to persons born after the 1st of October 1954. Please note that all lawyers have a degree in law (cand.jur), but to practice law in Denmark as an "advokat", lawyers need a license. Lawyers without a license are not included in the number.

Estonia

Q004 (2020): Inflation

Q004 (2018): There is no specific reason.

Q046 (2014): In 2014, one male judge left and a female judge was appointed.

Q046 (2012): In 2010, there were 3 female professional judges at the Supreme Court. At the beginning of 2012, one female judge became the judge representing Estonia in the European Human Rights Court.

Q046-2 (2020): In the first instance we don't have judges formally seperated as criminal or civil judges.

Q052 (2020): Trainees are not included in the numbers provided for Q52 and Q52-1.

Q052 (2019): Court interpreters are in the category "other non-judge staff".

Q052 (2018): Court interpreters are in the category "other non-judge staff".

Q052 (2017): The increase in the number of male staff in charge of administrative tasks is due to the general movement of personnel.
"Other non-judge staff": Court interpreters.

Q052 (2016): The observed variations in the numbers with regard to the different sub-categories are due to a general movement of staff.

In 2015, a reform of the Land Registry and Registration Department was carried out, during which the four districts were brought together registry and land registry departments to the Tartu County Court, thus establishing one land registry department and one registry office. The reform involved significant optimization of work processes and dossiers which resulted in the reduction of staff working in the registers. The objectives and results of the reform were largely achieved because registries are kept electronically, and individuals can largely interact with the registers, transmit and receive documents receive electronically.

Q052 (2015): The number of technical staff has been decreasing due to redundancies in the Registration and Land Registry Departments. The project of court lawyers was carried out having in mind that the Registration and Land Registry departments are fully digital. Therefore there is a possibility to decrease the number of technical staff.

Q052 (2014): A pilot project has been introduced in 2013 in one county court consisting in providing each judge with a personal legal assistant. After the first year of the pilot project, the average proceeding times in civil cases in that particular court dropped from 201 days to 160 days; after the second year the average proceeding times dropped further to 132 days. In 2015, the project has been extended to all first and second instance courts.

Q052 (2013): Since 2013, the second category includes a new position among court staff – judicial clerks. They assist judges in the administration of justice, participating in the preparation of court cases or in court proceedings. They replace step by step former consultants. There is one judicial clerk for every judge. In 2013, the reform was implemented in the largest court of general jurisdiction as a pilot (Harju County Court). In 2015,it was extended to all first and second instance courts.

Q052 (2012): The overall number of court staff has not changed much during the last years: 976 (2010), 957 (2012) and 990 (2013). Differences in figures in the sub-categories are due to the different categorization of court staff.

Q055 (General Comment): The categorization of questions 55 and 56 regarding public prosecutors do not exist in Estonia.

Q060 (2020): More males have been hired.

Q132 (2020): Since 2010 the salary of prosecutors depends of the salary of the President and is indexed by 1 April of each calendar year. In 2018 the salary system of public prosecutors changed and with that the smallest salaries increased the most.

Q132 (2019): Since 2010 the salary of prosecutors depends of the salary of the President and is indexed by 1 April of each calendar year. In 2018 the salary system of public prosecutors changed and with that the smallest salaries increased the most.

Q132 (2012): The salary of judges was increased on 1 January 2013.

Q133 (2012): On the occasion of the 2012 evaluation, it has been stressed that the salary of judges was increased on 1 January 2013. On the same time, the special pension was abolished for judges who are appointed to office after 30 June 2013, while judges appointed to office before 1 July 2013 retain their special pension.

Q145 (2012): In 2012, one disciplinary proceeding against a judge was initiated but the sanction was not pronounced in 2012.

Q148 (General Comment): Data on the number of legal advisors who cannot represent their clients in court is not collected.

Finland

Q004 (General Comment): Source: Structure of Earnings, Statistics Finland
https://pxweb2.stat.fi/PxWeb/pxweb/en/StatFin/StatFin__pra/
Q004 (2021): Preliminary information: salary in 2020 multiplied by the annual percentage change in the earnings level index 2021q4
Q004 (2020): In 2020, the average gross annual salary was EUR 3 595 per month.

Q004 (2019): In 2019, the average gross annual salary was EUR 3528 per month.

Q004 (2018): In 2018, the average gross annual salary was EUR 3465 per month. Correspondingly, the median was EUR 3079 per month. The most common monthly earnings of all full-time wage and salary earners was EUR 2600 per month.

Q046-2 (General Comment): We do not have statistic of the amount of the civil and/ or commercial and criminal judges in the general courts as in many courts judges work in both types of cases. In Market Court, there are 21 judges who are civil/commercial judges.
Q052 (General Comment): The Finnish court staff organisation does not correspond to the CEPEJ subcategories. Therefore, only the total of non-judge staff can be provided for the question 52. Office staff has tasks mentioned in the categories 2-5. Summoners' tasks are for example to serve summons, subpoenas and other documents. Trainee judges have the same responsibility as judges but they do not have competence to deal with difficult cases. They are always appointed for a fixed term period (one year). In the courts of appeal, the
administrative courts, the Supreme Court, the Supreme Administrative Court, the Labour Court and the Market Court a referendary prepares and presents a case to the judges but the final judgment is decided by the judges. The tasks of trainee judges and referendaries correspond to the categories 1 and 2.

Q052 (2021): The total non-judge staff includes office staff 1530, summoners 269, trainee district judges 131 and referendaries 278. 1. “Rechtspfleger (or similar bodies)”: The senior judge of a district court may appoint in writing a member of the office personnel at the district court who has given an affirmation corresponding to the judge’s affirmation, who has received sufficient training and who has sufficient skills to attend to the duties: (1) in cases referred to in Chapter 5, section 3 of the Code of Judicial Procedure: (a) to give judgments by default; (b) to give, on the basis of Chapter 21, section 8(c) of the Code of Judicial Procedure, decisions and judgments on court costs, if the respondent has conceded the claim; (c) to decide on the staying of an action if the plaintiff
has withdrawn the action and the respondent does not call for a decision in the case; (2) to decide on applications for divorce on the basis of section 25, subsection 1 of the Marriage Act (234/1929) if both spouses are domiciled in Finland. If the case to be decided by office personnel, as referred to in subsection 1, proves to be extensive, subject to interpretation or otherwise difficult to decide, the case shall be transferred for a decision of a notary or a legally trained judge at the district court. The chief judge of a district court may appoint in writing a member of the office personnel at the district court who has sufficient skills, to issue summons and certificates, to effect service of documents and to attend to other duties connected to the preparation, consideration or enforcement of administration of justice matters. Before taking such tasks the staff member must give an oath. (Courts Act, Chapter 19, Section 6).

Q052 (2020): The total non-judge staff includes office staff 1477, summoners/process serves 273, trainee district judges 137 and referendaries 275. 1. “Rechtspfleger (or similar bodies)”: The senior judge of a district court may appoint in writing a member of the office personnel at the district court who has given an affirmation corresponding to the judge’s affirmation, who has received sufficient training and who has sufficient skills to attend to the duties: (1) in cases referred to in Chapter 5, section 3 of the Code of Judicial Procedure: (a) to give judgments by default; (b) to give, on the basis of Chapter 21, section 8(c) of the Code of Judicial Procedure, decisions and judgments on court costs, if the respondent has conceded the claim; (c) to decide on the staying of an action if the plaintiff has withdrawn the action and the respondent does not call for a decision in the case; (2) to decide on applications for divorce on the basis of section 25, subsection 1 of the Marriage Act (234/1929) if both spouses are domiciled in Finland. If the case to be decided by office personnel, as referred to in subsection 1, proves to be extensive, subject to interpretation or otherwise difficult to decide, the case shall be transferred for a decision of a notary or a legally trained judge at the district court. The chief judge of a district court may appoint in writing a member of the office personnel at the district court who has sufficient skills, to issue summons and certificates, to effect service of documents and to attend to other duties connected to the preparation, consideration or enforcement of administration of justice matters. Before taking such tasks the staff member must give an oath. (Courts Act, Chapter 19, Section 6).

Q052 (2019): The total non-judge staff includes office staff 1455, summoners 267, trainee district judges 135 and referendaries 271

Q052 (2018): The total non-judge staff includes office staff 1435, summoners 263, trainee district judges 136 and referendaries 297.

Q052 (2017): Office staff 1440, summoners 263, trainee judges 122, referendaries 312

Q052 (2016): office staff 1473, summoners 248, trainee district judges 136, junior district judges 1, referendaries 312

Q052 (2015): office staff 1428, summoners 265, trainee district judges 138, junior district judges 5, referendaries 309

Q052 (2014): For the 2014 exercise the total of 2 161 subsumes 1 434 office staff, 266 summoners, 136 trainee district judges, 7 junior district judges and 318 referendaries.

Q052 (2013): For 2013, the total of 2 196 subsumes 1445 office staff, 265 summoners, 133 trainee district judges, 7 junior district judges, 346 referendaries.

Q052 (2012): For 2012, the total of 2 214 subsumes 1447 office staff, 264 summoners, 129 trainee district judges, 9 junior district judges, 365 referendaries.

Q055 (General Comment): The National Prosecution Authority comprises the Office of the Prosecutor General that acts as the general administrative unit, and five prosecution districts: Southern Finland, Western Finland, Northern Finland, Eastern Finland and Åland. The National Prosecution Authority has 34 offices around Finland. The Prosecutor General is the supreme prosecutor and the head of the prosecution service. The Prosecutor General directs and develops prosecutorial activity by issuing general instructions and guidelines to the prosecutors. She/he also appoints district prosecutors. The Prosecutor General may take over a case from a prosecutor, but cannot order a prosecutor to decide the case in any given manner. She/he can also self-decide on the bringing of charges and designate a prosecutor to pursue the case in the courts. The Deputy Prosecutor General decides the matters in his/her competence on the same authority as the Prosecutor General. He/she also acts as a deputy for the Prosecutor General when necessary. For regular prosecutorial tasks, the Office of the Prosecutor General has state prosecutors whose jurisdiction covers the entire country. Most criminal matters (89 256 cases annually) are dealt with by the prosecution areas. The Office of the Prosecutor General deals mainly with criminal cases with wider significance to society as a whole, a few dozen every year. Prosecutors in Finland are not bound on Court instances, and every prosecutor is expected to, in a normal situation, to handle and prosecute the criminal case all the way to the Supreme Court, if needed.

Q055 (2020): Prosecutors in Finland are not bound on Court instances.

Q060 (2021): In 2021, more staff was hired.

Q060 (2018): More staff has been recruited.
The number of males has increased.

Q132 (General Comment): In Finland, there are several salary categories for judges. The salary depends also on the years of work experience. At the end of 2021 first instance judge is in a salary category T11 in which the gross salary is from 4847,68 €/month to 6301,98€/month depending on his/her experience. A permanent first instance judge has usually at least nine years of work experience which means the salary is 5918,33 €/month. In Finland, the taxation is progressive so the information on net salary varies from person to person and is not available. Prosecutors in Finland are not bound on Court instances.

Q132 (2020): Prosecutors in Finland are not bound on Court instances.

Q132 (2016): In Finland there are several salary categories for judges. The slary depends also on the experience. A first instance judge has a category of T 11 for which the gross salary is from 4501,79 €/month to 5627,24 €/month depending on his/her experience. A permanent 1st instance judge has usually at least 9 years experience which means the salary is 5177,06 €/month. In Finland we have progressive taxation so the information on net salary is not available.

Q144 (General Comment): In Finland, anyone who suspects that a public authority or an official has not observed the law or failed to perform a duty may file a complaint with the Ombudsman or with the Chancellor of Justice. Anyone can complain in a matter concerning themself, but a complaint can also be made on behalf of someone else. Most of the complaints initiating disciplinary proceedings do not call for any action. Accordingly, there is a considerable difference between the number of initiated disciplinary proceedings and the number of sanctions.

Q144 (2021): Judges: The Parliamentary Ombudsman's office registered 254 new proceedings. However, the Parliamentary Ombudsman compiles their statistics slightly differently. Cases that relate to, for example, tax cases in administrative courts, dept recovery proceedings in the district courts, cases in Insurance Court and land cases are filed under the relevant substance matter and not court cases. Therefore, the Ombudsman handles more court related cases that it statistically looks. The Chancellor of Justice received 237 complaints against the general courts, 50 against the administrative courts and 19 against the specialist courts. So in total he received 306 complaints. He also randomly checked 3 930 criminal judgments, out of which 65 were looked at more closely. In addition, he received 31 notifications of suspected crime in office related to a judge. In addition, on his own initiative, he looked into 2 cases related to conduct of the court. Prosecutors: The Parliamentary Ombudsman's office registered 107 new proceedings in 2021. However, the Parliamentary Ombudsman compiles their statistics slightly differently and some cases that relate also to prosecutors are filed under the police or court cases. Chancellor of Justice received 85 complaints against the prosecutors in 2021.

Q144 (2020): Judges: The Parliamentary Ombudsman's office registered 257 new proceedings. However, the Parliamentary Ombudsman compiles their statistics slightly differently. Cases that relate to, for example, tax cases in administrative courts, dept recovery proceedings in the district courts, cases in Insurance Court and land cases are filed under the relevant substance matter and not court cases. Therefore, the Ombudsman handles more court related cases that it statistically looks. The Chancellor of Justice received 274 complaints against the general courts, 67 against the administrative courts and 19 against the specialist courts. So in total he received 360 complaints. He also randomly checked 3 106 criminal judgments, out of which 43 were looked at more closely. In addition, he received 55 notification of suspected crime in office related to a judge. Prosecutors: The Parliamentary Ombudsman's office registered 96 new proceedings. However, the Parliamentary Ombudsman compiles their statistics slightly differently and some cases that relate also to prosecutors are filed under the police or court cases.
Chancellor of Justice received 163 complaints against the prosecutors.

Q144 (2018): The Parliamentary Ombudsman initiated 199 disciplinary proceedings against judges and the Chancellor of Justice 466 (out of which 356 complaints, 80 disciplinary proceedings initiated after randomly checking criminal judgments and 30 notifications from the police and the courts of appeal to the Chancellor of Justice regarding suspected criminal offences committed by judges). The category 'criminal offence' includes notifications from the police and the courts of appeal to the Chancellor of Justice regarding suspected criminal offences committed by judges. The category 'other' includes all the other cases for which exact data on which grounds they were initiated is not available.
The Parliamentary Ombudsman initiated 47 disciplinary proceedings against prosecutors , The Chancellor of Justice 101 and the Office of the Prosecutor General 37.

Q144 (2016): The number of initiated cases was 737 from which 30 was criminal offence. The category other includes all the other cases for which exact data on what ground they ware initiated is not available. Among the 737 disciplinary proceedings initiated against judges or courts, 404 were before the Chancellor of Justice and 333 before the Parliamentary Ombudsman. However, the number of complaints effectively followed by a sanction was: the Chancellor of Justice: 10, the Parliamentary Ombudsman: 10. In most of the cases no measure is taken.
Total number of disciplinary proceedings initiated against public prosecutors were 165 (The Chancellor of Justice: 91, the Parliamentary Ombudsman: 72, the Prosecutor General: 2) but the number of complaints effectively followed by a sanction was (The Chancellor of Justice: 5, the Parliamentary Ombudsman: 4, the Prosecutor General: 2) . In most of the cases no measure is taken.

Q144 (2014): In 2014, the total number of disciplinary proceedings initiated against judges or courts were 620 (376 by the Chancellor of Justice; 244 by the Parliamentary Ombudsman) but the number of complaints effectively followed by a sanction was 28. Likewise, the total number of disciplinary proceedings initiated against public prosecutors was 160 (86 by the Chancellor of Justice; 74 by the Parliamentary Ombudsman) but the number of complaints effectively followed by a sanction was 7.

Q144 (2012): In 2012, the total number of disciplinary proceedings initiated against judges or courts were 642 (372 by the Chancellor of Justice; 270 by the Parliamentary Ombudsman) but the number of complaints effectively followed by a sanction was 13. Likewise, the total number of disciplinary proceedings initiated against public prosecutors was 173 (87 by the Chancellor of Justice; 786 by the Parliamentary Ombudsman) but the number of complaints effectively followed by a sanction was 4.

Q145 (General Comment): Most of the complaints initiating disciplinary proceedings do not call for any action. Accordingly, there is a considerable difference between the number of initiated disciplinary proceedings and the number of sanctions.

Q145 (2021): Judges: The Parliamentary Ombudsman's office gave 283 decisions in 2021. Ombudsman has issued a decision with his position on the matter as well as the steps to be taken in 11 cases. One of those was a reprimand and 9 were opinion which can be either guidance (ohjaava) or reprehension (moittiva). In addition, 1 case lead to rectification (korjaus). However, the Parliamentary Ombudsman compiles their statistics slightly differently. Cases that relate to, for example, tax cases in administrative courts, dept recovery proceedings in the district courts, cases in Insurance Court and land cases are filed under the relevant substance matter and not court cases. Therefore, the Ombudsman handles more court related cases that it statistically looks. The Chancellor of Justice issued 33 reprimands and 49 instructions. In six cases he applied the Supreme Court to nullify a decision.
Prosecutors:The Parliamentary Ombudsman's office gave 105 decisions in 2021. Ombudsman has issued a decision with his position on the matter as well as the steps to be taken in 2 cases. Those were guidance (ohjaava).
Chancellor of Justice issued 2 reprimands and 1 other action. The Office of the Prosecutor General publishes summary descriptions of cases where the decision taken by a prosecutor or their action has resulted the Prosecutor General to take action. In 2021 there were 20 of such published cases. More here (in Finnish):
https://syyttajalaitos.fi/kanteluratkaisuja?tab=2020

Q145 (2020): Judges:
The Parliamentary Ombudsman's office gave 228 decisions. Ombudsman has issued a decision with his position on the matter as well as the steps to be taken in 16 cases. 12 of those were guidance (ohjaava) or reprehension (moittiva). In 2 cases he gave a recommendation (esitys) and 2 cases lead to other action (muu toimenpide). However, the Parliamentary Ombudsman compiles their statistics slightly differently. Cases that relate to, for example, tax cases in administrative courts, dept recovery proceedings in the district courts, cases in Insurance Court and land cases are filed under the relevant substance matter and not court cases. Therefore, the Ombudsman handles more court related cases that it statistically looks. Chancellor of Justice issued 22 reprimands and 29 instructions. In six cases he applied the Supreme Court to nullify a decision. He notified the Ombudsman of 14 cases concerning the courts.
Prosecutors:
The Parliamentary Ombudsman's office gave 98 decisions. Ombudsman has issued a decision with his position on the matter as well as the steps to be taken in 5 cases. Those were guidance (ohjaava) or reprehension (moittiva).
Chancellor of Justice issued 3 reprimands and 13 instructions. He transferred 1 case to the Ombudsman.
The Office of the Prosecutor General publishes summary descriptions of cases where the decision taken by a prosecutor or their action has resulted the Prosecutor General to take action. In 2020 there were 30 of such published cases. More here (in Finnish): https://syyttajalaitos.fi/kanteluratkaisuja?tab=2020

Q145 (2018): The Parliamentary Ombudsman pronounced 11 sanctions against judges and the Chancellor of Justice 36.
The Parliamentary Ombudsman pronounced 4 sanctions against prosecutors, the Chancellor of Justice 3 and the Office of the Prosecutor General 5.

Q146 (General Comment): As of 2014, only attorneys-at-law, public legal aid lawyers and licenced legal counsels are allowed to represent a client in court. In addition, in-house lawyers can represent their company in court. Lawyers working for trade unions can represent a client in a district court and in the Labour Court in disputes regarding employment relationship. Lawyers working for public authorities can represent the public authority in court.
In order to qualify as an attorney-at-law, a lawyer needs to have at least four years of work experience and must pass the demanding three-part professional qualification test known as the bar examination. The titles of attorney-at-law and attorney's office are protected by law and can only be used by lawyers accepted into the Finnish Bar Association. Attorney's offices employ also associate lawyers, that is lawyers who are not yet members of the bar.

Q146 (2021): The total number of lawyers includes 2230 attorneys-at-law, 1738 licensed legal counsels and 205 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
The total number of in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

Q146 (2020): In 2020, the total number of lawyers includes 2211 attorneys-at-law, 1664 licensed legal counsels and 212 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
The total number of in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

Q146 (2019): It is estimated that there are 16.000 people with law degree in Finland – it is no possible to provide an exact number of "legal advisors".
Approx. 4.000 lawyers can represent their clients in Court. These consist of 1631 licensed legal councels, 2177 members of the Finnish Bar Association (attorneys-at-law) and 214 public legal assistants in state legal aid offices.
The Finnish Bar Association states that 66% are men and 34% women. However, 52% of their new members are women.

Q146 (2018): In 2018, the total number of 3965 lawyers includes 2143 attorneys-at-law, 1603 licensed legal counsels and 219 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
In addition, in-house lawyers can represent their company in court. Lawyers working for trade unions can represent a client in a district court and in the Labour Court in disputes regarding employment relationship. Lawyers working for public authorities can represent the public authority in court. The total number of these in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

Q146 (2017): The total number of lawyers 3,846 includes 2,137 members of the Finnish Bar Association, 1,588 licensed lawyers and 228 public legal aid lawyers. 107 legal aid lawyers were also members of the Finnish Bar Association.

Q146 (2016): The number of lawyers indicated for 2012, 2013 and 2014 refers to members of the Finnish Bar Association who are entitled to use the professional titles advokat (advocate). Law firms (firms owned by members of the Bar) employ also associates. Besides, legal aid offices employ also legal advisers who are not all members of the Bar Association. Till 2014, jurists (persons who have a Master's Degree in law) could offer similar legal services than members of the Bar. From the beginning of the year 2014, only advocates, public legal aid attorneys and counsels who have obtained the license referred to in the Licensed Counsel Act are allowed to represent a client in the court.
In 2016,the total number of lawyers 3,791 includes 2,119 members of the Finnish Bar Association, 1,540 licensed lawyers and 229 public legal aid lawyers (97 public legal aid lawyers are also members of the Finnish Bar Association). Only members of the Finnish Bar Association are entitled to use the professional title "advocate".

Q147 (2019): The Association of Finnish Lawyers, which is the only association in Finland for all lawyers, has approximately 16.000 members. 55% of their lawyer members are women, and 57% of the student members are women. (https://www.lakimiesliitto.fi/liitto/jasenet/)
Q148 (2018): The exact number of legal advisors who cannot represent their clients in court is not available.

France

Q004 (2021): The exact data are 37 742,7

Q004 (2020): The exact figure is 34,494.5_x000D_
Source INSEE
Q046 (2021): Data taken from an extraction of the LOLFI SIRH - Number of professional judges on 31/12/2021. The values are expressed in FTEs. Source DSJ
Administrative justice data: 1. total number of professional judges at first instance: 899(463 men, 436 women); 2) Number of professional judges in the courts of appeal (2nd instance): 304 (163 men, 141 women); 3. number of professional judges in the Supreme courts: 128 (81 men, 47 women). 1+2+3. Total number of professional judges: total 1331 (707 men, 624 women).
The figures are expressed in physical numbers as at 31/12/2021. The members of the National Court of Asylum (CNDA) and the Paid Parking Litigation Commission (Commission du contentieux du stationnement payant) are counted under the first instance.
Source: Council of State
The gender distribution is based on the number available in FTE for all professional judges except for administrative judges for whom the distribution is available in FTE only for the total.

Q046 (2020): "Here are the details:
With respect to the judiciary. The data are expressed in full-time equivalent. These figures concern only judges (and not paralegals) who sit in court (magistrates seconded to the central administration are not counted). In the table above, the figures have been rounded up when the decimal is greater than or equal to 0.5:
Total number of professional judges: total 6177.9; men 1725.5; women 4452.4
1. Number of first instance professional judges: total 4378.6; men 1133.7; women 3244.9
2. Number of second instance professional judges : total 1577.8; men 503.8; women 1074
3. Number of Supreme Court professional judges : total 221.5; men 88; women 133.5
Source: LSB
For the administrative order, the data include the National Court of Asylum (CNDA) and the Commission du contentieux du stationnement payant (CCSP). In FTE, only the total is available. The detail in physical staff is as follows:
Total number of professional judges: total 1357; men 727; women 630
1. Number of first instance professional judges : total 920; men 487; women 433
2. Number of second instance professional judges : total 306; men 156; women 150
3. Number of Suprem Court professional judges : total 131; men 84; women 47

"

Q046 (2019): Data are presented in full time equivalent, part-time employees being counted, which explains the possible horizontal and vertical inconsistencies in the table. For information: number of judges from civil society (first instance): Total: 19,002 (489 temporary judges (MTT) + 13,277 labor judges (conseillers prud'hommes ((CPH) + 1,832 Assessors of the Social Centres (APS) + 3,404 Consular Judges of the Commercial Courts (JC) Men: 11,249 (243 MTT + 6,902 CPH + 1,294 APS + 2,810 JC); Women: 7,753 (246 MTT + 6375 CPH + 538 APS + 594 JC). Source: LOLFI. Number of judges on duty in the courts.
The data do not encompass "public prosecutors and their staff". All judges in courts are counted, including presidents of courts, as the latter perform judges' duties.

Q046 (2018): With regard to administrative justice, in 2018, it should be noted that the number of judges sitting in specialised courts increased due to the very sharp increase in the number of appeals to the National Court of Asylum (CNDA) and the creation of the Commission du contentieux du stationnement payant (CCSP).
In the area of judicial justice, the increase is due to the filling of vacancies in the courts and the decrease in the number of departures of judges.
Q046 (2014): The 2014 data on number of judges of courts of law subsumes also the presidents appointed by 31 December 2014.
Q046 (2013): In 2013, in first instance, there are 161 presidents of ordinary courts of law and 42 presidents of administrative courts. In second instance, there are 37 first presidents of courts of law and 8 presidents of administrative courts. They are encompassed in the indicated figures. However, presidents of administrative courts of appeal are not included (being members of the State Council, they are included within the number of Supreme court judges).

Q046 (2012): The 2012 data is expressed in FTE, for positions actually filled on 31 December 2012 within courts of law and administrative courts. For the latter, data in FTE concerning the distribution between men and women is not available. Out of the 1377 first instance and appeal judges, there are 816 men and 561 women. Data on men-women distribution for the State Council is not available in FTE: there were 105 men and 47 women. For courts of law, there were in FTE: total: 5771 FTE (2066 men/3705 women); first instance professional judges (1326 men/2804 women); appeal court professional judges (622 men/795 women); Supreme court professional judges (118 men/106 women).The State Council used different calculation methods for 2010 and 2012.

Q046-2 (2021): Non-specialised judges, who account for approximately 45% of the staff of the civil and criminal courts, are required to work in both criminal and civil matters. As a result, the distribution between the different types of litigation is not quantifiable, as these assignments fall within the organisational powers of the head of court.
Similarly, certain specialised judges (juvenile judges and liberty and custody judges) are also likely to intervene in both civil and criminal cases due to their areas of competence.
Source DSJ. Data have been rounded up from 0.5, down below. Source: Council of State for the administrative part (data have been rounded).

Q046-2 (2020): "The distinction by type of case is not possible in the justice of the judicial order.
Note: the distribution of the processing of civil and criminal cases within the tribunals and courts, which depends on the organization of the jurisdictions, does not allow us to fill in this table. For the administrative courts, the FTEs have been rounded up. The precise non-rounded data can be made available if necessary. "
Q052 (General Comment): "Other non-judge staff" refers to legal assistants and specialised assistants who do not work for the public prosecution service. For the other subcategories (2, 3 and 4) it is not possible to distinguish between staff working for the courts and those working for the public prosecution services.

Q052 (2021): Concerning the total of 22 115, it should be noted that this figure includes 597 legal assistants and specialised assistants working for the courts and 939 contractual staff recruited in the framework of local justice. The "other non-judge staff" correspond to legal assistants and specialised assistants who do not work for the prosecution services. The category "non-judge (judicial) staff whose task is to assist the judges such as registrars" includes the category B contractual staff recruited under the support plan for justice implemented since the second half of 2020 on the sole basis of Article 7 bis of Law No. 84-16 of 11 January 1984 on the statutory provisions relating to the State civil service, created by the law on the transformation of the civil service of 6 August 2019, which institutes the project contract. These contractual employees are recruited for three years. The significant increase in the number of these contractual staff (240 more than in 2020), combined with the increase in the number of court clerks (+221 compared to last year) and the increase in the number of other non-judge staff (+210 compared to last year), contributes to the increase in the overall figures communicated for the year 2021. As on 31 December 2021, 1 666 category A and B staff (including 1 383 women) were undergoing initial training at the “École nationale des greffes”, most of them on practical training in the courts. These staff will join the courts in 2022 or 2023, which will significantly increase the number of staff working in the courts and the regional administrative services.
Source DSJ

Q052 (2020): "Non-judge staff" correspond to legal assistants and specialized assistants who do not work for the prosecution service. Unlike in previous years, this distinction could be made for the numbers in 2020, which explains the decrease in the figures provided compared to the previous year. The category "Non-judicial staff responsible for assisting judges, like registrars" includes the category B contractual employees recruited under the plan to support justice, implemented since the second half of 2020 on the sole basis of article 7bis of the law n°84-16 of January 11, 1984, concerning statutory provisions relating to the State civil service, created by the law on the transformation of the civil service of August 6, 2019, instituting the project contract. These contract employees are hired for 3 years.
As of 12/31/2020, 1,699 category A and B agents (including 1,388 women) were undergoing initial training at the National School of Clerks, most of whom were on practical training in the courts. These personnel will join the courts during 2021 or 2022, which will significantly increase the number of agents working in the courts and regional administrative services.
The data compiles data from the judicial and administrative justice systems. Interns are not included. "

Q052 (2019): As of 31/12/2019, 1,693 category A and B staff (including 1,408 women) were undergoing initial training at the “Ecole nationale des greffes”, most of them on practical training courses in the courts. These staff will join the courts in 2020 or 2021, which will significantly increase the number of staff working in the courts and regional administrative departments.
Other non-judge staff includes specialised assistants (106, 48 men and 58 women) and legal assistants (422, 93 men and 329 women) working in the civil and criminal courts. The increase in the number of legal assistants between 2018 and 2019 is due to the creation of new budgetary posts obtained.

Q052 (2018): With the exception of heading 5 "Other non-judge staff", the distinction between staff attached to judges and staff attached to prosecutors is not possible
At the date of 31/12/2018, 1,173 category A and B staff (including 1,003 women) were in initial training at the National School of Registries, most of whom were on practical training in the courts. These staff will join the courts in 2019 or 2020, which will significantly increase the number of staff working in the courts and regional administrative services.
"Other non-judge staff" includes specialised assistants and assistant lawyers who assist non-judge prosecutors in their duties.
The detail by function and gender is as follows:
Categories Total Male Female
Specialized assistants 23 13 10 10
Assistant lawyers 245 53 192
Total 268 66 202

Q052 (2017): The distinction between staff attached to judges and staff attached to prosecutors is not possible. Namely, the sub-category 2 encompasses specialised assistants (31) and assistant lawyers (242), who assist civil and penal judges or prosecutors in the preparation of case files.
Q052 (2016): No distinction is possible between staff attached to courts and staff attached to public prosecution services. The category “Other non-judge staff” refers to specialized assistants (18) and legal assistants (111) who work in civil and penal courts.
Q052 (2015): It should be noted that as of 31 December 2015, 1013 categories A and B staff (including 886 women) were in initial training at the Ecole nationale des greffes (French National School for Registrars), most of them in practical training in courts. This high volume of staff has joined the courts in 2016 or will do so in 2017, which will increase the number of staff actually working in the courts and regional administrative offices.

The distinction between staff in charge of assisting judges and staff in charge of assisting prosecutors is not possible. The latter are therefore part of the figures provided.

Q052 (2013): The 2013 data encompasses non-judge staff appointed to judges and public prosecutors. On 31 December 2013, 1064 agents were in initial training. They joined courts of law in 2014 or will do in 2015. Among the 21946 non-judge staff, 1911 were appointed to administrative courts. The 274 agents of the State Council counted in 2012 were appointed to a support function and are therefore excluded from the 2013 figures. The size of the litigation section of the State Council represents 87 FET. The staff of the National Court for asylum right has also been taken into account in categories 2, 3 and 4 for a total of 325 FET (not counted until 2013). In 2013, the State Council distributed non-judge staff which was before included in the category "other" in the proposed categories.

Q052 (2012): On 31 December 2012, 1039 staff were in initial training at the National School for Registrars, most of them in practical training in courts. They joined the tribunals in 2013 or will do so by 2014, which will increase the number of agents actually in office in courts and regional administrative services. Data pertaining to administrative courts is classified within the category "other" because of the versatility of their staff (1,505.5 FTE). As for the State Council, the number in FTE of the non-judge staff is 274.

Q052-1 (2021): It has not been possible to exclude the legal assistants and specialised assistants working for the public prosecution services for the breakdown of the data provided in the table above (359 in total for the First instance courts, Courts of appeal and Supreme courts, at national level). Also included in these numbers are the 'justice de proximité' contract staff whose recruitment has been authorised from 2020 onwards on the basis of the project contract (see comment of Q52). On the other hand, staff working in the SAR are excluded (contrary to Q52), i.e. 1 766 staff.
Source DSJ

Q055 (2021): Data taken from an extraction of the LOLFI SIRH - Number of public prosecutors on 31/12/2021. The values are expressed in FTEs.
Source DSJ
The data have been rounded upwards from 0.5 and downwards below, with the exception of the data relating to the number of male prosecutors at the Courts of appeal (the exact figure is 249.6) in order to ensure vertical consistency.

Q055 (2020): Only the judicial order is concerned

Q055 (2014): For 2014, State prosecutors, heads of public prosecution services, are included.

Q055 (2012): For 2012, only prosecutors of courts of law appointed by 31 December 2012 were counted.

Q060 (2021): 359 = legal assistants and specialised assistants
Source DSJ

Q060 (2016): It should be recalled that court staff are assigned to the services of judges and public prosecutors, and details of this breakdown are not available. For very specific staff, the data are nevertheless known: 60 specialised assistants and 49 legal assistants.

Q060 (2014): Staff assisting the public prosecution office are comprised in the whole of the registry staff under the direction of a registry director. The latter works closely with the chairman of the court and the public prosecutor at the court. Therefore, data on staff of the public prosecution office are, to this date, indistinct from those of court staff (question 52). Moreover, some very specialised public prosecution services can be assigned to specialised assistants, sometimes from other jurisdictions, to help them deal with the most complex proceedings. These specialised assistants are at number 44 (including 23 women) in 2014.

Q132 (General Comment): First-instance professional judge (civil and criminal courts) at the beginning of his/her career: judge at the 3rd step of the second grade - lump-sum compensation: 35% - flexible bonus 12%.
Public prosecutor at the beginning of his/her career: prosecutor of the Public Prosecutor's Office at the 3rd step of the second grade - lump-sum compensation: 38% - flexible bonus 12%.
Judge of the Court of Cassation: President of Chamber CC (F: 1369) - flexible bonus 14%.
Prosecutor at the Court of Cassation: First Advocate General CC (F: 1369) - flexible bonus 14%.

Q132 (2021): The data filled in the table are those of the civil and criminal justice, source DSJ.
Concerning the administrative justice, the data are as follows: professional judge of first instance, beginning of career: 50 200, 41 300; judge of the Supreme court or of the last instance of appeal: 95 100, 76 900. Source – Council of State

Q132 (2020): "The completed table concerns only magistrates of the judicial order.
For the administrative order: -gross annual salary in euros of a professional judge of 1st instance at the beginning of his career: 47,100 euros
-gross annual salary in euros of a Supreme Court judge: 94,000 euros
-net annual salary in euros of a professional judge of first instance at the beginning of his career: 38,700 euros
-net annual salary in euros of a supreme court judge: 76,000 euros.
sources DSJ and CE."

Q132 (2014): In 2014, the annual gross salary of administrative judges was 42,615€ and the annual net salary was 36,318€. At the State Council, the annual gross salary was 108,881€.

Q133 (2020): Pursuant to the provisions of the order of April 5, 2017, establishing the lists of functions of the State services of the Ministry of Justice provided for in Articles R. 2124-65 and R. 2124-68 of the General Code of the Property of Public Persons that may give rise to the granting of a concession of housing by absolute necessity of service or of a precarious occupation agreement with penalty, certain heads of courts and jurisdictions benefit from a precarious occupation agreement with penalty._x000D_
A fee is charged to the beneficiary of this agreement. It is equal to 50% of the real rental value of the occupied premises._x000D_

Q144 (2021): The data filled in the table are those of the civil, criminal and administrative justice.
Source: DSJ and Council of State
Q144 (2020): Four of these magistrates have been the subject of a procedure of prohibition from exercising their functions (precautionary procedure taken in the interest of the service)_x000D_
Data from the judicial order.
Q144 (2014): In 2014, with regard to administrative judges, there was an ethical misconduct (counted in the table).

Q145 (General Comment): Suspension ("temporary ban on performing duties") is a temporary measure, pronounced in case of emergency. It is a measure taken in the interest of the service and is not a sanction as such. It is intended to be followed by a decision on the merits of the case, concerning the disciplinary fault found.

Q145 (2021): The data filled in the table are those of the civil, criminal and administrative justice.
Source: DSJ and Council of State
Q145 (2020): The disciplinary sanctions applicable to magistrates are: 1° a reprimand with entry in the file; 2° compulsory removal; 3° removal from certain functions; 3° bis prohibition from being appointed or designated as a single judge for a maximum of five years; 4° lowering of step; 4° bis Temporary exclusion from office for a maximum of one year, with total or partial deprivation of salary; 5° Demotion; 6° Automatic retirement or admission to cease his or her duties when the judge is not entitled to a retirement pension; 7° Removal from office._x000D_
Other prosecutor: compulsory retirement_x000D_
Other judge: refusal of honorary status_x000D_
NB: in France, geographical transfer can be combined with another sanction and this was done on 3 occasions in 2020._x000D_
Data from the judicial order

Q145 (2014): In 2014, the category "others" includes temporary exclusion from functions without pay for an administrative judge and two "admissions to leave office", sentence close to dismissal.
There is a difference between the number of disciplinary proceedings initiated and the number of sanctions imposed because of procedural delays. Indeed, sanctions are not necessarily imposed the year of referral to the disciplinary body.

Q145 (2012): In 2012, another sanction imposed on a public prosecutor is the sanction of "denial of honorary", sanction applicable against retired judges at the time of the disciplinary decision. The disparity between the number of disciplinary proceedings and the number of penalties imposed results in the absence of obligation on the HJC to rule in the year of referral. It should be noted that in 2012, the Minister of Justice withdrew its request for disciplinary proceedings in a case against a judge.
Q146 (2021): Source DACS

Q146 (2020): source DACS

Q146 (2018): data at the date of 1st of January 2018

Q146 (2017): Data as at 1 January 2018

Q146 (2016): data as at 1 January 2017

Q146 (2014): The 2014 data refers to the number of lawyers on 1 January 2015.

Q146 (2012): The 2012 data reflects the number of lawyers in January 2012.

Q147 (2019): This category does not exist. The profession of legal adviser was integrated into the legal profession by the law of 31 December 1990. The activity of legal advice is open to certain professionals by virtue of their status but also to other professionals after an approval has been issued by the Ministry of Justice.
Q148 (2021): Source DACS

Q148 (2018): There is no regulated profession in France for lawyers who cannot represent clients in court.

Germany

Q004 (2021): The figure represents the average gross annual salary of employees working in full time including special payments (without special payments: 49 202 EUR)
Special payments are any payments outside of the regular remuneration. Typical examples of such payments are Christmas bonuses/end-of-the year bonuses, holiday bonuses, payments for jubilees, bonuses for the fulfilment of target agreements.

Q004 (2020): figure represents the average gross annual salary of employees working in full time

Q004 (2019): With regard to this question, no data are available for 2019. The data from 2018 have therefore been included.

Q004 (2018): With regard to this question, no data are available for 2018. The data from 2017 have therefore been included.

Q004 (2016): The circumstances have changed since the last campaign

Q046 (General Comment): 1. There is a "court-staff statistic" ("Personalbestand") of the Länder that reports the number of judges in full-time equivalent as of 31 December of the reference year. This statistic also shows the number of female judges but it is not possible to allocate the judges to the different instances/stages of appeal. This statistic does not include the judges at the Federal Courts ("Supreme Courts").
2. The "staff-assignment statistics" ("Personalverwendung") of the Länder basically reports the average number of personnel actually deployed during the reference year (full-time equivalent). For example, employees who were not present for more than 20 working days during a quarter for reasons other than holiday and/or training are excluded. The staff- assignment statistic offers the possibility to allocate the judges to the different instances but it does not show the number of female judges. It does not include the Federal judges either.
3. The "judiciary-staff statistic" ("Richterstatistik") combines the number of the judges of the Länder from statistic No 1 (court staff statistic) with the number of judges at the Federal Courts (full-time equivalent as of 31 December 2020). This statistic is not published every year but every two years. It differentiates between the judges of the Länder and the judges of the Federal Courts (highest instance) and includes the number of female judges.
Regarding Q46 the figures under "1. Number of first instance professional judges" and "2. Number of second instance (court of appeal) professional judges" were taken from statistic No 2 (staff-assignment) because statistic No 1 does not offer the possibility to allocate personnel to the different instances. The figures under "3. Number of Supreme Court professional judges" were taken from statistic No 3 because the Federal judges only appear in that statistic. "Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a ‘Pact for the Rule of Law’. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
These numbers will not be reflected directly in the answers to Q 46, because the figures represent the average value of the actual personnel deployed during the reference year (in full-time equivalents).
It should also be noted that one of goals of the ‘Pact for the Rule of Law’ is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

Q046 (2021): 1. and 2.: Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistics do not distinguish between male and female jugdes. The "regular" court-staff statistics of the Länder distinguish between "total" and "female" but do not allow for a diffentiation between the instances. According to the regular court-staff statistics as of 31 December 2021 there were 22 006 judges in total, 10 626 female and 11 380 male (full-time equivalents).
3: Figures represent the number of judges at the Federal Courts in full time equivalents as of 31 December 2020. The number of judges at the Federal Courts is published every second year (see General Comment).

Q046 (2020): 46.1 and 46.2: Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistics do not distinguish between male and female jugdes. The "regular" court-staff statistics of the Länder distinguish between "total" and "female" but do not allow for a diffentiation between the instances. According to the regular court-staff statistics as of 31 December 2020 there were 21.944 judges in total, 10.418 female and 11.526 male (full-time equivalents)
46.3: Figures represent the number of judges at the Federal Courts in full time equivalents as of 31 December 2020.
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a 'Pact for the Rule of Law'. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
These numbers will not be reflected directly in the data given above, because the figures represent the average value of the actual personnel deployed during the reference year (in full-time equivalents).
It should also be noted that one of goals of the 'Pact for the Rule of Law' is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

Q046 (2019): The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2018).
Q046 (2018): The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2018).
Q046 (2017): Comment - Please provide any useful comment for interpreting the data above: The information provided counts the number of full-time equivalent staff. There are no absolute figures for the number of persons making up this staff. A judge working full hours is counted as a full-time equivalent (i.e. 1). A judge working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a judge working half the usual number of hours). Re 1 and 2: Information based on staffing overviews. These data are ascertained according to a complex calculation mechanism as an annual average of the actual personnel deployed (for example: minus the number of staff absent for more than 20 working days in a single quarter for reasons other
than vacation and/or further-training). Re 3: The number of supreme court professional judges is based on judicial statistics. These data
are collected and collated every two years (last updated 31/12/2016).

Q046 (2016): The information provided counts the number of full-time equivalent staff. There are no absolute figures for the number of persons making up this staff. A judge working full hours is counted as a full-time equivalent (i.e. 1). A judge working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a judge working half the usual number of hours). Re 1 and 2: Information based on staffing overviews. These data are ascertained according to a complex calculation mechanism as an annual average of the actual personnel deployed (for example: minus the number of staff absent for more than 20 working days in a single quarter for reasons other than vacation and/or further-training). Re 3: The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2016).

Q046 (2015): The data refer to the year 2014. At present, no more recent data are available.

Sources: Federal Office of Justice (Bundesamt für Justiz), Schöffenstatistik (statistical information on lay judges) as per 31 December 2014 as well as information provided by the Federal Länder

Q046-2 (2021): "Other" includes: familiy cases (at the Local and Higher Regional Courts), cases at the Labour Courts, Social courts, Finance courts
"First instance" and "Second instance": Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training).
"Surpreme Court": the figures are taken from the court-staff statistics and represent the number (FTE) of judges at the Federal Courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Consitutional Court, Military Disciplinary Courts) as of 31. December 2020. The statistic is published every second year. It shows the number of judges (FTE) at the Federal Court of Justice (152) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 113 judges (headcount) assigned to the civil panels and 46 to the criminal panels.

Q046-2 (2020): "Other" includes: familiy cases (at the Local and Higher Regional Courts), cases at the Labour Courts, Social courts, Finance courts
"First instance" and "Second instance": Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training).
"Surpreme Court": the figures are taken from the court-staff statistics and represent the number (FTE) of judges at the Federal Courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Consitutional Court, Military Disciplinary Courts) as of 31. December 2020. The statistic shows the number of judges (FTE) at the Federal Court of Justice (152) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 114 judges (headcount) assigned to the civil panels and 47 to the criminal panels.
Slight horizontal and vertical inconsistencies are caused by rounding.

Q052 (General Comment): Data is taken from the "staff-assignment statistics" of the Länder and represents an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistics do not distinguish between male and female staff.

Q052 (2021): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2020): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2019): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2017): This figures denotes the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2016): This figures denotes the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel
Comments:
These are personnel-deployment figures denoting the number of full-time equivalent employees not exercising judicial office. Personnel-deployment figures are not collected according to reference date. Instead, an annual average is calculated over four quarters. There are no absolute figures for the number of persons making up this staff. An employee working full hours is counted as a full-time equivalent (i.e. 1). An employee working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for an employee working half the usual number of hours). Figures for the federal courts are not included.

Q052 (2014): The 2013 and 2014 data are the same due to the impossibility to obtain data for 2014. The trend observed since 2010 reveals stable figures.
Q052-1 (2021): Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances in the staff-assignment statistics of the Länder.
Q052-1 (2020): Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances in the staff-assignment statistics of the Länder.
Q052-1 (2018): Differentiating non-judge staff at first and second instance level based on their gender is not possible since the ordinary court system in Germany consists of three instances (local courts, regional courts and higher regional courts). At the same time, regional courts function as a court of appeal on fact and law but can also hear cases at first instance. Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances.

Q055 (General Comment): The information relates to the number of job shares for public prosecutors. There are no absolute figures for the number of persons. The information on the job shares count a judge working full-time as 1. A judge working part-time is counted as the fraction of 1 which corresponds to the proportion of his/her working hours to full-time (e.g. 0.5 for a judge working half the usual number of hours).

Q055 (2021): Figures represent full-time equivalents as of 31. December 2021
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a ‘Pact for the Rule of Law’. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
It should be noted that one of goals of the ‘Pact for the Rule of Law’ is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

Q055 (2020): Figures represent full-time equivalents as of 31. December 2020
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a 'Pact for the Rule of Law'. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
It should be noted that one of goals of the 'Pact for the Rule of Law' is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

Q055 (2016): Figures indicate the number of full-time equivalent staff (not the number of individuals). A prosecutor working full hours is counted as a full-time equivalent (i.e. 1). A prosecutor working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a prosecutor working half the usual number of hours).

Q060 (2021): This figure includes:
- The number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte"), the staff at the public prosecution offices and associate prosecutors' offices based at the Regional Courts as well as the staff at the public prosecution offices based at the Higher Regional Courts (full-time equivalent staff as of 31. December 2021)
- The staff (222 in total, 140 female) at the Office of the Federal Prosecutor General (headcount as of 31. December 2021).

Q060 (2020): This figure includes:
- The number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte" – see question 57), the staff at the public prosecution offices and associate prosecutors' offices based at the Regional Courts as well as the staff at the public prosecution offices based at the Higher Regional Courts (full-time equivalent staff as of 31. December 2020)
- The staff (207 in total, 135 female) at the Office of the Federal Prosecutor General (headcount as of 31. December 2020).

Q060 (2018): This figure indicates the number of full-time equivalent staff (not the number of individuals).
- It includes the number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the
Local Courts – in German: "Amtsanwälte" – see question 57).
- It covers the public prosecution offices and associate prosecutors' offices based at the Regional Courts (1st instance), the public prosecution offices based at the Higher Regional Courts (2nd instance), and the Office of the Federal Prosecutor General (in this case:
number of individuals).

Q060 (2016): This figure indicates the number of full-time equivalent staff (not the number of individuals).
- It includes the number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte" – see question 57).
- It covers the public prosecution offices and associate prosecutors' offices based at the Regional Courts (1st instance), the public prosecution offices based at the Higher Regional Courts (2nd instance), and the Office of the Federal Prosecutor General (in this case: number of individuals).

Q060 (2014): According to 2014 data, the indicated figure reflects job shares (not a number of heads). The data submitted relate to the cut-off date of 31 December 2013. No figures are available that are more up-to-date. The number refers to the staff of the public prosecutor's offices and the offices of associate public prosecutors at the local courts (courts of first instance), of the public prosecutor's offices at the higher regional courts (courts of second instance), and of the office of the federal prosecutor (Public Prosecutor General at the Federal Court of Justice; in the latter case, the figure reflects the number of heads).

Q132 (General Comment): No information on annual net salary is available on the basis of the personal circumstances of judges and public prosecutors. The federal average was calculated unweighted: the annual salaries of the Federal Länder were added and divided by the number of Länder, regardless of how many judges and prosecutors work in the respective Federal Land (the corresponding data are not known).

Q132 (2021): Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the Länder. Judges and public prosecutors may be entitled to additional payments depending on -
their individual familial situation (married/partnership, children)
- position and function at the court (eg. judges with administrative tasks)
The conditions and amount of any additional payments are determined by the remuneration laws of the Länder.

Q132 (2020): Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the Länder. Judges and public prosecutors may be entitled to additional payments depending on -
their individual familial situation (married/partnership, children)
- position and function at the court (eg. judges with administrative tasks)
The conditions and amount of any additional payments are determined by the remuneration laws of the Länder.

Q132 (2016): The salaries calculated were based on the following assumptions:
Outset of the career (judge / public prosecutor): remuneration pursuant to R1, salary bracket 1, single, no children
The average was formed as a simple average of the Länder, without weighting the numbers based on the number of judges active in them, since the corresponding data are not known. The figure given as the salary of a judge or public prosecutor of the Supreme Court is the basic salary R6 without any allowance for working at one of the highest federal courts and without family allowance.
No Information on annual net salary is available on the Basis of the personal circumstances of judges and public prosecutors.

Q132 (2014): The salaries calculated for 2014 were based on the following assumptions: outset of the career (judge/public prosecutor): remuneration pursuant to R1, salary bracket 1, single, no children. The figure given as the salary of a judge or public prosecutor of the Supreme Court is the basic salary R6 without any allowance for working at one of the highest federal courts and without family allowance.

Q132 (2012): The figure given for 2012 as the salary of a judge or public prosecutor of the Supreme Court is the basic salary R6 without any allowance for working at one of the highest federal courts and without family allowance.

Q144 (General Comment): Not all Länder collect data on disciplinary measures. Data are available only in individual cases, meaning that no representative result can be reported.

Q144 (2021): Five Länder could not provide any data on the disciplinary proceedings and selected "NA". Three Länder reported "0" for all categories (judges and prosecutors). Therefore, no reliable numbers for the whole of Germany are available.
Länder that could provide data, mentiones the following "other" proceedings: Violation of the duty to provide truthfull information toward the employer.

Q144 (2020): Violation of the duty to provide truthfull information toward the employer
These figures were provided by the Länder of Baden-Württemberg, Bayern, Brandenburg, Hamburg, Mecklenburg-Vorpommern, Nordrhein-Westfahlen, Rheinland-Pfalz, Sachsen, Sachsen-Anhalt and Schleswig-Holstein. Other Länder could not provide any relevant data.

Q144 (2018): - stating incorrect professional title on social media (Ordinary jurisdiction - judges)
- unspecified (3 cases)
These figures were provided by the Lander of Baden-Württemberg, Bavaria, Berlin, Hamburg, Mecklenburg-Western Pomerania, North Rhine-Westphalia, Rhineland-Palpatinate, Saxony and Thuringia.

Q145 (General Comment): Not all Länder collect data on disciplinary measures. Data are available only in individual cases, meaning that no representative result can be reported.

Q145 (2021): Four Länder could not provide any data on the number of sanctions and selected "NA". Seven Länder reported "0" for all categories (judges and prosecutors). Therefore, no reliable numbers for the whole of Germany are available.
Länder that could provide data, mentiones the following "other" sanctions: expression of disapproval with a warning.

Q145 (2020): - dicontinuation of the disciplinary proceeding
These figures were provided by the Länder of Baden-Württemberg, Mecklenburg-Vorpommern, Nordrhein-Westfahlen, Rheinland-Pfalz, Sachsen, and Schleswig-Holstein. Other Länder could not provide any relevant data. This means that some of the Länder who had data on the number of disciplinary proceedings available, could not provide data on the number of sanctions.

Q145 (2018): Ordinary jurisdiction: disapproval
These figures were provided by the Lander of Baden-Württemberg, Bavaria, Berlin, Hamburg, Mecklenburg-Western Pomerania, North Rhine-Westphalia, Rhineland-Palpatinate, Saxony and Thuringia.

Q147 (General Comment): All lawyers in Germany are empowered to plead before court. No distinction is made between different groups of lawyers in Germany, such as between solicitors and barristers. The stated within question 146 include in-house lawyers according to section 46 para. 2 of the Federal Code for Lawyers (Bundesrechtsanwaltsordnung – BRAO). These are persons, who exercise their profession as salaried employees of persons or companies other than lawyers or patent attorneys or in a company for the joint practice of law or patent law. They shall be deemed to be practising as a lawyer if they are working as a lawyer for their employer under an employment agreement The conditions to be met with regard to the requirement "working as a lawyer" are set out in section 46 para. 3. Compared to lawyers, their powers to provide for legal advice and representation in court are restricted according to section 46 para. 5 (restriction to the employer's legal affairs) and according to section 46c para. 2 BRAO. Like lawyers, in-house lawyers have to be admitted to the legal profession by the competent regional bar association. There are 22 765 in-house lawyers admitted to the legal profession in Germany. In addition to lawyers, certain other individuals may also appear in court as legal advisers but there are no statistical data on these individuals.

Q147 (2020): See the general comments

Q147 (2019): See the general comments

Greece

Q004 (2021): Our service has the data of the structure and distribution of Remuneration Survey in enterprises on the structure of remuneration of employees(having a dependent employment relationship) in enterprises by Sector (B-S branches), excluding X (Public Administration and Defense, compulsory Social Security) based on the NACE Rev. 2. The survey is conducted on a four-year basis. Therefore, the latest available figures are of the year 2018. The results of the of the survey will be published in late 2024 to early 2025.

Q004 (2020): The data come from the Survey of the Structure and Distribution of Remuneration in Greece for the year 2018, from which the sector X is excluded (Public Administration and Defense, Compulsory Social Security) based on the classification of activities NACE Rev. 2 and relate to the average annual gross earnings in euros. Data is available by gender.The only one available at the moment.
Men 19 234 Average Women 15 947 Average

Q004 (2019): The competent authority for this data (see Hellenic Statistical Authority) provides the relevant numbers. The competent authority did not provide any numbers for this section.

Q004 (2016): The data provided correspond to those of 2014, since the statistics on this point are carried out every four years. Therefore, they are not absolutely accurate.

Q046 (2021): The answer came after the cooperation of the Directorate for the organization and operation of Justice with Juststat. The increase in the number of Supreme Court professional judges is explained by the fact that, the judges of the Court of auditors, who are all supreme, had not been previously counted, but now they are included.

Q046 (2020): Gender statistics are not kept. -Number of first instance professional judges :593 first-instance administrative judges,1167 first instance judges,916 judges of local courts and District Criminal Courts.
- Number of second instance (court of appeal) professional judges:336 second-instance administrative judges,598 second instance judges
- Number of Supreme Court professional judges:170 administrative judges of Council of State,5 of the General Committee of the Ordinary and Administrative Courts,76 judges of Areios Pagos(Supreme Court),
The methodology of replying changed. Differences in numbers with previous years cannot be explained as we don't have enough information about previous data.

Q046 (2018): There is not a specific reason for the discrepancy of point 3. The number 243 is a result of the subtraction of points 1 and 2 from the total number of professional judges (1+2+3), just as last year.

Q046 (2016): Previous data concerning the number of second instance judges did not, inadvertently, include all the ranks for penal, political and administrative justice. Accordingly, this year the number is higher and explains also the variation in the total.
It should be mentioned that the number of judges at the courts of Peace, which on 31/12/2016 was 880, is not taken into consideration since they have a separate procedure entering the judiciary and they are a separate category within it.

Q046 (2014): The decrease in the number of second instance judges between 2013 and 2014 is due to the fact that administrative judges are not counted in this category for 2014.

Q046 (2013): In 2013, justices of peace are included, while Court of Auditors' judges are not considered in the total.

Q046 (2012): For 2012, the total number subsumes judicial officials of the civil-penal and administrative courts. It should be noticed that 688 magistrates were not included, as well as Court of Auditors' judges.

Q046-2 (2020): There are two categories of judges, those dealing with criminal and civil justice and administrative judges. There is no data on the separation of cases

Q052 (2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration

Q052 (2016): Previous data did not, inadvertently, exclude staff working for the public prosecution services.

Q052-1 (2021): At the highest level there is the Court of auditors, whose judicial officials have been included above, the total number of them is 637 and consists of 219 men and 418 women. The above data were provided by the Directorate of judicial officials with the cooperation of Juststat of the Ministry.

Q052-1 (2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration

Q055 (General Comment): In the position of Paredron of the court of First Instance and prosecutor's office Of civil and criminal courts are appointed graduates of the National School of judges, according to what is defined in Article 36 of N. 4871/2021 (a' 246). The graduates from the directions of civil-criminal judges and prosecutors of the National School of judges are appointed in the order which have in the relevant tables and are placed preferably, respectively, in the courts of First Instance and in Public Prosecutors ' Offices In Athens, Piraeus, Thessaloniki, Patras, Heraklion and Larissa. The paredroi of First Instance and the prosecutor's office have ten (10) months trial service, during of which they have all the rights and obligations of the ordinary judicial officer and inspected, like regular judges. The reports of the paredroi of the court of First Instance on performance, statistics of their performance and any other useful information or information on the performance or their suitability are stored in a specialist individual file, which, after the end of the trial service the file is submitted to the Supreme Court Council through the Minister of Justice.

Q055 (2021): The above data are given by the Directorate of organization and operation of Justice with the cooperation of JUSTSTAT.

Q055 (2020): Positions by law have increased.Gender data are not kept.

Q060 (2021): The modified response came after the cooperation of the Directorate of judicial officials with Juststat.

Q060 (2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration.

Q132 (2016): Data on net annual salaries of judges and prosecutors is not available. In fact, after subtracting from the gross salary the insurance contribution, the amount is still subject to further taxation (22%-35%), depending on the family status of each judge and prosecutor.

Q132 (2012): The decrease between 2010 and 2012 of the annual salaries (gross and net) of judges and public prosecutors at the Supreme Court level was a result of a fiscal policy due to the economic crisis.

Q133 (2021): judges, except salary, receive two allowances (Article 30 of N.3205/2003), the faster processing allowance and attendance costs. These are not taxed.Article 6, paragraph 6 subparagraph 4, of the decision numbered A.1275 (B ´6375/31.12.2021) indicating what is not included in the certificates of remuneration(page 81063 of the decision).However, if we are to be legally precise, the correct answer to the Cepej question is no. It is not a reduced taxation,but for sums granted, as to other classes of wage-earners, and they face expenses to which they are subjected for the exercise of their work.

Q144 (2021): The answers given by the courts are either numerical, or that the number of disciplinary procedures is zero or that the data is not available. It is noted that the supreme courts have answered numerically. Regarding the choice other to the above question the answer is the petitions of citizens against judicial officers.

Q144 (2020): From the majority of the courts, the answer that has been given is not available.

Q144 (2016): "Other": Dismissal due to serious illness: 1 Judge; Inadmissible case: 6 Judges

Q144 (2014): According to 2014 data, professional inadequacy is considered to be the delay in issuing decisions.

Q145 (2021): The answers given by the courts are either numerical, or that the number of penalties is zero or that the data is not available. It is noted that the supreme courts have answered numerically.

Q145 (2020): From the majority of the courts, the answer that has been given is not available.

Q145 (2016): - Dismissal due to Serious illness: 2 Judges
- Disciplinary offence not committed:5 Judges
- Disciplinary sanction not imposed:2 Judges
- Discussion postponed:5 Judges

Q145 (2012): For 2012, the category "other" subsumed 1 repetition of disciplinary proceedings and 1 declaration of a disciplinary action as unacceptable.

Q146 (2019): The number is indicative and constantly changing, in the absence of restrictions on the number of positions. Source: Plenary Session of the Presidents of Hellenic Bar Associations

Q146 (2018): The number is indicative and constantly changing, in the absence of restrictions on the number of positions. Source: Plenary Session of the Presidents of Hellenic Bar Associations

Q146 (2013): The 2013 data corresponds to the total number in the end of December 2013.

Q147 (2021): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q147 (2020): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q148 (2021): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q148 (2020): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Q148 (2019): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Q148 (2018): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Q148 (2016): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Hungary

Q004 (2021): In comparison to the previous year, the average gross annual salary increased due to the general development of Hungarian economy, to the increase in our GDP, as well as to the raising of the minimum wage.
See the most important annual data on the labour market on the website of the Hungarian Central Statistical Office: https://www.ksh.hu/stadat_files/mun/en/mun0001.html

Q046 (General Comment): Since 2012 and the establishment of the National Office for the Judiciary, the data collection methodology is the same. Accordingly, the number of first instance professional judges includes judges of the District Courts. As second instance judges are counted judges of the Regional Courts and the Regional Courts of Appeal. As concerning the Regional Courts, the distribution of first and second instance cases is based on the internal regulations which are renewed every year by the president of each court after consultation with the judicial council and the professional departments of the court. The number of Supreme Court judges is indicated in item 46.3.

Q046 (2019): There are additional 54 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration) and to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.
Q046 (2018): There are additional 48 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration) and to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.
Q046 (2017): There are additional 34 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration), and 4 judges assigned to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases during their assignment.
Q046 (2016): There are additional 35 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration), and 9 judges assigned to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.
Q046 (2014): In 2014, 26 judges were assigned to the National Office for the Judiciary and 7 judges were assigned to the Ministry of Justice. These judges do not hear cases when carrying out their specific missions within the NOJ and the Ministry of Justice.
Q046 (2013): The number of Supreme Court female judges decreased between 2010 and 2012, while the number of Supreme Court male judges increased between 2012 and 2013. There is no specific reason in this respect, as the vacant positions are filled through an open application process, where the gender of the applicants is not taken into consideration in any way.

Q046 (2012): The number of Supreme Court female judges decreased between 2010 and 2012, while the number of Supreme Court male judges increased between 2012 and 2013. There is no specific reason in this respect, as the vacant positions are filled through an open application process, where the gender of the applicants is not taken into consideration in any way.

Q052 (General Comment): • Court secretaries („bírósági titkár”) are employees of the court that are similar to Rechtspfleger. They are lawyers, who after acquiring a degree at a law faculty have made the bar exam (which requires at least 3 years professional practice). They are enabled to perform duties of judges in cases specifically defined by law.
According to the Constitution when a court secretary is dealing with a case he/she has the same independence as a judge. In criminal cases they can make out of trial decisions (e.g. order an expert to be included in the case), or they can hear witnesses on request of another court. This practically means they assist the judges in pre-trial phase of the case. In misdemeanour cases they adjudicate the case - this is an area of law in which mostly court secretaries deal with cases of first instance. In civil and labour cases they can make any decision that can be made without hearing the case. This practically means they assist the judges in pre-trial phase of the case. In administrative non-litigious cases they can make any decision that can be made without hearing the case. In company registry cases they can make every decision, as well in insolvency cases (with some exceptions).
• From 2012, the category "non-judge staff assisting judges" includes only staff directly assisting judges. • Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

Q052 (2021): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2020): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2018): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2017): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2016): Other non-judge staff includes Staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2015): For the gender ratio we are only able to provide the total figures.

Other non-judge staff (5) includes Staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2014): In 2014, the category “other” includes “staff in charge of different administrative tasks”, “technical staff” and some of those judicial employees who in 2012 were counted as "non-judge staff whose task is to assist judges".

Q052 (2013): The methodology of presentation of data used in 2013 is different. Some of those judicial employees who in 2012 were included in the category “non-judge staff whose task is to assist judges” were taken into account in the category “other”. The latter includes in 2013 the total number of “staff in charge of different administrative tasks” and “technical staff” because these numbers could not be separated within the national database.

Q052 (2012): Court secretaries are enabled to perform duties of judges in cases specifically defined by law. The increase of the number of Rechtspfleger was mainly due to the expanding scope of their authority according to the amended procedural codes. More administrative tasks and cases of lesser difficultiesare dealt with by Rechtspfleger.The category "non-judge staff assisting judges" includes in 2012 only staff directly assisting judges while in 2010, it encompassed other staff as well. In 2012, staff whose task does not consist in directly assisting judges was included in the item “other”.

Q055 (2021): On 31 December 2021, two prosecutors were serving in the Ministry of Justice, on a temporary basis. They are included in the total number of prosecutors; however, they are not taken into account when giving the number of prosecutors serving at different instances (court levels). All prosecutors are appointed to a full-time job; however, it occurs that some prosecutors perform part-time service on a temporary basis for various reasons, such as raising children.
The 'number of prosecutors at first instance level' is an aggregate of the number of prosecutors serving at district-level prosecution services and other prosecution services equivalent to that level, as well as the number of prosecutors serving at high prosecution services. A part of the prosecutors serving at high prosecution services proceed also at second instance (high court) level. The number of prosecutors serving at high prosecution services is 520 (226 males, 294 females), while the number of prosecutors serving at district-level prosecution services (other prosecution services equivalent to that level) is 1210 (439 males, 771 females).
The 'number of prosecutors at second instance (court of appeal) level' means the number of prosecutors serving at appellate prosecution services.

Q055 (2016): Another 9 prosecutors were temporarily serving in the Ministry of Justice. They are included in the total number of prosecutors, but we did not take them into account at each level.
Q132 (2020): At its December 2019 session, the National Assembly passed a law increasing the salaries of judges by 32 percent and that of prosecutors by 21 percent.

Q132 (2018): The reason for the increase of judicial salaries is the increase of the base salary of judges by 15% in 2017-2018.

Q144 (2021): Other for judges: breach of the rules of court management as a court executive

Q144 (2020): Prosecutors: In 3. A crime has been suspected and the cases are still under investigation.
Judges: Other category includes a case when a judge carried out an activity for remuneration that (s)he was not allowed by the law.

Q144 (2018): "other": the case covered ethical and professional issues as well

Q144 (2016): Prosecutors: "Other" - the authority of the profession is violated or threatened by the prosecutor's conduct or behaviour
Judges: A judge commits a disciplinary breach if he/she violates the obligations stemming from his/her service relationship, or his/her lifestyle and/or his/her behaviour harms or jeopardises the reputation of the judiciary.
"Other": 11 procedures were initiated because of the violation of the obligations stemming from the judicial service; 3 procedures were initiated because of the violation of the obligations stemming from the judicial service and also breaching professional ethics.

Q144 (2014): In the frame of the 2014 exercise, it has been specified that item 3 refers to criminal offences for which a disciplinary action can be ordered pursuant to the UJT, 82 § 1 b) (abusive or threatening lifestyle to the profession prestige). The sum of the subcategories does not correspond to the total due to the fact that the number of criminal offenses (2) is also included in the third category "professional inadequacy" (3). As a general rule, in case of criminal offense, the disciplinary action can be ordered on the basis of the Law on prosecutors, article 82 §(1) b) (abusive or threatening lifestyle to the profession prestige).

Q144 (2012): In 2012, the category “other” included in respect of judges misdemeanour proceedings. Besides, the attention was drawn on the fact that the proceedings encompassed in items 1 and 2 are the same that the proceedings subsumed in items 3 and 4. As to the disciplinary proceeding against a public prosecutor for professional inadequacy, the penalty was imposed in 2013.

Q145 (2021): Under the Act on Prosecutors, the so-called 'reproof' is a disciplinary sanction less severe than reprimand. In the reference year, 2 cases were ended with reproof. Another less severe disciplinary sanction is the written warning which is given in case of minor disciplinary offences. In the reference year, 8 cases were finished with a written warning. As to the 2 disciplinary cases that ended with dismissal, one case was initiated in 2020 but was finished in 2021.
Judges: Other category includes 4 cases in which the Service Tribunal finished the case without establishing any disciplinary liability of
the judge.
In the light of the coronavirus epidemic, strict protective measures have been introduced within the Hungarian Prosecution Service in order to protect the health of the prosecution staff and to ensure their operational efficiency. A significant part of the increase in disciplinary sanctions indicated by the CEPEJ was due to minor breaches of these protective measures. The disciplinary sanctions listed as possible replies to be indicated in the CEPEJ questionnaire, namely the disciplinary sanctions of 'suspension', 'withdrawal from the case', 'fine', 'transfer to another (prosecution) geographical location' and 'resignation', do not correspond to any of the disciplinary sanctions listed in our Status Act, hence the indicated possible disciplinary sanctions are not applicable. The disciplinary sanctions of ‘downgrading by one pay grade’ and ‘downgrading by two pay grade” corresponding to 'temporary reduction in salary' and ‘downgrading to inferior position or release from managerial position’ corresponding to ‘downgrading of position’ were not imposed in 2021. Nor was the disciplinary sanction of 'withdrawal of an award, including a title, conferred by the Chief Public Prosecutor' applied.

Q145 (2020): Prosecutors: In 1. and 10.: one case was initiated in 2019, ie it does not belong to the above 9 proceedings, but due to the issue it had to be included.
Of the 9 proceedings against prosecutors in 2020, three were discontinued, three, as criminal proceedings were also instituted in the case, were suspended, and in 2021 a written warning was applied in 2021 instead of a disciplinary sanction. The remaining two cases are the above-mentioned one-stop and one office-closed procedure.
In the case of prosecutors, no disciplinary proceedings were initiated in a further 11 minor disciplinary cases, and a written warning, which does not constitute a disciplinary sanction, was applied. The reason for the measure was the guilty breach of official duty in 9 cases, and the certification of an act violating or endangering the authority of his profession with his lifestyle and behavior in 2 cases.
Judges: Other category includes 4 cases in which the Service Tribunal finished the case without establishing any disciplinary liability of the judge.

Q145 (2018): "Other": In one case the sanction for a court executive was removal from his/her court executive position, altough he/she remained in his/her judicial position. Five cases were finished without any sanction (e.g. the judge resigned before the end of the case).

Q145 (2016): Prosecutors: - 2 disciplinary proceedings were completed by using a written warning that was not a disciplinary punishment.
- Other: dismissal as a disciplinary sanction
Judges:
Disciplinary sanctions that may be imposed on judges committing disciplinary breaches: reprimand, censure, demotion by one pay grade, demotion by two pay grades, exemption from the court executive position, motion for dismissal from the judge's position.

Q145 (2014): The figure provided for 2014 excludes those who are currently suspending their attorney practice and the so called trainee lawyers (persons who have graduated from law school, work for a law firms but have not passed the BAR exam yet). The figure also excludes the European community lawyers and the foreign legal advisors working in Hungary (the number of such lawyers is insignificant).
In 2014, concerning judges, in 11 cases the proceeding either was dismissed or no sanction was applied against the judge. In respect of prosecutors, in two cases the proceeding was discontinued and in one case it was suspended.

Q146 (2020): A new act on the attorneys (Act LXXXVIII of 2017) entered into force on 1 January 2018.
https://njt.hu/translated/doc/J2017T0078P_20180101_FIN.pdf

Q146 (2018): A new act on the attorneys (Act LXXXVIII of 2017) entered into force on 1 January 2018.
https://njt.hu/translated/doc/J2017T0078P_20180101_FIN.pdf
Q146 (2017): A new act on the attorneys entered into force, as of January 1, 2018. The next year's report will reflect the changes.

Q146 (2016): A new act on the attorneys will enter into force, as of January 1, 2018. The next year's report will reflect the changes.

Q147 (General Comment): Legal advisors (jogtanácsos) facilitate the functioning of the organisation by which they are employed. They conduct legal representation within the organisation, provide legal advice and information; prepare applications, contracts and other documents; participate in organising legal work. As a general rule, legal advisors, in contrast to attorneys, discharge their duties (which are not as extensive as those of attorneys) as employees. Their compensation is based on the regulations concerning employment. Any person entered in the register maintained by the county court in Budapest can become a legal advisor. Besides, applicants must hold citizenship in one of the member States participating in the Agreement on the European Economic Area; have no criminal record; hold a university degree; have passed the Hungarian professional examination in law.

Q147 (2020): Legal advisors (jogtanácsos) facilitate the functioning of the organisation by which they are employed. They conduct legal representation within the organisation, provide legal advice and information; prepare applications, contracts and other documents; participate in organising legal work. As a general rule, legal advisors, in contrast to attorneys, discharge their duties (which are not as extensive as those of attorneys) as employees. Their compensation is based on the regulations concerning employment. Any person entered in the register maintained by the county court in Budapest can become a legal advisor. Besides, applicants must hold citizenship in one of the member States participating in the Agreement on the European Economic Area; have no criminal record; hold a university degree; have passed the Hungarian professional examination in law.

Ireland

Q004 (2021): Year 2021 is the latest data available. The figure of €44,912.24 was taken from Q4 but it should be noted that the annual gross salary fluctuated during the course of 2021.
https://www.cso.ie/en/releaseandduplications/en/elcq/earningsandlabourcostsq42021final/2022premliminaryestimates.
According to preliminary estimates of the Earnings and Labour Costs Quarterly release, the average weekly earnings were €880.3 in Q1 2022, an increase of 2.3% from €860.19 one year earlier and an increase of 10.0% from the same period in 2020. This represents average earnings of those in employment in the Irish economy in Q1 2022, including those supported by the Employment Wage Subsidy (EWSS).
https://www.cso.ie/en/releaseandduplications/en/elcq/earningsandlabourcostsq42021final/2022premliminaryestimates.

Q004 (2020): Year 2019 is latest data available

Q004 (2019): Comments Taken from Earnings and Labour Costs Annual 2019 release of 26 June 2020
https://www.cso.ie/en/releasesandpublications/er/elca/earningsandlabourcostsannualdata2019/
Q004 (2018): Taken from Earnings and Labour Costs Annual 2018 release of 11 June 2019
https://www.cso.ie/en/releasesandpublications/er/elca/earningsandlabourcostsannualdata2018/

Q004 (2016): Average annual earnings increased by 1.1% to €36,919 in 2016, from €36,519 in 2015.
Taken from CSO release of 29 June 2017 - Earnings and Labour Costs Annual 2016. See link http://www.cso.ie/en/releasesandpublications/er/elca/earningsandlabourcostsannualdata2016/

Q046 (2021): Figures as of 31/12/2021.
At that time there were 6 vacancies in total.
First Instance Courts – District Court, Circuit Court, High Court = total 3
Second Instance Court – Court of Appeal = total 1
Highest Instance Court – Supreme Court = total 1

Q046 (2020): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the circuit court and ordinary judges of the High Court - including Court Presidents.
An amendment was made in 2019 to the number of judges in the court of appeal due to workload of the court.

Q046 (2019): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents.
An amendment was made to the number of judges in the court of appeal due to workload of the court.

Q046 (2018): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents.

Q046 (2017): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents. As at 31 December 2017 there were three serving female Supreme Court judges.
Q046 (2016): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents. As regards the number of Supreme Court judges, the figures reflect a reduction in the actual number of judges compared to the number reported in the previous reporting cycle.
Q046 (2015): The discrepancy between the total figures and the figures for gender is explained by vacancies in the judiciary's establishment, as follows: Supreme Court: 1; High Court: 1; Circuit Court: 2.

First instance judges are judges of the High Court, Circuit Court and District Court. The High Court and Circuit Court also exercise appellate jurisdiction.

Numbers above include Court Presidents.
Q046 (2014): In 2014, data on 2nd instance judges is available, since the new Court of Appeal was established only in 2014.

Q046-2 (2021): Judges can be assigned to both criminal and civil cases. Although in some jurisdictions, mainly the High Court and Circuit Court, Judges might specialise for a period (sometimes for a period of years) in criminal and civil matters. All Judges can administer all types of cases within their jurisdiction. Administrative cases are not a separate category in Ireland.

Q046-2 (2020): Judges deal with both criminal and civil and commercial proceedings. Number of Judges would be the same across all headings (except administrative as already explained) - Court Service
Q052 (General Comment): Staff numbers in the Irish Courts Service are computed on the basis of "Full-time equivalent" resources, requiring that staff numbers include decimal points, reflecting part-time, work-sharing and other reduced time working arrangements. As decimal points are not imputtable to this question in the data base, it has been necessary to round up or round down figures.
Q052 (2021): The discrepancies with previous data are explained by staffing fluctuations.
Q052 (2017): As concerns the increase observed in the number of female staff in charge of different administrative tasks, additional staff have been employed since the last reporting cycle.
Q052 (2016): With regard to the category "staff in charge of different administrative tasks", additional staff have been employed since the last reporting cycle.
Q052 (2015): Figures have rounded up or down to adjust for the fact that actual personnel resource numbers are calculated to decimal points to reflect employment of part of a full-time personnel resource (e.g. where work-sharing arrangements are in place).
Q052 (2013): The reduction in the number of Rechtspfleger since 2012 reflects in part the appointment of number of County Registrars falling within the Rechtspfleger category as Specialist Judges of the Circuit Court. There were also a number of vacant posts at the end of 2013.
Q052-1 (2021): The discrepancies with previous data are explained by staffing fluctuations.

Q052-1 (2020): The total non-Judge staff working in the courts includes staff of the Office of the CEO, Corporate Services staff, Strategy and Reform staff, ICT staff, Regions & C&D Operations, Superior Court Operations staff, as well as quasi-judicial and technical staff. These staff members work throughout the system, and not just in one of the district, circuit, high or supreme courts.
Q052-1 (2018): Question 52 - 1 was answered to provide a breakdown of staff working as registrars and in offices and other support staff in those offices. The reason the figures would not add up to the total is because the figures exclude administrative staff who are employed by the Courts Service in administrative areas away from front line offices, and who cannot be distributed between instances. The wording in the column for the total of such staff (1049) was given on the basis that this column used the same wording as the previous table which presumably covered all Courts Service staff.

Q055 (General Comment): Allocation of prosecutors work is not in all instances divided as per the questions above. The sub-categories at 1, 2 and 3 of the question posed do not apply in the Irish system.

Q055 (2020): Our court going staff number at the 31st December 2020 is 128 - (50 male / 78 female). This figure includes our Prosecutors and Technical staff - Legal Executive. It also includes 1 Trainee Solicitor. In our Office our Technical Staff and Trainee Solicitors are court going staff and manage the running of a prosecution at trial in the same manner as some of our Prosecutors. In relation to the increase in staff resources for the ODPP, and the context for same, please see the forewords of our Annual Report 2020 and our Annual Report 2019 available at https://www.dppireland.ie/publication-category/annual-reports/.
Q055 (2018): There were 108.7 fulltime equivalent lawyers (fte) (headcount 111) on the payroll of the Office of the Director of Public Prosecutions at 31 December 2018 – 65.6 fte (67 headcount) of these were female and 43.1 fte (44 headcount) were male.
Q055 (2016): Of the staff complement in the Office of the Director of Public Prosecutions at the end of the reference year, 102 were of professional or technical grade at Prosecutor equivalent level or above.

Q055 (2014): Parts' of Full Time Equivalents were counted in decimal figures and have been rounded up. The total represents the number of qualified Solicitors and Barristers employed directly in the Office of the Director of Public Prosecutions (DPP). A proportion of these lawyers represent the DPP in the District Court. Members of the police force also prosecute in this court within a prescribed 'delegated authority' from the DPP. Members of the independent Bar act on behalf of the DPP, on a self-employed basis, in first instance and appellate courts. There are a further 32 State Solicitors contracted to provide a solicitor service to the DPP in cases heard outside of the capital.

Q060 (2018): There were 95.25 fulltime equivalent (fte) administrative/technical staff (headcount 102) on the payroll of the Office of the Director of Public Prosecutions at 31 December 2018 – 54.85 fte (61 headcount) of these were female and 40.40 fte 41 headcount) were male.
Q060 (2016): Of the staff complement in the Office of the Director of Public Prosecutions at the end of the reference year, 77 were administrative grades.
Q060 (2014): In the frame of the 2014 exercise, parts of Full Time Equivalents were counted in decimal figures and have been rounded up or down as appropriate.
Q132 (2021): The information you are seeking has been retrieved from sources which are available to the public. For figures relating to judicial remuneration please see Association of Judges Ireland and for figures relating to the salaries of other civil servants which includes prosecutors see publicjobs.ie
Q132 (2020): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2020.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will
be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade

Q132 (2019): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2019.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will
be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade
Q132 (2018): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2018.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade
Q132 (2016): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2016.

Q132 (2014): The Judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court at December 2014 who were appointed to that courts on or after 1 January 2012. It is noteworthy that following a constitutional amendment in 2011, legislation was passed to allow for the reductions in the remuneration of judges. The Financial Emergency Measures in the Public Interest legislation refers.

Q132 (2013): There is no equivalent of a public prosecutor of the Supreme Court and so a summary of all lawyer grade salaries are provided below: Director of Public Prosecutions (€176,350); Deputy Director of Public Prosecutions (€156,380); Head of Directing Division (€142,199 (modified scale)); Professional Officer Grade II (€119,572); Professional Officer Grade III (€81,080); Professional Officer Grade IV (€67,434); Chief Prosecution Solicitor (€149,499); Principal Prosecution Solicitor (€85,127); Senior Prosecution Solicitor (€79,401); Prosecution Solicitor AP1 (€67,434); Prosecution Solicitor (€30,218 (new entrant from 1 January 2013)).

Q132 (2012): The Judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court at December 2012. Salary for prosecutor reflects the salary of a new entrant solicitor and the salary of a principal Prosecution Solicitor. In line with the Government's fiscal policy the salary or remuneration of public service staff and office holders has been reduced since the 2010 statistics. Following a constitutional amendment, legislation was passed to allow for the reductions in the remuneration of judges. The Financial Emergency Measures in the Public Interest legislation refers.

Q144 (2021): The judicial conduct regime as set out in the Judicial Council Act 2019 has not yet commenced. Draft Guidelines on Conduct and Ethics have been submitted by the Judicial Conduct Committee to the Board of the Council in accordance with this legislation and once adopted by the Council as a whole, the relevant sections of the Act may then be commenced. The legislative timeframe provides that adoption by the Council be done by the end of June 2022

Q144 (2020): The judicial conduct regime as set out in the Judicial Council Act 2019 has not yet commenced. Draft Guidelines on Conduct and Ethics have been submitted by the Judicial Conduct Committee to the Board of the Council in accordance with this legislation and once adopted by the Council as a whole, the relevant sections of the Act may then be commenced. The legislative timeframe provides that adoption by the Council be done by the end of June 2022

Q144 (2018): There is currently no mechanism in Ireland for disciplinary proceedings against judges. The Judicial Council, when established will provide such a mechanism.

Q145 (2021): The judicial conduct regime as set out in the Judicial Council Act 2019 has not yet commenced. Draft Guidelines on Conduct and Ethics have been submitted by the Judicial Conduct Committee to the Board of the Council in accordance with this legislation and once adopted by the Council as a whole, the relevant sections of the Act may then be commenced. The legislative timeframe provides that adoption by the Council be done by the end of June 2022

Q145 (2020): The judicial conduct regime as set out in the Judicial Council Act 2019 has not yet commenced. Draft Guidelines on Conduct and Ethics have been submitted by the Judicial Conduct Committee to the Board of the Council in accordance with this legislation and once adopted by the Council as a whole, the relevant sections of the Act may then be commenced. The legislative timeframe provides that adoption by the Council be done by the end of June 2022

Q145 (2018): There is currently no mechanism in Ireland for issuing sanctions against judges. The Judicial Council, when established will provide such a mechanism.

Q146 (2021): As of 31 December 2021, there were 11,316 practicing solicitors in Ireland. 5,319 male, 5971 female and 26 undefined. For the undefined classification, this is due to the Society not being provided with information on the solicitor's gender. These statistics include solicitors with a practicing certificate in the Republic of Ireland, including practicing solicitors employed by the State. Reply from the Law Library: total n: 2118; males 1354; female 764. Please note that the numbers above are as at June 2021 and per our Annual Report https://www.lawlibrary.ie/about/governance/annual-report/ The figures only relate to barristers who are members of the Bar of Ireland, and do not include barristers operating outside of the Bar of Ireland. The Roll of Barristers, held by the LSRA, contain that list. Further the above does not include solicitor numbers, which are available via the Law Society of Ireland and the LSRA.

Q146 (2020): The above figure is the sum membership of the Bar of Ireland and the Law Society. Total figure includes 24 lawyers with a gender reported as "Unknown".

Q146 (2019): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

Q146 (2018): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

Q146 (2017): This figure represents the total number of barristers practising as members of the Law Library/Bar of Ireland and the total number of solicitors who held practising certificates for 2017.

Q146 (2016): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

Q146 (2014): The number of lawyers comprises Solicitors and Barristers in the end of December 2014.

Q147 (2021): Traditionally, solicitors in Ireland could only represent their clients at the District Court and Circuit Court and would be required to engage a barrister to advocate on behalf of their clients at the higher courts. However, this has changed in recent years, and practicing solicitors are now entitled to a rights of audience and may argue cases at all courts. More information is available here:
https://mcmahonsolicitors.ie/parties/#:~:text=Originally%2C%20only%20barristers%20had%20rights,majority%20of%20Circuit%20Court%20cases.
https://www.citizensinformation.ie/en/justice/courtroom/solicitors.html

Q148 (2021): Solicitors may represent their clients in all court. However, many prefer to engage a barrister to do so on behalf of their client particularly in the higher courts. The Society is not aware of any exact figure of legal advisors who are prevented from representing their clients in court.

Italy

Q046 (General Comment): Apart from Administrative Justice, other specialized first instance courts that are not administered and financed by the Ministry of Justice (i.e. regional audit commissions, local tax commissions and military courts) are not taken into consideration at question 46.
Q046 (2018): Since 2018, the figures have also included judges belonging to Administrative Justice. The above figures include 6634 ordinary judges and 381 administrative judges.
Q046 (2017): An upward trend in respect of the number of female judges in the Supreme Court: in Italy, the High Council of the Judiciary is competent for the transfers of judges from one office to another. This transfer procedure generally takes place once or twice a year. The number of open positions for each court is proportional to the percentage of vacancies in that particular court. During the last few years, there were occasions where the positions made available at the court of cassation were a bit higher than number one would have expected according to the percentage of vacancies. Hence, more judges applied for the vacancies at the court of cassation compared to other courts. To date the vacancies at the court of cassation are about 4% of the total number of positions. As a matter of fact the penetration of female judges shows a positive trend. In first and second instance courts the penetration is already over 50%. At court of cassation level there is much room for improvement.

Q046 (2015): The overall reduction of judges between 2014 and 2015 is partly due to the effect of the recent labor reform that lowered the mandatory retirement age for judges from 75 to 70.
Q046 (2013): In the last few competitive exams held in Italy, the percentage of female candidates was higher than this of male candidates. Accordingly, a positive variation can be observed in respect of the number of female judges between 2010 and 2013.
Q052 (General Comment): The category “other non-judge staff” encompasses assistants, receptionists, porters and other judicial staff. As a general remark, it should be stressed that the high percentage of “other non-judge staff” in Italy is due to a very strict interpretation of the definition of the main categories. The specialized first instance courts that are not administered and financed by the Ministry of Justice (regional audit commissions, local tax commissions and military courts) are not taken into consideration at question 52.
Q052 (2021): The number of staff has increased due to the hiring of new personnel through public competition.

Q052 (2018): Since 2018, the figures have also included court staff belonging to Administrative Justice.

Q052 (2016): According to the data provided for 2014, 2015 and 2016, we can notice a downward trend as concerns the number of technical staff (a decrease of 28% between 2014 and 2015 and a decrease of 26% between 2015 and 2016), especially the number of female staff (a decrease of 33% between 2014 and 2015 and of 32% between 2015 and 2016). An explanation of these variations is not available at this stage.
Q052 (2015): 'Other non-judge staff' includes: assistants, receptionists, porters and other judicial staff.
The high percentage of “other non judge staff” in Italy is due to a very strict interpretation of the definition of the main categories.
Q052-1 (2018): Since 2018, the figures have also included court staff belonging to Administrative Justice.

Q055 (2016): There is no specific explanation concerning the increase in the total number of prosecutors at Supreme Court level. However, numbers are small and therefore percentage changes vary more harshly.
Q060 (2021): The number of staff has increased due to the hiring of new personnel through public competition.

Q132 (General Comment): It is noteworthy that the salaries of judges and public prosecutors do not depend on the position held but rather on the experience (i.e. years of service). That means that the salary of a judge working in the lowest courts can be the same as the salary of a judge working in the Highest Appellate Court.
Q144 (General Comment): Figures at Q.144 do not include disciplinary proceedings against administrative judges

Q144 (2021): The total number of disciplinary proceedings initiated in Italy in 2021 is 148. Unfortunately, we cannot distinguish neither between judges and prosecutors nor by type of proceeding.
In Italy both judges and prosecutors are governed by the same body, and they are seen as a whole (magistrates). For this reason, when it comes to disciplinary proceeding judges and prosecutors follow the same procedures, hence our statistics do not distinguish between judges and prosecutors. For this cycle the High Judicial Council has only provided the total.

Q144 (2018): The above figures do not include 2 disciplinary proceedings against administrative judges.

Q144 (2016): "Other" refers to disciplinary proceedings which involve more than one category (e.g. "Breach of professional ethics" and "Professional inadequacy").
Q145 (General Comment): Figures at Q.145 do not include sanctions against administrative judges

Q145 (2018): The above figures do not include 3 sanctions to administrative judges.

Q146 (2013): For 2013, the number of practicing lawyers was not available. The provided figure corresponds to the number of lawyers in 2012, assuming that data should be almost the same for both years.

Latvia

Q004 (General Comment): After 2012, the minimum monthly salary increased, which could have had an effect on the average gross annual salary.
Q004 (2021): The data provided by the Central Statistical Bureau.

Q004 (2020): The data provided by the Central Statistical Bureau.

Q004 (2016): on 2016

Q046 (2017): The changes in the number of judges at the Supreme Court are the outcome of the court reform developing pure three instance level court system. Until 2014 there were both appellate and cassation courts within the Supreme Court. Until end of 2014 and 2016 respectively there were additional appellate chambers dealing with criminal and civil cases. Since beginning of 2017 the number of judges at Supreme Court (cassation instance) is stable – 36.

Q046 (2014): The number of male judges in the Supreme Court decreased per 5 judges between 2012 and 2014 due to various reasons: three male judges retired; two male judges returned to regional courts (because they worked in the Supreme Court temporarily); one male judge passed away in 2014; one new male judge came to work in the Department of Civil Cases of the Supreme Court.
Q046-2 (General Comment): The courts of first instance of general jurisdiction do not explicitly distinguish between the specialisation of judges on the basis of the main types of cases, therefore there is not possible to distinguish the data between civil and or commercial cases and criminal cases.
Q046-2 (2021): For Supreme Court - within the number of judges is not indicated number of President of the Supreme Court.

Q046-2 (2020): The courts of first instance of general jurisdiction do not explicitly distinguish between the specialisation of judges on the basis of the main types of cases, therefore there is not possible to distinguish the data between civil and or commercial cases and criminal cases.
Q052 (2021): Other non-judge staff: Supreme Court - Division of case-law an research, Division of provision of regime of secrecy, Staff of secretariat of the Council for the Judiciary.
In general at the end of 2021, there were many vacancies for court staff for the first and second instance courts, therefore also there are differencies in the number of court staff. In the previous cycles, the numbers for court staff for the first and second instance courts were calculated a little bit different, there were included also vacancies.

Q052 (2020): The observed variations in the different categories are due to changes in court staff.
Other for Supreme Court - Division of case-law and research, Division of provision of regime of secrecy, Staff of the Secretariat of the Council for the Judiciary. Trainees are not included in the number provided of the non-judicial staff.

Q052 (2019): Other non - judge staff: Staff of the Division of case-law and research, Division of provision of regime of secrecy and Secretariat of the Council for the Judiciary, as well consultants (desk officers) of the Supreme Court of Latvia.
The overall discrepancies starts from 2018 due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate). The data between 2018 and 2019 are very similar.

Q052 (2018): Discrepancy due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate).

Q052 (2017): Other non-judge staff- this satff is for Supreme Court - Staff of Division of case-law and research staff, Division of provision of regime of secrecy staff, the Supreme Court of Latvia consultants and Secretariat of the Council for the Judiciary

Starting from 2015 till March, 2018 there were introduced court reform where the judicial map was revised. In the course of the court reform, several courts were merged, legally creating one larger court. On the other hand, in this new territory, the existing courts continue operating as the new body of the joint court, providing the opportunity for citizens to submit the documents at any place of the court. The court reform affected also the changes in the number of court staff, some positions were combined, some positions changed.

Q052 (2014): The category “other” includes employees from the Division of Provision of Secrecy Regime and the Supreme Court Division of Case-Law. The latter is a unit of the Supreme Court responsible for the compilation, analysis and publication of court opinions, as well as for summarizing, selecting, processing and publishing in the case-law database court rulings. For 2014, it also subsumes consultants of the Supreme Court.

Q052 (2013): The category “other” includes employees from the Division of Provision of Secrecy Regime and the Supreme Court Division of Case-Law. The latter is a unit of the Supreme Court responsible for the compilation, analysis and publication of court opinions, as well as for summarizing, selecting, processing and publishing in the case-law database court rulings.

Q052 (2012): The category “other” includes employees from the Division of Provision of Secrecy Regime and the Supreme Court Division of Case-Law. The latter is a unit of the Supreme Court responsible for the compilation, analysis and publication of court opinions, as well as for summarizing, selecting, processing and publishing in the case-law database court rulings.

Q052-1 (2021): In general, at the end of 2021, there were many vacancies for court staff for the first and second instance courts, therefore also there are differences in the number of court staff. In the previous cycles, the numbers for court staff for the first and second instance courts were calculated a little bit different, there were included also vacancies.

Q052-1 (2018): Discrepancy due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate)
Q055 (2020): The increase in the number of prosecutors in court district level prosecutor's offices is related to the imposition of an obligation on the prosecutor of the court district level prosecutor's office, and not on the chief prosecutor of the district (city) prosecutor's office to perform the duties of a higher prosecutor.
Regarding the decrease in the number of women working in the Prosecutor General's Office, it must be concluded that in total the number of women working has decreased by 8 persons. One of the reasons could be reaching the maximum age for performing the duties prescribed by law or the death of a person.

Q055 (2012): During 2011 and 2012, prosecutors’ offices increased the number of posts which resulted in the appointment of new prosecutors. In order to decide on the promotion of prosecutors, their professional qualification has been evaluated and their quality of work performance analysed, as well as their participation in trainings, work statistical indicators, etc. Pursuant to the collected data, more male prosecutors have been promoted to higher posts.

Q060 (2021): Total number of staff working at the Prosecution Office is 357 (103 male employees, 254 female employees): 187 employees (35 male and 152 female) are staff in charge of administrative functions and management of Prosecution Office. 75 employees (40 male and 35 female) perform technical duties. 95 employees are prosecutor assistants (28 male and 67 female). We would like to emphasize that in Latvia assistant prosecutors do not perform the functions of drafting procedural documents. Main duties of assistant prosecutors are preparation of criminal case material copies; drawing up of the case list documents, sewing and numbering of the case materials; preparation of materials to be issued to the process participants; certification of the correctness of document derivatives; delivery of the prepared materials to the addressees and reception of the documents.

Q060 (2014): The 2014 data encompasses the administrative director, deputies of the administrative director and other staff of the administrative director office – staff of the Chancellery, interpreters, IT specialists, personal specialists, car drivers, auditors (in total 318 employees, among which 232 women), as well as prosecutors’ assistants (in total 74 assistants, among which 55 women). Assistants to prosecutors have no prosecutorial procedural powers. Their competence and jurisdiction are strictly limited. For example, an assistant is entitled to receive visitors, to take action in connection with the preparation of the case (prepare copies of criminal case materials, to produce the list of documents) etc.

Q060 (2012): The 2012 data encompassed the administrative director, deputies of the administrative director and other staff of the administrative director office - staff of the Chancellery, interpreters, IT specialists, personal specialists, car drivers, auditors (in total 321 employees, among which 234 woman), as well as prosecutors' assistants (in total 72 assistants, among which 53 women). Prosecutors' assistants have no prosecutorial procedural powers. Their competence and jurisdiction are strictly limited. For example, an assistant is entitled to receive visitors, to take action in connection with the preparation of the case (prepare copies of criminal case materials, to produce the list of documents) etc.

Q132 (2020): Prosecutors shall be entitled to a supplement for the ranking of the public prosecutor, depending on the degree of office assigned. The ranking of a public prosecutor shall be assigned according to the position, professional knowledge, qualifications and experience of work.
Question 132 indicates the minimum gross and net public remuneration.
Discrepancies with data from the previous cycle are connected with changes in the Law On Remuneration of Officials and Employees of State and Local Government Authorities. Between 2019 and 2020 a gradual increase in salary has been introduced, the gross salary has been increased per EUR 1764 and the net annual salary increase per EUR 1203. The salaries for judges are reviewed annually according to the law.

Q132 (2019): Discrepancies with data from the previous cycle are connected with changes in the Law On Remuneration of Officials and Employees of State and Local Government Authorities.
Comments on salaries of prosecutors: The increase in salaries is related to changes in the regulatory framework for prosecutors remuneration, which entered into force on 01.01.2019. The discrepancies in the section of salary for public prosecutor at the beginning of his or her career is connected to that in previous cycle the maximum salary was indicated which first instance prosecutor could get, but now it is indicated the salary at the beginning of the career.

Q132 (2018): The changes are related to the Law On Remuneration of Officials and Employees of State and Local Government Authorities, which increased the judge's monthly salary to EUR 1966, and the salaries of judges increased significantly in 2018 compared to 2016. Same for prosecutors.
Comment for prosecutors: Prosecutors shall be entitled to a supplement for the ranking of the public prosecutor, depending on the degree of office assigned. The ranking of a public prosecutor shall be assigned according to the position, professional knowledge, qualifications and experience of work. Question 132 shows the maximum gross and net public remuneration.

Q132 (2016): Prosecutors, depending on the grade assigned, are provided with an allowance for a post of prosecutor from 7 to 35 percent of the monthly salary. The position of a prosecutor is assigned according to the occupation, professional knowledge, qualification and work experience.
In above stated amount special additional payment to judges depending of their time of service (starting from 7% after 3 years of service, until 35% - after 20 years of service) is already included.

Q132 (2012): During the economic crisis, starting from 01.07.2009, the salaries of judges were reduced by 15% and starting from 01.01.2010, they were reduced by 27 %. Starting from 01.01.2011, the determination of the salaries of judges and prosecutors is a part of the unified remuneration system for the officials and employees of the State and local government institutions. Besides, as the consequences of the crisis diminished, the salaries of judges increased.

Q144 (2020): Other of prosecutors: By 1 July 2020, the public prosecutor had been held to disciplinary action for the commission of an administrative violation, such as non-compliance with road traffic rules.
Q144 (2018): Other for prosecutors - A public prosecutor shall not be held liable for disciplinary action for committing a criminal offence, but shall be held liable for disciplinary action for committing an administrative violation, for example, failure to comply with road traffic regulations.

Q144 (2016): not intentionally breach of law, but negligence (breach of procedural terms, accidentally has not observed criminal procedure norms or substantive legal norms).
Q144 (2014): According to 2014 data and pursuant to the Judicial Disciplinary Liability Law, a judge may be held liable for: intentional breach of law in adjudication of cases – 14 cases in 2014; non-execution of job responsibilities or gross negligence committed during adjudication – 4 cases in 2014; disrespectful action or gross violation of norms of the Code of Judicial Ethics; administrative violations - 4 cases in 2014; refusal to suspend association with political party or political organisation – no cases in 2014; non-observance of restrictions and prohibitions stipulated in the Law on Prevention of Conflict of Interests in Activity of the State Officials – no cases in 2014.
As to public prosecutors, the category "other" encompassed not intentionally breaches of law, but negligence (breach of procedural terms; the prosecutor has accidentally not observed criminal procedure norms or substantive legal norms).

Q144 (2012): For 2012, the category "other" referred to reprimands in respect of judges. As to public prosecutors, the same category encompassed not intentionally breaches of law, but negligence (breach of procedural terms; the prosecutor has accidentally not observed criminal procedure norms or substantive legal norms).

Q145 (2021): „Other" cases. For judges - no sanction imposed, only examination of the matter. Article 7, para 8 of the Judicial Disciplinary Liability Law: (8) In exceptional cases, the Judicial Disciplinary Committee may restrict themselves to examination of a disciplinary matter at a sitting, without the imposition of a disciplinary sanction. Even without specific sanction this type of decision of the Disciplinary Board is regarded as sanction because the violation is established. The judge has a disciplinary record about this decision
If a significant difference exists between the number of disciplinary proceedings and the number of sanctions, please indicate the reasons: 3 cases: in two cases the case was dismissed: 1) no violation of law; 2) initialization of wrong proceedings (disciplinary instead of administrative); in one case the judge died

Q145 (2020): Section 44 of the Prosecutor's Office Law defines the disciplinary sanctions applicable to the public prosecutor: (1) note; (2) reprimand; (3) reduction of the monthly salary of the public prosecutor to 20 per cent for a period not exceeding six months; (4) demotion; (5) dismissal.
The Other column contains a disciplinary sanction - note (Reproof).
Other for judges- as additional sanction was imposed an extraordinary assessment of the professional work of a judge.
One case was terminate, in 4 cases no sanction was imposed.

Q145 (2018): Comment for judges - 3 cases pending; 2 cases – examination (discussion) in disciplinary board. Dismissal means that the application for disciplinary proceedings was dismissed. In 2018 there were no cases examined by the Disciplinary court. One appeal was received. Comment for prosecutors - Section 44 of the Prosecutor's Office Law defines the disciplinary sanctions applicable to the public prosecutor: (1) note; (2) reprimand; (3) reduction of the monthly salary of the public prosecutor to 20 per cent for a period not exceeding six months; (4) downgrades; (5) dismissal.
The column "Other" contains a disciplinary sanction - note (Reproof).

Q145 (2016): The disciplinary sanctions applicable to the prosecutor by Section 44 of the Office of the Prosecutor Law: 1) an annotation; 2) a reprimand; 3) reduction of the base salary of the prosecutor up to 20 per cent for a period not exceeding six months; 4) reduction in the grade of office; 5) demotion in office; 6) dismissal from employment.
We note that in the box Other is a disciplinary penalty – an annotation.
2 judges received a remark

Q145 (2014): In 2014, the examination of 8 cases against judges was postponed to 2015. The other sanctions pronounced included 2 removals from office; 2 remarks; 6 disciplinary cases were dismissed; in one case the Disciplinary Committee confined itself to the examination of the disciplinary case in the sitting of the disciplinary committee. As for public prosecutors, the category "other" referred to annotations.
Q145 (2013): For 2012, the category "other" subsumed with regard to judges 1 formal warning; one terminated disciplinary proceeding and disciplinary cases pending in 2013. As for public prosecutors, the same category referred to annotations.

Q146 (2017): This number includes sworn advocates and assistants to sworn advocates.
Q146 (2013): There were 1 336 sworn lawyers in Latvia on December 31, 2013, of which 70 - assistants to lawyers and 13 - lawyers from other countries. 116 State legal aid providers have been concluded contracts with the Legal Aid Administration about State-guaranteed legal assistance in civil cases, administrative cases, cross-border disputes and provision of out of court legal assistance. State provided legal assistance in criminal matters in Latvia is provided by sworn lawyers, not by legal aid providers.
Q147 (2017): According to Advocacy Law of the Republic of Latvia in accordance with the procedures specified by this Law, the following persons may work as advocates in Latvia:
1) sworn advocates;
2) assistants to sworn advocates;
3) citizens of European Union Member States who have obtained the qualification of an advocate in one of the European Union Member States (hereinafter - advocates of European Union Member States).
Foreign advocates, except for advocates of European Union Member States, may practice in Latvia in accordance with the international agreements on legal assistance binding to the Republic of Latvia. Solicitors, in-house counsellors and others is an unregulated profession in Latvia and consequently is not counted, controlled or otherwise supervised.

Q148 (2017): Solicitors, in-house counsellors and others is an unregulated profession in Latvia and consequently is not counted, controlled or otherwise supervised. Also, for example, Civil Procedure Law provides that in some case categories/the Supreme Court persons can conduct cases by themselves or with the intermediation of an advocate. Due to this it is not possible to count persons who cannot represent their clients in court.

Q148 (2016): There was a mistake in last cycle. Not all legal advisors can represent their clients in court, for instance, in criminal cases only sworn advocate can represent their clients in court.

Lithuania

Q004 (2021): From the 1st January, 2021 the minimum monthly salary was increased, the base salary of state politicians, judges, state officials, civil servants and employees of budgetary institutions was increased, the procedure for calculating the amount of tax-free income was changed and other reasons.
https://osp.stat.gov.lt/informaciniai-pranesimai?articleId=9732032

Q004 (2020): Annual salary growth has been affected by the increase in the minimum monthly salary since the beginning of the reference year, the base salary of state politicians, judges, state politicians, judges, civil servants, civil servants and employees of budgetary institutions, changes in the procedure for calculating tax-free income and other reasons.

Q004 (2019): The increase in wages in 2019 was caused by changes in the tax system: an increase in the basic salary of politicians, judges, civil servants, civil servants and employees of budgetary institutions, an increase in the minimum monthly salary, a revision of the new salary system for civil servants, a change in the procedure for calculating exemptions and other reasons.

Q004 (2018): The state budget and salary increased due to the growth of the economy.

Q004 (2016): The state budget and salary increased due to the growth of the economy (after recovering from crisis before).

Q046 (General Comment): The methodology of presentation of data reflects the peculiarities of the Lithuanian court system. Namely, as the regional courts function not only as courts of appeal, but also as courts of first instance (Article 19 of the Law on Courts of the Republic of Lithuania), the number of judges of these courts is included in the 1st section. Accordingly, the latter indicates the number of judges of district courts, regional courts and regional administrative courts. Likewise, given that the Supreme Administrative Court is the court of appeal (although the rulings of the Supreme Administrative Court of Lithuania are final and not subject to appeal) the number of judges of this court is encompassed in the 2nd section. The latter indicates the number of judges of the Court of Appeal of Lithuania and the Supreme Administrative Court of Lithuania. The 3rd section indicates the number of judges of the Supreme Court of Lithuania.

Q046 (2017): Please see general comments.

Q046-2 (2020): the first instance indicates the number of judges of district courts, regional courts and regional administrative courts. Likewise, given that the Supreme Administrative Court is the court of appeal (although the rulings of the Supreme Administrative Court of Lithuania are final and not subject to appeal) the number of judges of this court is encompassed in the 2nd instance. The latter indicates the number of judges of the Court of Appeal of Lithuania and the Supreme Administrative Court of Lithuania.

Q052 (General Comment): The category “other” includes translators, court psychologists, it encompasses also other helping staff (civil servants and working under the labour agreement).

Q052 (2021): Psychologists and translators.

Q052 (2020): Other staff – translators and psychologists.
There is no such a position as trainee judges in the Lithuanian court system.

Q052 (2019): Other staff - translators and psychologists.

Q052 (2018): Other non-judge staff – translators and psichologists.

Q052 (2017): Other staff – translators and psychologists.

Q052 (2016): In 2015 the number of technical staff has decreased while at the same time the number of staff assisting judges has increased.

Q052 (2014): The National Courts Administration has never collected data on statistics of court personnel according to the gender. The data, which was provided in earlier evaluation cycles, was preliminary data, manually gathered.

Q055 (2020): After the reorganization of the prosecution service in 2011, 5 second instance prosecutors' offices were merged with 51 separate first instance prosecutor's office in their area of operation, and thus 5 regional first-second instance prosecutor's offices were established.

Q055 (2014): In 2012, the 56 territorial prosecutor’s offices have been reorganised into 5 regional prosecutor’s offices with 10 district prosecutor’s offices functioning inside them (first instance and second instance levels have been combined). Currently, only two instances exist.

Q055 (2012): In 2012, after reorganization of the prosecution service, the first and the second instances have merged. Currently, two instances exist instead of three. Besides, the total number of prosecutors has decreased because some prosecutors have left the service, but no new prosecutors have been recruited.

Q060 (2021): The decrease in staff numbers is due to:
- natural rotation of human resources (various reasons: career, dissatisfaction with salary or duties, etc.);
- implementation of changes in work organisation;
- a higher number of persons left the institution than were recruited.

Q060 (2020): Number of staff does not include trainee prosecutors, only assistants, specialists and other employees. A person, who has been admitted to the service as prosecutor, must complete an assigned traineeship of up to two years. During the traineeship, the trainee prosecutor performs all duties of a prosecutor, but is obliged to coordinate draft procedural decisions and resolutions with the internship supervisor.

Q060 (2016): The provided data on the number of prosecution staff includes assistants and lawyers who work directly with prosecutors (total 363: 81 males and 282 females).

Q132 (2020): From the 1 January 2019 the official salary ratio of district court judges was increased. In 2019 and in 2020 a higher base amount of official salary (salary) was also applied, which is used to calculate the remuneration of judges and public procesutors (2018 - 132,5; 2019 - 173, 2020 - 176)

Q132 (2019): From 2019 January 1 the salaries of district court judges increased due to an increase in their official salary coefficients (the official salary ratio of the president of the court increased from 0.5 to 1.5 basic amounts; deputy chief judge - from 1.2 to 1.9 basic amounts, judge - by 2 basic amounts).
From 2019 January 1 the basic amount of the official salary, which is used to calculate the salaries of both prosecutors and judges, was also increased: in 2018 this basic amount was 132.5 euros, in 2019 - 173 euros.

Q132 (2018): In 2017 prosecutors' salaries were increased.

Q132 (2016): The salary of public prosecutors at the beginning of the carrier was increased.

Q133 (2019): no other financial bennefit.

Q144 (2021): note as a sanction.

Q144 (2020): 2 cases where disciplinary proceedings have not been instituted without evidence of disciplinary action, and 1 case when the disciplinary proceedings were terminated without the subject of disciplinary liability (the judge reached seniority and was dismissed).
in two cases a violation (professional inadequacy) was established, but limited to its consideration, no disciplinary proceedings were instituted; two cases (pbreach of professional ethics) were referred to the Juditial Court of Honor.

Q144 (2018): Concerning judges: only 2 of the initiated disciplinary proceedings (16) have been brought to the Judicial Court of Honor. Concerning prosecutors: the decrease of the number of initiated disciplinary proceedings (comparing with 2016) was the outcome of the fact that there were received fewer requests to initiate the inspection of prosecutor's activity or to conduct an investigation at the Prosecutor's Ethics Commission.

Q144 (2012): In 2012, the Judicial Ethics and Discipline Commission instituted 9 disciplinary actions (4 on the ground of breach of professional ethics and 5 on the ground of professional inadequacy).

Q145 (2020): other for judges - note as a sanction.
other for prosecutors - 6 admonition - the least severe disciplinary sanction, which have been pronounced against prosucutors in 2020.

Q145 (2018): Concerning judges: in 2018 the Judicial Court of Honor adopted 2 decisions: in one disciplinary case it was limited to the review of a disciplinary action, in the second - one the part of the case was terminated, in the other part of the case as the sanction a censure (less severe sanction than a reprimand) was pronounced. Concerning prosecutors:
9 admonitions - the least severe disciplinary sanction – have been pronounced against prosecutors in 2018. Disciplinary sanctions that may be imposed on prosecutor in Lithuania (starting from least severe): 1. Admonition (9 in 2018);
2. Reprimand (5 in 2018); 3. Position downgrade (0 in 2018) 4. Dismissal (3 in 2018) The increase of the number of sanctions in 2018 (comparing with 2016) was due to the complexity of the inspections, also investigations carried out by the Prosecutor's Ethics Commission because of the gravity and nature of the violations committed.

Q145 (2016): Disciplinary sanctions that may be imposed on prosecutors (starting from least severe):
1. Admonition (6 sanctions pronounced in 2016);
2. Reprimand (2 sanctions pronounced in 2016) ;
3. Qualification rank downgrade (1 in 2016);
4. Position downgrade (1 in 2016);
5. Dismissal (0 in 2016).

Q145 (2014): In 2014, the following sanctions have been pronounced against prosecutors: 1 censure; 3 reprimands; 0 qualification rank downgrade; 1 position downgrade; 1 dismissal. There was no qualification rank downgrade.
The Judicial Court of Honour has decided on 5 cases that were initiated by the Judicial Ethics and Discipline Commission and imposed these sanctions on judges: 1 censure; 2 reprimands. In one case, the Court limited itself to the review of a disciplinary action and with regard to another case, it dismissed the disciplinary action.
It is noteworthy that in 2014, the Judicial Ethics and Discipline Commission received 272 complaints, out of which 249 requests were refused for examination (lack of motivation, requests for evaluation of judgments or trials, questions that were raised not on judicial ethics). Besides, the Judicial Ethics and Discipline Commission has decided on 9 requests of judges to provide consultations on whether some of their actions would be treated as violation of ethics of judges.

Q145 (2012): In 2012, the following sanctions have been pronounced against prosecutors: 4 admonitions; 1 reprimand; 2 position downgrades; 2 resignations. There was no qualification rank downgrade.
There were 8 decisions of the Judicial Court of Honour in respect of judges: 3 decisions imposing a disciplinary sanction (censure); 3 decisions limited to the review of a disciplinary action; 2 decisions dismissing the disciplinary action.

Q146 (2019): There are also 1008 lawyers' assistants (449 males, 559 females). They can provide some legal service but are not included in the number of lawyers above.
Q146 (2018): There are also 943 lawyers' assistants. They can provide some legal service but are not included in the number of lawyers above.
Q146 (2017): The number is provided by the Lithuanian Bar Association (the number of practising lawyers (advocats) - 2207. Also there are 925 lawyers' assistants who provide legal service).
Q146 (2016): The number is provided by the Lithuanian Bar Association (the number of practising lawyers (advocats). Also there are 870 lawyers' assistants who provide legal service also.
Q146 (2015): Numbers are taken from the List of Practising Advocates of Lithuania. The list is regulated by the Law on the Bar and administered by Lithuanian Bar Association. The assistants of advocates is not presented in the data.

Q147 (2015): Numbers are taken from the List of Practising Advocates of Lithuania. The list is regulated by the Law on the Bar and administered by Lithuanian Bar Association. The assistants of advocates is not presented in the data.

Luxembourg

Q004 (2020): The 2019 data has been tentatively provided, pending the official release of the 2020 data.

Q004 (2019): This figure represents the average gross salary for the "Industry and Service" sector, according to the NACE Rev 2 code.
(https://statistiques.public.lu/stat/ReportFolders/ReportFolder.aspx?IF_Language=fra&MainTheme=3&FldrName=1&RFPath=30).
Q004 (2016): The variation between the different cycles (44% between 2014 and 2016) comes from a difference between gross salary (which was given for this cycle) and net salary (which was given for the previous cycles).
Q046 (General Comment): Section 1: The number of first instance professional judges includes judges of the district courts, judges of the justices of the peace and judges of the administrative tribunal.
section 2: The number of second instance professional judges includes judges of the Court of appeal of the Superior court of justice and judges of the Administrative court.
Section 3: The number of professional judges at the Supreme court level includes only judges of the Court of cassation.

Q046 (2018): The staff of the judicial and administrative courts has grown steadily in the recent years, as established by the amended law of 7 March 1980 on judicial organization. This explains the significant variations observed between 2016 and 2018 in the judiciary and non-judge staff. According to the judicial organisation of Luxembourg, there is a Superior Court of Justice, composed of the Court of Cassation and the Court of Appeal. The judges of the Superior Court of Justice belong to both the Court of Cassation and the Court of Appeal. If, legally speaking, these are separate positions, in practice the five judges of the Superior Court of Justice occupy two positions and they are therefore counted among the judges of the Court of Appeal as well as at the level of the Superior Court of Justice .
The figures differ from those indicated in the last data collection campaigns on two points. 1) concerning the number of judges at the highest level: starting with 2016, we have distinguished between the judges sitting at the court of appeal and those of the Cour de cassation, which is the highest court in Luxembourg. Until 2016, and as the two courts taken together form the Cour supérieure de Justice (which as such has some very specific competences), we indicated only the total of the judges affected to the Cour supérieure. It might be useful for statistical purposes to distinguish between the two levels. 2) concerning the number of judges at the first level: the figures indicated until 2016 were superior to the real figures, as, erroneously, the prosecutors (which by law are also magistrates affected to these courts) had been included. We corrected this error in 2016.
There has been a major modification in june 2017, by the law of 27th of June 2017 adopting a multiannual program of recruitment into the judiciary and amending the amended law of 7th of March 1980 on judicial organisation, programming the future changes in the staff at the different entities. This law provides for a multiannual program of recruitment of judges and prosecutors during the years 2017-2020. It entered into force in july 2017.

Q046 (2017): The Act of 27 June 2017 introducing a multiannual programme for recruitment to the judiciary and amending the amended Act of 7 March 1980 on the organisation of the judiciary, defines the number of posts in the various instances.
The indicated data correspond to the number of permanent positions actually held in 2017.

Q046 (2016): The figures differ from those indicated in the last data collection campaigns on two points.
1) concerning the number of judges at the highest level: starting with 2016, we have distinguished between the judges sitting at the court of appeal and those of the Cour de cassation, which is the highest court in Luxembourg. Until 2016, and as the two courts taken together form the Cour supérieure de Justice (which as such has some very specific competences), we indicated only the total of the judges affected to the Cour supérieure. It might be useful for statistical purposes to distinguish between the two levels.
2) concerning the number of judges at the first level: the figures indicated until 2016 were superior to the real figures, as, erroneously, the prosecutors (which by law are also magistrates affected to these courts) had been included. This error has now been corrected.

Q046 (2015): In 2014, the judges of the Administrative Court were included in the number of judges in the Supreme Court but in 2015 these judges were accounted as second instance judges.

Q046 (2014): In 2014, the judges of the Administrative Court were included in the number of judges in the Supreme Court but in 2015 these judges were accounted as second instance judges.

Q046 (2013): To the total number of judges, should be added 4 trainees ("attachés de justice"). The increase in the number of female judges at all instances between 2010 and 2013 is explained by the special attraction for a profession that allows to combine work and family life. Judges of second instance and those of the Court of Cassation are all part of the Superior Court of Justice.

Q046 (2012): The total number of professional judges does not correspond to the sum of the number of judges before each instance because some judges have jurisdiction in two courts (e.g. the Constitutional Court is composed of judges of the Court of Cassation and the Administrative Court).

Q052 (General Comment): With regard to question 52, all non-judge staff is in charge of assisting judges (except at the administrative courts). Therefore, starting from 2017, we do no longer distinguish between staff in charge of administrative tasks and staff assisting judges. Only at the administrative courts there are few persons not assisting judges.

Q052 (2021): The category “other non-judge staff” refers to the “référendaires” and the data protection compliance officer of the administrative courts.
The number of “other non-judge staff” has increased by 125% in absolute terms, which corresponds in fact to an increase of 5 persons, representing 5 posts of “référendaires”. Judicial and administrative courts are making greater use of “référendaires” to relieve judges of certain tasks.

Q052 (2020): The other non-judicial staff consists of three legal secretaries and a data protection compliance officer from the administrative courts.

Q052 (2018): Regarding the category "other non-judge staff", it includes non-judge staff working for administrative courts. The increase of the non-judge staff is due to the fact that we no longer distinguish between the staff in charge of administrative tasks and the staff assisting the judges as court clerks, since all the non-judge staff is in charge of assisting the judges. We interpreted this differently in the previous years. Previously some of the staff was considered as not assisting the judges, because of their statute, this appeared as not correct since none of them is limited to administrative tasks, except at the administrative courts, where six persons are in charge of purely administrative tasks. The revised 2017 data shows an increase of the total non-judge staff assisting the judges of 9.95%.

Q052 (2017): With regard to question 52, all the non-judge staff is in charge to assist the judges (except at the administrative courts). Therefore for the year 2017, we did no longer distinguish between staff of administrative tasks and the staff assisting the judges. Only at the administrative courts are 6 persons not assisting the judges.

Q052 (2016): Last year the separation of the sections 1, 2 and 3 was not done correctly. This year this task was made by the parquet general RH office.

Q052 (2014): The overall administrative tasks concerning ordinary courts are centralized at the level of the Prosecutor General Office. The same applies to technical staff. Among the 192 non-judge staff assisting judges, 117 are women. The category "staff in charge of different administrative tasks" (3 women, 2 men) and the category "technical staff" (1) refer exclusively to the Administrative Court (which was not the case for 2012). The 2014 data reflects the administrative reality, the staff that cannot be categorized to one specific task being attached to the State Prosecutor General. The total remains stable; slight variations are due to temporary replacements. The category "other" does not subsume external staff hired on contractual basis, e.g. in IT matters (as in 2012).

Q052 (2013): The overall administrative tasks concerning ordinary courts are centralized at the level of the Prosecutor General Office. The same applies to technical staff. Among the 192 non-judge staff assisting judges, 117 are women. The category "staff in charge of different administrative tasks" (3 women and 2 men) and the category "technical staff" (1) refer exclusively to the Administrative Court staff. The 2013 data reflects the administrative reality, the staff that cannot be categorized to one specific task being attached to the State Prosecutor General. The total remains stable; slight variations are due to temporary replacements. The category "other" does not subsume any more external staff intervening on contractual basis, for example in IT matters.

Q052 (2012): Except for categories 1 ('Rechtspfleger') and 2 (non-judge staff whose task is to assist the judges), all others carry on their work in the interest of the whole judicial system, that is to say, both for judges and prosecutors.

Q052-1 (2021): The 27% increase in the number of second instance non-judge staff is explained in particular by the hiring of additional “référendaires”. At the Supreme Court, the number of non-judge female staff decreased by 50% in relative terms; in absolute terms, this corresponds to one woman being replaced by a male member of staff.

Q055 (General Comment): The figure in point 3 includes both second instance and Supreme Court prosecutors, as they are grouped together in the Superior Court of Justice, which is subdivided into the Court of Appeal and the Court of Cassation.

Q055 (2018): Le personnel des juridictions judiciaires et administratives a connu une croissance soutenue ces dernières années, tel que prévu par la loi modifiée du 7 mars 1980 sur l'organisation judiciaire. Ceci explique les variations importantes observées entre 2016 et 2018 au niveau du personnel de la magistrature et du personnel non-juge. Les magistrats appartenant à la cellule de renseignement financier (CRF) sont dorénavant exclus de la question 55.1 (suite au détachement de la CRF du Parquet de Luxembourg) puisqu’ils n’exercent plus de fonction juridictionnelle proprement dite. Au total, la CRF compte 4 magistrats et un attaché de justice en 2018. L’effectif du Parquet d’arrondissement reste toutefois inchangé suite à la création des nouveaux postes affectés à la CRF
Les magistrats du pool de complément sont inclus dans les chiffres de la question 55.3.

Q055 (2016): The number of prosecutors indicated here as working at the Supreme Court corresponds to the number of prosecutors working at the Superior Court of Justice (which includes prosecutors intervening at the Court of Appeal and Court of Cassation level).
Q055 (2014): The number of male public prosecutors decreased between 2012 and 2014, while the number of female public prosecutors increased for the same period. These variations have for sole explanation the normal progress of career of magistrates of the public prosecution office at first instance.

Q060 (2020):
"The staff of the judicial and administrative jurisdictions has grown steadily in recent years, as provided for by the amended law of March 7, 1980 on judicial organization. This explains the significant variations observed between 2018 and 2020 at the judicial and non-judicial personnel.
In 2018, the FIU was administratively attached to the Parquet Général du Luxembourg. Due to the FIU's functional independence, analysts (13 positions) and administrative staff (6 positions) are no longer counted among the staff of the public prosecutor's office."

Q060 (2018): Le personnel des juridictions judiciaires et administratives a connu une croissance soutenue ces dernières années, tel que prévu par la loi modifiée du 7 mars 1980 sur l'organisation judiciaire. Ceci explique les variations importantes observées entre 2016 et 2018 au niveau du personnel de la magistrature et du personnel non-juge. En 2018, la CRF a été rattachée administrativement au Parquet général du Luxembourg. En raison de l'indépendance fonctionnelle de la CRF, les analystes (8 postes) et le personnel administratif (5 postes) ne sont dorénavant plus comptés parmi le personnel du ministère public. L'effectif du Parquet d'arrondissement reste toutefois inchangé, par rapport à 2017, suite à la création des nouveaux postes remplaçant les postes auparavant affectés à la CRF auprès du Parquet.

Q060 (2012): The methodology of presentation of data changed between 2010 and 2012 which partly explained the considerable increase observed for this period. Besides, in 2012, there was a general increase of the number of public servants at all levels.

Q132 (2021): As a starting salary (professional judge of first instance or prosecutor) we consider the salary of the "attachés de justice" after their first appointment. The salary scale of the magistrates provides for 380 index points as a basis, a possible professional experience can be added to it but is not taken into account by our calculations.
As a theoretical basic salary for a judge or prosecutor at the Court of Appeal we consider the grade M4, level 4, which corresponds to 455 points and to the average seniority of a magistrate appointed to the Court (Court and General Prosecutor's Office). However, it should be taken into account that this salary is strongly influenced by the family situation of the person concerned.
To calculate the annual salary, these points must be multiplied by the value of the index point. Between January and September 2021, the value of the index point for a civil servant was 20.17893; after 1 October, the value of the index point was 20.6831871. Taking into consideration these elements, a 12-month salary corresponds to 92 591€ for a first instance professional judge, respectively a salary of 110 865€ for a judge or prosecutor at the Supreme Court. These figures do not include any bonuses, allowances or benefits that may be added to the basic salary depending on the magistrate concerned.
More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates, can be found on the civil service website (https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html).

Q132 (2020): "As a starting salary (professional judge of first instance or prosecutor) we consider the salary of the judicial attachés after their first appointment. The salary scale of the magistrates provides for 380 index points as a basis, a possible professional experience can be added to it but is not taken into account by our calculations.
As a theoretical basic salary for a judge or prosecutor at the Court of Appeal we consider the grade M4, step 4, which corresponds to 455 points and to the average seniority of a magistrate appointed to the Court (seat and General Prosecutor's Office). However, it should be taken into account that this salary is strongly influenced by the family situation of the person concerned.
To calculate the annual salary, these points must be multiplied by the value of the index point. In December 2020, the value of the index point for a civil servant was 20.17893, which corresponds to a 12-month salary of 92.016€ for a professional judge of first instance, respectively a salary of 110.177€ for a judge or prosecutor at the Supreme Court. These figures do not include any bonuses, allowances or benefits that may be added to the basic salary depending on the magistrate concerned. More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates, can be found on the civil service website (https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html)."

Q132 (2019): As a salary at the beginning of the career (first instance professional judge or prosecutor) we consider the salary of the "attachés de justice" after their first appointment. The salary scale for judges and prosecutors is based on 380 points, any professional experience can be added but is not taken into account in our calculations. To calculate the annual salary, these points must be multiplied by the value of the index point. In December 2019, the value of the index point of a civil servant was 20,17893, which corresponds to a salary of €92,016 over 12 months. In 2016, this figure corresponded to €84,185 and in 2018 to €89,771. More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates (judges and prosecutors), can be found on the civil service website: https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html.

Q132 (2016): The salary are those of the Court President and the Prosecutor General as no average salary can be calculated.

Q144 (2021): Since disciplinary proceedings may also be initiated for acts relating to the magistrate's personal (non-professional) behaviour, the category "other" has been used to take account of such situations.

Q144 (2020):
Since disciplinary proceedings may also be initiated for facts relating to the magistrate's personal (non-professional) conduct, the heading OTHER has been used to take account of such situations.

Q145 (2021): The law still provides for the penalty of a warning as a first level of sanction as well as compulsory retirement. Disciplinary sanctions against magistrates (judges and prosecutors) are listed exhaustively in Article 156 of the Law on Judicial Organisation. Withdrawal from a specific case, position downgrade and transfer to another geographical (court) location are not included in this list.

Q145 (2020): The law still provides for a warning as the first level of sanction, as well as compulsory retirement. Disciplinary sanctions against magistrates (judges and prosecutors) are listed exhaustively in Article 156 of the Law on Judicial Organization. Withdrawal from a specific case, retroaction of position and geographical transfer are not included in this list.

Q145 (2018): L'unique procédure entamée contre un magistrat du siège pendant la procédure de référence s'est terminée par une décision de classement émanant de la formation de discipline de la Cour supérieure de justice.

Q145 (2016): In 2016 there have been two disciplinary actions. One of the cases was dismissed as not sufficiently founded, in the second case the perpetrator was revoked from office.

Q146 (2021): The Diekirch Bar did not provide details on the breakdown of the number of lawyers by gender. Among lawyers registered at the Luxembourg Bar, who represent 98% of the lawyers registered at the two Luxembourg Bars, 52% were male and 48% were female.

Q146 (2015): The number indicated includes the number of lawyers, trainee lawyer, lawyers practising under their home-country professional titles and independent lawyers at September 1st, 2016.

Malta

Q004 (2021): The figure quoted above relates specifically to the Average Annual BASIC salary as provided by the National Statistics Office of Malta. The NSO do not collect the Average Annual Gross salary.

Q004 (2018): This data has been provided by NSO based on as yet provisional estimates.

Q046 (General Comment): In Malta there is no Supreme Court, the Court of Appeal being the Court of second instance. The Constitutional Court, then, is presided over by the 3 judges who compose the Court of second instance also known as the Court of Appeal in its Superior Jurisdiction. It is interesting to notice that 2 judges presiding over the Second Instance Courts also preside over the Civil Court, First Hall and the Family Court (which are specialised 1st instance courts).
The number of 1st Instance 'judges' also includes magistrates that preside over 1st Instance Courts.

Q046 (2021): During 2021, 4 new magistrates and 2 new judges were appointed to the bench, thereby increasing the judicial complement by the same number. 2 judges were also appointed to the bench, but given that they were previously magistrates, their appointment did not increase the judicial complement.

Q046 (2019): For Number of first instance professional judges, the difference in nominal figures is of 4 male magistrates compared to previous cycle. This is mainly due to retirement and the appointment of 2 male magistrates to judges. 3 new magistrates have been appointed in 2019, only 1 of which is male.
For the Number of second instance professional judges, Madame Justice Lorraine Schembri Orland has been appointed Judge elect in respect of Malta on the European Court of Human Rights. Given that she did not serve in Malta at the end of 2019, she does not feature in the above data.

Q046 (2017): Despite the categorical manner in which the Maltese judiciary have been classified for the purpose of this exercise, it is important to note that the roles of some of the judges are very fluid. Hence, some of the 1st Instance judges preside, when the need arises, over 2nd Instance courts, whilst 2nd Instance judges hear cases at 1st Instance such as at the Civil Court, First Hall or the Civil Court, Family Section.
Throughout 2017, 1 male 1st Instance Judge passed away at the beginning of the year, whilst another 2nd Instance Judge retired towards the end of the year. 1 female Magistrate has been appointed. Care is being taken in order to ensure an equal gender representation in the appointments of the judiciary.

Q046 (2016): Despite the categorical manner in which the Maltese judiciary have been classified for the purpose of this exercise, it is important to note that the roles of some of the judges are very fluid. Hence, some of the 1st Instance judges sit, when the need arises, in 2nd Instance courts, whilst 2nd Instance judges hear cases at 1st Instance such as at the Civil Court, First Hall or the Civil Court, Family Section.
There has been an increase of 3 female judges at 1st instance since 2014. There was an increase from 15 to 17 female judges at 1st instance in 2015 and a further increase of 1 female judge at 1st instance in 2016. Care is being taken in order to ensure an equal gender representation in the appointments of the judiciary.

Q046 (2015): Regarding the number of judges, the high percentage variations that might be observed results from the small absolute number of judges that Malta has. Malta has been trying, and there are still on-going efforts, at increasing the number of judges. If between 2010 and 2015 the number of male judges decreased (by 1), this was complemented by an increase in the number of female judges (also by 1).

Q046-2 (2021): Some judges in the Maltese judicial system preside over both civil and criminal courts. In this instance, such judges have been distributed evenly between the 2 courts.
Administrative cases at first instance are heard by the Administrative Review Tribunal, presided over by 3 magistrates. If appealed, such cases are heard by the Court of Appeal Inferior Jurisdiction presided over by a judge who hears and decides cases appealed from a number of first instance courts (not only the Administrative Review Tribunal). Given that these cases constitute only a fraction of the caseload of this judge, it would be misleading to indicate him as a 2nd Instance judge over appeals from administrative cases.

Q046-2 (2020): Some judges in the Maltese judicial system preside over both civil and criminal courts. In this instance, such judges have been distributed evenly between the 2 courts.
Administrative cases at first instance are heard by the Administrative Review Tribunal, presided over by 3 magistrates. If appealed, such cases are heard by the Court of Appeal Inferior Jurisdiction presided over by a judge who hears and decides cases appealed form a number of first instance courts (not only the Administrative Review Tribunal).

Q052 (2019): For Technical Staff: This is an issue of recruitment and given the change from a Department to an Agency, the Court Services will be issuing new calls in line with the requirements of the Agency.
Q052 (2018): Other non-judge staff include:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti Personnel

Q052 (2017): Other non-judge staff includes:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti staff

Q052 (2016): Other non-judge staff includes:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti staff

Concerning "Technical Staff", 2 technical staff were employed. Between 2014 and 2015, there was a decrease in the number of tradesman employed with the court administration.

Q052 (2015): In the 2015 data, the category 'Non-judge staff whose task is to assist the judges' includes 13 Court Attorneys that have been introduced for the first time in October 2015. This staff is meant to assist the judges in the drafting of the sentences and other related matters. However the Court Attorneys are not autonomous and the responsibility for the sentences that they draft ultimately lies with the presiding judge.
The differences noted between 2014 and the previous regarding the categories "staff in charge of administrative tasks" and "other non-judge staff" is due to a change in the distribution. After 2014, some non-judge staff who were included in the category "staff in charge of administrative tasks" were integrated in "other non-judge staff".
The decrease between 2014 and 2015 in the number of "technical staff" is due to a decreases in the number of tradesman.

Q052 (2014): The differences noted between 2014 and the previous regarding the categories "staff in charge of administrative tasks" and "other non-judge staff" is due to a change in the distribution.

Q052 (2013): In 2013, the number of non-judge staff was detailed as follows: staff assisting judges – deputy registrars (67), court messengers (19), judicial assistants (30), clerical staff (141), ushers (25), senior court recorders (12), court recorder in charge (1), and Children's advocate (2); staff in charge of administrative tasks – Directorate Support Services (86), Directors and staff (12), Asset Management unit (3), Archives (3), one stop shop (7), Subasti (3), Library (1), Publications (3) technical staff – tradesmen (7), Bookbinder (1);
"other" – cleaners (8), Chief Marshal (1), Marshals (20). An exercise at beefing up the Court administration staff was undertaken by the Government in 2013, fas a result of which, the figures for different sub-categories have increased considerably.

Q052 (2012): In 2012, the number of non-judge staff was detailed as follows: staff assisting judges – deputy registrars (65), court messengers (19), judicial assistants (30), clerical staff (59), ushers (25), senior court recorders (12), court recorder in charge (1), and Children's advocate (2); staff in charge of administrative tasks – Directorate Support Services (83), Directors and staff (13), Asset Management unit (3), Archives (3), one stop shop (4), Subasti (2), Library (1), Publications (2); technical staff – tradesmen (7), Bookbinder (1); "other" – cleaners (7), Chief Marshal (1), Marshals (20).

Q052-1 (2020): It is not possible to differentiate the non-judge staff according to these criteria.

Q052-1 (2018): It is not possible, at the moment, to differentiate the staff working at first instance from that working at second instance.

Q055 (General Comment): All the lawyers working in the Office of the AG prosecute cases in the criminal courts, but it is not possible, as yet to distinguish between 1st and 2nd Instance Courts. All full-time lawyers have been included in the above figure except the AG herself.

Q055 (2020): The increase in the number of lawyers working at the Office of the AG follows the reform in 2020 whereby the AG has taken up exclusively the role of prosecutor general (the advisory role to government has been vested in the State Advocate). Given this special focus, the Office of the AG has been recruiting more lawyers in order to meet the case demands of the courts.

Q055 (2016): All the lawyers at the Office of the Attorney General work both in Court as well as advisers to the various Ministries and Departments. All prosecuting officers at the Office of the Attorney General act at all court levels. Thus, prosecutors are not classified according to the case instance.

Q055 (2014): These past few years there has been an increase in the number of female law graduates, which will definitely reflect in the employment trends within this sector.

Q060 (2016): This data relates specifically to the staff working int he Office of the AG.

Q060 (2014): The number of non-public prosecutors staff declared for 2014, is categorised as follows: supporting paralegal clerical staff – 17 (6 Male/11 Female); civil lawyers acting as attorneys – 13 (11Female/2 Male), legal prosecutors – 3 Female.

Q132 (2020): Wages for the lawyers of the AG were improved following a revision of salaries.

Q132 (2019): Public prosecutor at the beginning of his/her career: Actually there was an increase in the gross annual salary which is also reflected in the net annual salary. The difference in the net annual salary is then due to the different tax brackets that apply.

Q132 (2018): In 2018, following discussions with the Judiciary Association, the Ministry substantially increased the wage package of the members of the judiciary across all grades (Magistrates, Judges and Chief Justice). The agreement saw an increase in the basic salary and allowances received by the judiciary, with further increases planned over the coming 3 years. This improvement in the wage package reflects the commitment of the current administration to improve the working conditions of the judiciary, and continues to build on the reforms already brought into effect by the Constitutional Reforms (Justice Sector) Act of 2016.

Q132 (2014): The 2014 figures include the allowances over and above the 'basic' wage. A Magistrate has competence to hear all civil cases up to a value of €11,650 and criminal cases up till an imprisonment of 10 years whilst Judges hear all the other cases. The data provided relates to the salary of a Magistrate (in respect of first instance professional judge) and a Judge (in respect of Judge of the Supreme Court). The Net Annual Salary varies according to the Income Tax Bands announced, from time to time, and therefore it is not possible to indicate the amounts. The figures provided for as net income were calculated on the salary above-indicated for a married person.

Q132 (2012): In terms of the Judges and Magistrates Salaries Act, the gross annual salary of the Chief Justice for 2012 was €46 456, this of a judge was €40 221, whilst this of Magistrates was €34 188. A Magistrate has competence to hear all civil cases up till a value of €11,650 and criminal cases up till an imprisonment of 10 years whilst Judges hear all the other cases. The figure mentioned relates to the initial salary of Judge, though the beginning of one's career in the judicial field is as a Magistrate. The Net Annual Salary varies according to the income tax bands announced, from time to time, and therefore it is not possible to indicate the amounts. The figures provided for as net income were calculated on the salary above-indicated for a married person.

Q133 (General Comment): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through the introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.

Q133 (2020): In respect of 'Special Pension' for Public Prosecutors, The Pensions Ordinance, Chp 93 of the Laws of Malta, stipulates a special pension for the Attorney General only.
Q133 (2018): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through he introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.
Q133 (2016): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through he introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.

Q144 (General Comment): This data is not available due to issues of professional secrecy.

Q144 (2018): This information is not made publicly available.

Q145 (General Comment): This data is not available due to issues of professional secrecy.

Q145 (2018): This information is not made publicly available.

Q145 (2016): The only case mentioned above is know because it was leaked to the local media. The magistrate in question was reprimanded by the Commission for the Administration of Justice for breaching the judicial code of ethics.

Q146 (2021): The answer to Q146 represents the warranted lawyers who have registered themselves in the Register of Legal Professionals and Law Firms as per Act XIX of 2021. As from this evaluation onwards, the number of lawyers quoted will always be sourced from this official register.
Q146 (2017): The number of lawyers quoted in this answer refers to the number of warranted lawyers at the end of 2017. This data is based on a list of warranted lawyers practicing in Malta, compiled by the Department of Justice. Work on this list is ongoing but it is important to note that the figure quoted above, reflects a more faithful representation of the number of warranted lawyers in Malta.
Q146 (2016): The number of lawyers quoted in this answer refers to the number of warranted lawyers who are also members of the Chamber of Advocates, at the end of 2016. Throughout 2016, the Chamber of Advocates has been updating their list of members in order to clear the names of the lawyers who have either retired or have passed away. Furthermore, it is important to note that at present membership with the Chamber of Advocates, which is the sole Bar Association in Malta, is not mandatory. Hence over the past few months, the Department of Justice is drawing up the first complete list of warranted and non-warranted lawyers in Malta. Work is still underway so it is important to note that the figure quoted above, which is less than that submitted in the previous evaluation, reflects a more faithful representation of the number of warranted lawyers in Malta.

Q146 (2015): The number of lawyers quoted in this answer refers to the number of warranted lawyers on the list of advocates at the end of 2015. It is possible that some of these lawyers have retired so whilst the warrant remains valid, it does not necessarily mean that all 1569 lawyers are practising the profession. At present there does not exist any mechanism wherein lawyers register once they are given the Warrant to practice, and membership with the Chamber of Advocates, which is the sole Bar Association in Malta, is not mandatory to practice as a lawyer.

Q148 (General Comment): This data was not available prior to 2014. It started being collected by the Department of Justice in 2015.
Q148 (2021): Throughout 2021, 4 new applications have been submitted out of which 3 were accepted.

Q148 (2019): Throughout 2019, only 5 EU legal professionals were granted the respective certificate of registration with the limitation that they cannot represent their clients in court. Many more applications are pending evaluation.

Q148 (2018): The figure of 135 legal advisors is derived form the composite of 101 legal advisors at the end of 2017 and 34 new applications throughout 2018. hence at the end of 2018, there were 135 legal advisors who could practice with an established lawyer in Malta but cannot represent clients in court.
Q148 (2017): In 2017, there have been 25 newly registered legal advisors.

Netherlands

Q004 (General Comment): These are provisional numbers; definitive numbers (available next year) may differ slightly from those provided here. The data specifies ‘reward per working year’ as salary. This reward consists of salary (gross salary, including taxes and social contributions/premiums), rewards like holiday stipends, payment in kind, expense allowances tied in with work (e.g. travel allowances), and social premiums for the employer (payments for lawful and contractual social security, like pension contributions).

Q004 (2020): These are provisional numbers and the definitive numbers (available in 2022) may differ slightly from these provided here. The data specifies 'reward per working year' as salary. The reward consists of salary (gross salary, as it includes taxes and social contributions/premiums), rewards like holiday stipends, payment in kind, expense allowances that tie in with work (like travel allowances that cover costs to and from work), and social premiums that are for the employer (payments for lawful and contractual social security, like pension contributions).

Q004 (2019): The Statistics Bureau only had numbers for 2018. 2019 data was not available at the moment of data collection.

Q004 (2018): This is average salary of all employees; the number includes money that employers pay for pension plans, social security (money that is paid directly to employees). The statistic does not include the income of people who are not employees (people without work, employers).
Q004 (2016): Compared to previous questionaires (before 2014) these figures have been adjusted according to new rules of the european system of national accounts (illegal activities are now included)
Q046 (General Comment): Since 2020, new methodology of presentation of data is used, allowing distinguishing between first and second instance for the specific group of judges who were previously all counted as first instance judges ('overig RA'). For all cycles, court presidents are taken into consideration in the figures

Q046 (2021): Numbers are on posts filled, not fte. Total fte is 2416.
Total fte for first and second instance was given in 2021, but information on fte was NA for the rest of the categories and the detail required cannot be provided.
For the Supreme court, fte and posts filled are the same.

Q046 (2020): These numbers are on posts filled, not fte. The total fte for first and second instance together is 2372, but information on fte is NA for the rest of the categories and detail required for this question. These numbers include court presidents.
In the previous cycles, due to an inability to differentiate between first or second instance for a certain group of judges, they were counted as first instance judges. This inflated the first instance numbers and underreported the second instance numbers. This problem was present in the data up until the 2019 survey. For the 2020 data, this problem has been solved, and the data is now correct.
Q046 (2018): We did not receive information on the number of judges (in fte) working at the High Court. There are 33 judges at the High Court (people, not fte), 20 male / 13 female. Since this concerns only 1% of all judges, we'd suggest to work with these numbers (and accept the small deviation in the calulated total number)
Q046 (2017): these are number of people (posts); the total number of fte is 2315, this can not be separated for 1st and 2nd instances
NB: data on the number of Supreme Court judges is provided in fte. More precisely, according to the annual report of the Council of State https://jaarverslag.raadvanstate.nl/2017/ the number was 37.9 fte in 2017.
Q046 (2016): All data in number of persons. FTE data are only available for the total: 2148.
Supreme Court NA
Q046 (2015): Number of deputy judges courts in 2015 = 1.100
The numbers provided in the table are posts. The FTE is avaialble only for the total and it is 2.169. Other categories are NA.

Q046 (2014): In 2014, the number of first instance judges does not include judges of the Trade and Industry Tribunal, the Supreme Court and the Council of State. The number of second instance judges includes magistrates of the Trade and Industry Appeals Tribunal and the Administrative High Court, excluding these of the Supreme Court and the Council of State.

Q046 (2013): In 2013, the total in fte is 2 181. This was excluding the Supreme Court. The number of first instance judges excludes judges of the Trade and Industry Appeals Tribunal, the Supreme Court and the Council of State. The number of second instance judges includes magistrates of the Trade and Industry Appeals Tribunal and the Administrative High Court, excluding these of the Supreme Court and the Council of State.

Q046 (2012): In 2012, the total in fte is 2 194, excluding the Supreme Court. The number of first instance judges excludes judges of the Trade and Industry Appeals Tribunal, the Supreme Court and the Council of State. The number of second instance judges includes magistrates of the Trade and Industry Appeals Tribunal and the Administrative High Court, excluding these of the Supreme Court and the Council of State.
Q046-2 (General Comment): Judges often work more than one case type. There is a large overlap, but in the administrative system, only one sector can be registered. Therefore, making a distinction would not be a fair reflection of the true situation and the information is not easily available. This comment does not generally apply to the High Court.

Q046-2 (2021): Numbers are on posts filled, not fte. FTE for first and second instance is 2416.
For SC fte and posts filled are the same. Note that the 11 judges under the category 'Administrative' (Supreme Court) refer to the judges in the tax chamber of the Dutch Supreme Court. With regard to administrative law, the Dutch Supreme Court only handles tax cases and some social security cases. There is no third instance court for other administrative cases in The Netherlands.

Q046-2 (2020): Judges often work with more than one case type. There is a large overlap, but in the administrative system, only one sector can be registered. Therefore, while this information is not easily available, making this distinction would also not be a fair reflection of the true situation.
These are positions filled, not fte (like Q46).

Q052 (General Comment): Only the total of non-judge staff working in courts is available.

Q052 (2021): The Council of the Judiciary is not able to make a distinction between different types of non-judge staff working in courts, and thus, the entry is NA. The Supreme Court can make a distinction for the number of non-judge staff whose task is to assist the judges (fte = 110), and staff in charge of different administrative tasks (fte = 148). The first and second instance court cannot (total fte = 7395).

Q052 (2017): the number given is the number of people (posts), the fte is 6719; these can not be separated by gender or line in the table

Q052 (2016): Number of FTE = 6530.

Q052 (2015): FTE in 2015 is 6.497

Q052 (2014): The figure 7 287 pertains to persons; data in FTE is 6 495.

Q052 (2013): According to 2013 data, the figure 7.287 pertains to persons, data in fte is 6.495.

Q052-1 (2021): Comments from the SC:
1.Note that the above also includes the judicial and other staff working for the office of the Procurator General and Advocates General at the Dutch Supreme Court (who are not part of the Dutch public prosecution office).
2.Note that the Dutch Supreme Court has outsourced various tasks such as building maintenance, technical services, facility management, reception, security, cleaning and catering. The individuals performing these services are therefore not included in the numbers above.

Q052-1 (2018): The total of non-judge staff does not include staff of the High Court.

Q055 (General Comment): The Dutch Supreme Court does not have public prosecutors. The office of the Procurator General and Advocates-General at the Dutch Supreme Court is separate from Dutch public prosecution and the Ministry of Justice. They have a different function.

Q055 (2020): The Supreme Court does not have (public) prosecutors. The office of the procurator general and attorneys general that the Supreme Court houses, is separate from the public prosecution and does not function as prosecution. They have a different function.

Q055 (2016): total 927,5 358,12 569,38
1 842,25 312,72 529,53
2 85,25 45,40 39,85

Q055 (2014): For 2014, the number of prosecutors at first instance level includes 8 prosecutors who are still in education (7 females; 1 male). Prosecutors at Supreme Court level are not employees of the National Prosecution Service and therefore not included in the total.

Q132 (General Comment): Salary of judge / prosecutor 'at the beginning of career': the salary used is the one for a starting judge / prosecutor, after finalizing a training period of several years. During the training there is a fixed saraly, lower than the salary of a fully functional judge / prosecutor.

Q132 (2021): Public prosecution: Numbers are including a vacation stipend and 13th month. There is no new collective labour agreement as of yet, so these numbers are the same as last year. As soon as a new agreement is reached, the salary may change retroactively.
Concer
Courts: Salary of a judge / prosecutor 'at the beginning of career': the salary used is one for a starting judge / prosecutor, after finalizing a training period of several years. During the training, there is a fixed salary, lower than the salary of a fully functional judge/prosecutor. Salary includes a holiday stipend, as well as a 13th month.
Supreme Court: the above amount is the average gross salary (11.163,63 euro per month) for a regular Supreme Court judge and includes a holiday allowance (8% of annual salary) and a so-called 13th month (8.3% of annual salary). Please refer to legislation (https://wetten.overheid.nl/BWBR0008365/2021-07-01) on this subject as well as the salary scheme (https://nvvr.org/uploads/documenten/Salaristabellen-RM-juli-2021.pdf).

Q132 (2020): Public prosecutor at the beginning of his / her career: The recent salary table RM of the end of 2020 is used (Scale 9, first step). On top of this the holiday stipend and end of year stipend is calculated. The 42.900 is a rough estimate of the net annual salary, after taxes, pensions etc.

Q132 (2016): The discrepancy of the answers for gross salary is not clarified.

Q133 (2021): SC: Other financial benefits for a regular Supreme Court judge would be a tax free monthly allowance for expenses of 1.502 euro. Please refer to the legislation (https://wetten.overheid.nl/BWBR0008365/2021-07-01) and regulation (https://wetten.overheid.nl/BWBR0031765/2021-01-23) on this subject.

Q144 (2021): Courts: There was one disciplinary proceeding for a replacement-judge (these are usually lawyers, professors, etc. and replace judges when they are absent, ill, etc.), not counted here.
SC: the two disciplinary proceedings concerned a dismissal of a deputy judge. Deputy judges usually perform a main position outside the judiciary. The law has provided for the possibility of the dismissal of a judicial official by the Supreme Court if the judicial officer has not been called upon to perform activities by his or her court leadership for two years. In addition, there should be a sufficiently compelling reason justifying the request for dismissal. In one of the cases, the deputy judge had systematically failed to respond to call notices asking for her availability to perform judicial duties. Nor had she responded to other correspondence. In the other case, the appointment to the position of deputy judge was related to the individual's main position as civil-law notary. Disciplinary measures were imposed on the individual in question. A Disciplinary Court disqualified the individual from acting as a civil-law notary. As a result, this individual lacked authority and credibility. In both cases, the Supreme Court held that there was a sufficiently compelling reason for dismissal.

Q144 (2020): A combined integrity issue in work and private life

Q144 (2018): private use of a company car

Q145 (2021): Prosecutors – other sanctions: one was handled as a type of complaint, and the other was a conditional dismissal for 2 years.
Q145 (2020): Resignation: whether or not at the insistence of the board (head of the court administration). Technically judges cannot be fired, as they are appointed for life.
Q145 (2012): In the frame of the 2012 exercise, it has been explained that the sanctions enumerated in items 2 to 7 were not available yet in the Dutch legislation. As to the item "resignation", it subsumes dismissal upon request -early retirement- on a combination of a work and private related integrity issue. In 2010 and 2012, the only possible disciplinary measures were the written warning (for example, in the case of neglect of the dignity of the office and duties) and the dismissal. A dismissal is possible in the case of damaging a good state of affairs in the administration of justice and in its trust.
In 2012, there were 49 reported suspicions of integrity violations, 41 of them were actually fixed (39 prosecutors were involved). Most integrity violations had to do with improper use of service resources and the crossing of internal rules (e.g. unauthorized recording leave and undesirable use of the internet or social media). There was a rise in the number of suspected and confirmed integrity violations due to the increased awareness around integrity. Furthermore, in 2012, an Integrity Agency (BI-to) started working. It is a national expertise centre with an advisory, stimulating and controlling role in the area of integrity. Besides, in 2012, the renewed code of conduct was introduced focusing on five core values: professionalism, environmental focus, integrity, openness and diligence.

Q146 (2021): On 1-1-2021: 17 964 (9 837 male, 8 127 female)

Q146 (2020): This is the number of lawyers on 1-1-2021
Number of lawyers on 1-1-2020: 17.829 (total), 9867 (males), 7962 (females)

Q146 (2019): Numbers on 1/1/2020

Q146 (2017): Annual report NOVA 2017

Q147 (2017): NA

Q147 (2016): NA.

Poland

Q004 (2021): data source - Central Statistical Office
The wage increases linked to economic changes.
Q004 (2016): NA

Q046 (General Comment): The Polish court structure is characterized by four levels of courts but only three instances. Basically, there are district courts which are first instance courts, regional courts which are first and second instance courts, and appellate courts which are second instance courts. The highest instance courts are the Supreme Court, the Supreme Administrative Court and the Constitutional Tribunal. Owing to this peculiarity, some judges sit as first and second instance magistrates. According to the methodology of presentation of data that has been chosen, judges of regional courts are counted as first instance judges together with judges of district courts and judges of first instance administrative courts. Only judges of appellate courts are considered as second instance magistrates. The Supreme Court operates under the Constitution of the Republic of Poland and the Supreme Court Act. It is established to:
- exercise supervision over the activities of common and military courts in the area of adjudication - this is the so-called judicial supervision (Article 183(1) of the Constitution). The means used to exercise such supervision include:
- recognition of extraordinary complaints, cassations and other appeals (instance supervision),
passing resolutions resolving legal issues (extra-institutional supervision) Resolutions of the entire chamber or a larger body of judges have the force of law and are binding on all Supreme Court formations. A panel of 7 judges may decide to give the resolution the force of legal principle.
Competence of the Constitutional Tribunal
The Constitution of 2 April 1997 includes four areas within the jurisdiction of the Constitutional Tribunal:
1) control of norms (abstract and concrete; a posteriori and a priori - Art. 188 items 1-3, Art. 122 items 3 and 4, Art. 133 item 2 of the Constitution); a special procedure for the control of norms is the consideration of constitutional complaints (Art. 79 and Art. 188 item 5 of the Constitution)
2) adjudication of competence disputes between central constitutional organs of the state (Article 189 of the Constitution);
3) adjudicating on the compatibility with the Constitution of the objectives or activities of political parties (Article 188, item 4 of the Constitution)
4) recognising the temporary inability of the President of the Republic to discharge his office (Article 131, paragraph 1 of the Constitution).
Of the four areas of the jurisdiction of the Tribunal indicated above, the control of norms is undoubtedly a fundamental task.

Q046 (2021): Common courts:
The number of judges of district courts: 6046 (3938 women, 2108 men)
The number of judges of regional courts : 2684 (1550 women, 1134 men)
The number of judges of the appeal courts: 459 (239 women, 220 men)
The numbers are higher because the president appointed a lot of court assessors as judges in 2021. In addition, there were more appointments to the regional and appeal courts than retirements of judges from these courts.
The Supreme Court : 93 (73 men, 20 women)
The Administrative Supreme Court: 102 (62 men, 40 women);
Administrative courts first instance: 431 (192 men, 239 women);

Q046 (2020): The number of judges of district courts: 6036 (3922 women, 2114 men)
The number of judges of regional courts : 2544 (1462 women, 1082 men)
The number of judges of the appeal courts: 417 (220 women, 197 men)
The number of judges of the first instance administrative courts : 454 (260 women, 194 men)
Supreme courts:
The number of judges of the Supreme Administrative court: 102 (62 women, 40 men)
The number of judges of the supreme court: 97 (75 women, 22 men)
Military courts:
The number of judges of district military courts: 18 (1 woman, 17 men)
The number of garrison judges: 27 (5 women, 22 men).
*Starting from 2020 the number of Supreme court judges include also judges of the Supreme Administrative Court

Q046 (2019): Compared to the previous edition, the number of judges of the supreme court was also given.
The number of Supreme court is 99: 25 (civil chamber), 27 (criminal chamber) 14 (labour law and social security chamber), 20 (extraordinary control and public affairs chamber), 13 (disciplinary chamber).
Females: 21 (total)
11(civil chamber)
3 (criminal chamber)
3 (labour law and social security chamber)
3 (extraordinary control and public affairs chamber)
1 (disciplinary chamber)
Males: 78 (total)
14 (civil chamber)
24 (criminal chamber)
11 (labour law and social security chamber)
17 (extraordinary control and public affairs chamber)
12 (disciplinary chamber)

Q046-2 (General Comment): It is noteworthy recalling that the Supreme Administrative Court is also the court of second instance.
Q046-2 (2020): 1. Supreme Court - the 13 judges of the Supreme Court Chamber of Labour Law and Social Insurance appear in the column “other” together with the 18 judges of the Extraordinary Review and Public Affairs Chamber and the 13 judges of the Disciplinary Chamber.
Q052 (2021): •Members of the Research and Analyses Office of the Supreme Court (Biuro Studiów i Analiz SN);
Data also includes staff from The Supreme Administrative court and The Supreme court of justice
Q052 (2020): probation officers, Specialists of Opinion Teams of Forensic Specialists
*the presented data does not include court assessors (trainee judges). The question should only indicate the number of court employees who are not judges. According to Article 2 § 1a of the Act of 27 July 2001. Law on the Common Court System (Journal of Laws of 2020, item 2072), in district courts, tasks related to the administration of justice are also performed by court assessors/trainee judges, with the exception of:
1) applying temporary detention in pre-trial proceedings in relation to a detainee handed over to the court's disposal together with a request to apply temporary detention;
2) examining complaints against decisions on refusal to initiate an investigation or enquiry, decisions to discontinue an investigation or enquiry and decisions to discontinue an enquiry and on decisions to discontinue an investigation and enter the case in the register of crimes
3) deciding family and juvenile cases.
Since in the remaining scope court assessors perform tasks related to the administration of justice - just like judges - they should be deemed to belong to the professional group of judges. At the same time I would like to inform you that as at 31 December 2020 there were 486 trainee judges employed in district courts, including 317 women and 169 men. 1. number of rechtspflegers of 16 voivodeship administrative courts included (males 23, females 34);
2-4. - In 2020 data include also employees of the Supreme Administrative Court;

Q052 (2019): - professional probation officers;
- employed in Consultative Team of Judical Specialist
Q052 (2018): Other non-judge staff:
- professional probation officers
- employed in Consultative Team of Judical Specialists

Q052 (2017): Other non-judge staff -5790
of which:
Professional probation officers - 5188
Employed in Consultative Team of Judicial Specialists - 602.
Q052 (2016): Other non-judge staff - 5859
of which:
Professional probation officers - 5212
Employed in Consultative Team of Judical Specialists - 647.
Q052-1 (2020): Data from the supreme court's human resources Department.
In 2020 data include also employees of the Supreme Administrative Court

Q055 (General Comment): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. Whereas under item 3 is the number of prosecutors in the position of a prosecutor of the National Prosecutor's Office. The total is higher than the sum of the subcategories because it takes into account the number of prosecutors employed in regional prosecutor's offices, since according to Article 16 of the Law of 28 January 2016 - Law on Prosecutor's Office (Journal of Laws of 2021, item 66) the common organizational units of the prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices. All items (1-3) include prosecutors for military matters.
The inclusion of the number of prosecutors employed in regional prosecutors' offices only in the total number of prosecutors is due to the design of the table. The table allows prosecutors to be entered: 1. first level, 2. second level 3. highest level. The table does not provide an opportunity to depict the full structure of the prosecutor's office in Poland, which consists of four levels: district, circuit and regional prosecutor's offices and the National Prosecutor's Office with a rank equivalent to the Supreme Court. Regional prosecutors' offices are a separate ('third') level of prosecution and the number of prosecutors employed in them cannot be 'split into instances'.

Q055 (2021): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. In contrast, under item 3 is the number of prosecutors in the position of prosecutor of the National Prosecuting Authority. The total is higher than the sum of the sub-categories, as it takes into account the number of prosecutors employed in regional prosecutor's offices - a total of 402 prosecutors (154 women and 248 men), as, pursuant to Article 16 of the Act of 28 January 2016 - Law on the Public Prosecutor's Office (Journal of Laws of 2022, item 1247), the common organisational units of the public prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices.
All items (1 - 3) include military prosecutors, of whom 77 are employed at the district prosecutor's office level, including 19 women and 58 men; at the regional prosecutor's office level, 45 military prosecutors, including 9 women and 36 men; and at the National Prosecutor's Office, 17 military prosecutors (4 women and 13 men).

Q055 (2020): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. Whereas under item 3 is the number of prosecutors in the position of a prosecutor of the National Prosecutor's Office. The total is higher than the sum of the subcategories because it takes into account the number of prosecutors employed in regional prosecutor's offices - a total of 391 prosecutors (151 women and 240 men), since according to Article 16 of the Law of 28 January 2016 - Law on Prosecutor's Office (Journal of Laws of 2021, item 66) the common organizational units of the prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices. For 2020, all items (1-3) include prosecutors for military matters, who at the level of the district prosecutor's office are employed by 85, including 22 women and 63 men; at the level of the regional prosecutor's office - 38 prosecutors for military matters, including 8 women and 30 men, and at the National Prosecutor's Office - 13 prosecutors for military matters (2 women and 11 men).

Q055 (2018): Within the organizational structure of general organizational units of the prosecution office, there are Appellate Public Prosecutor’s Offices, which function as a third rank and employ altogether 367 prosecutors (149 women and 224 men). Additionally, 65 prosecutors of military affairs (including 16 women and 49 men) are employed at the level related to the Regional Public Prosecutor’s Office; 30 prosecutors of military affairs (including 6 women and 24 men) - at the level related to the District Public Prosecutor’s Office, and 5 prosecutors of military affairs (5 men) - in the National Public Prosecutor’s Office.

Q060 (2020): The table presents information available at the National Public Prosecutor's Office Human Resources Office [Biuro Kadr] and contains the numbers of persons actually employed in universal prosecutorial bodies of the public prosecution services, without conversion into full-time equivalents.
The Human Resources Office does not have detailed data on the number of employees in the universal prosecutorial bodies of the public prosecution service who are employed on an indefinite or fixed-term basis. Organisational units of the public prosecution service provide the Human Resources Office with data on employees of the public prosecution service (military part is provided separately) in the following groups:
1)FTE [full time employment] limits,
2)use of the FTE limits (not counted in full-time equivalents and not broken down between men and women) rounded to two decimal places, the actual number of employees (broken down into male and female employees).
The data provided doesnt include trainee prosecutors.

Q060 (2018): In the table, were presented total numbers of employees. Personnel’s Office does not have detailed data connected with differentiation the number of workers per part time or full-time basis. The Personnel’s Office also does not have detailed data connected with the number of workers employed in general organizational units of the prosecution office, for an unspecified or specified period of time.

Q132 (2021): Judges: The basic salary of a judge is determined in rates, the amount of which is determined using multipliers of the basis for determining basic salary. The rates of basic salary in particular judge's positions and multipliers, used for determination of basic salary of judges in particular rates, are specified in the appendix to the Act.
A judge is entitled to a function-related allowance in connection with the performance of his duties.
Judges' remuneration is also differentiated by a long service bonus, amounting, beginning with the sixth year of service, to 5% of basic salary and increasing after each year by 1% until it reaches 20% of basic salary. No social security contributions are payable on judges' salaries. Prosecutors:
The base salary for public prosecutors of universal prosecutorial bodies of the public prosecution services shall be determined based on the table of base salary scale for public prosecutors of universal prosecutorial bodies of the public prosecution services Pursuant to Article 123 of the Act on the Public Prosecutor's Office of 28 January 2016, the basis for determining the base salary of a public prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Main Statistical Office "Statistics Poland" [GUS]. At the same time, according to Article 124 § 11 of the quoted Act on Public Prosecutor's Office, a public prosecutor is entitled to an supplement for long-time service amounting to 5% of the base salary currently received by the public prosecutor, beginning from the 6th year of his/her employment, and increasing after each successive year of his/her employment by 1% of this salary, until reaching 20% of the base salary. After 20 years of service the long-service supplement shall be paid, irrespective of the length of service beyond that period, at the rate of 20% of the public prosecutor's current base salary.
Supreme court and Main Public Prosecutor Office: Pursuant to Article 124 § 1 of the above-mentioned Act, the base salary of public prosecutors of the National Public Prosecutor's Office is equal to the base salary of judges of the Supreme Court. Pursuant to Article 48 of the Act on the Supreme Court [Ustawa o Sądzie Najwyższym] of 8 December 2017 (Journal of Laws of 2021, item 154, as amended), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The promotion rate is 115% of the base rate. Upon taking up his/her post, a judge of the Supreme Court receives base pay at the basic rate. After 7 years of service in the Supreme Court, the base salary of a judge of the Supreme Court shall be increased to the promotion rate.

Q132 (2020): Judges: The basic salary of a judge is determined in rates, the amount of which is determined using multipliers of the basis for determining basic salary. The rates of basic salary in particular judge's positions and multipliers, used for determination of basic salary of judges in particular rates, are specified in the appendix to the Act.
A judge is entitled to a function-related allowance in connection with the performance of his duties.
Judges' remuneration is also differentiated by a long service bonus, amounting, beginning with the sixth year of service, to 5% of basic salary and increasing after each year by 1% until it reaches 20% of basic salary. No social security contributions are payable on judges' salaries. Prosecutors:
The base salary for public prosecutors of universal prosecutorial bodies of the public prosecution services shall be determined based on the table of base salary scale for public prosecutors of universal prosecutorial bodies of the public prosecution services Pursuant to Article 123 of the Act on the Public Prosecutor's Office of 28 January 2016, the basis for determining the base salary of a public prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Main Statistical Office "Statistics Poland" [GUS]. At the same time, according to Article 124 § 11 of the quoted Act on Public Prosecutor's Office, a public prosecutor is entitled to an supplement for long-time service amounting to 5% of the base salary currently received by the public prosecutor, beginning from the 6th year of his/her employment, and increasing after each successive year of his/her employment by 1% of this salary, until reaching 20% of the base salary. After 20 years of service the long-service supplement shall be paid, irrespective of the length of service beyond that period, at the rate of 20% of the public prosecutor's current base salary.
Supreme court and Main Public Prosecutor Office: Pursuant to Article 124 § 1 of the above-mentioned Act, the base salary of public prosecutors of the National Public Prosecutor's Office is equal to the base salary of judges of the Supreme Court. Pursuant to Article 48 of the Act on the Supreme Court [Ustawa o Sądzie Najwyższym] of 8 December 2017 (Journal of Laws of 2021, item 154, as amended), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The promotion rate is 115% of the base rate. Upon taking up his/her post, a judge of the Supreme Court receives base pay at the basic rate. After 7 years of service in the Supreme Court, the base salary of a judge of the Supreme Court shall be increased to the promotion rate.

Q132 (2019): The base salary for public prosecutors of common organisational units of the prosecutor's office is determined on the basis of the table of base salary for prosecutors of common organisational units of the prosecutor's office and the Institute of National Remembrance - Commission for the Prosecution of Crimes against the Polish Nation, and the multipliers used to determine this salary, which constitutes appendix no. 1 to the Regulation of the Council of Ministers of 29 February 2016 on the base salary of the prosecutors and the amount of functional allowances to which the prosecutors are entitled. The above table sets out the rates of base salary for different prosecutorial positions and the corresponding multiplier, which is used to determine the base salary for this position.
Pursuant to Article 123 of the Act of 28 January 2016 – The Prosecutor's Office Law, the basis for determining the base salary of a prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, published in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Central Statistical Office.
Pursuant to Article 124 § 1 of the abovementioned Act, the base salary of prosecutors of the National Prosecutor's Office is equal to the base salary of the Supreme Court judges. Pursuant to Article 48 of the Act of 8 December 2017 on the Supreme Court (Journal of Laws of 2018, item 5, as amended), the salary of a judge of the Supreme Court is determined at the base rate or the promotion rate. The promotion rate is 115% of the base rate. A judge of the Supreme Court, taking up a position, receives the base salary at the base rate. After 7 years of service in the Supreme Court, the base salary of a Supreme Court judge is increased to the promotion rate.
At the same time, pursuant to Article 124 § 11 of the quoted Act – The Prosecutor's Office Law, a prosecutor is entitled to an allowance for long-term work amounting to, starting from the 6th year of work, 5% of the base salary currently earned by the prosecutor and increasing after each consecutive year of work by 1% of this salary, until 20% of the base salary is reached. After 20 years of work, the allowance is paid, irrespective of the length of service beyond that period, in the amount of 20% of the base salary currently earned by the prosecutor.
Moreover, pursuant to Article 124 § 10 of the quoted Act – The Prosecutor's Office Law, in connection with the function of a prosecutor, the prosecutor is entitled to a functional allowance, which results from appendix no. 2 Table of functions and multipliers used to determine the amount of functional allowances to the Ordinance of the Council of Ministers of 29 February 2016 on the base salary of the prosecutors and the amount of functional allowances to which the prosecutors are entitled..
Additionally, pursuant to Article 111 § 2 and 4 of the abovementioned Act, due to the nature of work and the scope of tasks performed, a special bonus may also be granted to the prosecutor of the National Prosecutor's Office, in the amount not exceeding 40% of the total base salary and the functional allowance. The allowance shall be granted for a fixed period, and in justified cases - also for an indefinite period.

Q132 (2018): Base salary for prosecutors related to general organizational units of the prosecution office is determined by virtue of the Table regarding rates, connected with the base salary for prosecutors related to general organizational units of the prosecution office and for prosecutors related to the Nation's Memory Institute - Commission for the Prosecution of Crimes against Polish Nation. The aforementioned table also includes multipliers used for determining the aforementioned salary and it constitutes Schedule No 1 enclosed to the Regulation of the Council of Ministers of 29th February 2016 on the base salary for prosecutors and the amount of extra duty allowance for prosecutors. The aforementioned table determines rates of the base salary related to particular prosecutor's position and appropriate multiplier used for determining the amount of base salary connected with this position. Pursuant to art. 123 of the Law on Prosecution Act of 28th January 2016 (published in the Journal of Laws 2017, item 1767 and later amendments), the basis of the prosecutor's base salary in a given year shall be - so called - base amount, that is average salary related to second quarter of the previous year, published in the Official Journal of the Republic of Poland by the Chairman of the Central Statistics Office.
Pursuant to art. 124 § 1 of the aforementioned Act, base salary for prosecutors related to the National Public Prosecutor's Office is equal to base salary for the Supreme Court judges.
Pursuant to art. 48 of the Supreme Court Act of 8th December 2017 (published in the Journal of Laws 2018, item 5 and later amendments) salary for the Supreme Court judge is determined at the basic rate or promotion rate. The amount of a promotion rate constitutes 115% of a basic rate. The Supreme Court judge, while taking over the post, acquires base salary related to the basic rate. After seven years of duty connected with the Supreme Court, base salary for the Supreme Court judge is raised up to the promotion rate. At the same time, pursuant to art. 124 § 11 of the aforementioned Law on Prosecution Act, prosecutor is entitled to allowance connected with a long-term service. This allowance constitutes, starting with the 6th year of service, 5% of the base salary currently received by the prosecutor and it rises - after each following year of service - by 1% of the base salary, until it reaches the level of 20% of the base salary. After twenty years of service, the allowance constitutes, independently on the period of service exceeding this time, 20% of the base salary currently received by the prosecutor.
What is more, pursuant to art. 124 § 10 of the aforementioned Law on Prosecution Act, in connection with certain position, prosecutor in entitled to extra duty allowance, which stems from Schedule No 2 of the Table regarding positions and multipliers used for determining the amount of extra duty allowance, enclosed to the Regulation of the Council of Ministers of 29th February 2016 on the base salary for prosecutors and the amount of extra duty allowance for prosecutors.
Additionally, pursuant to art. 111 § 2 and 4 of the aforementioned Act, the National Public Prosecutor - due to the character of service and the scope of duties - can be entitled to the special allowance as well. The amount of the special allowance shall not exceed 40% of base salary and extra duty allowance altogether. The special allowance is granted for a specified period of time or - under particularly justified circumstances - for an unspecified period of time. Salaries of judges and public prosecutors of the Supreme Court or the Highest Appellate Instance - we indicated average salary which contains base salary, allowance connected with a long-term service and allowance connected with occupying post.

Q133 (2021): 1.A judge/prosecutor who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
2) Financial support. A judge/prosecutor may be granted financial support, in the form of a loan, to satisfy their residential needs.
3) Paid health leave. A judge/prosecutor may be granted paid health leave to undergo the prescribed treatment if the treatment requires to refrain from carrying out service. The health leave cannot exceed six months ..
3) Annual additional leave. A judge/prosecutor is entitled to annual additional leave of:
–six business days – after ten years of work,
–twelve business days - after fifteen years of work.
4) Jubilee award. A judge/prosecutor is entitled to a jubilee award . 5) If a judge/prosecutor is posted to a locality other than the locality in which the judge's place of work is located, which is not the judge's place of permanent residence, the judge posted during the period of posting, as an employee on a business trip, is entitled to the following dues, compensating for the inconveniences resulting from the posting outside the permanent place of service: 1) the right to accommodation, free of charge; ; - a monthly lump sum - in an amount not exceeding 78% of the judge's basic salary; - reimbursement of costs of the first journey from the place of permanent residence to the place of secondment, reimbursement of costs of the last journey from the place of secondment to the place of permanent residence and reimbursement of the costs of journeys made not more often than once a week to the place of permanent residence and back under conditions' - a lump sum to cover the costs of travel by means of local transport, - reimbursement of costs incurred for the use of vehicles owned by the employee for business purposes, - reimbursement of costs of daily commuting to the place of delegation;

Q133 (2020): 1.A judge/prosecutor who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
2) Financial support. A judge/prosecutor may be granted financial support, in the form of a loan, to satisfy their residential needs.
3) Paid health leave. A judge/prosecutor may be granted paid health leave to undergo the prescribed treatment if the treatment requires to refrain from carrying out service. The health leave cannot exceed six months ..
3) Annual additional leave. A judge/prosecutor is entitled to annual additional leave of:
–six business days – after ten years of work,
–twelve business days - after fifteen years of work.
4) Jubilee award. A judge/prosecutor is entitled to a jubilee award . 5) If a judge/prosecutor is posted to a locality other than the locality in which the judge's place of work is located, which is not the judge's place of permanent residence, the judge posted during the period of posting, as an employee on a business trip, is entitled to the following dues, compensating for the inconveniences resulting from the posting outside the permanent place of service: 1) the right to accommodation, free of charge; ; - a monthly lump sum - in an amount not exceeding 78% of the judge's basic salary; - reimbursement of costs of the first journey from the place of permanent residence to the place of secondment, reimbursement of costs of the last journey from the place of secondment to the place of permanent residence and reimbursement of the costs of journeys made not more often than once a week to the place of permanent residence and back under conditions' - a lump sum to cover the costs of travel by means of local transport, - reimbursement of costs incurred for the use of vehicles owned by the employee for business purposes, - reimbursement of costs of daily commuting to the place of delegation;

Q133 (2019): retirement
Pursuant to Article 127 § 1 of the Act of 28 January 2016 – The Prosecutor’s Office Law in connection with Article 69 -71 and Article 100 of the Act of 27 July 2001 - Law on the system of common courts (Journal of Laws of 2020, item 365, as amended), the prosecutor shall retire when they reach the age of 65, unless, not later than six months and not earlier than twelve months before reaching this age, they declare to the General Prosecutor their willingness to continue holding the position and present a certificate stating that they are able, due to their health condition, to perform their prosecutorial duties, issued on the terms specified for a candidate for the prosecutor's position. A prosecutor shall, at their request, retire, with the right to the emolument referred to in Article 100 § 2 - in the amount of 75% of the base salary and the length of service allowance earned on their last position - after the age of 55 for a woman, if she has worked for not less than 25 years in the position of a judge or a prosecutor, and the age of 60 for a man, if he has worked for not less than 30 years in the position of a judge or a prosecutor. A prosecutor who is a woman shall, at her request, retire after reaching the age of 60, regardless of the period of service as a prosecutor or judge. A prosecutor who retires or is retired due to age, illness or loss of ability shall be entitled to an emolument of 75% of the base salary and the length of service allowance earned on their last position. The emolument shall be increased in accordance with changes in the base salary of active prosecutors. In addition, a retired prosecutor shall be entitled to a one-time severance payment of six months' salary.
Judges and prosecutors are not given housing, but have, for example, the possibility to apply for financial support - in the form of a loan - to meet possible housing needs.

Q133 (2016): A judge who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
The emolument is icresed in line with changes of the basic solaries of active judges. A judge who retires is entitled to a one-off severance payment in the amount of six months' remuneration.

Q144 (General Comment): A judge shall be disciplinarily liable for official (disciplinary) offences, including: - a manifest and flagrant violation of the law; - acts or omissions likely to prevent or substantially impede the functioning of the judicial authority; - actions that question the existence of the official relationship of a judge, the effectiveness of the appointment of a judge or the legitimacy of the constitutional organ of the Republic of Poland; - public activities incompatible with the principles of independence of courts and judges; - offence against the dignity of the office. A judge shall also be held disciplinarily liable for his conduct prior to assuming office if by such conduct he has breached the duties of the state office then held or has proved himself unworthy of the office of judge.
The disciplinary penalties shall be:
- admonition;
- reprimand;
- reduction of the basic salary by 5%-50% for a period from six months to two years;
- a pecuniary penalty in the amount of one month's basic salary, plus the judge's long-service allowance, function allowance and special allowance, payable for the month preceding the issuance of the final sentence; - removal from office (for example, chair of a division) ;
- transfer to another place of employment;
- dismissal of a judge.
A prosecutor is liable to disciplinary action for official (disciplinary) offences, including: - an obvious and gross violation of the law; - acts or omissions which may prevent or seriously obstruct the functioning of the body of justice or the public prosecutor's office; - actions that question the existence of the official relationship of a judge or prosecutor, the effectiveness of the appointment of a judge or prosecutor or the constitutional authority of the Republic of Poland; - public activity incompatible with the principle of independence of the prosecutor; - misconduct on the part of the judge or prosecutor. An act or omission of a prosecutor undertaken exclusively in the public interest shall not constitute a disciplinary offence.
A public prosecutor shall also be liable to discipline for his or her conduct prior to assuming office if he or she has breached the duties or the dignity of the public office then held, or has proved unworthy of the office of public prosecutor.
A public prosecutor shall be liable only to disciplinary action for abuse of freedom of speech in the performance of his or her official duties, constituting a privately prosecutable insult to a party, his or her agent or defence counsel, curator, witness, expert or interpreter.
The disciplinary penalties are:
- admonition;
- reprimand;
- reduction of basic salary by 5% - 50% for the period from six months to two years; - a fine in the amount of one month's basic salary plus the prosecutor's long-service bonus, function bonus and special bonus payable for the month preceding the final conviction; - removal from office;
- transfer to another official position;
- expulsion from the prosecution service.

Q144 (2021): "Other": excessive length of the proceedings.
Prosecutors Office: providing information on a common type of disciplinary proceedings is not possible as no statistics are kept in this area. Disciplinary proceedings are carried out at the level of regional public prosecutor's offices by deputies of the disciplinary spokesman.

Q144 (2016): The data concern reasons of undertaken disciplinary proceedings agains judges is not available.

Q145 (2021): other :
- acquittal;
- consideration of the objection to the remark;
- finding guilty and waiving disciplinary sanction;
- Referral to other courts with jurisdiction;
- pending cases;
- uphold the contested order;
Prosecutors Office: statistical data of the Disciplinary Courts at the Prosecutor General's Office

Q145 (2020): Penalties of judges-. Data collected from Disciplinary Courts at the Courts of Appeal in Poland. Disciplinary Court at the Court of Appeal in Wrocław - 2 penalties of admonition;
Disciplinary Court at the Court of Appeal in Gdańsk - 1 penalty of a warning; Disciplinary Court of the Court of Appeal in Białystok - 5 decisions on discontinuance of proceedings and in one case the penalty was waived;
Disciplinary Court of the Court of Appeals in Kraków - 2 pending proceedings; Disciplinary Court of the Court of Appeals in Rzeszów - finding of guilt and waiver of punishment;
Disciplinary Court of the Court of Appeals in Szczecin - 2 penalties of admonition and 1 proceeding has not been completed yet;
Disciplinary Court of the Court of Appeal in Łódź - 1 withdrawal from imposing a disciplinary penalty Disciplinary Court of the Court of Appeals in Warsaw - 1 reprimand;
Disciplinary Court at the Court of Appeals in Lublin - guilt found, penalty waived, transferred according to jurisdiction;

Q145 (2018): According to art. 142 par. 1 of the Law on Prosecution Act of 28th January 2016 (published in the Journal of Laws 2017, item 1767 and later amendments) disciplinary penalties include: admonition, reprimand, dismissal from function, transfer to another place of service, dismissal from prosecutorial service. In view of the above mentioned regulation “other type of sanctions” means admonition and dismissal from prosecutorial service.

Q145 (2016): 16- number of admonition of judges
1-suspension of increasing the salary of a judge in repose.

Q146 (2020): Number of advocates: total: 19954, male- 10513, female - 8845
Incomplete data: No information on sex of 596 advocates;
Number of legal counsels: total: 37411, male - 17746, female - 19665
It is noteworthy that legal advisers have the same powers as advocates.
Q146 (2019): It is the total number of legal advisers and advocates.
It is noteworthy that legal advisers have the same powers as advocates.
Q146 (2012): Since 2010, the part-deregulation (carried out in 2007/2008) of the lawyer’s profession has been implemented and resulted in a major change in the number of lawyers.
Q148 (2019): "0" in principle, however: 4078 advocates and 10449 legal advisers - because of their non-practition.
Non-practitioners who have not lost their qualifications but who are registered on the list of non-practitioners, cannot provide services to clients, including representation in courts.

Portugal

Q004 (2016): In the present questionnaire we used another "concept" of gross anual salary that we believe is closer to the objectives of this question.
We opted for the category of "payments and salaries" instead of "remunerations" of the national budget because "remunerations" also includes social contributions by the employer which constitue wage costs and not salary.
Q046 (General Comment): The total includes judges from courts of 1st, 2nd and 3rd instances, except the Constitutional Court.
Q046 (2020): 3. We are dealing with small numbers, therefore the dicrepancy ratio is big. In addition, with time female judges, that are the majority of judges, are getting to the top of their professional career.
Q046 (2019): In absolute terms the increase is only 5 persons. The numbers are small, therefore in relative terms it appears to be relevant.
Q046 (2018): The number of Supreme Court Judges has been decreasing since 2015. In absolute terms the decrease from 2016 to 2018 is from 82 to 71 judges, which is not significative in absolute terms, but acquires a more relevant expression in relative terms.
Q046 (2017): As concerns the increase in the number of female Supreme Court judges: the numbers are small, therefore the variation seems important.
Q046 (2014): The increase in the number of Supreme Court female professional judges is due to the general tendency of increase of female judges in the last decade at first instance courts.
Q046-2 (2021): As there are judges who have civil and criminal competences at the same time, it is not possible to distinguish judges by civil and comercial matters. Therefore, the judges of the judicial courts were all included in the column “other”.

Q046-2 (2020): As there are judges who have civil and criminal competences at the same time, it is not possible to distinguish judges by civil and comercial matters. Therefore, the judges of the judicial courts were all included in the column “other”.

Q052 (General Comment): The variations in the number of non-judge staff over the different evaluation cycles seem high due to the small numbers.
Q052 (2020): 52-3-In absolute terms, the increase between 2018 and 2020 in the category "Staff in charge of different administrative tasks and of the management of the courts" for women is from 94 to 104. Since we are dealing with small absolute values, the identified variation, despite not representing a significant difference in absolute terms, acquires a more relevant expression in terms of relative variation.
52-4- We confirm the increase in the number of "technical staff" in the courts between 2018 and 2020. No specific explanation.

Q052 (2019): In 2019, as in previous years there was no other non-judge staff.

Q052 (2018): In 2018, as in 2017 there were no other non-judge staff.

Q052 (2017): "other non judge staff" - this category includes all staff with a non-specified category or non-specific functions. As this is a residual category, the numbers tend to be small.
Q052 (2014): The decrease in the number of staff in charge of administrative tasks is due to retirements that have not been replaced and to the continuous IT modernization.
Q052 (2013): The number of judicial staff is decreasing on account of retirements that have been occurring since 2010. In addition, due to the reform of the Public Administration that is taking place since 2009 and the financial constraints of the past few years, the number of public servants has decreased.

Q052-1 (2020): We confirm the increase in 2020 in the category of non-judge staff working in courts at Supreme Court level in the Supreme Court of Justice and the Supreme Administrative Court, with a special focus on the administrative and tax courts.

Q052-1 (2018): Since 2016 there has been an increase of non-judge staff to meet the needs of additional staff. There were no legislative or other changes that could directly justify the increase.
Q055 (General Comment): The communicated data encompasses the number of magistrates of the Public Prosecution Service in courts of first instance, second instance and high superior courts, except the Constitutional Court.

Q055 (2020): No specific explanation for the numbers above.

Q055 (2018): In absolute terms the decrease from 2016 to 2018 is from 7 to 5 female prossecutors, which is not significative in absolute terms, but acquires a more relevant expression in relative terms.
Q055 (2012): The increase in the number of female prosecutors is due to the general tendency of increase of female prosecutors in the last decade at first instance courts. It is natural that gradually the proportion of female prosecutors in the higher courts tends to grow as a result of their career progress. The number of prosecutors in the High Judicial Court and in the High Administrative Court, increased. In particular, in the High Administrative Court there was a strong reinforcement of these professionals in 2011 in order to respond to a pressing need of prosecutors in this court.

Q132 (General Comment): The net annual salary depends on various factors: personal tax situation; other personal revenues. It would not be accurate to provide a number under this category.
Q132 (2020): Source of data: Directorate-General for the Administration of Justice and the High Council for the Judiciary
The increase of salaries resulted from the revision of the statute of judges and prossecutors.

Q132 (2019): The increase of the Public Prosecutors' salary in the Supreme Court was due to the revision of the Statute of Judicial Magistrates
Q144 (General Comment): Judges: the annual report of the High Judicial Council doesn't discriminate the categories of disciplinary proceedings.
Q145 (2021): Regarding judges, on n.1 (2 sanctions were registered and 6 non registered), on n.9 (2 are sanctions of compulsory retirement and 1 of pension loss)

Q145 (2020): According to article 227 (2) of the Public Prosecution Statute, reprimands may not be registered. One of the reprimands applied in the year 2020 was not registered in the individual file of the sanctioned prosecutor.
Some of the sanctions applied in 2020 concern disciplinary proceedings started in 2019. Some of the disciplinary proceedings started in 2020 (Q144) have been filed (2).
With regard to judges, one of the reprimands was registered in the individual file of the sanctioned prossecutor, one was not and the third one is unknowed. Sanction 7 (transfer to another geographical (court) location) was applied as na accessory penalty of the suspension sanction).

Q145 (2018): 9. other: compulsory retirement

Q145 (2016): For public prosecutors other include temporary inactivity (2) and compulsory retirement (1).
For judges other include compulsory retirement (5)and dismissal (1).
Q145 (2014): For 2012 and 2014, the category “other” encompasses mandatory retirements. Sanctions indicated in items 2 and 4 imply salary reduction.
Q145 (2012): For 2012 and 2014, the category “other” encompasses mandatory retirements. Sanctions indicated in items 2 and 4 imply salary reduction.
Q148 (2021): We do not have this figure in Portugal.

Q148 (2020): We do not have this figure in Portugal.

Romania

Q004 (General Comment): At national level, the average gross annual salary is not calculated and included in the official statistical reports made annually by the National Institute of Statistics. Thus, the SMBA was calculated on the basis of the monthly average gross salary at an average monthly value of the euro calculated by the National Bank of Romania for the reference year concluding in the average gross annual salary (as the sum of monthly average salary).

Q004 (2020): The difference can be explained based on salary increases, and an upward trend can be observed continuing from 2018.

Q004 (2018): At national level, the average gross annual salary is not calculated and included in the official statistical reports made annually by the National Institute of Statistics. Thus, the SMBA was calculated by request by the National Institute of Statistics on the basis of the monthly average gross salary at an average annual value of the euro calculated by the National Bank of Romania for the reference year 2018
According to the provisions of the national legislation in force (GEO no. 79/2017 with subsequent amendments and completions), the social insurance contributions, respectively those of social health insurance that fell to the employer, were transferred to the employee's responsibility and, starting with 2018, are fully supported by the employee, being reflected in the gross amount of the earning.
Consequently, the indicator "monthly gross average wage" produced and disseminated from 2018 is no longer comparable with the previous data series.
These legal provisions do not influence the data comparability for the series of "average monthly net earnings."

Q046 (General Comment): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). Only judges of the first instance court „judecatorii" are counted as first instance judges. In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q046 (2020): Only judges of the „judecatorii" are counted as first instance judges.

Q046 (2019): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q046 (2018): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q046 (2017): The number of professional judges sitting in second instance courts (point 2) includes both the number of judges within the courts of appeal and the number of judges within the tribunals.
Q046 (2016): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In the table above the judges from tribunals are included in the category "second instance professional judges".
Q046 (2014): For 2014, judges mentioned at 46.1 are judges within first instance courts, while judges mentioned at 46.2 are judges within tribunals and courts of appeal.
Q046 (2013): Judges mentioned at 46.1 are judges within first instance courts and tribunals, while judges mentioned at 46.2 are judges within courts of appeal. In 2012 and 2013, the Superior Council of Magistracy brought important changes to the Regulation for the promotion of judges to the High Court of Cassation and Justice and 19 judges were promoted.

Q046 (2012): At 46.1 are mentioned judges within courts of first instance, while at 46.2 are mentioned judges within tribunals and courts of appeal.
Q046-2 (General Comment): The statistical system does not collect information regarding a breakdown in the number of judges based on the different legal matters.
Q046-2 (2020): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q052 (General Comment): The number indicated for the category “non-judge staff assisting judges” encompasses clerks with judicial tasks; the number indicated for “staff in charge of administrative tasks” concerns registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants; the number indicated for “technical staff” includes IT staff, contractual personnel and other personnel (drivers, ushers, procedural agents etc.). The category “other” subsumes assistance magistrates, judicial assistants and probation counselors. o Assistance magistrates work only within the High Court of Cassation and Justice. They participate in the trial sessions, have a consultative vote in deliberations and write the minutes of the sessions, as well as the decisions. o Judicial assistants work only within tribunals and are part, together with the judges, of the panels which judge, in first instance, cases regarding labor and social insurances litigations (the panel is composed of 1 judge and 2 judicial assistants; the latter participate in the deliberations with a consultative vote and sign the decisions). o The probation counselors have, in principle, the following attributions: support the activity of judges by elaborating certain evaluation documents in criminal cases with juvenile offenders; support the activity of the judge delegated with enforcing decisions in criminal matters; cooperate with public institutions in order to execute the measure to force a minor to carry out an unpaid activity in an institution of public interest; initiate and carry on special programs of social reinsertion for persons convicted to prison and for minors who committed offences provided by the criminal law; carry out, at request, activities of individual counseling of offenders, with regard to the social, group and individual behavior; initiate and carry out special programmes of protection, social and judicial assistance of minors and youngsters who committed offences.

Q052 (2021): 6.665 represents the number of clerks with judicial tasks (- 170 work only within the High Court of Cassation and Justice); 1.701 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 38 work only within the High Court of Cassation and Justice); 1.723 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (–100 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (1055): a higher percentage of occupation of vacant positions.
Assistance magistrates: 130 Judicial assistants: 176 Probation counselors: 749

Q052 (2019): 6437 represents the number of clerks with judicial tasks (- 169 work only within the High Court of Cassation and Justice); 1646 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 16 work only within the High Court of Cassation and Justice); 1750 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents..... (– 6 IT staff works only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (867):
Assistance magistrates: 116 Judicial assistants: 177 Probation counselors: 574

Q052 (2018): 6402 represents the number of clerks with judicial tasks (- 163 work only within the High Court of Cassation and Justice); 1645 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 17 work only within the High Court of Cassation and Justice); 1772 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (–101 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (843):
Assistance magistrates: 110 Judicial assistants: 176 Probation counselors: 557

Q052 (2017): Other categories of personnel which function within the Romanian courts (852): Assistance magistrates: 112 Judicial assistants: 176 Probation counselors: 564
The increase observed in the category "other" between 2016 and 2017 is explained by the employment of the respective number of probation counselors.

Q052 (2016): 6191 represents the number of clerks with judicial tasks (- 165 work only within the High Court of Cassation and Justice); 1621 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 9 work only within the High Court of Cassation and Justice); 1822 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (– 109 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (663):
Assistance magistrates: 113 Judicial assistants: 173 Probation counselors: 377

Q052 (2015): 6149 represents the number of clerks with judicial tasks (- 149 work only within the High Court of Cassation and Justice); 1615 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 9 work only within the High Court of Cassation and Justice); 1844 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (– 109 work only within the High Court of Cassation and Justice).

Other categories of personnel which function within the Romanian courts: Assistance magistrates: 115 ; Judicial assistants: 176 ; Probation counselors: 352

Q052 (2014): In 2014, there were 6072 clerks with judicial tasks (153 within the High Court of Cassation and Justice); 1585 registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (9 within the HCCJ); 1854 IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (96 within the HCCJ). The category "other" subsumes 101 Assistance magistrates, 175 Judicial assistants and 360 Probation counselors.

Q052 (2013): In 2013, there were 5743 clerks with judicial tasks; 1563 registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants; 1784 IT staff, contractual personnel and other personnel (drivers, ushers, procedural agents). The category "other" subsumes 92 Assistance magistrates, 176 Judicial assistants and 281 Probation counselors.

Q052 (2012): In 2012, there were 5489 clerks with judicial tasks; 1486 registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants; 1762 IT staff, contractual personnel and other personnel (drivers, ushers, procedural agents). The category "other" subsumes 90 Assistance magistrates; 175 Judicial assistants; 281 Probation counselors.

Q052-1 (2021): A higher percentage of occupation of vacant positions for total non-judge staff working in courts at Supreme Court level.

Q052-1 (2020): 3. Total non-judge staff working in courts at Supreme Court level-
The difference between 2018 (comunicated data) and 2020 is pointedly given by the difference in the methodology for reporting data within the human resources sector. Thus, for 2018, in the total number of auxiliary staff (non-judge staff working at Supreme Court level) was not included the number of staff represented by ushers, procedural agents, drivers. Also, rechecking the communicated data for 2018 on this point (point. 3), it is confirmed that the total number of auxiliary staff (occupied positions) at the High Court of Cassation and Justice is 230 (2018 data, including the staff represented by the professional categories mentioned above).

Q055 (General Comment): In Romania there are four level of courts/prosecution offices attached to these courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

Q055 (2018): In Romania there are four level of courts/prosecution offices attached to these courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

Q055 (2014): The prosecutor's offices are established in the following hierarchy: the prosecutor's offices attached to the courts of law (point 1 of the table), the prosecutor's offices attached to tribunals and prosecutor's offices attached to the courts of appeal (point 2), and the Prosecutor's Office attached to the High Court of Cassation and Justice (point 3).

Q055 (2012): The prosecutor's offices are established in the following hierarchy: the prosecutor's offices attached to the courts of law (point 1 of the table), the prosecutor's offices attached to tribunals and prosecutor's offices attached to the courts of appeal (point 2), the Prosecutor's Office attached to the High Court of Cassation and Justice (point 3).

Q060 (2020): Out of the total of 2408 filled in positions in the prosecution offices country wide, 1997 are occupied by clerks and the rest of 411 are procedural agents (who accomplish activities such as delivering summons, other courier activities etc.) and other staff such as drivers.

Q060 (2018): Out of the total of 2468 filled in positions in the prosecution offices country wide, 2044 are occupied by clerks and the rest of 424 are procedural agents (who accomplish activities such as delivering summons, other courier activities etc.) and other staff such as drivers.

Q060 (2016): The numbers include the clerks, forensics, auxiliary staff, public servants and contract staff

Q132 (2016): The increase between 2014 and 2016 is resulting from legislative changes, including the way in which specific legislation is applied in the light of the jurisprudence of the Constitutional Court. The calculation method did not change, but the base of the monthly salaries has grown during the last two years, according to the legislation concerning the public remuneration, as it was interpreted by the Constitutional Court and the ordinary courts of law. Currently, the differences between salaries in the judicial system are eliminated. Since 2000 to the present, the magistrates' salaries have risen steadily, including the latest law on salaries in the public domain (Law no. 153/2017) has set a has set a salary level for magistrates well above the average of the budgetary staff. This law will have its full effect until 2022.

Q132 (2012): The 2012 data was based on the Law regarding the unitary remuneration of personnel paid from public funds, no.284/2010, with subsequent amendments and additions.

Q133 (2021): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q133 (2020): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q133 (2019): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q133 (2018): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q144 (General Comment): Disciplinary breeches may have only a disciplinary liability. Nevertheless, judges and prosecutors are responsible for criminal acts as any other citizen, according to an ordinary proceeding.

Q144 (2021): As previously, in the table above we have indicated the number of disciplinary actions registered in the reference year (2021) before the Sections for judges and prosecutors of the Superior Council of Magistracy in disciplinary matters.
The discrepancies between the number of disciplinary actions and the number of breaches of professional ethics + breaches of the professional inadequacy are due to the fact that one disciplinary action can refer to not only one but more disciplinary offences, as well as to not only one but more magistrates.
The disciplinary offences are expressly regulated under the provisions of art. 99 of the Law no.303/2004 amended and republished in 2018.

Q144 (2020): As previously, in the table above we have indicated the number of disciplinary actions registered in the reference year (2020) before the Sections for judges and prosecutors of the Superior Council of Magistracy in disciplinary matters (9 disciplinary cases/disciplinary actions were registered before the Section for Judges of the SCM in disciplinary matters and 9 disciplinary cases were registered before the Section for Prosecutors of the SCM in disciplinary matters).
The discrepancies between the number of disciplinary actions and the number of breaches of professional ethics + breaches of the professional inadequacy are due to the fact that one disciplinary action can refer to not only one but more disciplinary offences, as well as to not only one but more magistrates.
The disciplinary offences are expressly regulated under the provisions of art. 99 of the Law no.303/2004 amended and republished in 2018.

Q144 (2018): In the table above we have indicated the number of disciplinary actions registered in the reference year (2018) before the Sections for judges and prosecutors of the Superior Council of Magistracy in disciplinary liability matters.
The inadvertence between the number of disciplinary actions and the number of breaches of professional ethics + breaches of the professional inadequacy is due to the fact that one disciplinary action can refer to not only one but more disciplinary offences, as well as to not only one but more magistrates.
The disciplinary offences are expressly regulated under the provisions of art. 99 of the Law no.303/2004 amended and republished in 2018.

Q145 (General Comment): In the case of breach of the Deontological Code, there is no disciplinary sanction applicable. According to our legislation (art. 100 of the Law no. 303/2004 modified and republished) the sanctions that may be applied to judges and prosecutors, according to the seriousness of their violations, are the following: warning; decreasing the gross monthly indemnity by up to 25% for a period from one to 3 months; disciplinary transfer for a period from one to 3 years to another court or prosecutor's office, even lover in rank; suspension from office for a period of up to 6 months; position downgrade; exclusion from the magistracy.

Q145 (2021): There should be taken into account that the above mentioned data reflect the number of the disciplinary sanctions rendered in the reference year (2021) irrespectively of the year the disciplinary action was registered in, therefore this number is not necessary equal to the number of disciplinary actions registered in 2021, as these sanctions can be rendered for disciplinary actions registered before 2021 while there are also disciplinary actions registered in 2021 but not yet solved before the end of 2021; moreover, most of the decisions are final but there are also several ones are not final yet (the recourse procedure).
“Position downgrade” - this type of disciplinary sanction did not exist and it has been introduced by the Law no. 242/2018.

Q145 (2020): There should be taken into account that the above mentioned data reflect the number of the disciplinary sanctions rendered in the reference year (2020) irrespectively of the year the disciplinary action was registered in, therefore this number is not necessary equal to the number of disciplinary actions registered in 2020, as these sanctions can be rendered for disciplinary actions registered before 2020 while there are also disciplinary actions registered in 2020 but not yet solved before the end of 2020; moreover, most of the decisions are final but there are also several ones are not final yet (the recourse procedure).
“Position downgrade” - this type of disciplinary sanction did not exist and it has been introduced by the Law no. 242/2018.

Q145 (2018): There should be taken into account that the above mentioned data reflect the number of the disciplinary sanctions rendered in the reference year (2018) irrespectively of the year the disciplinary action was registered in, therefore this number is not necessary equal to the number of disciplinary actions registered in 2018, as these sanctions can be rendered for disciplinary actions registered before 2018 while there are also disciplinary actions registered in 2018 but not yet solved before the end of 2018.

Q146 (2020): There is no official explanation due to legal norms, in principle such fluctuations can be registered within the profession, as long as the total number has not registered significant fluctuations.

Slovak Republic

Q004 (2021): http://datacube.statistics.sk/#!/view/en/VBD_INTERN/pr0204qs/v_pr0204qs_00_00_00_en

Q004 (2020): Ministry of Finance did not offer closer explanation. Source: https://www.statista.com/statistics/419502/average-annual-wages-slovak-republic-slovakia-y-on-y-in-euros/
Q046 (2021): Number of Supreme Administrative Court professional judges are included in the Q. 46 line 3. (8 males, 13 females; total 21).

Q046 (2019): The Number of Supreme Court professional judges is 77 for the full time judges. There are 7 temporarily assigned judges as well (2 women and 5 men).
Q046 (2018): The provided total corresponds to the number of judges actually performing their functions. Put differently, judges
who are temporary assigned to other institutions (Ministry of Justice, Judicial Academy, other judicial institutions including international courts), judges granted maternity leave etc. are not considered in the provided figures. Total number including judges temporary not performing their functions is 1427 (521 men, 906 women).
Q046 (2017): The increase in the total number of judges is caused by filling the previously designed vacant posts of judges.

Q046 (2015): The decrease in the number of judges in comparison with the previous cycle has been caused by the retirement of the judges whose posts have not been filled yet. The selection procedures for the vacant posts are under way.

Q046 (2014): In 2014, the total number of judges in the records of the Ministry of justice was 1366 (503 males, 863 females), including judges temporary assigned to other institutions, judges granted maternity leave etc.
Q046 (2013): In 2013, the total number of judges in the records of the Ministry of justice was 1385 (511 males, 874 females), including judges temporary assigned to other institutions, judges granted maternity leave etc.
Q046 (2012): In 2012, the total number of judges in the records of the Ministry of justice was 1344 (497 males, 847 females), including judges temporary assigned to other institutions, judges granted maternity leave etc.
Q046-2 (2021): The Supreme Administrative Court had 21 administrative judges in 2021, included in Second instance.

Q052 (2021): The number of technical staff is included in category 3 (staff in charge of administrative tasks).
The position in line 2. is not atractive for males.
Q052 (2020): The number of technical staff and other non-judge staff are included in category 3 (staff in charge of administrative tasks)
Q052 (2018): See general comment.
There are no special explanation related to discrepancies in gender composition of court staff
Q052 (2017): The slight increase in the number of male non-judge staff originates at the Supreme court of the Slovak republic. The position of the "Judicial assistant" has been established and filled. The assistant helps the judge with legal research, drafting of decisions etc. Out of 86 assistants there are 29 male.
Q052 (2014): In 2014, the category “Rechtspfleger” subsumes 967 higher judicial officers and 63 mediation and probation officers. The category “staff assisting judges” includes assistants of judges and court secretaries. The category “staff in charge of different administrative tasks” encompasses court staff responsible for court administration, contact with the public (information centre, filing office), archives and technical staff. It was not possible to extract the accurate number of “technical staff” and “other non-judge staff” from the overall data on “staff in charge of different administrative tasks”.

Q052 (2013): In 2013, the category “Rechtspfleger” includes 975 judicial officers, 45 legal assistants at the Supreme Court and 63 mediation and probation officers. The category “non-judge staff assisting judges” includes 1348 assistants and 752 judicial secretaries. The rest of the non-judge staff is subsumed in the category “other”. In 2011 and 2012, the Ministry of Justice decided to increase the total number of the judicial officers with the intention to improve the disposition of certain court agendas.

Q052 (2012): In 2012, the category “Rechtspfleger” includes 982 judicial officers and 64 mediation and probation officers. It was not possible to extract the accurate number of “technical staff” and “other non-judge staff” from the overall data on “staff in charge of different administrative tasks”.

Q052-1 (2021): Total non-judge staff working in courts at Supreme Administrative Court level - 59 total; 18 males and 41 females, included in line 3.. Some of the staff moved to the Supreme Administrative Court and some left the judicial system.

Q052-1 (2018): All data were provided by the central institution for the court management, The Department of Human Resources Development of the Ministry of Justice

Q055 (General Comment): The number of prosecutors at the Supreme Court level also includes prosecutors of the Special Prosecution Bureau. The latter deals with crimes of corruption and the most severe offences including organized crime. It intervenes in first instance, but acts as an organizational part of the General Prosecutor’s Office.

Q060 (2020): Staff increased for natural recruitment procedure

Q060 (2012): In 2012, the increase of the number of non-prosecutor staff resulted from the organisational changes in the prosecution services in the year 2011. In that year, the military prosecution services (which were administrated by the Ministry of Defence) were abolished and all the staff was assigned to the prosecution services.

Q132 (General Comment): The stated sums represent the basic gross salary of judges/prosecutors without bonuses and supplements. According to the Act on Judges (No. 385/2000 Coll.) the average monthly salary of the judge equals the monthly salary of the Member of Parliament. The monthly salary of the judge at the beginning of the career is 90% of this salary. The monthly salary of the judge of the Supreme Court is 130 % of the monthly salary of the Member of Parliament. The judge is entitled to have 2 additional monthly salaries (in May and in November) unless he/she do not meet the conditions stipulated in law. The sum of annual average salary stated in this questionnaire counts 14 months salaries.
All bonuses and supplements are stipulated by law. Specific supplement belongs to the judges of the Specialized Criminal court and to the judges of the Supreme court deciding on the remedies against the decisions of that court. The value of the net salary depends on several individual criteria, e. g. the number of children, the voluntary pension security scheme etc. Similar rules govern the salaries of prosecutors (Act on Prosecutors and Trainee Prosecutors No.154/2001 Coll.). The average salary of the prosecutor equals the average salary of the judge. The salary of the beginning prosecutor is 85% of this salary, the salary of the prosecutor at the General Prosecutors office is equal to the salary of the Supreme Court judge. Prosecutors are also entitled to 2 additional monthly salaries. Supplements for the heads of the prosecutor offices are similar to supplements of the court presidents at the same level.The prosecutors of the Special Prosecutor´s Office are entitled to same supplement as the judges of the Specialized Criminal Court.

Q132 (2019): The stated sums represent the basic gross salary of judges/prosecutors stipulated by law without supplements (methodology comparable to previous years data in the questionnaire). See general comment for details.

Q132 (2018): The stated sums represent the basic gross salary of judges/prosecutors stipulated by law without supplements. See general comment for details.

Q132 (2014): The salaries of judges and prosecutors in 2014 were at the same level as in 2012. The adjustments of salaries for all State officials (Members of Parliament, Government, judges) were stopped in the years 2013 and 2014 due to State expenditures restrictions.

Q133 (2020): The regulation about housing was included in the Decree of the Ministry of Justice of the Slovak Republic no. 293/2019
Coll., which lays down the conditions and scope of reimbursement of increased expenses for traveling of the hosting judge, or the hosting court can offer accommodation for the judge.

Q133 (2019): The regulation about housing is newly included in the Decree of the Ministry of Justice of the Slovak Republic no. 293/2019 Coll., which lays down the conditions and scope of reimbursement of increased expenses for traveling of the hosting judge, or the hosting court can offer accommodation for the judge.

Q144 (General Comment): Criminal offences of judges and prosecutors are not tried at discipilinary proceedings.

Q144 (2021): We would like to draw your attention to the judicial reform adopted in the Slovak Republic last (reference) year, which had also an impact on the disciplinary proceedings against judges and public prosecutors. The Supreme Administrative Court of the Slovak Republic (SAC) was established on 1 January 2021 and became fully operational on 1 August 2021; the competence to decide on the disciplinary liability of judges and prosecutors was transferred to it. The authority responsible for decision-making on the disciplinary liability of judges until the establishment of the SAC was the disciplinary chambers elected by the Judicial Council of the Slovak Republic. Disciplinary Proceedings Code of the Supreme Administrative Court of the Slovak Republic came into force on 1 December 2021. In the absence of this concrete legal regulation of disciplinary proceedings, the disciplinary chambers of SAC were not able to commence their decision-making. The number of disciplinary proceedings initiated against judges refers to the disciplinary proceedings brought before the SAC since 1 August 2021 and those which were brought before the disciplinary chambers of the Judicial Council from 1 January 2021 till 31 July 2021, were pending as of 1 August 2021 and transferred to the SAC.
The number of disciplinary proceedings initiated against public prosecutors refers to the proceeding which was brought before the SAC from 1 August 2021. From 1 January until 31 July 2021, there might have been some other disciplinary proceedings initiated against public prosecutors, which were brought before the disciplinary committees appointed by the Prosecutor General - the authority responsible for decision-making on the disciplinary liability of public prosecutors before the establishment of the SAC. None of the cases were transferred to the SAC and the SAC therefore does not have the data or statistics of the decision-making of those disciplinary committees.
Besides the disciplinary proceedings heard and decided by the SAC, there is a possibility to impose a sanction of minor importance to a judge. According to Article 117 paragraph 7 of the Act on Judges, deficiencies in the work/ethics of minor importance can be dealt with by giving a written warning to a judge if this is sufficient. The SAC does not have the competence to collect the information regarding the written warnings unless the judge proposes to invalidate the written warning since the review of those written warnings is carried out by the SAC. In 2021, there were 6 proposals for determining the written warning as invalid brought before the SAC and the disciplinary chambers of the Judicial Council.

Q144 (2020): In the line 4. "Other" are counted motions for a declaration that the written warning is invalid.

Q144 (2018): In 2018 there were 21 disciplinary proceedings initiated against judges for these reasons:
Professional inadequacy: 19 disciplinary proceedings, e.g. violation of the duties of a judge; a deliberate breach of the judge's duty to decide impartially and impartially; presence in the workplace under the influence of alcohol, narcotic or psychotropic substances; culpable conduct of a judge resulting in delays in court proceedings, Other: 2 disciplinary proceedings for failure to submit the written declaration along with asset declaration

Q144 (2016): With respect to the judges the majority of "other" disciplinary proceedings was initiated due to causing the procedural delays (23 cases), filing an application for declaration of invalidity of a written reprimand filed by a judge itself (3 cases) and failure to meet the obligation of standby duty performance duly and timely and failure to meet the obligation of overtime function performance (1 case).
Q144 (2014): In 2014, the category “other” included 1 deliberate violation of the obligation to impartial and unbiased deciding, 9 deliberate conducts of judges leading to undue delays, 1 arbitrary decision, 2 repeated committing of a serious breaching of discipline.
Q144 (2012): In 2012, there were 19 disciplinary proceedings against judges for professional inadequacy - undue delays in proceedings (10), failure to elaborate the judgments within the statutory time period (3); failure to decide within the statutory time period (3); other breaches of the professional duties (3). As to the category “other”, it encompassed one misdemeanor against the public order.
Q145 (General Comment): The disciplinary judiciary at the Judicial Council of the Slovak Republic consisted of the Disciplinary Boards (senates) and the Disciplinary Boards (senates) of Appeal. The senates were created by the Judicial Council of the Slovak Republic, which supervised them to the extent specified by law. The first instance disciplinary board/senat consists of 3 members - the president of the board has to be a judge, 1 member is a judge and 1 member is experienced legal professional. The appeal disciplinary board consists of 5 members - the president of the tribunal and 2 members have to be judges, 2 members are experienced legal professionals. In the case of the president and the vice-president of the Supreme Court, the role of disciplinary court is performed by the Constitutional court of the Slovak republic. The disciplinary judiciary exercised its powers in the above mentioned proces from 1st of July 2017 untill 31st of July 2021. From 1st of August 2021, the Supreme Administrative Court of the Slovak Republic is the disciplinary court for judges of the Slovak Republic.

Q145 (2021): In the light of the above-mentioned information concerning the judicial reform, there were no sanctions against judges and public prosecutors imposed by the SAC in 2021. The disciplinary chambers of the SAC started the decision-making process in February/March 2022. Due to the de facto inoperability of the disciplinary chambers of the Judicial Council, there were no sanctions against judges imposed by Judicial Council either. Regarding the sanctions against public prosecutors imposed before 1 August 2021, the SAC does not have the data or statistics of the decision-making of the disciplinary committees.

Q145 (2020): Prosecutors: In 2020, no disciplinary measure was imposed by the prosecutor, only one disciplinary was legally terminated, namely with the acquittal of the prosecutor. Judges: In the line 4. "Other" are counted suspension of disciplinary proceedings (16) and liberation (2).

Q145 (2018): The difference between the number of disciplinary proceedings initiated and the number of sanctions imposed is caused by the fact that not every initiated disciplinary proceedings results in sanction or finding the defendant guilty. The other reason is that some proceedings were not terminated within the same year.

Q145 (2016): In relation to the judges the majority of “other” disciplinary proceedings was ended by the judge being acquitted (9 cases), the disciplinary proceedings being terminated (11 cases), the disciplinary sentence being withheld (1 case) or the sanction being pronounced to be invalid (2 cases). There were situations within one disciplinary proceeding of partly deciding one way and partly deciding the other (for example partly imposing a sanction and partly terminating the disciplinary proceedings), therefore the number of initiated disciplinary proceedings differs from the number of sanctions. In relation to the prosecutors the “other” sanctions include suspension of the disciplinary proceedings due to the initiation of public prosecution in criminal proceedings against the prosecutor (1 case), termination of the disciplinary proceedings due to its inadmissibility because of lapse of the period of two years since commitment of the disciplinary misconduct (5 cases), termination of the disciplinary proceedings due to its inadmissibility because of failure to file an application on time (1 case), termination of disciplinary proceedings due to its inadmissibility because of termination of function of the prosecutor accused (2 cases), termination of the disciplinary proceedings due to its inadmissibility because of the application being filed by an unauthorised person (1 case), termination of the disciplinary proceedings due to its inadmissibility because the act was not considered to be a disciplinary misconduct (2 cases) and the prosecutor being acquitted (2 cases).
There were situations within one disciplinary proceeding of partly deciding one way and partly deciding the other (for example partly imposing a sanction and partly terminating the disciplinary proceedings), therefore the number of initiated disciplinary proceedings differs from the number of sanctions.

Q145 (2014): In 2014, only 6 disciplinary proceedings were resolved with final and conclusive decision. The remaining proceedings were pending. As concerns the category “other”, it subsumed a removal from the office of the vice-president of a court.
It is noteworthy that in 2014, several essential changes of legislation were made regarding disciplinary sanctioning of prosecutors. As a result, ongoing disciplinary procedures took more time and a low number of disciplinary sanctions were imposed.

Q145 (2012): In 2012, only 9 cases were decided by the Disciplinary court, the rest of the proceedings being pending. Besides, as regards the category “other”, in 3 cases the motion was withdrawn, while in 1 case the motion was dismissed.

Q146 (2016): The number represents all lawyers registered in the list of the Slovak Bar Association.
Out of this number 848 lawyers have their practise suspended.

Q146 (2012): The number of practising lawyers is increasing constantly.

Q148 (2018): Slovak legal order does not regulate this type of legal advisors.

Q148 (2017): The Slovak legal system does not recognize this kind of legal advisors.

Slovenia

Q004 (2020): Annual average gross salary is increasing (increase by 4% from 2018 to 2019 and by 6% from 2019 to 2020).

Q004 (2016): Average monthly gross earnings for 2016.

Q046 (General Comment): The provided total number of judges corresponds to the number of de facto occupied judicial posts performing their functions. Some judges are assigned to other duties (eg. to the Judicial council, Ministry of Justice, Supreme court) and are not included in the reported numbers. The information on actual presence (excluding the maternity or sick leave, but including the annual leave) is also available. Higher judges at first instance courts (local, district, labour and social and the Administrative Court) are reported by their court - as second instance judges.

Q046 (2021): At the end of 2021, 880 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 860 professional judges sit in courts (perform judicial function), since the rest of the judges (20 judges - difference to the total of 880 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The data on actual presence of judges in courts is also collected; the number of judges in the Slovenian judicial system in 2021 was 802,84 according to actual presence calculations.
Until 2021, approx. 30 judges at the Administrative Court (first instance court, see Q44) and approx. 50 higher judges at local and district courts (first instance courts) were reported as second-instance judges (accoriding to their rank: higher judge); from 2022 they are reported according to their court (first-instance judges).

Q046 (2020): At the end of 2020, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 875 professional judges sit in courts (perform judicial function), since the rest of the judges (15 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave).
The number of judges in the Slovenian judicial system in 2020 was 805,5 according to actual presence calculations.

Q046 (2019): At the end of 2019, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave).
Nevertheless, we report that 873 professional judges sit in courts (perform judicial function), since the rest of the judges (17 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.
The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave). The number of judges in the Slovenian judicial system in 2019 was 797 according to actual presence calculations.

Q046 (2018): At the end of 2018, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 867 professional judges sit in courts (perform judicial function), since the rest of the judges (23 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave).
The number of judges in the Slovenian judicial system in 2018 was 796 according to actual presence calculations.

Q046 (2017): At the end of 2017, 889 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 869 professional judges sit in courts (perform judicial function), since the rest of the judges (20 judges - difference to the total of 889 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.
The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave)
The number of judges in the Slovenian judicial system in 2016 was 795,54 according to actual presence calculations.

Q046 (2016): At the end of 2016, 897 judicial posts were formally occupied (full-time equivalent method), although some post were de facto vacant (e.g. judge absent due to maternity leave). The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave). The number of judges in Slovenian judicial system in 2016 was 811,52 according to actual presence calculations.
Nevertheless, we report that 880 professional judges sit in courts (perform judicial function), since the rest of the judges (17 judges - difference to the total of 897 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.

Q046 (2015): At the end of 2015, 912 judicial posts were formally occupied (FTE), although some post were de facto vacant (e.g. judge absent due to maternity leave).
Nevertheless, 897 professional judges sit in courts (perform judicial function), since
some judges were assigned to other duties (at the Supreme Court; different projects ;appointed to the Judicial Council and appointed to the Ministry of Justice.

We reported the Administrative court as the first instance court (Q42 and Q91). However, the law requires for the Administrative court judge to be a higher judge (2nd instance judge), therefore the Administrative court judges are included as the 2nd instance professional judges

Q046 (2012): Starting with 2012, judges of administrative courts are included in the number of first instance judges.

Q046-2 (General Comment): In 2021, the data on judges classified by legal fields was collected for the first time (by approximating the time an individual judge is working on a certain type of case). Since the methodology of reporting is yet to be revised and elaborated, we can only report approximate numbers. The distinction to Civil and/or Commercial/Criminal/Administrative/Other judges is roughly the same as for the number of cases (see comments to Q91, 93 and 94). The category "Other" includes judges involved in the court management. Judges involved in court management are partially or entirely relieved from adjudicating cases.
The data is reported as actual presence (not FTE).

Q046-2 (2021): The data is only approximate - please see general comment. The data is reported as actual presence (not FTE) and therefore not compatible with Q46.

Q046-2 (2020): There is no data for 2020. In 2021, the data on judges by legal fields was collected for the first time (by approximating the time and workload an individual judge is working on a certain type of cases). Since the metodology of reporting is yet to be revised and elaborated, we can only report approximate numbers. For distinction on Civil and/or Commercial/Criminal/Administrative/Other please see comments to Q91, 93 and 94.
First instance judges: Civil and/or commercial: 62% (approx. 396 judges); Criminal: 33% (approx. 214 judges); Administrative: 4% (approx. 28 judges), Other: 1% (approx. 5 judges)
Please note: the judges at the Administrative Court that resolve administative cases at first instance have the rank of a higher judge.
Second instance judges: Civil and/or commercial: 66% (approx. 77 judges); Criminal: 34% (approx. 39 judges); Administrative: /, Other: /
Supreme court judges: Civil and/or commercial: 57% (approx. 16 judges); Criminal: 18% (approx. 5 judges); Administrative: 25% (approx. 9 judges), Other: /

Q052 (General Comment): The definitions of categories are as follows:
1. “Rechtspfleger” category includes only the staff (judicial assistants and judicial advisers) with autonomous competence to adopt final decisions (decisions on the merits of the case), set explicitly in procedural laws - currently the Claim Enforcement and Security Act, the Financial Operations, Insolvency Proceedings and Compulsory Windingup Act, the Court Register of Legal Entities Act and the Land Register Act.
2. “Non-judge staff” category includes staff, whose tasks are generally set by the Courts Act. These are judicial assistants (filing applications and statements by parties for the record and, by order of a judge, perform less demanding tasks related to preparation for trial proceedings or other procedural acts, making calculations of costs, preparing drafts of decisions and performing other tasks in judicial proceedings under the orders of a judge), judicial advisers (performing work connected with the examination of parties, witnesses and experts (outside the main hearings), performing more complex preparatory work for hearings, reporting at panel meetings, drafting decisions, conducting hearings under the guidance of a judge and performing other work by order of a judge) and judicial trainees (typically do not perform significant amount of work as their role is to learn; however they can participate in hearings and drafting of court decisions in some cases).
3. All the other staff, not mentioned above and not corresponding to 4. “Technical staff” is included in 3. “Administrative staff”. The latter includes, along with the court management staff, the office support staff, whose tasks are not specifically set by the law and include case registering, administrative case preparation, court fees, typing and/or recording of court sessions etc.

Q052 (2021): Approx. 3% of all court staff (115 persons) are judicial trainees (reported under “2. Non-judge (judicial staff”).

Q052 (2020): Approx. 3% of all court staff (109 persons) are judicial trainees (counted under “2. Non-judge (judicial staff”). No particular explanation can be given regarding the increase in the number of “3. Staff in charge of different administrative tasks and of the management of the courts” / Males.

Q052 (2017): Differences with previous evaluation cycles within categories (including male/female ratio):
The number of court staff is reported according to the actual work tasks of the staff. Between years, court staff can be assigned to different departments and tasks and therefore the variation of Rechtspfleger/Non-judge/Administrative staff categories and male/female ratio within categories can change, even though no major hiring or letting go for different categories of court staff had occurred. The relative differences in the Technical staff category are due to the small (absolute) number of staff.

Q052 (2016): Differences with previous evaluation cycles within categories (including male/female ratio):
The number of court staff is reported according to the actual work tasks of the staff. Between years, court staff can be assigned to different departments and tasks and therefore the variation of Rechtspfleger/Non-judge/Administrative staff categories and male/female ratio within categories can change, even though no major hiring or letting go for different categories of court staff had occurred. The relative differences in the Technical staff category are due to the small (absolute) number of staff.

Q052 (2015): The difference between 2014 and 2015 data is due to the methodology of gathering the data. In this cycle, all the courts were asked to provide the additional data to assure the accuracy of the answer. The reporting method was further improved and some adjustments were made according to the definition of “Rechtspfleger”, “Non-judge staff” and „Administrative staff“ categories.

Q052 (2014): In courts, there were 14,55 % of males and 85,45 % of females (judges included) on 31. 12. 2014. In this cycle the reporting method was further improved. The Supreme Court's strategic orientation according to this matter is to decrease the number of judges, while increasing the number of non-judge staff. The Supreme Court can, in order to ensure timeliness of proceedings, distribute additional finances for temporary employment of additional staff to individual courts.

Q052 (2013): The category 1 - "Rechtspfleger" includes court clerks, independent and higher judicial advisors in the field of commercial (court) register, land register and civil enforcement procedure, as they have the competence to decide on certain cases, judicial advisers in the field of civil enforcement, who have even slightly broader competences than judicial assistants. The category 2 includes judicial advisers and the remaining judicial assistants. The category 3 includes administrative support to the judge and court management – court director, human resources office, financing-accounting office. The category 4 refers to cleaning, security, system administration, drivers, etc.

Q052 (2012): In 2012, the category 1 - "Rechtspfleger" includes court clerks; the category 2 includes judicial advisers. The other court staff was not further categorised.
Q052-1 (General Comment): Besides profiles typically working in courts, the non-judge staff at the Supreme court includes also staff at the Centre for Informatics (see Q62-1) – approx. 20 employees, mostly system administrators/engineers (counted at Q52 under “4. Technical staff”) and project managers (counted at Q52 as “3. Administrative staff”).

Q052-1 (2020): No particular explanation can be given regarding the increase in the number of “3. Total non-judge staff working in courts at Supreme Court level” / Males.
Q055 (General Comment): The number is reported in FTE.
In the Slovenian criminal justice system state prosecutors are exclusively authorized to conduct public prosecution in criminal matters on behalf of society and in the public interest. The Constitution and law guarantee autonomy in status and functioning of state prosecutors. Decisions made by the state prosecutor shall not be interfered with, except by way of general instructions and assigning of a case in the manner determined by the law.
Slovenian state prosecutors perform their function in 13 organizational units – prosecution offices. There are 11 District State Prosecutor’s Offices and one Specialized State Prosecutor's Office of the Republic of Slovenia, where local, district and senior state prosecutors are positioned. At the Office of the Prosecutor General of the Republic of Slovenia supreme state prosecutors and the State Prosecutor General perform their functions. Some state prosecutors of lower ranks are assigned to the office perform demanding professional tasks.
There are no higher state prosecutor’s offices as the proceedings at the courts of appeal are governed by the district prosecutor’s offices. According to the State Prosecution Service Act prosecutors with the rank of at least local state prosecutor may represent a case at local courts, prosecutors with the rank of at least district state prosecutor may represent a case at district courts, prosecutors with the rank of at least senior state prosecutor may represent a case before higher courts and only supreme state prosecutors may represent a case at the Supreme Court. Local state prosecutors may also appear at district courts, if authorized by the head of state prosecutor’s office for certain categories of matters, for a particular matter, for certain categories of procedural acts or for a particular procedural act. Local and district prosecutors may in their cases appear along with a senior prosecutor at courts of appeal, if authorized by the head of an appellate division of the state prosecutor’s office for a particular case. Senior and supreme state prosecutors are competent to represent a case at before first instance courts. Local and district prosecutors are reported as prosecutors at first instance level, senior prosecutors as prosecutors at second instance level and supreme prosecutors as prosecutors at Supreme Court level, without regard to the court instance where they perform their function, or that they are assigned to another institution for a limited period of time (e.g for the administration of State Prosecutorial Council).
The number of posts of state prosecutors is set by the Government's Regulation. However the actual number of state prosecutors is lower than the number se by regulation due to different factors.

Q055 (2021): Before 2021, data was reported in gross numbers. For 2021 data, the FTE format is observed.
The above data does not include six State prosecutors who perform other duties (assigned to The Council of State Prosecutors, appointed to Eurojust, the European Public Prosecutor and the European Delegate Prosecutor).
Q055 (2020): The information is in form of gross data. According to the methodology used for reporting judges and court staff (FTE) – by which part-time employees are converted to full-time time by the calculation of working hours, the number amounts to 193, as a number of prosecutors are not working full time.

Q055 (2016): Slovenian state prosecutors perform their function in 13 organizational units. There are 11 district prosecutor's offices and one Specialised State Prosecutor's Office of The Republic of Slovenia, where local, district and higher state prosecutors are positioned. At The Office of the Prosecutor General of the Republic of Slovenia supreme state prosecutors and State Prosecutor General perform their functions. Here are also some state prosecutors of lower ranks assigned to perform demanding professional tasks.
There are no higher state prosecutor's offices as the proceedings before the courts of appeal are governed by the district prosecutor's offices. According to the State Prosecutor Act prosecutors with the rank of at least local state prosecutor may represent a case before local courts, prosecutors with the rank of at least district state prosecutor may represent a case before district courts, prosecutors with the rank of at least higher state prosecutor may represent a case before higher courts and only supreme state prosecutors may represent a case before the supreme court. Local state prosecutors may also appear before district courts if authorized by the head of a state prosecutor's office for certain categories of matters, for a particular matter, for certain categories of procedural acts or for a particular procedural act. According to amendment of legislation in 2015 local and district prosecutors may in their cases appear along with a higher prosecutor before the courts of appeal if authorized by the head of an appellate division of the state prosecutor's office for a particular case. Higher and supreme state prosecutors are competent to represent a case also before first instance courts.
In the context of question 55 we counted local and district prosecutors as prosecutors at first instance level (164), higher prosecutors as prosecutors at second instance level (42) and supreme prosecutors as prosecutors at Supreme Court level (11) without regard of the rang of court before they perform their function in fact or if they are assigned to other institution for a limited period of time (e.g for the administration of State Prosecutorial Council). The information is in form of full-time equivalent.

Q055 (2014): In November 2011, the new State Prosecutor Act came into force. It dissolved the special department of the Office of the State Prosecutor General, responsible for the 2d instance level. Proceedings before courts of appeal are now governed by the 4 State circuit prosecutor offices in towns where the higher courts are located. Prosecutors are organised in 12 offices (11 circuit offices and one Specialised State Prosecutor's Office, where circuit and higher prosecutors work) and the Supreme State Prosecutor Office (where supreme State prosecutors and the general State prosecutor work). The function "assistant State prosecutor" changed in "local State prosecutor". The Specialised State Prosecutor's Office for dealing with the most severe criminal offences was established.

Q055 (2012): In November 2011, the new State Prosecutor Act came into force. It dissolved the special department of the Office of the State Prosecutor General, responsible for the 2d instance level. Proceedings before courts of appeal are now governed by the 4 State circuit prosecutor offices in towns where the higher courts are located. Prosecutors are organised in 12 offices (11 circuit offices and one Specialised State Prosecutor's Office, where circuit and higher prosecutors work) and the Supreme State Prosecutor Office (where supreme State prosecutors and the general State prosecutor work). The function "assistant State prosecutor" changed in "local State prosecutor". The Specialised State Prosecutor's Office for dealing with the most severe criminal offences was established.

Q060 (General Comment): The number is reported in FTE. Staff attached to the public prosecution service are civil servants at state prosecutor's offices (state prosecutorial personnel). Staff includes the director general, directors, judicial advisors, trainees, administrators, registrars and other civil servants from state prosecutor's offices. Trainees typically do not perform a significant amount of work as their role is to learn; nevertheless, they participate in hearings and in drafting decisions in some cases.

Q060 (2021): Before 2021, data was reported in gross numbers. For 2021 data, the FTE format is observed.

Q060 (2020): The information is in form of gross data. According to the methodology used for reporting judges and court staff (FTE) – by which part-time employees are converted to full-time time by the calculation of working hours, the number amounts to 298, as a number of staff are not working full time.

Q060 (2016): The information is in form of full-time equivalent.

Q060 (2014): The substantial increase of employments in state prosecutor's offices in 2014 is a result of Government's decision to strengthen the fight against corruption and other fields of criminality defined in the Prosecution Policy. In the year 2014, 40 Senior Judicial Advisers took up their post, as well as 7 other types of civil servants. In the year 2015 the employment procedures were concluded for admitting 15 trainees.

Q132 (General Comment): The basic salary for judges and prosecutors is regulated by law, as well as promotion. The salary of the prosecutor is determined on the same basis, with the same supplements and in the same way as the salary of the judge. All employees in the country (including judges and public prosecutors) are also entitled to the supplement for the period of employment. As the calculation of the average pay would be too complicated, we report figures calculated from above criteria. Please note all figures reported include the supplement for the period of employment.
Judge/prosecutor at the beginning of the career: starting salary for local court judge and for local state prosecutor (without promotion), including the supplement for the period of employment (5 years) - approx. 1-2% of the reported amount.
Judge/Prosecutor at the highest instance: starting salary of a supreme court judge and supreme state prosecutor – counselor (not president of the Supreme Court or State Prosecutor General) including the supplement for the period of employment (44 years) - approx 15% of the reported amount.

Q133 (General Comment): There is a possibility for judges, public prosecutors and state attorneys (as well as other public servants in judiciary) to apply for a non-profit tenancy in an apartment, owned by the Ministry of Justice. However, the number of available apartments is very low (less than 0,5% of all functionaries and public servants in judiciary).

Q133 (2018): There is a possibility for judges, public prosecutors and state attorneys (as well as other public servants in judiciary) to apply for a non-profit tenancy in an apartment, owned by the Ministry of Justice. However, the number of available apartments is very low (less than 0,5% of all functionaries and public servants in judiciary).

Q144 (General Comment): The Judicial Service Act provides for 27 different types of conduct of judges that represent a disciplinary breach and the state State Prosecution Service Act provides for 31 different types of conduct of public prosecutors that represent a disciplinary breach.
Q144 (2016): Judges: Seven disciplinary proceedings were initiated in 2015.
Prosecutors: One disciplinary proceeding was initiated in 2015 for the reason of professional inadequacy.
Q144 (2014): o breach of professional ethics: one disciplinary proceeding was initiated in 2014 because of an action or behaviour on the part of the judge that conflicts with the judge's impartiality or that damages the reputation of the judicial profession and inappropriate, indecent or insulting behaviour or expression towards individuals, organs of the State and legal entities in connection within the judicial service or outside of it;
o professional inadequacy: two disciplinary proceedings were initiated in 2014 because of careless, untimely inappropriate or negligent performance of judicial service;
o criminal offence: one disciplinary proceeding was initiated in 2014 because of commission of an act that has the statutory definition of a criminal offence while holding judicial office.
o "other": 11 different breaches, such as illegal or irrational use of means of work, abuse of right to absence from work, infringement of the rules on safety at work, infringement of the Court Rules on the use of service uniform etc.; however there were no discipline proceedings corresponding to such breaches in 2014.

Q144 (2013): With regard to public prosecutors, to provide a more comprehensive picture it was mentioned that there were 3 disciplinary proceedings initiated in year 2013.
Q144 (2012): In 2012 one disciplinary proceeding was initiated against a judge because of an action or behaviour on the part of the judge that conflicts with the judge's impartiality or that damages the reputation of the judicial profession. The proposal of the disciplinary prosecutor for the pronouncement of disciplinary sanction was refused.
According to the Judicial Service Act, there are 27 types of breach of discipline in respect of judges. For the purpose of these questions, they were divided to 4 corresponding groups:

Q145 (General Comment): According to the Judicial Service Act, the following disciplinary sanctions are possible: written warning (CEPEJ: reprimand), suspension of promotion (but not position downgrade, therefore CEPEJ: other), wage reduction (CEPEJ: temporary reduction of salary), transfer to another court (CEPEJ: transfer to another geographical (court) location) and termination of judicial office (CEPEJ: resignation). There are no other disciplinary sanctions corresponding to the rest of the CEPEJ categories.
Q145 (2021): In 2021, 4 procedures against judges has ended (2 finding alleged offender not responsible and 2 has been stopped due to procedural reasons).
Q145 (2020): In 2020, one procedure agains judges has ended (finding alleged offender not responsible).

Q145 (2018): Suspension (judges and public prosecutors): In previous campaigns, the answer was “NAP”, as suspension de facto includes withdrawal from cases, but is not a disciplinary sanction strictly speaking. In terms of the Judial Council Act suspension is a temporary dismissal from the judicial service that is related to the conduct of disciplinary proceedings and may last until the adoption of the final decision of the disciplinary court. In the reference year, one judge was suspended.
Other (judges): Cessation/suspension of promotion.
The difference between the number of disciplinary proceedings and the number of sanctions for judges is due to the fact that not all initiated disciplinary proceedings have been finished during the reference year. In the reference year 2018 two disciplinary proceedings were finished: one initiated already in 2017 and one initiated in 2018. Two disciplinary proceedings initiated in 2018 have not been finished in 2018, but only in 2019.

Q145 (2016): Judges, other: Cessation/suspension of promotion.

Q145 (2012): In 2012 the following sanctions have been pronounced: 1 reprimand because of an unconscious, late, inappropriate or negligent performance of judicial service. There has been no termination of judicial office for a judge on the grounds that he/she is not suitable for performing judicial service.

Q146 (2017): (Male: 939, 798: female).

Q147 (General Comment): Persons entered in the directory of the Bar Association of Slovenia are only lawyers (and not other legal experts, in-house counsellors etc.)

Spain

Q052 (General Comment): The Spanish judicial system distinguishes between three categories of non-judicial staff: Gestión Procesal, Tramitación Procesal and Auxilio Judicial. These bodies have their competences regulated at article 475 and other of the Organic Law of the Judiciary, it is very difficult to distribute them in the previous points of the question because the three groups have functions to assist Judges, make administrative tasks and have technical tasks. The sum of these bodies, destinated to Courts, is the response to Q.52.5 'Other non judge staff'.

Q052 (2021): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts:44651
In adition to that, there are 1147 Forensic Doctors.

Q052 (2020): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts:44289
In adition to that, there are 1144 Forensic Doctors.
Regarding the distribution males / females: This distribution can only be given from the Autonomous Regions of the direct competence of the Ministry of Justice (5 out of 17). In these Autonomoues Regions the proportion of females within the civil servants in Courts is 71'76% (therefore, 28'23% of males). This proportion is possibly applicable to the whole national system.

Q052 (2019): The data indicated in the chart as 'other non judge staff' (43556) includes the three kinds of civil servants that work in Courts (Gestión procesal, Tramitación procesal, Auxilio judicial). In addition to that, there are other 1122 Forensic Doctors.

Q052 (2018): 1121 Forensic Doctors

Q052 (2017): The figure for other non judge staff includes judicial civil servants who are in charge of the processing of files, communication acts, and other tasks, and are distributed in three categories (called Auxilio Judicial,Tramitación Procesal, Gestión Procesal). Forensic Doctors are a special body (not included in the figure provided in this question). Their total number (Forensic Doctors) at 4 April 2018 is 1003.
For 2017, in contrast with previous cycles, data on number of “other non-judge staff” excludes the civil servants that work in Prosecution Offices.

Q052 (2016): The figure for other non judge staff includes judicial civil servants who are in charge of the processing of files, communication acts, and other tasks, and are distributed in three categories (called Auxilio Judicial, Tramitación Procesal, Gestión Procesal). Forensic Doctors are a special body (not included in the figure provided in this question). Their total number (Forensic Doctors) at 4 April 2018 is 1003.

Q052 (2014): In 2014, there are 44 896 other non-judge staff (judicial clerks) and 3 667 judicial counsellors (this is the new name for the secretario judiciales since October 1st).

Q052-1 (2018): These figures include the number of "letrados de Administración de Justicia", which are the CEPEJ equivalent of "Rechtspfleger".

Q055 (General Comment): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'. However, it distinguishes three categories.
Article 34 of Law 50/1981, (Organic Statute of the Public Prosecutor's Office) distinguishes three categories:
1st Chamber Prosecutors of the Supreme Court, equal to Magistrates of the High Court. The Deputy Prosecutor of the Supreme Court will be considered the President of the Chamber.
2nd Prosecutors, equated to Magistrates.
3. Lawyers-Prosecutors, equated to Judges.

Q055 (2021): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, First category (''Fiscales de Sala'') Prosecutor of Chamber: Total 32, Males 21, Females 11 (this category includes the Prosecutors of chamber of Supreme Court).
Second. ''Fiscal'': Total 1825, Males 701, Females 1124
Third: ''Abogado-Fiscal'': Total 774, Males 178, Females 596

Q055 (2020): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, First category (''Fiscales de Sala del Tribunal Supremo'') Supreme Court Prosecutor of Chamber: Total 50, Males 36, Females 14
Second. ''Fiscal'': Total 1830, Males 700, Females 1130
Third: ''Abogado-Fiscal'': Total 681, Males 158, Females 523

Q055 (2018): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, Total 33, Males 26, Females 7
Second) Total 1779, Males 696, Females 1083
Third) Total 653, Males 161, Females 492

Q055 (2016): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First) Total 25, Males 19, Females 6
Second) Total 1826, Males 738, Females 1088
Third) Total 622, Males 155, Females 467

Q132 (General Comment): In addition to salary, other concepts must be taken into account: Remuneration for objectives and professional substitutions.
Remuneration according to objectives can be considerable in both cases (judges and prosecutors). Substitution refers to cases in which, according to the law, one judge substitutes another, thereby accruing an increase in remuneration, depending on the circumstances and duration of that substitution

Q132 (2021): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Prosecution 3.391.688,99 euros, Judges 6.719.737,10 euros.
- Professional substitutions. Prosecution 596.210,59 euros, Judges 7.666.770,44 euros.

Q132 (2020): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Prosecution 3.364.701,68 euros, Judges 6.760.485,89 euros.
- Professional substitutions. Prosecution 624.438,54 euros, Judges 8.852.605,61 euros.

Q132 (2019): Other two concepts have to be taken into account:
- Remuneration for objectives. (For 2019, Judges 6.560.790,81, Prosecutors 3.298.733,53)
- Professional substitutions. (For 2019, Judges 6.028.864,05; Prosecutors 726.720,41)
Remuneration according to objectives can be considerable in both cases.Substitution refers to cases in which, according to the law, one judge substitutes another, thereby accruing an increase in remuneration, depending on the circumstances and duration of that substitution.

Q132 (2018): Other two concepts have to be taken into account:
- Remuneration for objectives. (For 2018, Judges 6.474.050,91, Prosecutors 3.220.851,03)
- Professional substitutions. (For 2018, Judges 3.220.851,03; Prosecutors 646.740,23)

Q144 (2020): Other Judges: affiliation to a political party or union; unjustified absence; incompatible activity.
Other Prosecutions: lack of consideration; delay.

Q144 (2018): The number total in case of Prosecutors expresses the number of information proceedings opened.

Q144 (2016): 2 - Delay 1 - To break the regime of incompatible activities (data for Prosecutors)

Q145 (2012): For 2012, the category “other” encompasses disciplinary proceedings resolved without a sanction for the judge.

Q146 (2021): The data are obtained through the General Bar Association Annual Report 2021. On practicing and resident lawyers.

Q146 (2020): The data are obtained through the General Bar Association Annual Report 2020. On practicing and resident lawyers.

Q146 (2017): Resident Lawyers (Memory of the General Bar Association 2017)

Q146 (2016): Resident Lawyers (31 December 2016)

Q146 (2015): In civil cases, mainly the legal representation is for Procuradores. In criminal cases, lawyers can assume legal representation until a Procurador is appointed for the case. In administrative cases legal representation is mostly assumed by lawyers. Graduados sociales' (consultants on labour and social security matters) may represent the parties in labour law proceedings. The responses above are given is on the basis that lawyers have a monopoly on practising the defence at Court which, in Spain, is not equivalent to “legal representation”.

Indicator 7: Professionals of justice

comments provided by the national correspondents

organised by question no.

Question 004. Average gross annual salary (in €) for the reference year

Question 046. Number of professional judges sitting in courts (if possible on 31 December of the reference year). (please give the information in full-time equivalent and for posts actually filled for all types of courts - general jurisdiction and specialised courts)

Question 046-2. Number of judges (FTE) by case type:

Question 052. Number of non-judge staff who are working in courts (if possible on 31 December of the reference year) (this data should not include the staff working for public prosecutors; see question 60) (please give the information in full-time equivalent and for posts actually filled)

Question 052-1. Number of non-judge staff by instance (if possible, on 31 December of the reference year) (this data should not include the staff working for public prosecutors; see question 60) (please give the information in full-time equivalent and for posts actually filled).

Question 055. Number of public prosecutors (on 31 December of the reference year). (Please give the information in full-time equivalent and for posts actually filled, for all types of courts – general jurisdiction and specialised courts).

Question 060. Number of staff (non-public prosecutors) attached to the public prosecution services, if possible, on 31 December of the reference year and without the number of non-judge staff, see question 52 (in full-time equivalent and for posts actually filled).

Question 132. Salaries of judges and public prosecutors on 31 December of the reference year:

Question 133. Do judges and public prosecutors have additional benefits?

Question 144. Number of disciplinary proceedings initiated during the reference year against judges and public prosecutors. (If a disciplinary proceeding is undertaken because of several reasons, please count the proceedings only once and for the main reason.)

Question 145. Number of sanctions pronounced during the reference year against judges and public prosecutors:

Question 146. Total number of lawyers practising in your country:

Question 147. Does this figure include "legal advisors" who cannot represent their clients in court (for example, some solicitors or in-house counsellors)?

Question 148. Number of legal advisors who cannot represent their clients in court:

Question 004

Austria

(General Comment): Since the 2010 evaluation, the provided figure corresponds to the average gross income including taxes and social expenses borne by the employee, but not employer's contribution for social insurance. This is in line with the figures given in question 132 (gross annual salary of judges and prosecutors).

(2021): Not available yet.

(2019): 2018 data has been communicated, pending 2019 data.

Belgium

(2021): The average gross annual salary is 44022,8 euros, source National Bank of Belgium.

(2020):
Answer provided based on the latest data published by the National Accounts (April 2021).

(2019): Average gross annual salary for employees (both full-time and part-time).

(2016): Average gross salary for a full-time employee (without exceptional bonuses and vacation pay)

Bulgaria

(2021): Preliminary data.
The minimum wage in the country has been risen with 6.6%. In section “Human health and social work activities” the average annual wage increased with 25.7% due to additional wage payments related with the health crisis. In section “Education” there was an increase of the teachers' wages and salaries and the increase in the section was 17.0%. High growth rate of wages and salaries in 2021 compared to 2020 (17.7%) was recorded in “Accommodation and food service activities” as the section started to recover after 2020 lockdowns.

(2018): NSI data

(2016): No explanation.

Croatia

(2021): Average monthly gross salary for 2021 for person in paid employment in legal entities in the Republic of Croatia is available at web page of the Croatian Bureau of Statistics (https://podaci.dzs.hr/2021/en/10583).
This monthly gross salary (9599 Croatian Kuna) has been multiplied by 12 and then divided by Croatian Kuna / Euro average annual medium exchange rate published by the Croatian National Bank (7,52418 Croatian Kuna for 1 Euro; this information is available at https://www.hnb.hr/temeljne-funkcije/monetarna-politika/tecajna-lista/tecajna-lista.)

Czech Republic

(2021): The gross salary is constantly growing.

(2020): The gross salary is constantly growing.

(2019): Positive trends in Czech economy and the exchange rate have had an influence on the rise of average gross annual salary (in €).

(2016): The Czech economy is doing well + the exchange rate.

Estonia

(2020): Inflation

(2018): There is no specific reason.

Finland

(General Comment): Source: Structure of Earnings, Statistics Finland
https://pxweb2.stat.fi/PxWeb/pxweb/en/StatFin/StatFin__pra/

(2021): Preliminary information: salary in 2020 multiplied by the annual percentage change in the earnings level index 2021q4

(2020): In 2020, the average gross annual salary was EUR 3 595 per month.

(2019): In 2019, the average gross annual salary was EUR 3528 per month.

(2018): In 2018, the average gross annual salary was EUR 3465 per month. Correspondingly, the median was EUR 3079 per month. The most common monthly earnings of all full-time wage and salary earners was EUR 2600 per month.

France

(2021): The exact data are 37 742,7

(2020): The exact figure is 34,494.5_x000D_
Source INSEE

Germany

(2021): The figure represents the average gross annual salary of employees working in full time including special payments (without special payments: 49 202 EUR)
Special payments are any payments outside of the regular remuneration. Typical examples of such payments are Christmas bonuses/end-of-the year bonuses, holiday bonuses, payments for jubilees, bonuses for the fulfilment of target agreements.

(2020): figure represents the average gross annual salary of employees working in full time

(2019): With regard to this question, no data are available for 2019. The data from 2018 have therefore been included.

(2018): With regard to this question, no data are available for 2018. The data from 2017 have therefore been included.

(2016): The circumstances have changed since the last campaign

Greece

(2021): Our service has the data of the structure and distribution of Remuneration Survey in enterprises on the structure of remuneration of employees(having a dependent employment relationship) in enterprises by Sector (B-S branches), excluding X (Public Administration and Defense, compulsory Social Security) based on the NACE Rev. 2. The survey is conducted on a four-year basis. Therefore, the latest available figures are of the year 2018. The results of the of the survey will be published in late 2024 to early 2025.

(2020): The data come from the Survey of the Structure and Distribution of Remuneration in Greece for the year 2018, from which the sector X is excluded (Public Administration and Defense, Compulsory Social Security) based on the classification of activities NACE Rev. 2 and relate to the average annual gross earnings in euros. Data is available by gender.The only one available at the moment.
Men 19 234 Average Women 15 947 Average

(2019): The competent authority for this data (see Hellenic Statistical Authority) provides the relevant numbers. The competent authority did not provide any numbers for this section.

(2016): The data provided correspond to those of 2014, since the statistics on this point are carried out every four years. Therefore, they are not absolutely accurate.

Hungary

(2021): In comparison to the previous year, the average gross annual salary increased due to the general development of Hungarian economy, to the increase in our GDP, as well as to the raising of the minimum wage.
See the most important annual data on the labour market on the website of the Hungarian Central Statistical Office:
https://www.ksh.hu/stadat_files/mun/en/mun0001.html

Ireland

(2021): Year 2021 is the latest data available. The figure of €44,912.24 was taken from Q4 but it should be noted that the annual gross salary fluctuated during the course of 2021.
https://www.cso.ie/en/releaseandduplications/en/elcq/earningsandlabourcostsq42021final/2022premliminaryestimates.
According to preliminary estimates of the Earnings and Labour Costs Quarterly release, the average weekly earnings were €880.3 in Q1 2022, an increase of 2.3% from €860.19 one year earlier and an increase of 10.0% from the same period in 2020. This represents average earnings of those in employment in the Irish economy in Q1 2022, including those supported by the Employment Wage Subsidy (EWSS).

Latvia

(General Comment): After 2012, the minimum monthly salary increased, which could have had an effect on the average gross annual salary.

(2021): The data provided by the Central Statistical Bureau.

(2020): The data provided by the Central Statistical Bureau.

(2016): on 2016

Lithuania

(2021): From the 1st January, 2021 the minimum monthly salary was increased, the base salary of state politicians, judges, state officials, civil servants and employees of budgetary institutions was increased, the procedure for calculating the amount of tax-free income was changed and other reasons.
https://osp.stat.gov.lt/informaciniai-pranesimai?articleId=9732032

(2020): Annual salary growth has been affected by the increase in the minimum monthly salary since the beginning of the reference year, the base salary of state politicians, judges, state politicians, judges, civil servants, civil servants and employees of budgetary institutions, changes in the procedure for calculating tax-free income and other reasons.

(2019): The increase in wages in 2019 was caused by changes in the tax system: an increase in the basic salary of politicians, judges, civil servants, civil servants and employees of budgetary institutions, an increase in the minimum monthly salary, a revision of the new salary system for civil servants, a change in the procedure for calculating exemptions and other reasons.

(2018): The state budget and salary increased due to the growth of the economy.

(2016): The state budget and salary increased due to the growth of the economy (after recovering from crisis before).

Luxembourg

(2020): The 2019 data has been tentatively provided, pending the official release of the 2020 data.

(2019): This figure represents the average gross salary for the "Industry and Service" sector, according to the NACE Rev 2 code.
(https://statistiques.public.lu/stat/ReportFolders/ReportFolder.aspx?IF_Language=fra&MainTheme=3&FldrName=1&RFPath=30).

(2016): The variation between the different cycles (44% between 2014 and 2016) comes from a difference between gross salary (which was given for this cycle) and net salary (which was given for the previous cycles).

Malta

(2021): The figure quoted above relates specifically to the Average Annual BASIC salary as provided by the National Statistics Office of Malta. The NSO do not collect the Average Annual Gross salary.

(2018): This data has been provided by NSO based on as yet provisional estimates.

Netherlands

(General Comment): These are provisional numbers; definitive numbers (available next year) may differ slightly from those provided here. The data specifies ‘reward per working year’ as salary. This reward consists of salary (gross salary, including taxes and social contributions/premiums), rewards like holiday stipends, payment in kind, expense allowances tied in with work (e.g. travel allowances), and social premiums for the employer (payments for lawful and contractual social security, like pension contributions).

(2020): These are provisional numbers and the definitive numbers (available in 2022) may differ slightly from these provided here. The data specifies ‘reward per working year’ as salary. The reward consists of salary (gross salary, as it includes taxes and social contributions/premiums), rewards like holiday stipends, payment in kind, expense allowances that tie in with work (like travel allowances that cover costs to and from work), and social premiums that are for the employer (payments for lawful and contractual social security, like pension contributions).

(2019): The Statistics Bureau only had numbers for 2018. 2019 data was not available at the moment of data collection.

(2018): This is average salary of all employees; the number includes money that employers pay for pension plans, social security (money that is paid directly to employees). The statistic does not include the income of people who are not employees (people without work, employers).

(2016): Compared to previous questionaires (before 2014) these figures have been adjusted according to new rules of the european system of national accounts (illegal activities are now included)

Poland

(2021): data source - Central Statistical Office
The wage increases linked to economic changes.

(2016): NA

Portugal

(2016): In the present questionnaire we used another "concept" of gross anual salary that we believe is closer to the objectives of this question.
We opted for the category of "payments and salaries" instead of "remunerations" of the national budget because "remunerations" also includes social contributions by the employer which constitue wage costs and not salary.

Romania

(General Comment): At national level, the average gross annual salary is not calculated and included in the official statistical reports made annually by the National Institute of Statistics. Thus, the SMBA was calculated on the basis of the monthly average gross salary at an average monthly value of the euro calculated by the National Bank of Romania for the reference year concluding in the average gross annual salary (as the sum of monthly average salary).

(2020): The difference can be explained based on salary increases, and an upward trend can be observed continuing from 2018.

(2018): At national level, the average gross annual salary is not calculated and included in the official statistical reports made annually by the National Institute of Statistics. Thus, the SMBA was calculated by request by the National Institute of Statistics on the basis of the monthly average gross salary at an average annual value of the euro calculated by the National Bank of Romania for the reference year 2018
According to the provisions of the national legislation in force (GEO no. 79/2017 with subsequent amendments and completions), the social insurance contributions, respectively those of social health insurance that fell to the employer, were transferred to the employee's responsibility and, starting with 2018, are fully supported by the employee, being reflected in the gross amount of the earning.
Consequently, the indicator "monthly gross average wage" produced and disseminated from 2018 is no longer comparable with the previous data series.
These legal provisions do not influence the data comparability for the series of "average monthly net earnings."

Slovak Republic

(2021): http://datacube.statistics.sk/#!/view/en/VBD_INTERN/pr0204qs/v_pr0204qs_00_00_00_en

(2020): Ministry of Finance did not offer closer explanation. Source: https://www.statista.com/statistics/419502/average-annual-wages-slovak-republic-slovakia-y-on-y-in-euros/

Slovenia

(2020): Annual average gross salary is increasing (increase by 4% from 2018 to 2019 and by 6% from 2019 to 2020).

(2016): Average monthly gross earnings for 2016.

Question 046

Austria

(General Comment): For the all exercises, data have been provided in full time equivalent. The first instance judges sit in District and partly regional courts. The second instance judges sit in partly regional courts and Courts of appeal. The last instance includes judges sitting in the Supreme Court and the Supreme Administrative Court.

(2019): Data in full time equivalent
1.: district courts and partly regional courts + administrative courts 2.: courts of appeal and partly regional courts

(2018): Data in full time equivalent
1.: district and regional Courts + administrative court
2.: courts of appeal

(2017): The data also include those of administrative courts.

(2016): This cycle admnistrative courts were taken into account for the first time.
The administrative courts were established January 1st 2014. After their establishment the data of the administrative courts is introduced this cycle for the first time.

(2015): The right (not rounded) numbers are:

TotalMalesFemales
Total number of professional judges (1 + 2 + 3)1620,65 - 790,52 - 830,13
1. Number of first instance professional judges1222,95 - 559,08 - 663,87
2. Number of second instance (court of appeal) professional judges 330,35 - 187,75 - 142,60
3. Number of supreme court professional judges 67,35 - 43,69 - 23,66

Data in full time equivalent
1.: district and partly regional courts
2.: partly regional courts and courts of appeal

(2014): For 2014, the numerical values in the table have been rounded. The most exact replies would be: Total: 1 620,04 (789,68 Male, 830,36 Female); first instance professional judges: 1 224,36 (556,01 Male, 668,35 Female); second instance professional judges: 329,63 (190,78 Male, 138,85 Female); Supreme court professional judges: 66,05 (42,89 Male, 23,16 Female). In 2014, some judges entitled to adjudicate in different law fields have been counted twice.

(2013): In 2013, the different tasks had been assigned to the full time equivalent judges, distinguishing between dealing with first and second instance court proceedings on the one hand and administrative tasks on the other hand.

(2012): In 2012, in contrast with previous evaluations, the different tasks had been more exactly assigned to the full time equivalent judges, distinguishing between dealing with first and second instance court proceedings on the one hand and administrative tasks on the other hand.

Belgium

(General Comment): There is no particular reason for the increase in the number of female second instance judges; it is related to the natural evolution (more women at the first instance implies, after some time, a larger base for recruitment at the appeal level).
The table contains data for civil and criminal courts, as well as for the Council of State (44 members) and the Aliens Litigation Council (55 judges).

(2021): Source: FPS Justice, Directorate-General for the Judiciary, HR Department Judiciary, Notaries and Enforcement agents.
Point 3 concerns judges of the Court of Cassation.
As for the previous cycles, the table contains data for the civil and criminal courts. For this cycle, the (administrative) judges of the Council of State and of the Aliens Litigation Council (41 and 55 judges respectively) have been added to the table. With regard to the administrative judges of the Council of State (as for the Aliens Litigation Council), it is decided to count them as first instance judges. It should be noted, however, that judges of the Council of State intervene both at first and last instance. The number of judges at the Council of State is 44 members and for the Aliens Litigation Council it is 55. For the Aliens Litigation Council, the total of 55 is broken down as follows: 32 female judges - 23 male judges, of whom the first president and the president are men. For the Council of State, the situation is as follows: in principle, the Council is composed of 44 members (1 first president, 1 president, 14 chamber presidents and 28 councillors of State); in practice, 41 members are currently in office (two recent retirements and one death); 20 Dutch-speaking and 21 French-speaking; 12 women and 29 men. It is worth mentioning that an extension of the framework of the Council of State is provided for by a law of 6 September 2022 (which amended article 69 of the laws on the Council of State, coordinated on 12 January 1973). The Council will now consist of 58 members. These new members have not yet been recruited.

(2020): "No particular reason for the increase in the number of female second instance judges; related to natural evolution (more women in the first degree means, after a while, a larger base for recruitment to the appellate degree).
As in previous cycles, the table contains data for the judicial courts. The number of judges in the Council of State is 44 members and for the Council of Foreigners' Disputes it is 54 judges. "

(2019): Number of judges in courts within the ambit of the Federal Public Service of Justice (ordre judiciaire)

(2018): As a result of the reform of the cantons of justice of the peace, the number of places for justices of the peace has decreased by 25.

(2014): For 2014, the number of professional judges includes presidents of courts.

(2013): The 2013 data on the number of professional judges reflects the situation as at 18 January 2014.

Bulgaria

(General Comment): The number of the first instance professional judges encompasses the judges of the first instance courts as follows - 113 district, 28 administrative, 3 military-district and the Specialized Criminal Court;
The number of the second instance (court of appeal) professional judges encompasses the judges of second instance courts as follows - 28 regional/provincial, 5 appellate, The Military Court of Appeal and the Specialized Criminal Court of Appeal.
The number of Supreme Court professional judges encompasses the judges of the Supreme Court of Cassation and the Supreme administrative court.

(2021): First instance courts – district, administrative, military district and Specialized Criminal Court.
Second instance courts (courts of appeal) – regional, appellate, Appellate Specialized Criminal Court and Military Appellate Court.
Supreme Courts – Supreme Court of Cassation and Supreme Administrative Court

(2020): Number of professional judges from district courts - 959, incl. men - 354 and women - 605. Annex: Summary information on the data as of 31.12.2020, received by all regional courts and all administrative courts, regarding the number of judges working in the first instance panels and the number of judges, who administer justice in the appellate / cassation panels, as well as data on how many of them are men and how many of them are women. It should be borne in mind that, according to the information received, in almost all courts, a large number of judges sit both at first instance and as second instance judges. Therefore, the sum of the number of first instance judges and the number of second instance judges should not give the total number of magistrates in the respective region/ administrative court. Number of professional judges from the Court of Appeal - 124, incl. men - 43 and women - 81.

(2019): 046/2. The indicated number of 134 judges refers only to the magistrates appointed and working in the 7 courts of appeal in Bulgaria. The calculation is made on the basis of the question itself, which draws attention only to the number of appellate judges (judges working in a court of appeal), as is evident from it - "professional judges of second instance / appellate court /". In almost all regional courts, most judges sit in both the first and second instance departments of the courts and this makes it difficult to differentiate them. This year all judges in regional courts are listed in 046/1 - Number of first instance professional judges.

(2017): P. 1 – The number of first instance professional judges consists of judges in 27 Regional courts within regional centres; 86 out of regional centres; 28 Administrative courts; 1 Specialized Criminal Court; 3 Military courts; and the number of the first instance judges in District courts has been added to them;
P.2 – The number of the second instance judges consists of judges in 27 District courts; Sofia City Court; 5 Courts of Appeal; 1 Military court of appeal and 1 Appealate Specialized Criminal Court. This number does not include the second instance judges who have adjudicated in first instance pannels.
P.3- The number of working judges in the Supreme Court of Cassation and Supreme Administrative Court at 31.12.2017

(2016): P. 1 – The number of first instance professional judges consists of judges in 27 Regional courts within regional centres; 86 out of regional centres; 28 Administrative courts; 1 Specialized Criminal Court; 3 Military courts; and the number of first instance judges in District courts has been added to them;
P.2 – The number of second instance judges consists of judges in 27 District courts; Sofia City Court; 5 Courts of Appeal; 1 Military court of appeal and 1 Appealate Specialized Criminal Court. This number does not include the second instance judges who have served in first instance courts. P.3- The number of working judges in the Supreme Court of Cassation and Supreme Administrative Court at 31.12.2016

(2015): 1.The figure 1760 includes the number of judges, employed at the 1st instance courts ((113 regional courts (27 Regional courts in the district centers and 86 regional courts outside the district centers); 28 Administrative courts; 1 Specialized criminal court; 3 Military courts) including the number of the first instance judges` (524) working in the first instance court formations in the District courts as from 31.12.2015. The number of Military courts has been reduced after decision under protocol ? 44/13.12.2013 of the Supreme Judicial Council from 5 to 3.

2.The number of judges, employed at the 2nd instance courts as from 31.12.2015 and the Courts of Appeal is 277. This figure is a result from the addition of the judges in the 28 District courts; 6 Courts of appeal and 1 Specialized criminal court of appeal – 801 judges in total, where the number of the first instance judges in the District courts (524) have been deducted.

3.The number of judges, employed in the Supreme Court of Cassation and the Supreme Administrative courts as from 31.12.2015 is 188.

(2014): In 2014, the number 1753 shows the number of judges employed in the first instance courts (113 regional, 28 administrative and 3 military courts) and 550 first instance judges, working in the district courts. The number of military courts was reduced from 5 to 3. The number of second instance judges is 277 and does not encompass first instance judges, working in the first instance chambers of the district courts.

Croatia

(General Comment): In the total number of judges, only data on actually working judges is presented (the total does not include judges on unpaid leave; judges on maternity leave; judges suspended after the disciplinary procedure; judges transferred to other State bodies- for example to Ministry of Justice or Judicial Academy). Moreover, two judges working half-time (for the reason of care for a child with special needs) are counted as 1 judge. Data refer to all judges: presidents of courts, judges authorised to perform judicial administration and judges.

(2018): Source: Ministry of Justice of the Republic of Croatia
The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

(2017): The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

(2016): Source: Ministry of Justice of the Republic of Croatia
The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

(2015): The Republic of Croatia submits now correct numbers of professional judges sitting in courts for previous cycles (2013 and 2014), because in the previous cycles this number did not include court presidents, while there were excluded in the separate questions. Therefore, the correct numbers for these cycles is now provided.

(2014): In 2014, the number of professional judges in first instance courts includes judges of municipal, commercial, administrative and misdemeanour courts. The number of judges in second instance courts includes judges of county courts, the High Commercial Court, the High Misdemeanour Court and the High Administrative Court. The number of 3rd instance judges refers to the Supreme Court. Four first instance administrative courts became operational in 2012, while the Administrative Court of the Republic of Croatia became the High Administrative Court.

Cyprus

(General Comment): Cyprus has a two tier system. The Supreme Court is the second and final instance court. All judges of the Supreme Court hear appeals.

(2020): Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.

(2015): From 2014, following the retirement of male judges at last instance, female judges were appointed.

Czech Republic

(General Comment): The Czech Republic has a four-tier system. The number of judges of the two High Courts is included in the number of second instance judges. This methodology of presentation of data is applied since 2013, while for the previous evaluations, magistrates of the High Courts were considered as third instance judges.

(2016): The Czech Republic has a four-tier system. The number of judges of the two High Courts is included in the number of second instance judges.

Denmark

(2017): The figures above show the numbers of appointed judges in the Danish judicial system. Thus, the figures also include the Court of Greenland, the High Court of Greenland and the court of the Faroe Islands.

Estonia

(2014): In 2014, one male judge left and a female judge was appointed.

(2012): In 2010, there were 3 female professional judges at the Supreme Court. At the beginning of 2012, one female judge became the judge representing Estonia in the European Human Rights Court.

France

(2021): Data taken from an extraction of the LOLFI SIRH - Number of professional judges on 31/12/2021. The values are expressed in FTEs. Source DSJ
Administrative justice data: 1. total number of professional judges at first instance: 899(463 men, 436 women); 2) Number of professional judges in the courts of appeal (2nd instance): 304 (163 men, 141 women); 3. number of professional judges in the Supreme courts: 128 (81 men, 47 women). 1+2+3. Total number of professional judges: total 1331 (707 men, 624 women). The figures are expressed in physical numbers as at 31/12/2021. The members of the National Court of Asylum (CNDA) and the Paid Parking Litigation Commission (Commission du contentieux du stationnement payant) are counted under the first instance.
Source: Council of State
The gender distribution is based on the number available in FTE for all professional judges except for administrative judges for whom the distribution is available in FTE only for the total.

(2020): "Here are the details:
With respect to the judiciary. The data are expressed in full-time equivalent. These figures concern only judges (and not paralegals) who sit in court (magistrates seconded to the central administration are not counted). In the table above, the figures have been rounded up when the decimal is greater than or equal to 0.5:
Total number of professional judges: total 6177.9; men 1725.5; women 4452.4
1. Number of first instance professional judges: total 4378.6; men 1133.7; women 3244.9
2. Number of second instance professional judges : total 1577.8; men 503.8; women 1074
3. Number of Supreme Court professional judges : total 221.5; men 88; women 133.5
Source: LSB
For the administrative order, the data include the National Court of Asylum (CNDA) and the Commission du contentieux du stationnement payant (CCSP). In FTE, only the total is available. The detail in physical staff is as follows:
Total number of professional judges: total 1357; men 727; women 630
1. Number of first instance professional judges : total 920; men 487; women 433
2. Number of second instance professional judges : total 306; men 156; women 150
3. Number of Suprem Court professional judges : total 131; men 84; women 47
Source: EC
"

(2019): Data are presented in full time equivalent, part-time employees being counted, which explains the possible horizontal and vertical inconsistencies in the table. For information: number of judges from civil society (first instance):
Total: 19,002 (489 temporary judges (MTT) + 13,277 labor judges (conseillers prud'hommes ((CPH) + 1,832 Assessors of the Social Centres (APS) + 3,404 Consular Judges of the Commercial Courts (JC) Men: 11,249 (243 MTT + 6,902 CPH + 1,294 APS + 2,810 JC); Women: 7,753 (246 MTT + 6375 CPH + 538 APS + 594 JC). Source: LOLFI. Number of judges on duty in the courts.
The data do not encompass "public prosecutors and their staff". All judges in courts are counted, including presidents of courts, as the latter perform judges' duties.

(2018): With regard to administrative justice, in 2018, it should be noted that the number of judges sitting in specialised courts increased due to the very sharp increase in the number of appeals to the National Court of Asylum (CNDA) and the creation of the Commission du contentieux du stationnement payant (CCSP).
In the area of judicial justice, the increase is due to the filling of vacancies in the courts and the decrease in the number of departures of judges.

(2014): The 2014 data on number of judges of courts of law subsumes also the presidents appointed by 31 December 2014.

(2013): In 2013, in first instance, there are 161 presidents of ordinary courts of law and 42 presidents of administrative courts. In second instance, there are 37 first presidents of courts of law and 8 presidents of administrative courts. They are encompassed in the indicated figures. However, presidents of administrative courts of appeal are not included (being members of the State Council, they are included within the number of Supreme court judges).

(2012): The 2012 data is expressed in FTE, for positions actually filled on 31 December 2012 within courts of law and administrative courts. For the latter, data in FTE concerning the distribution between men and women is not available. Out of the 1377 first instance and appeal judges, there are 816 men and 561 women. Data on men-women distribution for the State Council is not available in FTE: there were 105 men and 47 women. For courts of law, there were in FTE: total: 5771 FTE (2066 men/3705 women); first instance professional judges (1326 men/2804 women); appeal court professional judges (622 men/795 women); Supreme court professional judges (118 men/106 women).The State Council used different calculation methods for 2010 and 2012.

Germany

(General Comment): 1. There is a "court-staff statistic" ("Personalbestand") of the Länder that reports the number of judges in full-time equivalent as of 31 December of the reference year. This statistic also shows the number of female judges but it is not possible to allocate the judges to the different instances/stages of appeal. This statistic does not include the judges at the Federal Courts ("Supreme Courts").
2. The "staff-assignment statistics" ("Personalverwendung") of the Länder basically reports the average number of personnel actually deployed during the reference year (full-time equivalent). For example, employees who were not present for more than 20 working days during a quarter for reasons other than holiday and/or training are excluded. The staff- assignment statistic offers the possibility to allocate the judges to the different instances but it does not show the number of female judges. It does not include the Federal judges either.
3. The "judiciary-staff statistic" ("Richterstatistik") combines the number of the judges of the Länder from statistic No 1 (court staff statistic) with the number of judges at the Federal Courts (full-time equivalent as of 31 December 2020). This statistic is not published every year but every two years. It differentiates between the judges of the Länder and the judges of the Federal Courts (highest instance) and includes the number of female judges.
Regarding Q46 the figures under "1. Number of first instance professional judges" and "2. Number of second instance (court of appeal) professional judges" were taken from statistic No 2 (staff-assignment) because statistic No 1 does not offer the possibility to allocate personnel to the different instances. The figures under "3. Number of Supreme Court professional judges" were taken from statistic No 3 because the Federal judges only appear in that statistic. "Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a ‘Pact for the Rule of Law’. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
These numbers will not be reflected directly in the answers to Q 46, because the figures represent the average value of the actual personnel deployed during the reference year (in full-time equivalents).
It should also be noted that one of goals of the ‘Pact for the Rule of Law’ is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

(2021): 1. and 2.: Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistics do not distinguish between male and female jugdes. The "regular" court-staff statistics of the Länder distinguish between "total" and "female" but do not allow for a diffentiation between the instances. According to the regular court-staff statistics as of 31 December 2021 there were 22 006 judges in total, 10 626 female and 11 380 male (full-time equivalents).
3: Figures represent the number of judges at the Federal Courts in full time equivalents as of 31 December 2020. The number of judges at the Federal Courts is published every second year (see General Comment).

(2020): 46.1 and 46.2: Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistics do not distinguish between male and female jugdes. The "regular" court-staff statistics of the Länder distinguish between "total" and "female" but do not allow for a diffentiation between the instances. According to the regular court-staff statistics as of 31 December 2020 there were 21.944 judges in total, 10.418 female and 11.526 male (full-time equivalents)
46.3: Figures represent the number of judges at the Federal Courts in full time equivalents as of 31 December 2020.
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a ‘Pact for the Rule of Law’. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
These numbers will not be reflected directly in the data given above, because the figures represent the average value of the actual personnel deployed during the reference year (in full-time equivalents).
It should also be noted that one of goals of the ‘Pact for the Rule of Law’ is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

(2019): The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2018).

(2018): The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2018).

(2017): Comment - Please provide any useful comment for interpreting the data above: The information provided counts the number of full-time equivalent staff. There are no absolute figures for the number of persons making up this staff. A judge working full hours is counted as a full-time equivalent (i.e. 1). A judge working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a judge working half the usual number of hours). Re 1 and 2: Information based on staffing overviews. These data are ascertained according to a complex calculation mechanism as an annual average of the actual personnel deployed (for example: minus the number of staff absent for more than 20 working days in a single quarter for reasons other
than vacation and/or further-training). Re 3: The number of supreme court professional judges is based on judicial statistics. These data
are collected and collated every two years (last updated 31/12/2016).

(2016): The information provided counts the number of full-time equivalent staff. There are no absolute figures for the number of persons making up this staff. A judge working full hours is counted as a full-time equivalent (i.e. 1). A judge working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a judge working half the usual number of hours). Re 1 and 2: Information based on staffing overviews. These data are ascertained according to a complex calculation mechanism as an annual average of the actual personnel deployed (for example: minus the number of staff absent for more than 20 working days in a single quarter for reasons other than vacation and/or further-training). Re 3: The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2016).

(2015): The data refer to the year 2014. At present, no more recent data are available.

Sources: Federal Office of Justice (Bundesamt für Justiz), Schöffenstatistik (statistical information on lay judges) as per 31 December 2014 as well as information provided by the Federal Länder

Greece

(2021): The answer came after the cooperation of the Directorate for the organization and operation of Justice with Juststat. The increase in the number of Supreme Court professional judges is explained by the fact that, the judges of the Court of auditors, who are all supreme, had not been previously counted, but now they are included.

(2020): Gender statistics are not kept. -Number of first instance professional judges :593 first-instance administrative judges,1167 first instance judges,916 judges of local courts and District Criminal Courts.
- Number of second instance (court of appeal) professional judges:336 second-instance administrative judges,598 second instance judges
- Number of Supreme Court professional judges:170 administrative judges of Council of State,5 of the General Committee of the Ordinary and Administrative Courts,76 judges of Areios Pagos(Supreme Court),
The methodology of replying changed. Differences in numbers with previous years cannot be explained as we don’t have enough information about previous data.

(2018): There is not a specific reason for the discrepancy of point 3. The number 243 is a result of the subtraction of points 1 and 2 from the total number of professional judges (1+2+3), just as last year.

(2016): Previous data concerning the number of second instance judges did not, inadvertently, include all the ranks for penal, political and administrative justice. Accordingly, this year the number is higher and explains also the variation in the total.
It should be mentioned that the number of judges at the courts of Peace, which on 31/12/2016 was 880, is not taken into consideration since they have a separate procedure entering the judiciary and they are a separate category within it.

(2014): The decrease in the number of second instance judges between 2013 and 2014 is due to the fact that administrative judges are not counted in this category for 2014.

(2013): In 2013, justices of peace are included, while Court of Auditors’ judges are not considered in the total.

(2012): For 2012, the total number subsumes judicial officials of the civil-penal and administrative courts. It should be noticed that 688 magistrates were not included, as well as Court of Auditors’ judges.

Hungary

(General Comment): Since 2012 and the establishment of the National Office for the Judiciary, the data collection methodology is the same. Accordingly, the number of first instance professional judges includes judges of the District Courts. As second instance judges are counted judges of the Regional Courts and the Regional Courts of Appeal. As concerning the Regional Courts, the distribution of first and second instance cases is based on the internal regulations which are renewed every year by the president of each court after consultation with the judicial council and the professional departments of the court. The number of Supreme Court judges is indicated in item 46.3.

(2019): There are additional 54 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration) and to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.

(2018): There are additional 48 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration) and to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.

(2017): There are additional 34 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration), and 4 judges assigned to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases during their assignment.

(2016): There are additional 35 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration), and 9 judges assigned to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.

(2014): In 2014, 26 judges were assigned to the National Office for the Judiciary and 7 judges were assigned to the Ministry of Justice. These judges do not hear cases when carrying out their specific missions within the NOJ and the Ministry of Justice.

(2013): The number of Supreme Court female judges decreased between 2010 and 2012, while the number of Supreme Court male judges increased between 2012 and 2013. There is no specific reason in this respect, as the vacant positions are filled through an open application process, where the gender of the applicants is not taken into consideration in any way.

(2012): The number of Supreme Court female judges decreased between 2010 and 2012, while the number of Supreme Court male judges increased between 2012 and 2013. There is no specific reason in this respect, as the vacant positions are filled through an open application process, where the gender of the applicants is not taken into consideration in any way.

Ireland

(2021): Figures as of 31/12/2021.
At that time there were 6 vacancies in total.
First Instance Courts – District Court, Circuit Court, High Court = total 3
Second Instance Court – Court of Appeal = total 1
Highest Instance Court – Supreme Court = total 1

(2020): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the circuit court and ordinary judges of the High Court - including Court Presidents.
An amendment was made in 2019 to the number of judges in the court of appeal due to workload of the court.

(2019): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents.
An amendment was made to the number of judges in the court of appeal due to workload of the court.

(2018): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents.

(2017): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents. As at 31 December 2017 there were three serving female Supreme Court judges.

(2016): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents. As regards the number of Supreme Court judges, the figures reflect a reduction in the actual number of judges compared to the number reported in the previous reporting cycle.

(2015): The discrepancy between the total figures and the figures for gender is explained by vacancies in the judiciary's establishment, as follows: Supreme Court: 1; High Court: 1; Circuit Court: 2.

First instance judges are judges of the High Court, Circuit Court and District Court. The High Court and Circuit Court also exercise appellate jurisdiction.

Numbers above include Court Presidents.

(2014): In 2014, data on 2nd instance judges is available, since the new Court of Appeal was established only in 2014.

Italy

(General Comment): Apart from Administrative Justice, other specialized first instance courts that are not administered and financed by the Ministry of Justice (i.e. regional audit commissions, local tax commissions and military courts) are not taken into consideration at question 46.

(2018): Since 2018, the figures have also included judges belonging to Administrative Justice. The above figures include 6634 ordinary judges and 381 administrative judges.

(2017): An upward trend in respect of the number of female judges in the Supreme Court: in Italy, the High Council of the Judiciary is competent for the transfers of judges from one office to another. This transfer procedure generally takes place once or twice a year. The number of open positions for each court is proportional to the percentage of vacancies in that particular court. During the last few years, there were occasions where the positions made available at the court of cassation were a bit higher than number one would have expected according to the percentage of vacancies. Hence, more judges applied for the vacancies at the court of cassation compared to other courts. To date the vacancies at the court of cassation are about 4% of the total number of positions. As a matter of fact the penetration of female judges shows a positive trend. In first and second instance courts the penetration is already over 50%. At court of cassation level there is much room for improvement.

(2015): The overall reduction of judges between 2014 and 2015 is partly due to the effect of the recent labor reform that lowered the mandatory retirement age for judges from 75 to 70.

(2013): In the last few competitive exams held in Italy, the percentage of female candidates was higher than this of male candidates. Accordingly, a positive variation can be observed in respect of the number of female judges between 2010 and 2013.

Latvia

(2017): The changes in the number of judges at the Supreme Court are the outcome of the court reform developing pure three instance level court system. Until 2014 there were both appellate and cassation courts within the Supreme Court. Until end of 2014 and 2016 respectively there were additional appellate chambers dealing with criminal and civil cases. Since beginning of 2017 the number of judges at Supreme Court (cassation instance) is stable – 36.

(2014): The number of male judges in the Supreme Court decreased per 5 judges between 2012 and 2014 due to various reasons: three male judges retired; two male judges returned to regional courts (because they worked in the Supreme Court temporarily); one male judge passed away in 2014; one new male judge came to work in the Department of Civil Cases of the Supreme Court.

Lithuania

(General Comment): The methodology of presentation of data reflects the peculiarities of the Lithuanian court system. Namely, as the regional courts function not only as courts of appeal, but also as courts of first instance (Article 19 of the Law on Courts of the Republic of Lithuania), the number of judges of these courts is included in the 1st section. Accordingly, the latter indicates the number of judges of district courts, regional courts and regional administrative courts. Likewise, given that the Supreme Administrative Court is the court of appeal (although the rulings of the Supreme Administrative Court of Lithuania are final and not subject to appeal) the number of judges of this court is encompassed in the 2nd section. The latter indicates the number of judges of the Court of Appeal of Lithuania and the Supreme Administrative Court of Lithuania. The 3rd section indicates the number of judges of the Supreme Court of Lithuania.

(2017): Please see general comments.

Luxembourg

(General Comment): Section 1: The number of first instance professional judges includes judges of the district courts, judges of the justices of the peace and judges of the administrative tribunal.
section 2: The number of second instance professional judges includes judges of the Court of appeal of the Superior court of justice and judges of the Administrative court.
Section 3: The number of professional judges at the Supreme court level includes only judges of the Court of cassation.

(2018): The staff of the judicial and administrative courts has grown steadily in the recent years, as established by the amended law of 7 March 1980 on judicial organization. This explains the significant variations observed between 2016 and 2018 in the judiciary and non-judge staff. According to the judicial organisation of Luxembourg, there is a Superior Court of Justice, composed of the Court of Cassation and the Court of Appeal. The judges of the Superior Court of Justice belong to both the Court of Cassation and the Court of Appeal. If, legally speaking, these are separate positions, in practice the five judges of the Superior Court of Justice occupy two positions and they are therefore counted among the judges of the Court of Appeal as well as at the level of the Superior Court of Justice .
The figures differ from those indicated in the last data collection campaigns on two points. 1) concerning the number of judges at the highest level: starting with 2016, we have distinguished between the judges sitting at the court of appeal and those of the Cour de cassation, which is the highest court in Luxembourg. Until 2016, and as the two courts taken together form the Cour supérieure de Justice (which as such has some very specific competences), we indicated only the total of the judges affected to the Cour supérieure. It might be useful for statistical purposes to distinguish between the two levels. 2) concerning the number of judges at the first level: the figures indicated until 2016 were superior to the real figures, as, erroneously, the prosecutors (which by law are also magistrates affected to these courts) had been included. We corrected this error in 2016.
There has been a major modification in june 2017, by the law of 27th of June 2017 adopting a multiannual program of recruitment into the judiciary and amending the amended law of 7th of March 1980 on judicial organisation, programming the future changes in the staff at the different entities. This law provides for a multiannual program of recruitment of judges and prosecutors during the years 2017-2020. It entered into force in july 2017.

(2017): The Act of 27 June 2017 introducing a multiannual programme for recruitment to the judiciary and amending the amended Act of 7 March 1980 on the organisation of the judiciary, defines the number of posts in the various instances.
The indicated data correspond to the number of permanent positions actually held in 2017.

(2016): The figures differ from those indicated in the last data collection campaigns on two points.
1) concerning the number of judges at the highest level: starting with 2016, we have distinguished between the judges sitting at the court of appeal and those of the Cour de cassation, which is the highest court in Luxembourg. Until 2016, and as the two courts taken together form the Cour supérieure de Justice (which as such has some very specific competences), we indicated only the total of the judges affected to the Cour supérieure. It might be useful for statistical purposes to distinguish between the two levels.
2) concerning the number of judges at the first level: the figures indicated until 2016 were superior to the real figures, as, erroneously, the prosecutors (which by law are also magistrates affected to these courts) had been included. This error has now been corrected.

(2015): In 2014, the judges of the Administrative Court were included in the number of judges in the Supreme Court but in 2015 these judges were accounted as second instance judges.

(2014): In 2014, the judges of the Administrative Court were included in the number of judges in the Supreme Court but in 2015 these judges were accounted as second instance judges.

(2013): To the total number of judges, should be added 4 trainees ("attachés de justice"). The increase in the number of female judges at all instances between 2010 and 2013 is explained by the special attraction for a profession that allows to combine work and family life. Judges of second instance and those of the Court of Cassation are all part of the Superior Court of Justice.

(2012): The total number of professional judges does not correspond to the sum of the number of judges before each instance because some judges have jurisdiction in two courts (e.g. the Constitutional Court is composed of judges of the Court of Cassation and the Administrative Court).

Malta

(General Comment): In Malta there is no Supreme Court, the Court of Appeal being the Court of second instance. The Constitutional Court, then, is presided over by the 3 judges who compose the Court of second instance also known as the Court of Appeal in its Superior Jurisdiction. It is interesting to notice that 2 judges presiding over the Second Instance Courts also preside over the Civil Court, First Hall and the Family Court (which are specialised 1st instance courts).
The number of 1st Instance 'judges' also includes magistrates that preside over 1st Instance Courts.

(2021): During 2021, 4 new magistrates and 2 new judges were appointed to the bench, thereby increasing the judicial complement by the same number. 2 judges were also appointed to the bench, but given that they were previously magistrates, their appointment did not increase the judicial complement.

(2019): For Number of first instance professional judges, the difference in nominal figures is of 4 male magistrates compared to previous cycle. This is mainly due to retirement and the appointment of 2 male magistrates to judges. 3 new magistrates have been appointed in 2019, only 1 of which is male.
For the Number of second instance professional judges, Madame Justice Lorraine Schembri Orland has been appointed Judge elect in respect of Malta on the European Court of Human Rights. Given that she did not serve in Malta at the end of 2019, she does not feature in the above data.

(2017): Despite the categorical manner in which the Maltese judiciary have been classified for the purpose of this exercise, it is important to note that the roles of some of the judges are very fluid. Hence, some of the 1st Instance judges preside, when the need arises, over 2nd Instance courts, whilst 2nd Instance judges hear cases at 1st Instance such as at the Civil Court, First Hall or the Civil Court, Family Section.
Throughout 2017, 1 male 1st Instance Judge passed away at the beginning of the year, whilst another 2nd Instance Judge retired towards the end of the year. 1 female Magistrate has been appointed. Care is being taken in order to ensure an equal gender representation in the appointments of the judiciary.

(2016): Despite the categorical manner in which the Maltese judiciary have been classified for the purpose of this exercise, it is important to note that the roles of some of the judges are very fluid. Hence, some of the 1st Instance judges sit, when the need arises, in 2nd Instance courts, whilst 2nd Instance judges hear cases at 1st Instance such as at the Civil Court, First Hall or the Civil Court, Family Section.
There has been an increase of 3 female judges at 1st instance since 2014. There was an increase from 15 to 17 female judges at 1st instance in 2015 and a further increase of 1 female judge at 1st instance in 2016. Care is being taken in order to ensure an equal gender representation in the appointments of the judiciary.

(2015): Regarding the number of judges, the high percentage variations that might be observed results from the small absolute number of judges that Malta has. Malta has been trying, and there are still on-going efforts, at increasing the number of judges. If between 2010 and 2015 the number of male judges decreased (by 1), this was complemented by an increase in the number of female judges (also by 1).

Netherlands

(General Comment): Since 2020, new methodology of presentation of data is used, allowing distinguishing between first and second instance for the specific group of judges who were previously all counted as first instance judges ('overig RA'). For all cycles, court presidents are taken into consideration in the figures

(2021): Numbers are on posts filled, not fte. Total fte is 2416.
Total fte for first and second instance was given in 2021, but information on fte was NA for the rest of the categories and the detail required cannot be provided.
For the Supreme court, fte and posts filled are the same.

(2020): These numbers are on posts filled, not fte. The total fte for first and second instance together is 2372, but information on fte is NA for the rest of the categories and detail required for this question. These numbers include court presidents.
In the previous cycles, due to an inability to differentiate between first or second instance for a certain group of judges, they were counted as first instance judges. This inflated the first instance numbers and underreported the second instance numbers. This problem was present in the data up until the 2019 survey. For the 2020 data, this problem has been solved, and the data is now correct.

(2018): We did not receive information on the number of judges (in fte) working at the High Court. There are 33 judges at the High Court (people, not fte), 20 male / 13 female. Since this concerns only 1% of all judges, we'd suggest to work with these numbers (and accept the small deviation in the calulated total number)

(2017): these are number of people (posts); the total number of fte is 2315, this can not be separated for 1st and 2nd instances
NB: data on the number of Supreme Court judges is provided in fte. More precisely, according to the annual report of the Council of State https://jaarverslag.raadvanstate.nl/2017/ the number was 37.9 fte in 2017.

(2016): All data in number of persons. FTE data are only available for the total: 2148.
Supreme Court NA

(2015): Number of deputy judges courts in 2015 = 1.100
The numbers provided in the table are posts. The FTE is avaialble only for the total and it is 2.169. Other categories are NA.

(2014): In 2014, the number of first instance judges does not include judges of the Trade and Industry Tribunal, the Supreme Court and the Council of State. The number of second instance judges includes magistrates of the Trade and Industry Appeals Tribunal and the Administrative High Court, excluding these of the Supreme Court and the Council of State.

(2013): In 2013, the total in fte is 2 181. This was excluding the Supreme Court. The number of first instance judges excludes judges of the Trade and Industry Appeals Tribunal, the Supreme Court and the Council of State. The number of second instance judges includes magistrates of the Trade and Industry Appeals Tribunal and the Administrative High Court, excluding these of the Supreme Court and the Council of State.

(2012): In 2012, the total in fte is 2 194, excluding the Supreme Court. The number of first instance judges excludes judges of the Trade and Industry Appeals Tribunal, the Supreme Court and the Council of State. The number of second instance judges includes magistrates of the Trade and Industry Appeals Tribunal and the Administrative High Court, excluding these of the Supreme Court and the Council of State.

Poland

(General Comment): The Polish court structure is characterized by four levels of courts but only three instances. Basically, there are district courts which are first instance courts, regional courts which are first and second instance courts, and appellate courts which are second instance courts. The highest instance courts are the Supreme Court, the Supreme Administrative Court and the Constitutional Tribunal. Owing to this peculiarity, some judges sit as first and second instance magistrates. According to the methodology of presentation of data that has been chosen, judges of regional courts are counted as first instance judges together with judges of district courts and judges of first instance administrative courts. Only judges of appellate courts are considered as second instance magistrates. The Supreme Court operates under the Constitution of the Republic of Poland and the Supreme Court Act. It is established to:
- exercise supervision over the activities of common and military courts in the area of adjudication - this is the so-called judicial supervision (Article 183(1) of the Constitution). The means used to exercise such supervision include:
- recognition of extraordinary complaints, cassations and other appeals (instance supervision),
passing resolutions resolving legal issues (extra-institutional supervision) Resolutions of the entire chamber or a larger body of judges have the force of law and are binding on all Supreme Court formations. A panel of 7 judges may decide to give the resolution the force of legal principle.
Competence of the Constitutional Tribunal
The Constitution of 2 April 1997 includes four areas within the jurisdiction of the Constitutional Tribunal:
1) control of norms (abstract and concrete; a posteriori and a priori - Art. 188 items 1-3, Art. 122 items 3 and 4, Art. 133 item 2 of the Constitution); a special procedure for the control of norms is the consideration of constitutional complaints (Art. 79 and Art. 188 item 5 of the Constitution)
2) adjudication of competence disputes between central constitutional organs of the state (Article 189 of the Constitution);
3) adjudicating on the compatibility with the Constitution of the objectives or activities of political parties (Article 188, item 4 of the Constitution)
4) recognising the temporary inability of the President of the Republic to discharge his office (Article 131, paragraph 1 of the Constitution).
Of the four areas of the jurisdiction of the Tribunal indicated above, the control of norms is undoubtedly a fundamental task.

(2021): Common courts:
The number of judges of district courts: 6046 (3938 women, 2108 men)
The number of judges of regional courts : 2684 (1550 women, 1134 men)
The number of judges of the appeal courts: 459 (239 women, 220 men)
The numbers are higher because the president appointed a lot of court assessors as judges in 2021. In addition, there were more appointments to the regional and appeal courts than retirements of judges from these courts.
The Supreme Court : 93 (73 men, 20 women)
The Administrative Supreme Court: 102 (62 men, 40 women);
Administrative courts first instance: 431 (192 men, 239 women);

(2020): The number of judges of district courts: 6036 (3922 women, 2114 men)
The number of judges of regional courts : 2544 (1462 women, 1082 men)
The number of judges of the appeal courts: 417 (220 women, 197 men)
The number of judges of the first instance administrative courts : 454 (260 women, 194 men)
Supreme courts:
The number of judges of the Supreme Administrative court: 102 (62 women, 40 men)
The number of judges of the supreme court: 97 (75 women, 22 men)
Military courts:
The number of judges of district military courts: 18 (1 woman, 17 men)
The number of garrison judges: 27 (5 women, 22 men).
*Starting from 2020 the number of Supreme court judges include also judges of the Supreme Administrative Court

(2019): Compared to the previous edition, the number of judges of the supreme court was also given.
The number of Supreme court is 99: 25 (civil chamber), 27 (criminal chamber) 14 (labour law and social security chamber), 20 (extraordinary control and public affairs chamber), 13 (disciplinary chamber).
Females: 21 (total)
11(civil chamber)
3 (criminal chamber)
3 (labour law and social security chamber)
3 (extraordinary control and public affairs chamber)
1 (disciplinary chamber)
Males: 78 (total)
14 (civil chamber)
24 (criminal chamber)
11 (labour law and social security chamber)
17 (extraordinary control and public affairs chamber)
12 (disciplinary chamber)

Portugal

(General Comment): The total includes judges from courts of 1st, 2nd and 3rd instances, except the Constitutional Court.

(2020): 3. We are dealing with small numbers, therefore the dicrepancy ratio is big. In addition, with time female judges, that are the majority of judges, are getting to the top of their professional career.

(2019): In absolute terms the increase is only 5 persons. The numbers are small, therefore in relative terms it appears to be relevant.

(2018): The number of Supreme Court Judges has been decreasing since 2015. In absolute terms the decrease from 2016 to 2018 is from 82 to 71 judges, which is not significative in absolute terms, but acquires a more relevant expression in relative terms.

(2017): As concerns the increase in the number of female Supreme Court judges: the numbers are small, therefore the variation seems important.

(2014): The increase in the number of Supreme Court female professional judges is due to the general tendency of increase of female judges in the last decade at first instance courts.

Romania

(General Comment): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). Only judges of the first instance court „judecatorii" are counted as first instance judges. In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

(2020): Only judges of the „judecatorii" are counted as first instance judges.

(2019): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

(2018): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

(2017): The number of professional judges sitting in second instance courts (point 2) includes both the number of judges within the courts of appeal and the number of judges within the tribunals.

(2016): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In the table above the judges from tribunals are included in the category "second instance professional judges".

(2014): For 2014, judges mentioned at 46.1 are judges within first instance courts, while judges mentioned at 46.2 are judges within tribunals and courts of appeal.

(2013): Judges mentioned at 46.1 are judges within first instance courts and tribunals, while judges mentioned at 46.2 are judges within courts of appeal. In 2012 and 2013, the Superior Council of Magistracy brought important changes to the Regulation for the promotion of judges to the High Court of Cassation and Justice and 19 judges were promoted.

(2012): At 46.1 are mentioned judges within courts of first instance, while at 46.2 are mentioned judges within tribunals and courts of appeal.

Slovak Republic

(2021): Number of Supreme Administrative Court professional judges are included in the Q. 46 line 3. (8 males, 13 females; total 21).

(2019): The Number of Supreme Court professional judges is 77 for the full time judges. There are 7 temporarily assigned judges as well (2 women and 5 men).

(2018): The provided total corresponds to the number of judges actually performing their functions. Put differently, judges who are temporary assigned to other institutions (Ministry of Justice, Judicial Academy, other judicial institutions including international courts), judges granted maternity leave etc. are not considered in the provided figures. Total number including judges temporary not performing their functions is 1427 (521 men, 906 women).

(2017): The increase in the total number of judges is caused by filling the previously designed vacant posts of judges.

(2015): The decrease in the number of judges in comparison with the previous cycle has been caused by the retirement of the judges whose posts have not been filled yet. The selection procedures for the vacant posts are under way.

(2014): In 2014, the total number of judges in the records of the Ministry of justice was 1366 (503 males, 863 females), including judges temporary assigned to other institutions, judges granted maternity leave etc.

(2013): In 2013, the total number of judges in the records of the Ministry of justice was 1385 (511 males, 874 females), including judges temporary assigned to other institutions, judges granted maternity leave etc.

(2012): In 2012, the total number of judges in the records of the Ministry of justice was 1344 (497 males, 847 females), including judges temporary assigned to other institutions, judges granted maternity leave etc.

Slovenia

(General Comment): The provided total number of judges corresponds to the number of de facto occupied judicial posts performing their functions. Some judges are assigned to other duties (eg. to the Judicial council, Ministry of Justice, Supreme court) and are not included in the reported numbers. The information on actual presence (excluding the maternity or sick leave, but including the annual leave) is also available. Higher judges at first instance courts (local, district, labour and social and the Administrative Court) are reported by their court - as second instance judges.

(2021): At the end of 2021, 880 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 860 professional judges sit in courts (perform judicial function), since the rest of the judges (20 judges - difference to the total of 880 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The data on actual presence of judges in courts is also collected; the number of judges in the Slovenian judicial system in 2021 was 802,84 according to actual presence calculations.
Until 2021, approx. 30 judges at the Administrative Court (first instance court, see Q44) and approx. 50 higher judges at local and district courts (first instance courts) were reported as second-instance judges (accoriding to their rank: higher judge); from 2022 they are reported according to their court (first-instance judges).

(2020): At the end of 2020, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 875 professional judges sit in courts (perform judicial function), since the rest of the judges (15 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave).
The number of judges in the Slovenian judicial system in 2020 was 805,5 according to actual presence calculations.

(2019): At the end of 2019, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave).
Nevertheless, we report that 873 professional judges sit in courts (perform judicial function), since the rest of the judges (17 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.
The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave). The number of judges in the Slovenian judicial system in 2019 was 797 according to actual presence calculations.

(2018): At the end of 2018, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 867 professional judges sit in courts (perform judicial function), since the rest of the judges (23 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave).
The number of judges in the Slovenian judicial system in 2018 was 796 according to actual presence calculations.

(2017): At the end of 2017, 889 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 869 professional judges sit in courts (perform judicial function), since the rest of the judges (20 judges - difference to the total of 889 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.
The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave)
The number of judges in the Slovenian judicial system in 2016 was 795,54 according to actual presence calculations.

(2016): At the end of 2016, 897 judicial posts were formally occupied (full-time equivalent method), although some post were de facto vacant (e.g. judge absent due to maternity leave). The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave). The number of judges in Slovenian judicial system in 2016 was 811,52 according to actual presence calculations.
Nevertheless, we report that 880 professional judges sit in courts (perform judicial function), since the rest of the judges (17 judges - difference to the total of 897 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.

(2015): At the end of 2015, 912 judicial posts were formally occupied (FTE), although some post were de facto vacant (e.g. judge absent due to maternity leave).
Nevertheless, 897 professional judges sit in courts (perform judicial function), since
some judges were assigned to other duties (at the Supreme Court; different projects ;appointed to the Judicial Council and appointed to the Ministry of Justice.

We reported the Administrative court as the first instance court (Q42 and Q91). However, the law requires for the Administrative court judge to be a higher judge (2nd instance judge), therefore the Administrative court judges are included as the 2nd instance professional judges

(2012): Starting with 2012, judges of administrative courts are included in the number of first instance judges.

Question 046-2

Belgium

(2020): The system does not allow part-time work for judges. Data by type of case are not known. Judges are appointed at the court level, and the head of the court assigns them to the different chambers of the court and allocates cases.

Bulgaria

(2021): The total number of first-instance judges is 1258. It includes 991 district (first instance) judges, for whom there is no available information regarding the specialization, 236 administrative, 10 other (military) and 21 - judges at first instance Specialized Criminal Court.
The total number of second-instance judges includes also 59 junior judges, adjudicating at regional courts (second instance), for whom information on specialization is not available. 5 other are military judges.
The total number of supreme judges includes the president of the Supreme Court of Cassation, for whom there is no available information regarding the specialization.

(2020): The column "others" in question 46-2 refers to the military judges - 12 regional/provincial and 5 appellate - a total of 17.
The total number of judges in the district courts is 959, and the same, with the exception of the Sofia District Court, are not divided by subject matter. Therefore, data related to the number of first instance judges dealing with civil / commercial and criminal cases are not available. Appendix: Summary information on the data as of 31.12.2020, received by all regional/provincial courts (first and second instance) regarding the number of judges in them, who work in the civil, commercial and criminal divisions. It should be borne in mind that, according to the information received, in almost all courts, a large number of judges sit in more than one division, therefore the summation of the number of judges from the three divisions should not give the total number of judges in the respective court. Total number of judges in the Court of Appeal (second instance) - 124, of which in the civil division - 36, in the commercial division - 38 and in the criminal division - 50.

Croatia

(General Comment): The difficulty to provide the data lays in mixed specialization of judges in courts, so exact data cannot be extracted.

Cyprus

(General Comment): Cyprus has a two-tier system; therefore, the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court is included in the second instance cases (questions 97 and 98).

(2021): All 13 Supreme court judges hear all cases. District court judges are dealing with criminal and civil cases, and they were previously included in the 'Other' cases. We have now limited this to judges of special jurisdiction courts.

(2020): This includes the supreme court judges who deal with all types of cases, first instance family court judges, labour court judges, rent control court judges and military court.
Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.

Czech Republic

(2021): Insolvency proceedings and Guardianship proceedings

(2020): Insolvency Proceedings

Denmark

(General Comment): We cannot answer this question by case type as all judges make decisions in all types of cases in Denmark.

Estonia

(2020): In the first instance we don't have judges formally seperated as criminal or civil judges.

Finland

(General Comment): We do not have statistic of the amount of the civil and/ or commercial and criminal judges in the general courts as in many courts judges work in both types of cases. In Market Court, there are 21 judges who are civil/commercial judges.

France

(2021): Non-specialised judges, who account for approximately 45% of the staff of the civil and criminal courts, are required to work in both criminal and civil matters. As a result, the distribution between the different types of litigation is not quantifiable, as these assignments fall within the organisational powers of the head of court.
Similarly, certain specialised judges (juvenile judges and liberty and custody judges) are also likely to intervene in both civil and criminal cases due to their areas of competence.
Source DSJ. Data have been rounded up from 0.5, down below. Source: Council of State for the administrative part (data have been rounded).

(2020): "The distinction by type of case is not possible in the justice of the judicial order.
Note: the distribution of the processing of civil and criminal cases within the tribunals and courts, which depends on the organization of the jurisdictions, does not allow us to fill in this table. For the administrative courts, the FTEs have been rounded up. The precise non-rounded data can be made available if necessary. "

Germany

(2021): "Other" includes: familiy cases (at the Local and Higher Regional Courts), cases at the Labour Courts, Social courts, Finance courts
"First instance" and "Second instance": Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training).
"Surpreme Court": the figures are taken from the court-staff statistics and represent the number (FTE) of judges at the Federal Courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Consitutional Court, Military Disciplinary Courts) as of 31. December 2020. The statistic is published every second year. It shows the number of judges (FTE) at the Federal Court of Justice (152) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 113 judges (headcount) assigned to the civil panels and 46 to the criminal panels.

(2020): "Other" includes: familiy cases (at the Local and Higher Regional Courts), cases at the Labour Courts, Social courts, Finance courts
"First instance" and "Second instance": Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training).
"Surpreme Court": the figures are taken from the court-staff statistics and represent the number (FTE) of judges at the Federal Courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Consitutional Court, Military Disciplinary Courts) as of 31. December 2020. The statistic shows the number of judges (FTE) at the Federal Court of Justice (152) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 114 judges (headcount) assigned to the civil panels and 47 to the criminal panels.
Slight horizontal and vertical inconsistencies are caused by rounding.

Greece

(2020): There are two categories of judges, those dealing with criminal and civil justice and administrative judges. There is no data on the separation of cases

Ireland

(2021): Judges can be assigned to both criminal and civil cases. Although in some jurisdictions, mainly the High Court and Circuit Court, Judges might specialise for a period (sometimes for a period of years) in criminal and civil matters. All Judges can administer all types of cases within their jurisdiction. Administrative cases are not a separate category in Ireland.

(2020): Judges deal with both criminal and civil and commercial proceedings. Number of Judges would be the same across all headings (except administrative as already explained) - Court Service

Latvia

(General Comment): The courts of first instance of general jurisdiction do not explicitly distinguish between the specialisation of judges on the basis of the main types of cases, therefore there is not possible to distinguish the data between civil and or commercial cases and criminal cases.

(2021): For Supreme Court - within the number of judges is not indicated number of President of the Supreme Court.

(2020): The courts of first instance of general jurisdiction do not explicitly distinguish between the specialisation of judges on the basis of the main types of cases, therefore there is not possible to distinguish the data between civil and or commercial cases and criminal cases.

Lithuania

(2020): the first instance indicates the number of judges of district courts, regional courts and regional administrative courts. Likewise, given that the Supreme Administrative Court is the court of appeal (although the rulings of the Supreme Administrative Court of Lithuania are final and not subject to appeal) the number of judges of this court is encompassed in the 2nd instance. The latter indicates the number of judges of the Court of Appeal of Lithuania and the Supreme Administrative Court of Lithuania.

Malta

(2021): Some judges in the Maltese judicial system preside over both civil and criminal courts. In this instance, such judges have been distributed evenly between the 2 courts.
Administrative cases at first instance are heard by the Administrative Review Tribunal, presided over by 3 magistrates. If appealed, such cases are heard by the Court of Appeal Inferior Jurisdiction presided over by a judge who hears and decides cases appealed from a number of first instance courts (not only the Administrative Review Tribunal). Given that these cases constitute only a fraction of the caseload of this judge, it would be misleading to indicate him as a 2nd Instance judge over appeals from administrative cases.

(2020): Some judges in the Maltese judicial system preside over both civil and criminal courts. In this instance, such judges have been distributed evenly between the 2 courts.
Administrative cases at first instance are heard by the Administrative Review Tribunal, presided over by 3 magistrates. If appealed, such cases are heard by the Court of Appeal Inferior Jurisdiction presided over by a judge who hears and decides cases appealed form a number of first instance courts (not only the Administrative Review Tribunal).

Netherlands

(General Comment): Judges often work more than one case type. There is a large overlap, but in the administrative system, only one sector can be registered. Therefore, making a distinction would not be a fair reflection of the true situation and the information is not easily available. This comment does not generally apply to the High Court.

(2021): Numbers are on posts filled, not fte. FTE for first and second instance is 2416.
For SC fte and posts filled are the same. Note that the 11 judges under the category ‘Administrative’ (Supreme Court) refer to the judges in the tax chamber of the Dutch Supreme Court. With regard to administrative law, the Dutch Supreme Court only handles tax cases and some social security cases. There is no third instance court for other administrative cases in The Netherlands.

(2020): Judges often work with more than one case type. There is a large overlap, but in the administrative system, only one sector can be registered. Therefore, while this information is not easily available, making this distinction would also not be a fair reflection of the true situation.
These are positions filled, not fte (like Q46).

Poland

(General Comment): It is noteworthy recalling that the Supreme Administrative Court is also the court of second instance.

(2020): 1. Supreme Court - the 13 judges of the Supreme Court Chamber of Labour Law and Social Insurance appear in the column “other” together with the 18 judges of the Extraordinary Review and Public Affairs Chamber and the 13 judges of the Disciplinary Chamber.

Portugal

(2021): As there are judges who have civil and criminal competences at the same time, it is not possible to distinguish judges by civil and comercial matters. Therefore, the judges of the judicial courts were all included in the column “other”.

(2020): As there are judges who have civil and criminal competences at the same time, it is not possible to distinguish judges by civil and comercial matters. Therefore, the judges of the judicial courts were all included in the column “other”.

Romania

(General Comment): The statistical system does not collect information regarding a breakdown in the number of judges based on the different legal matters.

(2020): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Slovak Republic

(2021): The Supreme Administrative Court had 21 administrative judges in 2021, included in Second instance.

Slovenia

(General Comment): In 2021, the data on judges classified by legal fields was collected for the first time (by approximating the time an individual judge is working on a certain type of case). Since the methodology of reporting is yet to be revised and elaborated, we can only report approximate numbers. The distinction to Civil and/or Commercial/Criminal/Administrative/Other judges is roughly the same as for the number of cases (see comments to Q91, 93 and 94). The category "Other" includes judges involved in the court management. Judges involved in court management are partially or entirely relieved from adjudicating cases.
The data is reported as actual presence (not FTE).

(2021): The data is only approximate - please see general comment. The data is reported as actual presence (not FTE) and therefore not compatible with Q46.

(2020): There is no data for 2020. In 2021, the data on judges by legal fields was collected for the first time (by approximating the time and workload an individual judge is working on a certain type of cases). Since the metodology of reporting is yet to be revised and elaborated, we can only report approximate numbers. For distinction on Civil and/or Commercial/Criminal/Administrative/Other please see comments to Q91, 93 and 94.
First instance judges: Civil and/or commercial: 62% (approx. 396 judges); Criminal: 33% (approx. 214 judges); Administrative: 4% (approx. 28 judges), Other: 1% (approx. 5 judges)
Please note: the judges at the Administrative Court that resolve administative cases at first instance have the rank of a higher judge.
Second instance judges: Civil and/or commercial: 66% (approx. 77 judges); Criminal: 34% (approx. 39 judges); Administrative: /, Other: /
Supreme court judges: Civil and/or commercial: 57% (approx. 16 judges); Criminal: 18% (approx. 5 judges); Administrative: 25% (approx. 9 judges), Other: /

Question 052

Austria

(General Comment): Starting from 2021, the “Kanzlei” who are responsible for handling of case files are counted as “staff in charge of different administrative tasks and of the management of the courts”. “Other staff” only includes trainees (including trainees for Rechtspfleger) and staff representation. Moreover, starting from 2021, “technical staff” also includes staff working at the courts‘ IT departments.

(2021): Starting from 2021, the “Kanzlei” who are responsible for handling of case files are no more counted as “other staff”, but as “staff in charge of different administrative tasks and of the management of the courts”. “Other staff” only includes trainees (including trainees for Rechtspfleger) and staff representation. Moreover, starting from 2021, “technical staff” also includes staff working at the courts‘ IT departments, therefore the number is higher than in previous years.

(2020): "Other": Handling of case files (“Kanzlei”)
2. Non-judge (judicial) staff whose task is to assist the judges: the increased number concerns administrative courts.

(2019): Non-judge staff whose task is to assist the judges: more staff at the administrative courts
Staff in charge of different administrative tasks and of the management of the courts: more staff
Other: Handling of case files (“Kanzlei”)

(2018): Handling of case files (“Kanzlei”)

(2017): The data also include those of administrative courts.

(2016): This cycle admnistrative courts were taken into account for the first time.
The administrative courts were established January 1st 2014. After their establishment the data of the administrative courts is introduced this cycle for the first time.

(2015): The right (not rounded) numbers are:
Total non-judge staff working in courts (1 + 2 + 3 + 4 + 5) 4734,55 - 1407,08 - 3327,47
1. Rechtspfleger (or similar bodies) with judicial or quasi-judicial tasks having autonomous competence and whose decisions could be subject to appeal798,11 - 331,63 - 466,48
2. Non-judge staff whose task is to assist the judges such as registrars (case file preparation, assistance during the hearing, court recording, helping to draft the decisions) 19,05 - 1 - 18,05
3. Staff in charge of different administrative tasks and of the management of the courts (human resources management, material and equipment management, including computer systems, financial and budgetary management, training management)439,56 - 155,86 - 283,70
4. Technical staff21,70 - 9,85 - 11,85
5. Other non-judge staff3456,13 - 908,74 - 2547,39

(2014): The numerical values in the table have been rounded. The most exact replies for this period would be: total non-judge staff: 4 704,51 (1 388 Male, 3 316,51 Female); Rechtspfleger: 784,78 (320,21 Male, 464,57 Female); non-judge staff whose task is to assist the judges: 19,18 (1 Male, 18,18 Female); staff in charge of different administrative tasks: 438,97 (159,85 Males, 279,12 Females); technical staff: 23,05 (9,95 Males, 13,10 Females); other non-judge staff: 3 438,53 (896,99 Males, 2 541,54 Females).

Belgium

(2019): "Technical personnel": the slight increase observed between 2018 and 2019 results from investments in personnel.

(2013): The number of women per category is as follows: Total: 3839,45; category 2: 1212,62; category 3: 2031,93; category 4: 594,90.

(2012): The 2d category "non-judge staff whose task is to assist the judges such as registrars" covers clerks and referendaries; the 3d category "staff in charge of different administrative tasks" includes HRM staff, seconded staff to specific authorities of the judicial organisation and administrative staff of the court registry. This distribution can be presented with the following figures: Total: 5457,95 (3930,35 women); 2: 1707,72 (1166,52 women); 3: 2766,23 (2075,73 women); 5: 984 (688,10 women).

Bulgaria

(General Comment): Since 2012, the category “other” encompasses the number of non-judge staff employees working in the recreational field, while in 2010 it subsumes the number of court assistants. The Judicial Administration Commission does not keep statistics of those who are trained, as well as of trainee judges. There are junior judges in the courts in the country, for whom Judicial Administration Commission has no relation, no data. Accordingly, the total number of judicial employees in the courts does not include trainee judges.

(2019): Since 2012, the category “other” encompasses the number of non-judge staff employees working in the recreational field, while in 2010 it subsumes the number of court assistants.

(2017): These are the staff employed in the recreational establishments of the Supreme Administrative Court and the Supreme Court of Cassation such as: manager of the training center, chefs, worker in the kitchen, bartender, waiter, tendant.

(2015): Unlike the previous evaluation cycles, now we indicate the figure 502 – technical staff (it includes drives, cleaning staff, guards, etc.), which reduce the number of the employees engaged with administrative tasks and court management under number 3.
Other non-judge staff includes 55 court servants working in recreation department.

(2013): The number of non-judge staff assisting judges includes the number of all court staff from the so called specialized administration supporting judges, including court secretaries and court assistance, while for 2010 it subsumes only court secretaries. The category “staff in charge of different administrative tasks” subsumes the number of non – judge staff of general administration.

(2012): The number of non-judge staff assisting judges includes the number of all court staff from the so called specialized administration supporting judges, including court secretaries and court assistance, while for 2010 it subsumes only court secretaries.

Croatia

(General Comment): The total number of non-judicial staff is a result of a deduction and subsumes only actually working staff. Thus, the total does not include staff on unpaid leave; staff on maternity leave; staff suspended after disciplinary procedures; staff transferred to other State bodies (for example the Ministry of Justice or Judicial Academy). Besides, two non-judicial officials working half-time (for the reason of care for a child with special needs) are counted as 1 non-judicial official. The reason for fluctuation and differences in the number of Rechtpflegers in Republic of Croatia is that they work for 2 years, then prolonged 5 years and then they get a permanent post or not.

(2015): The Republic of Croatia submits correct numbers of non-judge staff who are working in courts for previous cycles (2012, 2013 and 2014), because in the previous cycles this number included the staff working for public prosecutors. Therefore, the correct numbers for these cycles are now provided.

(2014): In 2013, the number of “Rechtspfleger” included judicial advisors because they work autonomously on cases, on the one hand, and staff who are not judges, but who can enact decisions (land registry officials and court registry officials), on the other hand. In 2014, the interpretation changed and judicial advisors were moved to the category “non-judicial staff whose task is to assist the judges”, since they work autonomously but their decision must be signed by a judge.

(2013): The variations between 2012 and 2013 in respect of certain sub-categories are due only to a different methodology of classification. The total is slightly different for the two years.

Cyprus

(General Comment): The total number of non-judge staff includes clerical staff and also court bailiffs.

(2021): court baillifs

(2020): Other non-judge staff includes court bailiffs. Differences in number of staff compared to previous year come from new appointments and retirements.

(2018): Court bailiffs are included in category Other.

(2017): court bailiffs

(2016): court bailiff
in 2014 the correct number for male no judge staff assisting the judge should be 9
Question 52: if we change the number of male non judge staff assisting the judge for 2014 from 23 to 9, we must also change the number of non-judge staff assisting judges from 143 to 129 and also the total from 462 to 448. Do you agree on up-dating in this way 2014 data in order to ensure the consistency of the table? the numbers for 2014 must also be changed

(2015): Between 2014 and 2015, there was a change in the distribution of non-judge staff. In 2014, in the category "staff in charge of administrative tasks", only the number of high-level administrative staff was included. The other administrative staff were included in the category "other non judge staff". Whereas in 2015, all administrative staff were included in the category "staff in charge of administrative tasks". This change of distribution leads to significant variations.

(2014): Variations concerning data on different categories of non-judge staff are due to different methodology of presentation of data used for 2014 and the previous evaluations.

Czech Republic

(General Comment): The category “other” encompasses for 2010 judicial trainees or staff in charge of court documentation. For 2012, 2013 and 2014, besides the already mentioned components, it subsumes also press centre and telephone exchange.
The judicial trainee is entitled to perform the acts of the court under the conditions and to the extent specified in factual and time plan of the preparatory service which is compiled by the chairman of the regional court after consultation with the advisory board for the education of trainees. The plan must be focused in such a way that the training for the performance of the function of a judge serves in particular to:
a) deepening the trainee's professional knowledge of substantive and procedural law,
b) developing the trainee's ability to apply legislation in a specific matter,
c) gaining knowledge of individual agendas maintained by courts and their implementation,
d) acquisition of procedural procedures and habits necessary for the performance of the function of a judge,
e) acquaintance with ethical principles related to the performance of the function of a judge.
In accordance with the preparatory service plan, the trainee performs preparatory service at a district or regional court. The trainee is usually assigned to one judge. Familiarization with individual court agendas is ensured by the fact that the president of the court where the judicial trainee is currently located gradually assigns the trainee to individual court departments.
The preparatory service includes adaptation courses, seminars and lectures organized by the Judicial Academy and educational activities organized by court for at least 2 days per month.
Nowadays, there are few judicial trainees and in 2022 the title will be replaced by a „judicial candidate“.

(2017): Other - judicial trainees, staff in charge of court documentation, press centre and telephone exchange.

(2016): Other - judicial trainees, staff in charge of court documentation, press centre and telephone exchange.

(2015): In 2015, compared to 2014, the number of non-judge staff increased due to a project financed from the European social fund and state budget: “Project on improvement of the efficiency of courts by strengthening of the administrative capacities”. The project is running until 30th December 2015.

(2014): In 2014, the number of non-judge staff increased due to a project financed from the European social fund and State budget: “Project on improvement of the efficiency of courts by strengthening of the administrative capacities”. The project is running until 30th December 2015.

Denmark

(2020): -

(2019): information NA

(2017): "other non judge staff" - in 2017 there was no staff to fit into this category.

(2016): The 2016 data on the number of rechtspflegers is correct. The discrepancy that occurs compared to 2014 data is due to a mistake in the 2014 numbers.

Estonia

(2020): Trainees are not included in the numbers provided for Q52 and Q52-1.

(2019): Court interpreters are in the category "other non-judge staff".

(2018): Court interpreters are in the category "other non-judge staff".

(2017): The increase in the number of male staff in charge of administrative tasks is due to the general movement of personnel.
"Other non-judge staff": Court interpreters.

(2016): The observed variations in the numbers with regard to the different sub-categories are due to a general movement of staff.

In 2015, a reform of the Land Registry and Registration Department was carried out, during which the four districts were brought together registry and land registry departments to the Tartu County Court, thus establishing one land registry department and one registry office. The reform involved significant optimization of work processes and dossiers which resulted in the reduction of staff working in the registers. The objectives and results of the reform were largely achieved because registries are kept electronically, and individuals can largely interact with the registers, transmit and receive documents receive electronically.

(2015): The number of technical staff has been decreasing due to redundancies in the Registration and Land Registry Departments. The project of court lawyers was carried out having in mind that the Registration and Land Registry departments are fully digital. Therefore there is a possibility to decrease the number of technical staff.

(2014): A pilot project has been introduced in 2013 in one county court consisting in providing each judge with a personal legal assistant. After the first year of the pilot project, the average proceeding times in civil cases in that particular court dropped from 201 days to 160 days; after the second year the average proceeding times dropped further to 132 days. In 2015, the project has been extended to all first and second instance courts.

(2013): Since 2013, the second category includes a new position among court staff – judicial clerks. They assist judges in the administration of justice, participating in the preparation of court cases or in court proceedings. They replace step by step former consultants. There is one judicial clerk for every judge. In 2013, the reform was implemented in the largest court of general jurisdiction as a pilot (Harju County Court). In 2015,it was extended to all first and second instance courts.

(2012): The overall number of court staff has not changed much during the last years: 976 (2010), 957 (2012) and 990 (2013). Differences in figures in the sub-categories are due to the different categorization of court staff.

Finland

(General Comment): The Finnish court staff organisation does not correspond to the CEPEJ subcategories. Therefore, only the total of non-judge staff can be provided for the question 52. Office staff has tasks mentioned in the categories 2-5. Summoners' tasks are for example to serve summons, subpoenas and other documents. Trainee judges have the same responsibility as judges but they do not have competence to deal with difficult cases. They are always appointed for a fixed term period (one year). In the courts of appeal, the
administrative courts, the Supreme Court, the Supreme Administrative Court, the Labour Court and the Market Court a referendary prepares and presents a case to the judges but the final judgment is decided by the judges. The tasks of trainee judges and referendaries correspond to the categories 1 and 2.

(2021): The total non-judge staff includes office staff 1530, summoners 269, trainee district judges 131 and referendaries 278. 1. “Rechtspfleger (or similar bodies)”: The senior judge of a district court may appoint in writing a member of the office personnel at the district court who has given an affirmation corresponding to the judge’s affirmation, who has received sufficient training and who has sufficient skills to attend to the duties: (1) in cases referred to in Chapter 5, section 3 of the Code of Judicial Procedure: (a) to give judgments by default; (b) to give, on the basis of Chapter 21, section 8(c) of the Code of Judicial Procedure, decisions and judgments on court costs, if the respondent has conceded the claim; (c) to decide on the staying of an action if the plaintiff
has withdrawn the action and the respondent does not call for a decision in the case; (2) to decide on applications for divorce on the basis of section 25, subsection 1 of the Marriage Act (234/1929) if both spouses are domiciled in Finland. If the case to be decided by office personnel, as referred to in subsection 1, proves to be extensive, subject to interpretation or otherwise difficult to decide, the case shall be transferred for a decision of a notary or a legally trained judge at the district court. The chief judge of a district court may appoint in writing a member of the office personnel at the district court who has sufficient skills, to issue summons and certificates, to effect service of documents and to attend to other duties connected to the preparation, consideration or enforcement of administration of justice matters. Before taking such tasks the staff member must give an oath. (Courts Act, Chapter 19, Section 6).

(2020): The total non-judge staff includes office staff 1477, summoners/process serves 273, trainee district judges 137 and referendaries 275. 1. “Rechtspfleger (or similar bodies)”: The senior judge of a district court may appoint in writing a member of the office personnel at the district court who has given an affirmation corresponding to the judge’s affirmation, who has received sufficient training and who has sufficient skills to attend to the duties: (1) in cases referred to in Chapter 5, section 3 of the Code of Judicial Procedure: (a) to give judgments by default; (b) to give, on the basis of Chapter 21, section 8(c) of the Code of Judicial Procedure, decisions and judgments on court costs, if the respondent has conceded the claim; (c) to decide on the staying of an action if the plaintiff has withdrawn the action and the respondent does not call for a decision in the case; (2) to decide on applications for divorce on the basis of section 25, subsection 1 of the Marriage Act (234/1929) if both spouses are domiciled in Finland. If the case to be decided by office personnel, as referred to in subsection 1, proves to be extensive, subject to interpretation or otherwise difficult to decide, the case shall be transferred for a decision of a notary or a legally trained judge at the district court. The chief judge of a district court may appoint in writing a member of the office personnel at the district court who has sufficient skills, to issue summons and certificates, to effect service of documents and to attend to other duties connected to the preparation, consideration or enforcement of administration of justice matters. Before taking such tasks the staff member must give an oath. (Courts Act, Chapter 19, Section 6).

(2019): The total non-judge staff includes office staff 1455, summoners 267, trainee district judges 135 and referendaries 271

(2018): The total non-judge staff includes office staff 1435, summoners 263, trainee district judges 136 and referendaries 297.

(2017): Office staff 1440, summoners 263, trainee judges 122, referendaries 312

(2016): office staff 1473, summoners 248, trainee district judges 136, junior district judges 1, referendaries 312

(2015): office staff 1428, summoners 265, trainee district judges 138, junior district judges 5, referendaries 309

(2014): For the 2014 exercise the total of 2 161 subsumes 1 434 office staff, 266 summoners, 136 trainee district judges, 7 junior district judges and 318 referendaries.

(2013): For 2013, the total of 2 196 subsumes 1445 office staff, 265 summoners, 133 trainee district judges, 7 junior district judges, 346 referendaries.

(2012): For 2012, the total of 2 214 subsumes 1447 office staff, 264 summoners, 129 trainee district judges, 9 junior district judges, 365 referendaries.

France

(General Comment): "Other non-judge staff" refers to legal assistants and specialised assistants who do not work for the public prosecution service. For the other subcategories (2, 3 and 4) it is not possible to distinguish between staff working for the courts and those working for the public prosecution services.

(2021): Concerning the total of 22 115, it should be noted that this figure includes 597 legal assistants and specialised assistants working for the courts and 939 contractual staff recruited in the framework of local justice. The "other non-judge staff" correspond to legal assistants and specialised assistants who do not work for the prosecution services. The category "non-judge (judicial) staff whose task is to assist the judges such as registrars" includes the category B contractual staff recruited under the support plan for justice implemented since the second half of 2020 on the sole basis of Article 7 bis of Law No. 84-16 of 11 January 1984 on the statutory provisions relating to the State civil service, created by the law on the transformation of the civil service of 6 August 2019, which institutes the project contract. These contractual employees are recruited for three years. The significant increase in the number of these contractual staff (240 more than in 2020), combined with the increase in the number of court clerks (+221 compared to last year) and the increase in the number of other non-judge staff (+210 compared to last year), contributes to the increase in the overall figures communicated for the year 2021. As on 31 December 2021, 1 666 category A and B staff (including 1 383 women) were undergoing initial training at the “École nationale des greffes”, most of them on practical training in the courts. These staff will join the courts in 2022 or 2023, which will significantly increase the number of staff working in the courts and the regional administrative services.
Source DSJ

(2020): "Non-judge staff" correspond to legal assistants and specialized assistants who do not work for the prosecution service. Unlike in previous years, this distinction could be made for the numbers in 2020, which explains the decrease in the figures provided compared to the previous year. The category "Non-judicial staff responsible for assisting judges, like registrars" includes the category B contractual employees recruited under the plan to support justice, implemented since the second half of 2020 on the sole basis of article 7bis of the law n°84-16 of January 11, 1984, concerning statutory provisions relating to the State civil service, created by the law on the transformation of the civil service of August 6, 2019, instituting the project contract. These contract employees are hired for 3 years.
As of 12/31/2020, 1,699 category A and B agents (including 1,388 women) were undergoing initial training at the National School of Clerks, most of whom were on practical training in the courts. These personnel will join the courts during 2021 or 2022, which will significantly increase the number of agents working in the courts and regional administrative services.
The data compiles data from the judicial and administrative justice systems. Interns are not included. "

(2019): As of 31/12/2019, 1,693 category A and B staff (including 1,408 women) were undergoing initial training at the “Ecole nationale des greffes”, most of them on practical training courses in the courts. These staff will join the courts in 2020 or 2021, which will significantly increase the number of staff working in the courts and regional administrative departments.
Other non-judge staff includes specialised assistants (106, 48 men and 58 women) and legal assistants (422, 93 men and 329 women) working in the civil and criminal courts. The increase in the number of legal assistants between 2018 and 2019 is due to the creation of new budgetary posts obtained.

(2018): With the exception of heading 5 "Other non-judge staff", the distinction between staff attached to judges and staff attached to prosecutors is not possible
At the date of 31/12/2018, 1,173 category A and B staff (including 1,003 women) were in initial training at the National School of Registries, most of whom were on practical training in the courts. These staff will join the courts in 2019 or 2020, which will significantly increase the number of staff working in the courts and regional administrative services.
"Other non-judge staff" includes specialised assistants and assistant lawyers who assist non-judge prosecutors in their duties.
The detail by function and gender is as follows:
Categories Total Male Female
Specialized assistants 23 13 10 10
Assistant lawyers 245 53 192
Total 268 66 202

(2017): The distinction between staff attached to judges and staff attached to prosecutors is not possible. Namely, the sub-category 2 encompasses specialised assistants (31) and assistant lawyers (242), who assist civil and penal judges or prosecutors in the preparation of case files.

(2016): No distinction is possible between staff attached to courts and staff attached to public prosecution services. The category “Other non-judge staff” refers to specialized assistants (18) and legal assistants (111) who work in civil and penal courts.

(2015): It should be noted that as of 31 December 2015, 1013 categories A and B staff (including 886 women) were in initial training at the Ecole nationale des greffes (French National School for Registrars), most of them in practical training in courts. This high volume of staff has joined the courts in 2016 or will do so in 2017, which will increase the number of staff actually working in the courts and regional administrative offices.

The distinction between staff in charge of assisting judges and staff in charge of assisting prosecutors is not possible. The latter are therefore part of the figures provided.

(2013): The 2013 data encompasses non-judge staff appointed to judges and public prosecutors. On 31 December 2013, 1064 agents were in initial training. They joined courts of law in 2014 or will do in 2015. Among the 21946 non-judge staff, 1911 were appointed to administrative courts. The 274 agents of the State Council counted in 2012 were appointed to a support function and are therefore excluded from the 2013 figures. The size of the litigation section of the State Council represents 87 FET. The staff of the National Court for asylum right has also been taken into account in categories 2, 3 and 4 for a total of 325 FET (not counted until 2013). In 2013, the State Council distributed non-judge staff which was before included in the category "other" in the proposed categories.

(2012): On 31 December 2012, 1039 staff were in initial training at the National School for Registrars, most of them in practical training in courts. They joined the tribunals in 2013 or will do so by 2014, which will increase the number of agents actually in office in courts and regional administrative services. Data pertaining to administrative courts is classified within the category "other" because of the versatility of their staff (1,505.5 FTE). As for the State Council, the number in FTE of the non-judge staff is 274.

Germany

(General Comment): Data is taken from the "staff-assignment statistics" of the Länder and represents an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistics do not distinguish between male and female staff.

(2021): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

(2020): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

(2019): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

(2017): This figures denotes the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

(2016): This figures denotes the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel
Comments:
These are personnel-deployment figures denoting the number of full-time equivalent employees not exercising judicial office. Personnel-deployment figures are not collected according to reference date. Instead, an annual average is calculated over four quarters. There are no absolute figures for the number of persons making up this staff. An employee working full hours is counted as a full-time equivalent (i.e. 1). An employee working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for an employee working half the usual number of hours). Figures for the federal courts are not included.

(2014): The 2013 and 2014 data are the same due to the impossibility to obtain data for 2014. The trend observed since 2010 reveals stable figures.

Greece

(2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration

(2016): Previous data did not, inadvertently, exclude staff working for the public prosecution services.

Hungary

(General Comment): • Court secretaries („bírósági titkár") are employees of the court that are similar to Rechtspfleger. They are lawyers, who after acquiring a degree at a law faculty have made the bar exam (which requires at least 3 years professional practice). They are enabled to perform duties of judges in cases specifically defined by law.
According to the Constitution when a court secretary is dealing with a case he/she has the same independence as a judge. In criminal cases they can make out of trial decisions (e.g. order an expert to be included in the case), or they can hear witnesses on request of another court. This practically means they assist the judges in pre-trial phase of the case. In misdemeanour cases they adjudicate the case - this is an area of law in which mostly court secretaries deal with cases of first instance. In civil and labour cases they can make any decision that can be made without hearing the case. This practically means they assist the judges in pre-trial phase of the case. In administrative non-litigious cases they can make any decision that can be made without hearing the case. In company registry cases they can make every decision, as well in insolvency cases (with some exceptions).
• From 2012, the category "non-judge staff assisting judges" includes only staff directly assisting judges. • Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

(2021): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

(2020): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

(2018): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

(2017): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

(2016): Other non-judge staff includes Staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

(2015): For the gender ratio we are only able to provide the total figures.

Other non-judge staff (5) includes Staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

(2014): In 2014, the category "other" includes "staff in charge of different administrative tasks", "technical staff" and some of those judicial employees who in 2012 were counted as "non-judge staff whose task is to assist judges".

(2013): The methodology of presentation of data used in 2013 is different. Some of those judicial employees who in 2012 were included in the category "non-judge staff whose task is to assist judges" were taken into account in the category "other". The latter includes in 2013 the total number of "staff in charge of different administrative tasks" and "technical staff" because these numbers could not be separated within the national database.

(2012): Court secretaries are enabled to perform duties of judges in cases specifically defined by law. The increase of the number of Rechtspfleger was mainly due to the expanding scope of their authority according to the amended procedural codes. More administrative tasks and cases of lesser difficultiesare dealt with by Rechtspfleger.The category "non-judge staff assisting judges" includes in 2012 only staff directly assisting judges while in 2010, it encompassed other staff as well. In 2012, staff whose task does not consist in directly assisting judges was included in the item “other”.

Ireland

(General Comment): Staff numbers in the Irish Courts Service are computed on the basis of "Full-time equivalent" resources, requiring that staff numbers include decimal points, reflecting part-time, work-sharing and other reduced time working arrangements. As decimal points are not imputtable to this question in the data base, it has been necessary to round up or round down figures.

(2021): The discrepancies with previous data are explained by staffing fluctuations.

(2017): As concerns the increase observed in the number of female staff in charge of different administrative tasks, additional staff have been employed since the last reporting cycle.

(2016): With regard to the category "staff in charge of different administrative tasks", additional staff have been employed since the last reporting cycle.

(2015): Figures have rounded up or down to adjust for the fact that actual personnel resource numbers are calculated to decimal points to reflect employment of part of a full-time personnel resource (e.g. where work-sharing arrangements are in place).

(2013): The reduction in the number of Rechtspfleger since 2012 reflects in part the appointment of number of County Registrars falling within the Rechtspfleger category as Specialist Judges of the Circuit Court. There were also a number of vacant posts at the end of 2013.

Italy

(General Comment): The category “other non-judge staff” encompasses assistants, receptionists, porters and other judicial staff. As a general remark, it should be stressed that the high percentage of “other non-judge staff” in Italy is due to a very strict interpretation of the definition of the main categories. The specialized first instance courts that are not administered and financed by the Ministry of Justice (regional audit commissions, local tax commissions and military courts) are not taken into consideration at question 52.

(2021): The number of staff has increased due to the hiring of new personnel through public competition.

(2018): Since 2018, the figures have also included court staff belonging to Administrative Justice.

(2016): According to the data provided for 2014, 2015 and 2016, we can notice a downward trend as concerns the number of technical staff (a decrease of 28% between 2014 and 2015 and a decrease of 26% between 2015 and 2016), especially the number of female staff (a decrease of 33% between 2014 and 2015 and of 32% between 2015 and 2016). An explanation of these variations is not available at this stage.

(2015): 'Other non-judge staff' includes: assistants, receptionists, porters and other judicial staff.
The high percentage of “other non judge staff” in Italy is due to a very strict interpretation of the definition of the main categories.

Latvia

(2021): Other non-judge staff: Supreme Court - Division of case-law an research, Division of provision of regime of secrecy, Staff of secretariat of the Council for the Judiciary.
In general at the end of 2021, there were many vacancies for court staff for the first and second instance courts, therefore also there are differencies in the number of court staff. In the previous cycles, the numbers for court staff for the first and second instance courts were calculated a little bit different, there were included also vacancies.

(2020): The observed variations in the different categories are due to changes in court staff.
Other for Supreme Court - Division of case-law and research, Division of provision of regime of secrecy, Staff of the Secretariat of the Council for the Judiciary. Trainees are not included in the number provided of the non-judicial staff.

(2019): Other non - judge staff: Staff of the Division of case-law and research, Division of provision of regime of secrecy and Secretariat of the Council for the Judiciary, as well consultants (desk officers) of the Supreme Court of Latvia.
The overall discrepancies starts from 2018 due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate). The data between 2018 and 2019 are very similar.

(2018): Discrepancy due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate).

(2017): Other non-judge staff- this satff is for Supreme Court - Staff of Division of case-law and research staff, Division of provision of regime of secrecy staff, the Supreme Court of Latvia consultants and Secretariat of the Council for the Judiciary

Starting from 2015 till March, 2018 there were introduced court reform where the judicial map was revised. In the course of the court reform, several courts were merged, legally creating one larger court. On the other hand, in this new territory, the existing courts continue operating as the new body of the joint court, providing the opportunity for citizens to submit the documents at any place of the court. The court reform affected also the changes in the number of court staff, some positions were combined, some positions changed.

(2014): The category “other” includes employees from the Division of Provision of Secrecy Regime and the Supreme Court Division of Case-Law. The latter is a unit of the Supreme Court responsible for the compilation, analysis and publication of court opinions, as well as for summarizing, selecting, processing and publishing in the case-law database court rulings. For 2014, it also subsumes consultants of the Supreme Court.

(2013): The category “other” includes employees from the Division of Provision of Secrecy Regime and the Supreme Court Division of Case-Law. The latter is a unit of the Supreme Court responsible for the compilation, analysis and publication of court opinions, as well as for summarizing, selecting, processing and publishing in the case-law database court rulings.

(2012): The category “other” includes employees from the Division of Provision of Secrecy Regime and the Supreme Court Division of Case-Law. The latter is a unit of the Supreme Court responsible for the compilation, analysis and publication of court opinions, as well as for summarizing, selecting, processing and publishing in the case-law database court rulings.

Lithuania

(General Comment): The category “other” includes translators, court psychologists, it encompasses also other helping staff (civil servants and working under the labour agreement).

(2021): Psychologists and translators.

(2020): Other staff – translators and psychologists.
There is no such a position as trainee judges in the Lithuanian court system.

(2019): Other staff - translators and psychologists.

(2018): Other non-judge staff – translators and psichologists.

(2017): Other staff – translators and psychologists.

(2016): In 2015 the number of technical staff has decreased while at the same time the number of staff assisting judges has increased.

(2014): The National Courts Administration has never collected data on statistics of court personnel according to the gender. The data, which was provided in earlier evaluation cycles, was preliminary data, manually gathered.

Luxembourg

(General Comment): With regard to question 52, all non-judge staff is in charge of assisting judges (except at the administrative courts). Therefore, starting from 2017, we do no longer distinguish between staff in charge of administrative tasks and staff assisting judges. Only at the administrative courts there are few persons not assisting judges.

(2021): The category “other non-judge staff” refers to the “référendaires” and the data protection compliance officer of the administrative courts.
The number of “other non-judge staff” has increased by 125% in absolute terms, which corresponds in fact to an increase of 5 persons, representing 5 posts of “référendaires”. Judicial and administrative courts are making greater use of “référendaires” to relieve judges of certain tasks.

(2020): The other non-judicial staff consists of three legal secretaries and a data protection compliance officer from the administrative courts.

(2018): Regarding the category "other non-judge staff", it includes non-judge staff working for administrative courts. The increase of the non-judge staff is due to the fact that we no longer distinguish between the staff in charge of administrative tasks and the staff assisting the judges as court clerks, since all the non-judge staff is in charge of assisting the judges. We interpreted this differently in the previous years. Previously some of the staff was considered as not assisting the judges, because of their statute, this appeared as not correct since none of them is limited to administrative tasks, except at the administrative courts, where six persons are in charge of purely administrative tasks. The revised 2017 data shows an increase of the total non-judge staff assisting the judges of 9.95%.

(2017): With regard to question 52, all the non-judge staff is in charge to assist the judges (except at the administrative courts). Therefore for the year 2017, we did no longer distinguish between staff of administrative tasks and the staff assisting the judges. Only at the administrative courts are 6 persons not assisting the judges.

(2016): Last year the separation of the sections 1, 2 and 3 was not done correctly. This year this task was made by the parquet general RH office.

(2014): The overall administrative tasks concerning ordinary courts are centralized at the level of the Prosecutor General Office. The same applies to technical staff. Among the 192 non-judge staff assisting judges, 117 are women. The category "staff in charge of different administrative tasks" (3 women, 2 men) and the category "technical staff" (1) refer exclusively to the Administrative Court (which was not the case for 2012). The 2014 data reflects the administrative reality, the staff that cannot be categorized to one specific task being attached to the State Prosecutor General. The total remains stable; slight variations are due to temporary replacements. The category "other" does not subsume external staff hired on contractual basis, e.g. in IT matters (as in 2012).

(2013): The overall administrative tasks concerning ordinary courts are centralized at the level of the Prosecutor General Office. The same applies to technical staff. Among the 192 non-judge staff assisting judges, 117 are women. The category "staff in charge of different administrative tasks" (3 women and 2 men) and the category "technical staff" (1) refer exclusively to the Administrative Court staff. The 2013 data reflects the administrative reality, the staff that cannot be categorized to one specific task being attached to the State Prosecutor General. The total remains stable; slight variations are due to temporary replacements. The category "other" does not subsume any more external staff intervening on contractual basis, for example in IT matters.

(2012): Except for categories 1 ('Rechtspfleger') and 2 (non-judge staff whose task is to assist the judges), all others carry on their work in the interest of the whole judicial system, that is to say, both for judges and prosecutors.

Malta

(2019): For Technical Staff: This is an issue of recruitment and given the change from a Department to an Agency, the Court Services will be issuing new calls in line with the requirements of the Agency.

(2018): Other non-judge staff include:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti Personnel

(2017): Other non-judge staff includes:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti staff

(2016): Other non-judge staff includes:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti staff

Concerning "Technical Staff", 2 technical staff were employed. Between 2014 and 2015, there was a decrease in the number of tradesman employed with the court administration.

(2015): In the 2015 data, the category 'Non-judge staff whose task is to assist the judges' includes 13 Court Attorneys that have been introduced for the first time in October 2015. This staff is meant to assist the judges in the drafting of the sentences and other related matters. However the Court Attorneys are not autonomous and the responsibility for the sentences that they draft ultimately lies with the presiding judge.
The differences noted between 2014 and the previous regarding the categories "staff in charge of administrative tasks" and "other non-judge staff" is due to a change in the distribution. After 2014, some non-judge staff who were included in the category "staff in charge of administrative tasks" were integrated in "other non-judge staff".
The decrease between 2014 and 2015 in the number of "technical staff" is due to a decreases in the number of tradesman.

(2014): The differences noted between 2014 and the previous regarding the categories "staff in charge of administrative tasks" and "other non-judge staff" is due to a change in the distribution.

(2013): In 2013, the number of non-judge staff was detailed as follows: staff assisting judges – deputy registrars (67), court messengers (19), judicial assistants (30), clerical staff (141), ushers (25), senior court recorders (12), court recorder in charge (1), and Children's advocate (2); staff in charge of administrative tasks – Directorate Support Services (86), Directors and staff (12), Asset Management unit (3), Archives (3), one stop shop (7), Subasti (3), Library (1), Publications (3) technical staff – tradesmen (7), Bookbinder (1);
"other" – cleaners (8), Chief Marshal (1), Marshals (20). An exercise at beefing up the Court administration staff was undertaken by the Government in 2013, fas a result of which, the figures for different sub-categories have increased considerably.

(2012): In 2012, the number of non-judge staff was detailed as follows: staff assisting judges – deputy registrars (65), court messengers (19), judicial assistants (30), clerical staff (59), ushers (25), senior court recorders (12), court recorder in charge (1), and Children's advocate (2); staff in charge of administrative tasks – Directorate Support Services (83), Directors and staff (13), Asset Management unit (3), Archives (3), one stop shop (4), Subasti (2), Library (1), Publications (2); technical staff – tradesmen (7), Bookbinder (1); "other" – cleaners (7), Chief Marshal (1), Marshals (20).

Netherlands

(General Comment): Only the total of non-judge staff working in courts is available.

(2021): The Council of the Judiciary is not able to make a distinction between different types of non-judge staff working in courts, and thus, the entry is NA. The Supreme Court can make a distinction for the number of non-judge staff whose task is to assist the judges (fte = 110), and staff in charge of different administrative tasks (fte = 148). The first and second instance court cannot (total fte = 7395).

(2017): the number given is the number of people (posts), the fte is 6719; these can not be separated by gender or line in the table

(2016): Number of FTE = 6530.

(2015): FTE in 2015 is 6.497

(2014): The figure 7 287 pertains to persons; data in FTE is 6 495.

(2013): According to 2013 data, the figure 7.287 pertains to persons, data in fte is 6.495.

Poland

(2021): •Members of the Research and Analyses Office of the Supreme Court (Biuro Studiów i Analiz SN);
Data also includes staff from The Supreme Administrative court and The Supreme court of justice

(2020): probation officers, Specialists of Opinion Teams of Forensic Specialists
*the presented data does not include court assessors (trainee judges). The question should only indicate the number of court employees who are not judges. According to Article 2 § 1a of the Act of 27 July 2001. Law on the Common Court System (Journal of Laws of 2020, item 2072), in district courts, tasks related to the administration of justice are also performed by court assessors/trainee judges, with the exception of:
1) applying temporary detention in pre-trial proceedings in relation to a detainee handed over to the court's disposal together with a request to apply temporary detention;
2) examining complaints against decisions on refusal to initiate an investigation or enquiry, decisions to discontinue an investigation or enquiry and decisions to discontinue an enquiry and on decisions to discontinue an investigation and enter the case in the register of crimes
3) deciding family and juvenile cases.
Since in the remaining scope court assessors perform tasks related to the administration of justice - just like judges - they should be deemed to belong to the professional group of judges. At the same time I would like to inform you that as at 31 December 2020 there were 486 trainee judges employed in district courts, including 317 women and 169 men. 1. number of rechtspflegers of 16 voivodeship administrative courts included (males 23, females 34);
2-4. - In 2020 data include also employees of the Supreme Administrative Court;

(2019): - professional probation officers;
- employed in Consultative Team of Judical Specialist

(2018): Other non-judge staff:
- professional probation officers
- employed in Consultative Team of Judical Specialists

(2017): Other non-judge staff -5790
of which:
Professional probation officers - 5188
Employed in Consultative Team of Judicial Specialists - 602.

(2016): Other non-judge staff - 5859
of which:
Professional probation officers - 5212
Employed in Consultative Team of Judical Specialists - 647.

Portugal

(General Comment): The variations in the number of non-judge staff over the different evaluation cycles seem high due to the small numbers.

(2020): 52-3-In absolute terms, the increase between 2018 and 2020 in the category "Staff in charge of different administrative tasks and of the management of the courts" for women is from 94 to 104. Since we are dealing with small absolute values, the identified variation, despite not representing a significant difference in absolute terms, acquires a more relevant expression in terms of relative variation.
52-4- We confirm the increase in the number of "technical staff" in the courts between 2018 and 2020. No specific explanation.

(2019): In 2019, as in previous years there was no other non-judge staff.

(2018): In 2018, as in 2017 there were no other non-judge staff.

(2017): "other non judge staff" - this category includes all staff with a non-specified category or non-specific functions. As this is a residual category, the numbers tend to be small.

(2014): The decrease in the number of staff in charge of administrative tasks is due to retirements that have not been replaced and to the continuous IT modernization.

(2013): The number of judicial staff is decreasing on account of retirements that have been occurring since 2010. In addition, due to the reform of the Public Administration that is taking place since 2009 and the financial constraints of the past few years, the number of public servants has decreased.

Romania

(General Comment): The number indicated for the category “non-judge staff assisting judges” encompasses clerks with judicial tasks; the number indicated for “staff in charge of administrative tasks” concerns registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants; the number indicated for “technical staff” includes IT staff, contractual personnel and other personnel (drivers, ushers, procedural agents etc.). The category “other” subsumes assistance magistrates, judicial assistants and probation counselors. o Assistance magistrates work only within the High Court of Cassation and Justice. They participate in the trial sessions, have a consultative vote in deliberations and write the minutes of the sessions, as well as the decisions. o Judicial assistants work only within tribunals and are part, together with the judges, of the panels which judge, in first instance, cases regarding labor and social insurances litigations (the panel is composed of 1 judge and 2 judicial assistants; the latter participate in the deliberations with a consultative vote and sign the decisions). o The probation counselors have, in principle, the following attributions: support the activity of judges by elaborating certain evaluation documents in criminal cases with juvenile offenders; support the activity of the judge delegated with enforcing decisions in criminal matters; cooperate with public institutions in order to execute the measure to force a minor to carry out an unpaid activity in an institution of public interest; initiate and carry on special programs of social reinsertion for persons convicted to prison and for minors who committed offences provided by the criminal law; carry out, at request, activities of individual counseling of offenders, with regard to the social, group and individual behavior; initiate and carry out special programmes of protection, social and judicial assistance of minors and youngsters who committed offences.

(2021): 6.665 represents the number of clerks with judicial tasks (- 170 work only within the High Court of Cassation and Justice); 1.701 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 38 work only within the High Court of Cassation and Justice); 1.723 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (–100 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (1055): a higher percentage of occupation of vacant positions.
Assistance magistrates: 130 Judicial assistants: 176 Probation counselors: 749

(2019): 6437 represents the number of clerks with judicial tasks (- 169 work only within the High Court of Cassation and Justice); 1646 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 16 work only within the High Court of Cassation and Justice); 1750 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents..... (– 6 IT staff works only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (867):
Assistance magistrates: 116 Judicial assistants: 177 Probation counselors: 574

(2018): 6402 represents the number of clerks with judicial tasks (- 163 work only within the High Court of Cassation and Justice); 1645 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 17 work only within the High Court of Cassation and Justice); 1772 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (–101 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (843):
Assistance magistrates: 110 Judicial assistants: 176 Probation counselors: 557

(2017): Other categories of personnel which function within the Romanian courts (852): Assistance magistrates: 112 Judicial assistants: 176 Probation counselors: 564
The increase observed in the category "other" between 2016 and 2017 is explained by the employment of the respective number of probation counselors.

(2016): 6191 represents the number of clerks with judicial tasks (- 165 work only within the High Court of Cassation and Justice); 1621 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 9 work only within the High Court of Cassation and Justice); 1822 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (– 109 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (663):
Assistance magistrates: 113 Judicial assistants: 173 Probation counselors: 377

(2015): 6149 represents the number of clerks with judicial tasks (- 149 work only within the High Court of Cassation and Justice); 1615 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 9 work only within the High Court of Cassation and Justice); 1844 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (– 109 work only within the High Court of Cassation and Justice).

Other categories of personnel which function within the Romanian courts: Assistance magistrates: 115 ; Judicial assistants: 176 ; Probation counselors: 352

(2014): In 2014, there were 6072 clerks with judicial tasks (153 within the High Court of Cassation and Justice); 1585 registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (9 within the HCCJ); 1854 IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (96 within the HCCJ). The category “other” subsumes 101 Assistance magistrates, 175 Judicial assistants and 360 Probation counselors.

(2013): In 2013, there were 5743 clerks with judicial tasks; 1563 registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants; 1784 IT staff, contractual personnel and other personnel (drivers, ushers, procedural agents). The category “other” subsumes 92 Assistance magistrates, 176 Judicial assistants and 281 Probation counselors.

(2012): In 2012, there were 5489 clerks with judicial tasks; 1486 registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants; 1762 IT staff, contractual personnel and other personnel (drivers, ushers, procedural agents). The category “other” subsumes 90 Assistance magistrates; 175 Judicial assistants; 281 Probation counselors.

Slovak Republic

(2021): The number of technical staff is included in category 3 (staff in charge of administrative tasks).
The position in line 2. is not atractive for males.

(2020): The number of technical staff and other non-judge staff are included in category 3 (staff in charge of administrative tasks)

(2018): See general comment.
There are no special explanation related to discrepancies in gender composition of court staff

(2017): The slight increase in the number of male non-judge staff originates at the Supreme court of the Slovak republic. The position of the "Judicial assistant" has been established and filled. The assistant helps the judge with legal research, drafting of decisions etc. Out of 86 assistants there are 29 male.

(2014): In 2014, the category “Rechtspfleger” subsumes 967 higher judicial officers and 63 mediation and probation officers. The category “staff assisting judges” includes assistants of judges and court secretaries. The category “staff in charge of different administrative tasks” encompasses court staff responsible for court administration, contact with the public (information centre, filing office), archives and technical staff. It was not possible to extract the accurate number of “technical staff” and “other non-judge staff” from the overall data on “staff in charge of different administrative tasks”.

(2013): In 2013, the category “Rechtspfleger” includes 975 judicial officers, 45 legal assistants at the Supreme Court and 63 mediation and probation officers. The category “non-judge staff assisting judges” includes 1348 assistants and 752 judicial secretaries. The rest of the non-judge staff is subsumed in the category “other”. In 2011 and 2012, the Ministry of Justice decided to increase the total number of the judicial officers with the intention to improve the disposition of certain court agendas.

(2012): In 2012, the category “Rechtspfleger” includes 982 judicial officers and 64 mediation and probation officers. It was not possible to extract the accurate number of “technical staff” and “other non-judge staff” from the overall data on “staff in charge of different administrative tasks”.

Slovenia

(General Comment): The definitions of categories are as follows:
1. “Rechtspfleger” category includes only the staff (judicial assistants and judicial advisers) with autonomous competence to adopt final decisions (decisions on the merits of the case), set explicitly in procedural laws - currently the Claim Enforcement and Security Act, the Financial Operations, Insolvency Proceedings and Compulsory Windingup Act, the Court Register of Legal Entities Act and the Land Register Act.
2. “Non-judge staff” category includes staff, whose tasks are generally set by the Courts Act. These are judicial assistants (filing applications and statements by parties for the record and, by order of a judge, perform less demanding tasks related to preparation for trial proceedings or other procedural acts, making calculations of costs, preparing drafts of decisions and performing other tasks in judicial proceedings under the orders of a judge), judicial advisers (performing work connected with the examination of parties, witnesses and experts (outside the main hearings), performing more complex preparatory work for hearings, reporting at panel meetings, drafting decisions, conducting hearings under the guidance of a judge and performing other work by order of a judge) and judicial trainees (typically do not perform significant amount of work as their role is to learn; however they can participate in hearings and drafting of court decisions in some cases).
3. All the other staff, not mentioned above and not corresponding to 4. “Technical staff” is included in 3. “Administrative staff”. The latter includes, along with the court management staff, the office support staff, whose tasks are not specifically set by the law and include case registering, administrative case preparation, court fees, typing and/or recording of court sessions etc.

(2021): Approx. 3% of all court staff (115 persons) are judicial trainees (reported under “2. Non-judge (judicial staff”).

(2020): Approx. 3% of all court staff (109 persons) are judicial trainees (counted under “2. Non-judge (judicial staff”).
No particular explanation can be given regarding the increase in the number of “3. Staff in charge of different administrative tasks and of the management of the courts” / Males.

(2017): Differences with previous evaluation cycles within categories (including male/female ratio):
The number of court staff is reported according to the actual work tasks of the staff. Between years, court staff can be assigned to different departments and tasks and therefore the variation of Rechtspfleger/Non-judge/Administrative staff categories and male/female ratio within categories can change, even though no major hiring or letting go for different categories of court staff had occurred. The relative differences in the Technical staff category are due to the small (absolute) number of staff.

(2016): Differences with previous evaluation cycles within categories (including male/female ratio):
The number of court staff is reported according to the actual work tasks of the staff. Between years, court staff can be assigned to different departments and tasks and therefore the variation of Rechtspfleger/Non-judge/Administrative staff categories and male/female ratio within categories can change, even though no major hiring or letting go for different categories of court staff had occurred. The relative differences in the Technical staff category are due to the small (absolute) number of staff.

(2015): The difference between 2014 and 2015 data is due to the methodology of gathering the data. In this cycle, all the courts were asked to provide the additional data to assure the accuracy of the answer. The reporting method was further improved and some adjustments were made according to the definition of “Rechtspfleger”, “Non-judge staff” and „Administrative staff“ categories.

(2014): In courts, there were 14,55 % of males and 85,45 % of females (judges included) on 31. 12. 2014. In this cycle the reporting method was further improved. The Supreme Court's strategic orientation according to this matter is to decrease the number of judges, while increasing the number of non-judge staff. The Supreme Court can, in order to ensure timeliness of proceedings, distribute additional finances for temporary employment of additional staff to individual courts.

(2013): The category 1 - "Rechtspfleger" includes court clerks, independent and higher judicial advisors in the field of commercial (court) register, land register and civil enforcement procedure, as they have the competence to decide on certain cases, judicial advisers in the field of civil enforcement, who have even slightly broader competences than judicial assistants. The category 2 includes judicial advisers and the remaining judicial assistants. The category 3 includes administrative support to the judge and court management – court director, human resources office, financing-accounting office. The category 4 refers to cleaning, security, system administration, drivers, etc.

(2012): In 2012, the category 1 - "Rechtspfleger" includes court clerks; the category 2 includes judicial advisers. The other court staff was not further categorised.

Spain

(General Comment): The Spanish judicial system distinguishes between three categories of non-judicial staff: Gestión Procesal, Tramitación Procesal and Auxilio Judicial. These bodies have their competences regulated at article 475 and other of the Organic Law of the Judiciary, it is very difficult to distribute them in the previous points of the question because the three groups have functions to assist Judges, make administrative tasks and have technical tasks. The sum of these bodies, destinated to Courts, is the response to Q.52.5 'Other non judge staff'.

(2021): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts:44651
In adition to that, there are 1147 Forensic Doctors.

(2020): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts:44289
In adition to that, there are 1144 Forensic Doctors.
Regarding the distribution males / females: This distribution can only be given from the Autonomous Regions of the direct competence of the Ministry of Justice (5 out of 17). In these Autonomoues Regions the proportion of females within the civil servants in Courts is 71'76% (therefore, 28'23% of males). This proportion is possibly applicable to the whole national system.

(2019): The data indicated in the chart as 'other non judge staff' (43556) includes the three kinds of civil servants that work in Courts (Gestión procesal, Tramitación procesal, Auxilio judicial). In addition to that, there are other 1122 Forensic Doctors.

(2018): 1121 Forensic Doctors

(2017): The figure for other non judge staff includes judicial civil servants who are in charge of the processing of files, communication acts, and other tasks, and are distributed in three categories (called Auxilio Judicial,Tramitación Procesal, Gestión Procesal). Forensic Doctors are a special body (not included in the figure provided in this question). Their total number (Forensic Doctors) at 4 April 2018 is 1003.
For 2017, in contrast with previous cycles, data on number of “other non-judge staff” excludes the civil servants that work in Prosecution Offices.

(2016): The figure for other non judge staff includes judicial civil servants who are in charge of the processing of files, communication acts, and other tasks, and are distributed in three categories (called Auxilio Judicial, Tramitación Procesal, Gestión Procesal). Forensic Doctors are a special body (not included in the figure provided in this question). Their total number (Forensic Doctors) at 4 April 2018 is 1003.

(2014): In 2014, there are 44 896 other non-judge staff (judicial clerks) and 3 667 judicial counsellors (this is the new name for the secretario judiciales since October 1st).

Question 052-1

Belgium

(2021): Source: Directorate P&O - HR Department Judicial staff - Directorate General Judicial Organisation, Federal Public Service Justice (FPS Justice)

(2020): Source: HR Service Judicial Personnel-Directorate General Judicial Organization, FPS Justice

Bulgaria

(General Comment): The regional courts in Bulgaria are first and second instance so this is a problem when giving data according to CEPEJ criteria, so this can explain the discrepancies here.
Item 1 "Total non-judge staff working in courts at first instance" includes staff from district and administrative courts. Item 2 "Total non-judge staff working in courts at second instance (court of appeal) level" includes staff from regional and appellate courts although in some types of cases the regional court is first instance.

(2021): 2. "Total non-judge staff working in courts at second instance": the increased number is due to newly opened vacancies for non-judge staff in view of strengthening the courts' activities.

(2020): This answer 5 204 - item 1 "Total number of court employees working in the courts of first instance" includes all employees of the district, regional and administrative courts, although in some types of cases the regional court is the second instance. The number 716 - item 2 "Total number of court employees working in the courts of second instance (appellate court)" includes all employees working in the courts of appeal in the country.

Cyprus

(2021): Positions that were vacant had been filled.

(2020): Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.

(2018): The Court of Appeal is also the Supreme Court

Denmark

(2020): -

France

(2021): It has not been possible to exclude the legal assistants and specialised assistants working for the public prosecution services for the breakdown of the data provided in the table above (359 in total for the First instance courts, Courts of appeal and Supreme courts, at national level). Also included in these numbers are the 'justice de proximité' contract staff whose recruitment has been authorised from 2020 onwards on the basis of the project contract (see comment of Q52). On the other hand, staff working in the SAR are excluded (contrary to Q52), i.e. 1 766 staff.
Source DSJ

Germany

(2021): Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances in the staff-assignment statistics of the Länder.

(2020): Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances in the staff-assignment statistics of the Länder.

(2018): Differentiating non-judge staff at first and second instance level based on their gender is not possible since the ordinary court system in Germany consists of three instances (local courts, regional courts and higher regional courts). At the same time, regional courts function as a court of appeal on fact and law but can also hear cases at first instance. Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances.

Greece

(2021): At the highest level there is the Court of auditors, whose judicial officials have been included above, the total number of them is 637 and consists of 219 men and 418 women. The above data were provided by the Directorate of judicial officials with the cooperation of Juststat of the Ministry.

(2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration

Ireland

(2021): The discrepancies with previous data are explained by staffing fluctuations.

(2020): The total non-Judge staff working in the courts includes staff of the Office of the CEO, Corporate Services staff, Strategy and Reform staff, ICT staff, Regions & C&D Operations, Superior Court Operations staff, as well as quasi-judicial and technical staff. These staff members work throughout the system, and not just in one of the district, circuit, high or supreme courts.

(2018): Question 52 - 1 was answered to provide a breakdown of staff working as registrars and in offices and other support staff in those offices. The reason the figures would not add up to the total is because the figures exclude administrative staff who are employed by the Courts Service in administrative areas away from front line offices, and who cannot be distributed between instances. The wording in the column for the total of such staff (1049) was given on the basis that this column used the same wording as the previous table which presumably covered all Courts Service staff.

Italy

(2018): Since 2018, the figures have also included court staff belonging to Administrative Justice.

Latvia

(2021): In general, at the end of 2021, there were many vacancies for court staff for the first and second instance courts, therefore also there are differences in the number of court staff. In the previous cycles, the numbers for court staff for the first and second instance courts were calculated a little bit different, there were included also vacancies.

(2018): Discrepancy due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate)

Luxembourg

(2021): The 27% increase in the number of second instance non-judge staff is explained in particular by the hiring of additional “référendaires”. At the Supreme Court, the number of non-judge female staff decreased by 50% in relative terms; in absolute terms, this corresponds to one woman being replaced by a male member of staff.

Malta

(2020): It is not possible to differentiate the non-judge staff according to these criteria.

(2018): It is not possible, at the moment, to differentiate the staff working at first instance from that working at second instance.

Netherlands

(2021): Comments from the SC:
1.Note that the above also includes the judicial and other staff working for the office of the Procurator General and Advocates General at the Dutch Supreme Court (who are not part of the Dutch public prosecution office).
2.Note that the Dutch Supreme Court has outsourced various tasks such as building maintenance, technical services, facility management, reception, security, cleaning and catering. The individuals performing these services are therefore not included in the numbers above.

(2018): The total of non-judge staff does not include staff of the High Court.

Poland

(2020): Data from the supreme court's human resources Department.
In 2020 data include also employees of the Supreme Administrative Court

Portugal

(2020): We confirm the increase in 2020 in the category of non-judge staff working in courts at Supreme Court level in the Supreme Court of Justice and the Supreme Administrative Court, with a special focus on the administrative and tax courts.

(2018): Since 2016 there has been an increase of non-judge staff to meet the needs of additional staff. There were no legislative or other changes that could directly justify the increase.

Romania

(2021): A higher percentage of occupation of vacant positions for total non-judge staff working in courts at Supreme Court level.

(2020): 3. Total non-judge staff working in courts at Supreme Court level-
The difference between 2018 (comunicated data) and 2020 is pointedly given by the difference in the methodology for reporting data within the human resources sector. Thus, for 2018, in the total number of auxiliary staff (non-judge staff working at Supreme Court level) was not included the number of staff represented by ushers, procedural agents, drivers. Also, rechecking the communicated data for 2018 on this point (point. 3), it is confirmed that the total number of auxiliary staff (occupied positions) at the High Court of Cassation and Justice is 230 (2018 data, including the staff represented by the professional categories mentioned above).

Slovak Republic

(2021): Total non-judge staff working in courts at Supreme Administrative Court level - 59 total; 18 males and 41 females, included in line 3.. Some of the staff moved to the Supreme Administrative Court and some left the judicial system.

(2018): All data were provided by the central institution for the court management, The Department of Human Resources Development of the Ministry of Justice

Slovenia

(General Comment): Besides profiles typically working in courts, the non-judge staff at the Supreme court includes also staff at the Centre for Informatics (see Q62-1) – approx. 20 employees, mostly system administrators/engineers (counted at Q52 under “4. Technical staff”) and project managers (counted at Q52 as “3. Administrative staff”).

(2020): No particular explanation can be given regarding the increase in the number of “3. Total non-judge staff working in courts at Supreme Court level” / Males.

Spain

(2018): These figures include the number of "letrados de Administración de Justicia", which are the CEPEJ equivalent of "Rechtspfleger".

Question 055

Austria

(General Comment): Data is presented in full time equivalent.

(2014): The numerical values provided in the table are rounded. The accurate figures are: total – 344,83 (171,52 males and 173,31 females); prosecutors at first instance level – 308,69 (147,13 males and 161,56 females); prosecutors at second instance (court of appeal) level – 20,94 (13,04 males and 7,90 females); prosecutors at Supreme Court level – 15,20 (11,35 males and 3,85 females).

(2012): In 2012, the various tasks were more exactly assigned to the number of full time equivalents - dealing with tasks of the prosecution on the one hand and the administrative tasks on the other hand.

Belgium

(2021): Source: FPS Justice - Directorate General for the Judiciary, HR Department of the Judiciary, Notaries and Enforcement agents

(2020): Support Service of the College of Public Prosecutors

(2014): In 2014, the number of professional prosecutors includes the heads of division of the 15 public prosecutors' offices and the heads of the 8 prosecution offices within labour courts.

Bulgaria

(General Comment): The provided data refers to the actual number of employed persons for the year of reference.

(2016): 1511 is the total number of working prosecutors at 31.12.2016; 888 prosecutors at first instance level includes – the prosecutors from 113 Regional Prosecutor`s Offices and 1 Specialized Prosecotr`s Office; 500 prosecutors work in 28 District Prosecutor`s Offices, 7 Appelate Prosecutor`s Offices and 3 Military District Prosecutor`s Offices; 123 are the prosecutors working in Supreme Prosecutor`s Office of Cassation and Supreme Administrative Prosecutor`s Office and 1 Prosecutor General. (The indicated numbers do not include the number of the investigative magistrates in the investigative departments at District Prosecutor`s Offices and National Investigation Service and their administrative heads.

(2014): For 2014, the number of prosecutors acting at 1st instance includes prosecutors of the regional prosecutor's offices, specialized prosecutor's offices and the military prosecutor's offices. The number of prosecutors acting at 2nd instance includes prosecutors from district and appellate prosecutor's offices. The number of prosecutors at Supreme Court level includes prosecutors from the Supreme Prosecutor's Office of Cassation, Supreme Administrative Public Prosecutor's Office, and the Prosecutor GeneralIn contrast with the 2012 evaluation, the number of investigators in the District Investigation Departments at the District Prosecutor's Offices and the National Investigation Service is not taken into consideration for 2014.

(2012): For 2012, the total includes 512 magistrates with position of "investigator in the Investigation Department at the District Prosecution Office". Conversely, these 512 magistrates are not subsumed in the number of prosecutors at 1st instance level. The number of prosecutors at 2nd instance level including Prosecutor's Office of Appeal and Military District Prosecutor's Office encompasses 451 prosecutors and 433 investigators in the Investigation Departments at the District Prosecution Offices and military investigators. The number of prosecutors at Supreme Court level includes 128 prosecutors and 79 investigators at the National Investigation Service.

Croatia

(General Comment): The provided data encompasses all officials in the public prosecutors' offices, including heads of the public prosecutors' offices (the Public Prosecutor of the Republic of Croatia, county and municipal public prosecutors, the head of the Bureau for Combating Corruption and Organised Crime) and all public prosecutors deputies. The number of prosecutors at the first instance level includes all municipal public prosecutors, their deputies, as well as the head of the Bureau for Combating Corruption and Organised Crime and his deputies. The number of prosecutors at the second instance (court of appeal) level includes all county public prosecutors and their deputies. The number of prosecutors at the Supreme Court level includes the Public Prosecutor and his deputies.

(2018): The above information includes all officials in the public prosecutor's offices – all public prosecutors (heads of prosecution offices) and public prosecutors' deputies (deputies of the Public Prosecutor, deputies of the Head of the Bureau for Combating Corruption and Organised Crime and deputies of the county and municipal public prosecutors).
The number of prosecutors at the first instance level includes all municipal public prosecutors (heads of municipal prosecution offices and Head of the Bureau for Combating Corruption and Organised Crime), their deputies, as well as the deputies of the Head of the Bureau for Combating Corruption and Organised Crime. The number of prosecutors at the second instance level (court of appeal) includes all county public prosecutors (heads of the county prosecutors' offices) and their deputies. The number of prosecutors at the supreme court level includes the Public Prosecutor General and his deputies.

(2012): In 2012, the public prosecutors' Office of the Republic of Croatia employed 21 officials. The county public prosecutors' offices employed 155 officials, and the municipal public prosecutors' offices employed 410 officials. Out of 617 officials, 385 or 62.4% were women. The number of officials remained the same as in 2011. As of 31 December 2012, 7 public prosecutor's posts and 130 deputy public prosecutor's posts were vacant.

Cyprus

(2020): The number includes also legal advisors to the Attorney General's office.
The number increased because more positions of prosecutors were approved.

(2014): All prosecutors appear before all courts.

Czech Republic

(General Comment): The Czech Republic is endowed with a system of 4 levels of State prosecution offices: district, regional, high and supreme. The number of high public prosecutors is included in the number of prosecutors at second instance level.

Denmark

(General Comment): The public prosecutors are the Director of Public Prosecutions, the state prosecutors, the police directors as well as the persons who are assumed to assist them in the judicial processing of criminal cases.
Organizationally, the Prosecution Service consists of the Director of Public Prosecutions and state prosecutor's offices (central prosecution service) with associated police districts (local prosecution service).
The Director of Public Prosecutions and selected employees appear before the Supreme Court. At the end of 2021, 58 prosecutors were employed at the Director of Public Prosecutions office. 6 of them appear before the Supreme Court. The Director of Public Prosecutions is superior to the other public prosecutors and supervises them and handles complaints about decisions made by the state prosecutors office as the first instance. The state prosecutors' offices appear before the high courts (second instance – court of appeal). The state prosecutors supervise the police directors' handling of criminal cases and handle complaints about decisions made by the police directors regarding criminal prosecution.
The directors of police and the public prosecutors who are employed by them appear before the district courts.
The number is the actual number of employees in full-time equivalent as of December 2021. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2021 and scaled up to a full year. The actual numbers of full-time equivalents are calculated as digitals numbers which is not possible to add in the questionnaire. This is why the total number of prosecutors does not add up when compared to the number of males and females.

(2021): The number is the actual number of employees in full-time equivalent as of December 2021. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2021 and scaled up to a full year. The actual numbers of full-time equivalents are calculated as digitals numbers which is not possible to add in the questionnaire. This is why the total number of prosecutors does not add up when compared to the number of males and females.

(2016): The observed discrepancies are due to ordinary changes in staffing.

(2014): The variations over the period 2012-2014 are due to the fact that in 2012, information was missing about prosecutors engaged in tasks concerning administrative cases (Ledelsessekretatiat) and prosecutors employed by the national police (Rigspolitiet).

Estonia

(General Comment): The categorization of questions 55 and 56 regarding public prosecutors do not exist in Estonia.

Finland

(General Comment): The National Prosecution Authority comprises the Office of the Prosecutor General that acts as the general administrative unit, and five prosecution districts: Southern Finland, Western Finland, Northern Finland, Eastern Finland and Åland. The National Prosecution Authority has 34 offices around Finland. The Prosecutor General is the supreme prosecutor and the head of the prosecution service. The Prosecutor General directs and develops prosecutorial activity by issuing general instructions and guidelines to the prosecutors. She/he also appoints district prosecutors. The Prosecutor General may take over a case from a prosecutor, but cannot order a prosecutor to decide the case in any given manner. She/he can also self-decide on the bringing of charges and designate a prosecutor to pursue the case in the courts. The Deputy Prosecutor General decides the matters in his/her competence on the same authority as the Prosecutor General. He/she also acts as a deputy for the Prosecutor General when necessary. For regular prosecutorial tasks, the Office of the Prosecutor General has state prosecutors whose jurisdiction covers the entire country. Most criminal matters (89 256 cases annually) are dealt with by the prosecution areas. The Office of the Prosecutor General deals mainly with criminal cases with wider significance to society as a whole, a few dozen every year. Prosecutors in Finland are not bound on Court instances, and every prosecutor is expected to, in a normal situation, to handle and prosecute the criminal case all the way to the Supreme Court, if needed.

(2020): Prosecutors in Finland are not bound on Court instances.

France

(2021): Data taken from an extraction of the LOLFI SIRH - Number of public prosecutors on 31/12/2021. The values are expressed in FTEs.
Source DSJ
The data have been rounded upwards from 0.5 and downwards below, with the exception of the data relating to the number of male prosecutors at the Courts of appeal (the exact figure is 249.6) in order to ensure vertical consistency.

(2020): Only the judicial order is concerned

(2014): For 2014, State prosecutors, heads of public prosecution services, are included.

(2012): For 2012, only prosecutors of courts of law appointed by 31 December 2012 were counted.

Germany

(General Comment): The information relates to the number of job shares for public prosecutors. There are no absolute figures for the number of persons. The information on the job shares count a judge working full-time as 1. A judge working part-time is counted as the fraction of 1 which corresponds to the proportion of his/her working hours to full-time (e.g. 0.5 for a judge working half the usual number of hours).

(2021): Figures represent full-time equivalents as of 31. December 2021
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a ‘Pact for the Rule of Law’. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
It should be noted that one of goals of the ‘Pact for the Rule of Law’ is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

(2020): Figures represent full-time equivalents as of 31. December 2020
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a ‘Pact for the Rule of Law’. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.

It should be noted that one of goals of the ‘Pact for the Rule of Law’ is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

(2016): Figures indicate the number of full-time equivalent staff (not the number of individuals). A prosecutor working full hours is counted as a full-time equivalent (i.e. 1). A prosecutor working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a prosecutor working half the usual number of hours).

Greece

(General Comment): In the position of Paredron of the court of First Instance and prosecutor's office Of civil and criminal courts are appointed graduates of the National School of judges, according to what is defined in Article 36 of N. 4871/2021 (a' 246). The graduates from the directions of civil-criminal judges and prosecutors of the National School of judges are appointed in the order which have in the relevant tables and are placed preferably, respectively, in the courts of First Instance and in Public Prosecutors ' Offices In Athens, Piraeus, Thessaloniki, Patras, Heraklion and Larissa. The paredroi of First Instance and the prosecutor's office have ten (10) months trial service, during of which they have all the rights and obligations of the ordinary judicial officer and inspected, like regular judges. The reports of the paredroi of the court of First Instance on performance, statistics of their performance and any other useful information or information on the performance or their suitability are stored in a specialist individual file, which, after the end of the trial service the file is submitted to the Supreme Court Council through the Minister of Justice.

(2021): The above data are given by the Directorate of organization and operation of Justice with the cooperation of JUSTSTAT.

(2020): Positions by law have increased.Gender data are not kept.

Hungary

(2021): On 31 December 2021, two prosecutors were serving in the Ministry of Justice, on a temporary basis. They are included in the total number of prosecutors; however, they are not taken into account when giving the number of prosecutors serving at different instances (court levels). All prosecutors are appointed to a full-time job; however, it occurs that some prosecutors perform part-time service on a temporary basis for various reasons, such as raising children.
The 'number of prosecutors at first instance level' is an aggregate of the number of prosecutors serving at district-level prosecution services and other prosecution services equivalent to that level, as well as the number of prosecutors serving at high prosecution services. A part of the prosecutors serving at high prosecution services proceed also at second instance (high court) level. The number of prosecutors serving at high prosecution services is 520 (226 males, 294 females), while the number of prosecutors serving at district-level prosecution services (other prosecution services equivalent to that level) is 1210 (439 males, 771 females).
The 'number of prosecutors at second instance (court of appeal) level' means the number of prosecutors serving at appellate prosecution services.

(2016): Another 9 prosecutors were temporarily serving in the Ministry of Justice. They are included in the total number of prosecutors, but we did not take them into account at each level.

Ireland

(General Comment): Allocation of prosecutors work is not in all instances divided as per the questions above. The sub-categories at 1, 2 and 3 of the question posed do not apply in the Irish system.

(2020): Our court going staff number at the 31st December 2020 is 128 - (50 male / 78 female). This figure includes our Prosecutors and Technical staff - Legal Executive. It also includes 1 Trainee Solicitor. In our Office our Technical Staff and Trainee Solicitors are court going staff and manage the running of a prosecution at trial in the same manner as some of our Prosecutors. In relation to the increase in staff resources for the ODPP, and the context for same, please see the forewords of our Annual Report 2020 and our Annual Report 2019 available at https://www.dppireland.ie/publication-category/annual-reports/.

(2018): There were 108.7 fulltime equivalent lawyers (fte) (headcount 111) on the payroll of the Office of the Director of Public Prosecutions at 31 December 2018 – 65.6 fte (67 headcount) of these were female and 43.1 fte (44 headcount) were male.

(2016): Of the staff complement in the Office of the Director of Public Prosecutions at the end of the reference year, 102 were of professional or technical grade at Prosecutor equivalent level or above.

(2014): Parts' of Full Time Equivalents were counted in decimal figures and have been rounded up. The total represents the number of qualified Solicitors and Barristers employed directly in the Office of the Director of Public Prosecutions (DPP). A proportion of these lawyers represent the DPP in the District Court. Members of the police force also prosecute in this court within a prescribed 'delegated authority' from the DPP. Members of the independent Bar act on behalf of the DPP, on a self-employed basis, in first instance and appellate courts. There are a further 32 State Solicitors contracted to provide a solicitor service to the DPP in cases heard outside of the capital.

Italy

(2016): There is no specific explanation concerning the increase in the total number of prosecutors at Supreme Court level. However, numbers are small and therefore percentage changes vary more harshly.

Latvia

(2020): The increase in the number of prosecutors in court district level prosecutor's offices is related to the imposition of an obligation on the prosecutor of the court district level prosecutor's office, and not on the chief prosecutor of the district (city) prosecutor's office to perform the duties of a higher prosecutor.
Regarding the decrease in the number of women working in the Prosecutor General's Office, it must be concluded that in total the number of women working has decreased by 8 persons. One of the reasons could be reaching the maximum age for performing the duties prescribed by law or the death of a person.

(2012): During 2011 and 2012, prosecutors' offices increased the number of posts which resulted in the appointment of new prosecutors. In order to decide on the promotion of prosecutors, their professional qualification has been evaluated and their quality of work performance analysed, as well as their participation in trainings, work statistical indicators, etc. Pursuant to the collected data, more male prosecutors have been promoted to higher posts.

Lithuania

(2020): After the reorganization of the prosecution service in 2011, 5 second instance prosecutors' offices were merged with 51 separate first instance prosecutor's office in their area of operation, and thus 5 regional first-second instance prosecutor's offices were established.

(2014): In 2012, the 56 territorial prosecutor's offices have been reorganised into 5 regional prosecutor's offices with 10 district prosecutor's offices functioning inside them (first instance and second instance levels have been combined). Currently, only two instances exist.

(2012): In 2012, after reorganization of the prosecution service, the first and the second instances have merged. Currently, two instances exist instead of three. Besides, the total number of prosecutors has decreased because some prosecutors have left the service, but no new prosecutors have been recruited.

Luxembourg

(General Comment): The figure in point 3 includes both second instance and Supreme Court prosecutors, as they are grouped together in the Superior Court of Justice, which is subdivided into the Court of Appeal and the Court of Cassation.

(2018): Le personnel des juridictions judiciaires et administratives a connu une croissance soutenue ces dernières années, tel que prévu par la loi modifiée du 7 mars 1980 sur l'organisation judiciaire. Ceci explique les variations importantes observées entre 2016 et 2018 au niveau du personnel de la magistrature et du personnel non-juge. Les magistrats appartenant à la cellule de renseignement financier (CRF) sont dorénavant exclus de la question 55.1 (suite au détachement de la CRF du Parquet de Luxembourg) puisqu'ils n'exercent plus de fonction juridictionnelle proprement dite. Au total, la CRF compte 4 magistrats et un attaché de justice en 2018. L'effectif du Parquet d'arrondissement reste toutefois inchangé suite à la création des nouveaux postes affectés à la CRF
Les magistrats du pool de complément sont inclus dans les chiffres de la question 55.3.

(2016): The number of prosecutors indicated here as working at the Supreme Court corresponds to the number of prosecutors working at the Superior Court of Justice (which includes prosecutors intervening at the Court of Appeal and Court of Cassation level).

(2014): The number of male public prosecutors decreased between 2012 and 2014, while the number of female public prosecutors increased for the same period. These variations have for sole explanation the normal progress of career of magistrates of the public prosecution office at first instance.

Malta

(General Comment): All the lawyers working in the Office of the AG prosecute cases in the criminal courts, but it is not possible, as yet to distinguish between 1st and 2nd Instance Courts. All full-time lawyers have been included in the above figure except the AG herself.

(2020): The increase in the number of lawyers working at the Office of the AG follows the reform in 2020 whereby the AG has taken up exclusively the role of prosecutor general (the advisory role to government has been vested in the State Advocate). Given this special focus, the Office of the AG has been recruiting more lawyers in order to meet the case demands of the courts.

(2016): All the lawyers at the Office of the Attorney General work both in Court as well as advisers to the various Ministries and Departments. All prosecuting officers at the Office of the Attorney General act at all court levels. Thus, prosecutors are not classified according to the case instance.

(2014): These past few years there has been an increase in the number of female law graduates, which will definitely reflect in the employment trends within this sector.

Netherlands

(General Comment): The Dutch Supreme Court does not have public prosecutors. The office of the Procurator General and Advocates-General at the Dutch Supreme Court is separate from Dutch public prosecution and the Ministry of Justice. They have a different function.

(2020): The Supreme Court does not have (public) prosecutors. The office of the procurator general and attorneys general that the Supreme Court houses, is separate from the public prosecution and does not function as prosecution. They have a different function.

(2016): total 927,5 358,12 569,38
1 842,25 312,72 529,53
2 85,25 45,40 39,85

(2014): For 2014, the number of prosecutors at first instance level includes 8 prosecutors who are still in education (7 females; 1 male). Prosecutors at Supreme Court level are not employees of the National Prosecution Service and therefore not included in the total.

Poland

(General Comment): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. Whereas under item 3 is the number of prosecutors in the position of a prosecutor of the National Prosecutor's Office. The total is higher than the sum of the subcategories because it takes into account the number of prosecutors employed in regional prosecutor's offices, since according to Article 16 of the Law of 28 January 2016 - Law on Prosecutor's Office (Journal of Laws of 2021, item 66) the common organizational units of the prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices. All items (1-3) include prosecutors for military matters.
The inclusion of the number of prosecutors employed in regional prosecutors' offices only in the total number of prosecutors is due to the design of the table. The table allows prosecutors to be entered: 1. first level, 2. second level 3. highest level. The table does not provide an opportunity to depict the full structure of the prosecutor's office in Poland, which consists of four levels: district, circuit and regional prosecutor's offices and the National Prosecutor's Office with a rank equivalent to the Supreme Court. Regional prosecutors' offices are a separate ('third') level of prosecution and the number of prosecutors employed in them cannot be 'split into instances'.

(2021): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. In contrast, under item 3 is the number of prosecutors in the position of prosecutor of the National Prosecuting Authority. The total is higher than the sum of the sub-categories, as it takes into account the number of prosecutors employed in regional prosecutor's offices - a total of 402 prosecutors (154 women and 248 men), as, pursuant to Article 16 of the Act of 28 January 2016 - Law on the Public Prosecutor's Office (Journal of Laws of 2022, item 1247), the common organisational units of the public prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices.
All items (1 - 3) include military prosecutors, of whom 77 are employed at the district prosecutor's office level, including 19 women and 58 men; at the regional prosecutor's office level, 45 military prosecutors, including 9 women and 36 men; and at the National Prosecutor's Office, 17 military prosecutors (4 women and 13 men).

(2020): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. Whereas under item 3 is the number of prosecutors in the position of a prosecutor of the National Prosecutor's Office. The total is higher than the sum of the subcategories because it takes into account the number of prosecutors employed in regional prosecutor's offices - a total of 391 prosecutors (151 women and 240 men), since according to Article 16 of the Law of 28 January 2016 - Law on Prosecutor's Office (Journal of Laws of 2021, item 66) the common organizational units of the prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices. For 2020, all items (1-3) include prosecutors for military matters, who at the level of the district prosecutor's office are employed by 85, including 22 women and 63 men; at the level of the regional prosecutor's office - 38 prosecutors for military matters, including 8 women and 30 men, and at the National Prosecutor's Office - 13 prosecutors for military matters (2 women and 11 men).

(2018): Within the organizational structure of general organizational units of the prosecution office, there are Appellate Public Prosecutor’s Offices, which function as a third rank and employ altogether 367 prosecutors (149 women and 224 men). Additionally, 65 prosecutors of military affairs (including 16 women and 49 men) are employed at the level related to the Regional Public Prosecutor’s Office; 30 prosecutors of military affairs (including 6 women and 24 men) - at the level related to the District Public Prosecutor’s Office, and 5 prosecutors of military affairs (5 men) - in the National Public Prosecutor’s Office.

Portugal

(General Comment): The communicated data encompasses the number of magistrates of the Public Prosecution Service in courts of first instance, second instance and high superior courts, except the Constitutional Court.

(2020): No specific explanation for the numbers above.

(2018): In absolute terms the decrease from 2016 to 2018 is from 7 to 5 female prossecutors, which is not significative in absolute terms, but acquires a more relevant expression in relative terms.

(2012): The increase in the number of female prosecutors is due to the general tendency of increase of female prosecutors in the last decade at first instance courts. It is natural that gradually the proportion of female prosecutors in the higher courts tends to grow as a result of their career progress. The number of prosecutors in the High Judicial Court and in the High Administrative Court, increased. In particular, in the High Administrative Court there was a strong reinforcement of these professionals in 2011 in order to respond to a pressing need of prosecutors in this court.

Romania

(General Comment): In Romania there are four level of courts/prosecution offices attached to these courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

(2018): In Romania there are four level of courts/prosecution offices attached to these courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

(2014): The prosecutor’s offices are established in the following hierarchy: the prosecutor’s offices attached to the courts of law (point 1 of the table), the prosecutor’s offices attached to tribunals and prosecutor’s offices attached to the courts of appeal (point 2), and the Prosecutor’s Office attached to the High Court of Cassation and Justice (point 3).

(2012): The prosecutor’s offices are established in the following hierarchy: the prosecutor’s offices attached to the courts of law (point 1 of the table), the prosecutor’s offices attached to tribunals and prosecutor’s offices attached to the courts of appeal (point 2), the Prosecutor’s Office attached to the High Court of Cassation and Justice (point 3).

Slovak Republic

(General Comment): The number of prosecutors at the Supreme Court level also includes prosecutors of the Special Prosecution Bureau. The latter deals with crimes of corruption and the most severe offences including organized crime. It intervenes in first instance, but acts as an organizational part of the General Prosecutor’s Office.

Slovenia

(General Comment): The number is reported in FTE.
In the Slovenian criminal justice system state prosecutors are exclusively authorized to conduct public prosecution in criminal matters on behalf of society and in the public interest. The Constitution and law guarantee autonomy in status and functioning of state prosecutors. Decisions made by the state prosecutor shall not be interfered with, except by way of general instructions and assigning of a case in the manner determined by the law.
Slovenian state prosecutors perform their function in 13 organizational units – prosecution offices. There are 11 District State Prosecutor's Offices and one Specialized State Prosecutor's Office of the Republic of Slovenia, where local, district and senior state prosecutors are positioned. At the Office of the Prosecutor General of the Republic of Slovenia supreme state prosecutors and the State Prosecutor General perform their functions. Some state prosecutors of lower ranks are assigned to the office perform demanding professional tasks.
There are no higher state prosecutor's offices as the proceedings at the courts of appeal are governed by the district prosecutor's offices. According to the State Prosecution Service Act prosecutors with the rank of at least local state prosecutor may represent a case at local courts, prosecutors with the rank of at least district state prosecutor may represent a case at district courts, prosecutors with the rank of at least senior state prosecutor may represent a case before higher courts and only supreme state prosecutors may represent a case at the Supreme Court. Local state prosecutors may also appear at district courts, if authorized by the head of state prosecutor's office for certain categories of matters, for a particular matter, for certain categories of procedural acts or for a particular procedural act. Local and district prosecutors may in their cases appear along with a senior prosecutor at courts of appeal, if authorized by the head of an appellate division of the state prosecutor's office for a particular case. Senior and supreme state prosecutors are competent to represent a case at before first instance courts.
Local and district prosecutors are reported as prosecutors at first instance level, senior prosecutors as prosecutors at second instance level and supreme prosecutors as prosecutors at Supreme Court level, without regard to the court instance where they perform their function, or that they are assigned to another institution for a limited period of time (e.g for the administration of State Prosecutorial Council).
The number of posts of state prosecutors is set by the Government's Regulation. However the actual number of state prosecutors is lower than the number se by regulation due to different factors.

(2021): Before 2021, data was reported in gross numbers. For 2021 data, the FTE format is observed.
The above data does not include six State prosecutors who perform other duties (assigned to The Council of State Prosecutors, appointed to Eurojust, the European Public Prosecutor and the European Delegate Prosecutor).

(2020): The information is in form of gross data. According to the methodology used for reporting judges and court staff (FTE) – by which part-time employees are converted to full-time time by the calculation of working hours, the number amounts to 193, as a number of prosecutors are not working full time.

(2016): Slovenian state prosecutors perform their function in 13 organizational units. There are 11 district prosecutor's offices and one Specialised State Prosecutor's Office of The Republic of Slovenia, where local, district and higher state prosecutors are positioned. At The Office of the Prosecutor General of the Republic of Slovenia supreme state prosecutors and State Prosecutor General perform their functions. Here are also some state prosecutors of lower ranks assigned to perform demanding professional tasks.
There are no higher state prosecutor's offices as the proceedings before the courts of appeal are governed by the district prosecutor's offices. According to the State Prosecutor Act prosecutors with the rank of at least local state prosecutor may represent a case before local courts, prosecutors with the rank of at least district state prosecutor may represent a case before district courts, prosecutors with the rank of at least higher state prosecutor may represent a case before higher courts and only supreme state prosecutors may represent a case before the supreme court. Local state prosecutors may also appear before district courts if authorized by the head of a state prosecutor's office for certain categories of matters, for a particular matter, for certain categories of procedural acts or for a particular procedural act. According to amendment of legislation in 2015 local and district prosecutors may in their cases appear along with a higher prosecutor before the courts of appeal if authorized by the head of an appellate division of the state prosecutor's office for a particular case. Higher and supreme state prosecutors are competent to represent a case also before first instance courts.
In the context of question 55 we counted local and district prosecutors as prosecutors at first instance level (164), higher prosecutors as prosecutors at second instance level (42) and supreme prosecutors as prosecutors at Supreme Court level (11) without regard of the rang of court before they perform their function in fact or if they are assigned to other institution for a limited period of time (e.g for the administration of State Prosecutorial Council). The information is in form of full-time equivalent.

(2014): In November 2011, the new State Prosecutor Act came into force. It dissolved the special department of the Office of the State Prosecutor General, responsible for the 2d instance level. Proceedings before courts of appeal are now governed by the 4 State circuit prosecutor offices in towns where the higher courts are located. Prosecutors are organised in 12 offices (11 circuit offices and one Specialised State Prosecutor's Office, where circuit and higher prosecutors work) and the Supreme State Prosecutor Office (where supreme State prosecutors and the general State prosecutor work). The function "assistant State prosecutor" changed in "local State prosecutor". The Specialised State Prosecutor's Office for dealing with the most severe criminal offences was established.

(2012): In November 2011, the new State Prosecutor Act came into force. It dissolved the special department of the Office of the State Prosecutor General, responsible for the 2d instance level. Proceedings before courts of appeal are now governed by the 4 State circuit prosecutor offices in towns where the higher courts are located. Prosecutors are organised in 12 offices (11 circuit offices and one Specialised State Prosecutor's Office, where circuit and higher prosecutors work) and the Supreme State Prosecutor Office (where supreme State prosecutors and the general State prosecutor work). The function "assistant State prosecutor" changed in "local State prosecutor". The Specialised State Prosecutor's Office for dealing with the most severe criminal offences was established.

Spain

(General Comment): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories.
Article 34 of Law 50/1981, (Organic Statute of the Public Prosecutor's Office) distinguishes three categories:
1st Chamber Prosecutors of the Supreme Court, equal to Magistrates of the High Court. The Deputy Prosecutor of the Supreme Court will be considered the President of the Chamber.
2nd Prosecutors, equated to Magistrates.
3. Lawyers-Prosecutors, equated to Judges.

(2021): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, First category ("Fiscales de Sala") Prosecutor of Chamber: Total 32, Males 21, Females 11 (this category includes the Prosecutors of chamber of Supreme Court).
Second. "Fiscal": Total 1825, Males 701, Females 1124
Third: "Abogado-Fiscal": Total 774, Males 178, Females 596

(2020): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, First category ("Fiscales de Sala del Tribunal Supremo") Supreme Court Prosecutor of Chamber: Total 50, Males 36, Females 14
Second. "Fiscal": Total 1830, Males 700, Females 1130
Third: "Abogado-Fiscal": Total 681, Males 158, Females 523

(2018): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, Total 33, Males 26, Females 7
Second) Total 1779, Males 696, Females 1083
Third) Total 653, Males 161, Females 492

(2016): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First) Total 25, Males 19, Females 6
Second) Total 1826, Males 738, Females 1088
Third) Total 622, Males 155, Females 467

Question 060

Belgium

(2020): V: 1694
M: 730

Bulgaria

(2021): The decrease in the number of staff (non-public prosecutors) in the prosecutor's offices is due to the closing of the majority of the first-instance prosecutor's offices and their merger with those in the regional centers. Thus, the managing and duplicating positions in the closed prosecutor's offices were cut.

(2014): For 2014, the number of actually working servants in the Prosecutors office at 31 December 2014 (2918,5) includes also 66 servants working in the field of recreational craft. The main source of this data is the establishment plan of the Prosecutors office of the Republic of Bulgaria for the number of prosecutors and investigators and a reference for the number of employees in the Prosecutors office of the Republic of Bulgaria at December 2014.

(2012): For 2012, the number of actually employed servants in the Prosecutors Office at 31 December 2012 (2989,5) includes 177 servants in the recreation department.

Cyprus

(2021): In 2021, a significant number of public prosecutors were appointed, as new posts have been approved and vacant posts have been filled.

(2020): trainees are not included

Denmark

(General Comment): In Denmark, the staff attached to the public prosecution service (non-public prosecutors) are shared between the police and the prosecution offices (first instance level).

(2021): The number is the actual number of employees in full-time equivalent as of December 2021. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2021 and scaled up to a full year. The actual numbers of full-time equivalents are calculated as digitals numbers which is not possible to add in the questionnaire.

(2020): In 2020, lawyers and police personnel attached to the Prosecution Service are included in the figures.

(2018): The staff attached to the public prosecution service (non-public prosecutors) are shared between the police and the prosecution offices (first instance level).

Estonia

(2020): More males have been hired.

Finland

(2021): In 2021, more staff was hired.

(2018): More staff has been recruited.
The number of males has increased.

France

(2021): 359 = legal assistants and specialised assistants
Source DSJ

(2016): It should be recalled that court staff are assigned to the services of judges and public prosecutors, and details of this breakdown are not available. For very specific staff, the data are nevertheless known: 60 specialised assistants and 49 legal assistants.

(2014): Staff assisting the public prosecution office are comprised in the whole of the registry staff under the direction of a registry director. The latter works closely with the chairman of the court and the public prosecutor at the court. Therefore, data on staff of the public prosecution office are, to this date, indistinct from those of court staff (question 52). Moreover, some very specialised public prosecution services can be assigned to specialised assistants, sometimes from other jurisdictions, to help them deal with the most complex proceedings. These specialised assistants are at number 44 (including 23 women) in 2014.

Germany

(2021): This figure includes:
- The number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte"), the staff at the public prosecution offices and associate prosecutors' offices based at the Regional Courts as well as the staff at the public prosecution offices based at the Higher Regional Courts (full-time equivalent staff as of 31. December 2021)
- The staff (222 in total, 140 female) at the Office of the Federal Prosecutor General (headcount as of 31. December 2021).

(2020): This figure includes:
- The number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte" – see question 57), the staff at the public prosecution offices and associate prosecutors' offices based at the Regional Courts as well as the staff at the public prosecution offices based at the Higher Regional Courts (full-time equivalent staff as of 31. December 2020)
- The staff (207 in total, 135 female) at the Office of the Federal Prosecutor General (headcount as of 31. December 2020).

(2018): This figure indicates the number of full-time equivalent staff (not the number of individuals).
- It includes the number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the
Local Courts – in German: "Amtsanwälte" – see question 57).
- It covers the public prosecution offices and associate prosecutors' offices based at the Regional Courts (1st instance), the public prosecution offices based at the Higher Regional Courts (2nd instance), and the Office of the Federal Prosecutor General (in this case:
number of individuals).

(2016): This figure indicates the number of full-time equivalent staff (not the number of individuals).
- It includes the number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte" – see question 57).
- It covers the public prosecution offices and associate prosecutors' offices based at the Regional Courts (1st instance), the public prosecution offices based at the Higher Regional Courts (2nd instance), and the Office of the Federal Prosecutor General (in this case: number of individuals).

(2014): According to 2014 data, the indicated figure reflects job shares (not a number of heads). The data submitted relate to the cut-off date of 31 December 2013. No figures are available that are more up-to-date. The number refers to the staff of the public prosecutor’s offices and the offices of associate public prosecutors at the local courts (courts of first instance), of the public prosecutor’s offices at the higher regional courts (courts of second instance), and of the office of the federal prosecutor (Public Prosecutor General at the Federal Court of Justice; in the latter case, the figure reflects the number of heads).

Greece

(2021): The modified response came after the cooperation of the Directorate of judicial officials with Juststat.

(2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration.

Ireland

(2018): There were 95.25 fulltime equivalent (fte) administrative/technical staff (headcount 102) on the payroll of the Office of the Director of Public Prosecutions at 31 December 2018 – 54.85 fte (61 headcount) of these were female and 40.40 fte 41 headcount) were male.

(2016): Of the staff complement in the Office of the Director of Public Prosecutions at the end of the reference year, 77 were administrative grades.

(2014): In the frame of the 2014 exercise, parts of Full Time Equivalents were counted in decimal figures and have been rounded up or down as appropriate.

Italy

(2021): The number of staff has increased due to the hiring of new personnel through public competition.

Latvia

(2021): Total number of staff working at the Prosecution Office is 357 (103 male employees, 254 female employees): 187 employees (35 male and 152 female) are staff in charge of administrative functions and management of Prosecution Office. 75 employees (40 male and 35 female) perform technical duties. 95 employees are prosecutor assistants (28 male and 67 female). We would like to emphasize that in Latvia assistant prosecutors do not perform the functions of drafting procedural documents. Main duties of assistant prosecutors are preparation of criminal case material copies; drawing up of the case list documents, sewing and numbering of the case materials; preparation of materials to be issued to the process participants; certification of the correctness of document derivatives; delivery of the prepared materials to the addressees and reception of the documents.

(2014): The 2014 data encompasses the administrative director, deputies of the administrative director and other staff of the administrative director office – staff of the Chancellery, interpreters, IT specialists, personal specialists, car drivers, auditors (in total 318 employees, among which 232 women), as well as prosecutors' assistants (in total 74 assistants, among which 55 women). Assistants to prosecutors have no prosecutorial procedural powers. Their competence and jurisdiction are strictly limited. For example, an assistant is entitled to receive visitors, to take action in connection with the preparation of the case (prepare copies of criminal case materials, to produce the list of documents) etc.

(2012): The 2012 data encompassed the administrative director, deputies of the administrative director and other staff of the administrative director office - staff of the Chancellery, interpreters, IT specialists, personal specialists, car drivers, auditors (in total 321 employees, among which 234 woman), as well as prosecutors' assistants (in total 72 assistants, among which 53 women). Prosecutors' assistants have no prosecutorial procedural powers. Their competence and jurisdiction are strictly limited. For example, an assistant is entitled to receive visitors, to take action in connection with the preparation of the case (prepare copies of criminal case materials, to produce the list of documents) etc.

Lithuania

(2021): The decrease in staff numbers is due to:
- natural rotation of human resources (various reasons: career, dissatisfaction with salary or duties, etc.);
- implementation of changes in work organisation;
- a higher number of persons left the institution than were recruited.

(2020): Number of staff does not include trainee prosecutors, only assistants, specialists and other employees. A person, who has been admitted to the service as prosecutor, must complete an assigned traineeship of up to two years. During the traineeship, the trainee prosecutor performs all duties of a prosecutor, but is obliged to coordinate draft procedural decisions and resolutions with the internship supervisor.

(2016): The provided data on the number of prosecution staff includes assistants and lawyers who work directly with prosecutors (total 363: 81 males and 282 females).

Luxembourg

(2020):
"The staff of the judicial and administrative jurisdictions has grown steadily in recent years, as provided for
by the amended law of March 7, 1980 on judicial organization. This explains the significant variations observed between 2018 and 2020 at the
judicial and non-judicial personnel.
In 2018, the FIU was administratively attached to the Parquet Général du Luxembourg. Due to the FIU's functional independence, analysts (13 positions) and administrative staff (6 positions) are no longer counted among the staff of the public prosecutor's office."

(2018): Le personnel des juridictions judiciaires et administratives a connu une croissance soutenue ces dernières années, tel que prévu par la loi modifiée du 7 mars 1980 sur l'organisation judiciaire. Ceci explique les variations importantes observées entre 2016 et 2018 au niveau du personnel de la magistrature et du personnel non-juge. En 2018, la CRF a été rattachée administrativement au Parquet général du Luxembourg. En raison de l'indépendance fonctionnelle de la CRF, les analystes (8 postes) et le personnel administratif (5 postes) ne sont dorénavant plus comptés parmi le personnel du ministère public. L'effectif du Parquet d'arrondissement reste toutefois inchangé, par rapport à 2017, suite à la création des nouveaux postes remplaçant les postes auparavant affectés à la CRF auprès du Parquet.

(2012): The methodology of presentation of data changed between 2010 and 2012 which partly explained the considerable increase observed for this period. Besides, in 2012, there was a general increase of the number of public servants at all levels.

Malta

(2016): This data relates specifically to the staff working int he Office of the AG.

(2014): The number of non-public prosecutors staff declared for 2014, is categorised as follows: supporting paralegal clerical staff – 17 (6 Male/11 Female); civil lawyers acting as attorneys – 13 (11Female/2 Male), legal prosecutors – 3 Female.

Poland

(2020): The table presents information available at the National Public Prosecutor's Office Human Resources Office [Biuro Kadr] and contains the numbers of persons actually employed in universal prosecutorial bodies of the public prosecution services, without conversion into full-time equivalents.
The Human Resources Office does not have detailed data on the number of employees in the universal prosecutorial bodies of the public prosecution service who are employed on an indefinite or fixed-term basis. Organisational units of the public prosecution service provide the Human Resources Office with data on employees of the public prosecution service (military part is provided separately) in the following groups:
1)FTE [full time employment] limits,
2)use of the FTE limits (not counted in full-time equivalents and not broken down between men and women) rounded to two decimal places, the actual number of employees (broken down into male and female employees).
The data provided doesnt include trainee prosecutors.

(2018): In the table, were presented total numbers of employees. Personnel's Office does not have detailed data connected with differentiation the number of workers per part time or full-time basis. The Personnel's Office also does not have detailed data connected with the number of workers employed in general organizational units of the prosecution office, for an unspecified or specified period of time.

Romania

(2020): Out of the total of 2408 filled in positions in the prosecution offices country wide, 1997 are occupied by clerks and the rest of 411 are procedural agents (who accomplish activities such as delivering summons, other courier activities etc.) and other staff such as drivers.

(2018): Out of the total of 2468 filled in positions in the prosecution offices country wide, 2044 are occupied by clerks and the rest of 424 are procedural agents (who accomplish activities such as delivering summons, other courier activities etc.) and other staff such as drivers.

(2016): The numbers include the clerks, forensics, auxiliary staff, public servants and contract staff

Slovak Republic

(2020): Staff increased for natural recruitment procedure

(2012): In 2012, the increase of the number of non-prosecutor staff resulted from the organisational changes in the prosecution services in the year 2011. In that year, the military prosecution services (which were administrated by the Ministry of Defence) were abolished and all the staff was assigned to the prosecution services.

Slovenia

(General Comment): The number is reported in FTE. Staff attached to the public prosecution service are civil servants at state prosecutor's offices (state prosecutorial personnel). Staff includes the director general, directors, judicial advisors, trainees, administrators, registrars and other civil servants from state prosecutor's offices. Trainees typically do not perform a significant amount of work as their role is to learn; nevertheless, they participate in hearings and in drafting decisions in some cases.

(2021): Before 2021, data was reported in gross numbers. For 2021 data, the FTE format is observed.

(2020): The information is in form of gross data. According to the methodology used for reporting judges and court staff (FTE) – by which part-time employees are converted to full-time time by the calculation of working hours, the number amounts to 298, as a number of staff are not working full time.

(2016): The information is in form of full-time equivalent.

(2014): The substantial increase of employments in state prosecutor's offices in 2014 is a result of Government's decision to strengthen the fight against corruption and other fields of criminality defined in the Prosecution Policy. In the year 2014, 40 Senior Judicial Advisers took up their post, as well as 7 other types of civil servants. In the year 2015 the employment procedures were concluded for admitting 15 trainees.

Question 132

Austria

(2021): Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 75700
Net annual salary: EUR 46900
Judge of the Administrative Supreme Court: Gross annual salary: EUR 133000

(2020): Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 75000
Net annual salary: EUR 46600
Judge of the Administrative Supreme Court: Gross annual salary: EUR 130000

(2019): Administrative Courts - First instance professional judge at the beginning of his/her Career:
Gross annual salary, in €: 72.900 Net annual salary, in €: 45.100

(2018): Gross annual Salary in € on 31 Dec 2018 First instance professional judge at the beginning of his/her career 53 865
Judge of the Supreme Court or the Highest Appellate Court : 131 227,88
Public prosecutor at the beginning of his/her career: 57 158,80
Public prosecutor of the Supreme Court or the Highest Appellate Instance : 131 227,88
Administrative court:
first instance professional Judge at the beginning of his/her Career: 69 600,00
Judge of the Supreme Court or the Highest Appellate Court: 126 000

(2016): Because of the requirement of numerical values the numerical values in the table above are rounded. the correct and exact answer is:
Gross annual Salary in € on 31 Dec 2016 (= Gross annual Salary in local currency on 31 dec 2016):
First instance professional judge at the beginning of his/her career: 59 962,40
Judge of the Supreme Court or the Highest Appellate Court (please indicate the average salary of a judge at this level, and not the salary of the Court President): 126 594,16
Public prosecutor at the beginning of his/her career: 55 139
Public prosecutor of the Supreme Court or the Highest Appellate Instance (please indicate the average salary of a public prosecutor at this level, and not the salary of the Public prosecutor General): 126 594,16

(2014): For 2014, the numerical values in the table are rounded. The correct and exact reply concerning the gross annual salary in Euros on 31 December 2014 is: first instance professional judges at the beginning of their career: 50 402,80 Euros; judges of the Supreme Court or the Highest appellate Court: 121 651,25 Euros; public prosecutors at the beginning of their career: 53 485,60 Euros; public prosecutors of the Supreme Court or the Highest appellate instance: 121651,25 Euros.

Belgium

(General Comment): Elements taken into account for salaries: judge at the first instance court or deputy king public prosecutor, with three years' seniority (beginning of career), married with two dependent children. Councillor at the Court of Cassation with 24 years' seniority, married, no dependent children. Advocate General at the Court of Cassation, with 24 years' seniority, no dependent children.

(2019): Judge at the court of first instance or deputy king's prosecutor, with three years of seniority (beginning of career) married and two dependent children.
Advisor to the Supreme Court with 24 years of seniority, married and no dependent children.
Advocate General at the Supreme Court, with 24 years of service and no dependent children.

(2016): Judge at the Court of First Instance or Deputy Crown Prosecutor, with three years seniority (beginning of career) married and two dependent children
Councillor at the Court of Cassation with 24 years seniority, married, no dependent children
Advocate General at the Court of Cassation, with 24 years seniority, no dependent children

Bulgaria

(2021): In the data for Q 132, the line "Prosecutor at the beginning of his/her career" is correct, but refers to the salaries of a district (first instance) prosecutor at the beginning of his/her career. The data for judges and prosecutors is calculated from the salary report collected and summarized by the Judiciary as of December 2021. The gross salary of the lowest judicial/prosecutor level, i.e. district judge and district prosecutor, is calculated. The system also has the position of "junior judge", but at the beginning of their career, they work in second-instance courts (regional courts), and based on the Questionnaire, information is requested about the lowest position in the first instance. The salary of a district judge and a district prosecutor according to "Table No. 1 of the SJC for Determining the Maximum Basic Monthly Salaries of Judges, Prosecutors and Investigators" is the same.
The data for question 132, line "Prosecutor of the Supreme Court or the Highest Appellate Instance" for the supreme judges and supreme prosecutors is calculated from the salary report provided by the supreme judicial bodies as of December 2021. The gross salary of a magistrate in the supreme judicial body was calculated. According to "Table No. 1 of the SJC for Determining the Maximum Basic Monthly Salaries of Judges, Prosecutors, and Investigators", the determined remuneration of a supreme judge and a supreme prosecutor is the same.

(2020): In 2019, with a decision of the Plenum of the SJC under item 6 of Protocol № 2 / 24.01.2019, an updated Table № 1 of the SJC was approved to determine the maximum basic monthly salaries of judges, prosecutors and investigators pursuant to Art. 218, para 2 and para 3 of the JSA with an increase of 10%, as of 01.01.2019. With the same decision the ranks for magistrates were increased by BGN 100 per rank, as of 01.03.2019.
In 2020, with a decision of the Plenum of the SJC under item 2 of Protocol № 2 / 30.01.2020, an updated Table 1 of the SJC was approved for determining the maximum basic monthly salaries of judges, prosecutors and investigators on the grounds of Article 218. , para 2 and para 3 of JSA with an increase of 10%, as of 01.01.2020. With the same decision the ranks for magistrates were increased by BGN 50 per rank, as of 01.03.2020.

(2018): The sums shown do not include the amount of the social security contributions, in order to be made comparable to the data given in the previous assessment cycle when they were not included either in the amount of the gross salary for the relevant position. The source of the data was information summarized and analyzed in the “Financial planning and analysis” Department of Supreme Judicial Council of Bulgaria

(2016): Under the provisions of Art. 218 (2) of the Judiciary System Act, the basic monthly remuneration for the lowest judicial, prosecutorial or investigating magisterial position shall be set at the double amount of the average monthly salary of employees in the public-financed sphere according to data of the National Institute of Statistics.
The increase in the salaries of the magistrates that occupy the lowest position is in line with the increase of the average monthly salary of the employees in the public-financed sphere, according to data of the National Statistical Institute and the financial resources of the budget of the judiciary.
Under the provisions of Art. 218, (3) of the Judiciary System Act, the remuneration of the other positions, including judges and prosecutors in the Supreme Court / Supreme Prosecution Office in the bodies of the judiciary, shall be determined by a decision of the SJC Plenum and taking into account the financial possibilities on the budget of the judiciary.

(2014): For 2014, the indicated amounts do not include the insurance contributions for the purpose of data comparability in respect of the previous evaluation scheme, when these amounts have not also been taken into consideration.

(2012): For 2010, the basis for assessment were the data from Table 1 of the Supreme Judicial Council determining the maximum amount of the monthly salary of judges, prosecutors and investigators, while for 2012, the basis for assessment were the data from the Information for the funds for salaries from the establishment plans and the average salary by positions, which is prepared by all the bodies of the judiciary and is summarized in the SJC. This information file reflects the actually received gross salaries, which include the basic salary and additional remuneration for grade and service.

Croatia

(2021): Salaries of judges and other judicial officials are determined by multiplying the base for calculating the salary by the coefficient for a particular official, which are proscribed by the Judges' and other Judicial Officials' Salaries Act (Official Gazette No. 10/99, 25/00, 01/01, 30/01, 59/01, 114/01, 116/01, 64/02, 153/02, 154/02, 17/04, 08/06, 142/06, 34/07, 134/07, 146/08, 155/08, 39/09, 155/09, 14/11, 154/11, 12/12, 143/12, 100/14, 147/14, 120/16, 16/19). Determined salaries are increased by 0.5% for each completed year of service, by a maximum of 20%.

(2020): Salaries of judges and other judicial officials are determined by multiplying the base for calculating the salary by the coefficient for a particular official, which are proscribed by the Judges' and other Judicial Officials' Salaries Act (Official Gazette No. 10/99, 25/00, 01/01, 30/01, 59/01, 114/01, 116/01, 64/02, 153/02, 154/02, 17/04, 08/06, 142/06, 34/07, 134/07, 146/08, 155/08, 39/09, 155/09, 14/11, 154/11, 12/12, 143/12, 100/14, 147/14, 120/16, 16/19). Determined salaries are increased by 0.5% for each completed year of service, by a maximum of 20%.

(2012): Due to the different calculation of tax rates and changes in the amounts of tax reliefs, there is a difference between calculation of salaries in 2010 and 2012.

Czech Republic

(2020): the salaries have risen generally + exchange rate

(2012): In 2012, the salary of public prosecutors was increased in order to bring it closer to the judges' salary.

Denmark

(General Comment): We are not able to inform the net salary. The Danish tax system is progressive. That means that the percentage of tax depends on the income and the municipal tax varies from municipality to municipality.

(2021): The annual salaries are specified without pension. The annual salary for a Public prosecutor of the Supreme Court or the Highest Appellate is specified based on the average salary for Senior Prosecutors, Special Prosecutors and the Deputy State Prosecutor at The Supreme Court Unit with the Director of Public Prosecutions.

Estonia

(2020): Since 2010 the salary of prosecutors depends of the salary of the President and is indexed by 1 April of each calendar year. In 2018 the salary system of public prosecutors changed and with that the smallest salaries increased the most.

(2019): Since 2010 the salary of prosecutors depends of the salary of the President and is indexed by 1 April of each calendar year. In 2018 the salary system of public prosecutors changed and with that the smallest salaries increased the most.

(2012): The salary of judges was increased on 1 January 2013.

Finland

(General Comment): In Finland, there are several salary categories for judges. The salary depends also on the years of work experience. At the end of 2021 first instance judge is in a salary category T11 in which the gross salary is from 4847,68 €/month to 6301,98€/month depending on his/her experience. A permanent first instance judge has usually at least nine years of work experience which means the salary is 5918,33 €/month. In Finland, the taxation is progressive so the information on net salary varies from person to person and is not available. Prosecutors in Finland are not bound on Court instances.

(2020): Prosecutors in Finland are not bound on Court instances.

(2016): In Finland there are several salary categories for judges. The slary depends also on the experience. A first instance judge has a category of T 11 for which the gross salary is from 4501,79 €/month to 5627,24 €/month depending on his/her experience. A permanent 1st instance judge has usually at least 9 years experience which means the salary is 5177,06 €/month. In Finland we have progressive taxation so the information on net salary is not available.

France

(General Comment): First-instance professional judge (civil and criminal courts) at the beginning of his/her career: judge at the 3rd step of the second grade - lump-sum compensation: 35% - flexible bonus 12%.
Public prosecutor at the beginning of his/her career: prosecutor of the Public Prosecutor's Office at the 3rd step of the second grade - lump-sum compensation: 38% - flexible bonus 12%.
Judge of the Court of Cassation: President of Chamber CC (F: 1369) - flexible bonus 14%.
Prosecutor at the Court of Cassation: First Advocate General CC (F: 1369) - flexible bonus 14%.

(2021): The data filled in the table are those of the civil and criminal justice, source DSJ.
Concerning the administrative justice, the data are as follows: professional judge of first instance, beginning of career: 50 200, 41 300; judge of the Supreme court or of the last instance of appeal: 95 100, 76 900. Source – Council of State

(2020): "The completed table concerns only magistrates of the judicial order.
For the administrative order: -gross annual salary in euros of a professional judge of 1st instance at the beginning of his career: 47,100 euros
-gross annual salary in euros of a Supreme Court judge: 94,000 euros
-net annual salary in euros of a professional judge of first instance at the beginning of his career: 38,700 euros
-net annual salary in euros of a supreme court judge: 76,000 euros.
sources DSJ and CE."

(2014): In 2014, the annual gross salary of administrative judges was 42,615€ and the annual net salary was 36,318€. At the State Council, the annual gross salary was 108,881€.

Germany

(General Comment): No information on annual net salary is available on the basis of the personal circumstances of judges and public prosecutors. The federal average was calculated unweighted: the annual salaries of the Federal Länder were added and divided by the number of Länder, regardless of how many judges and prosecutors work in the respective Federal Land (the corresponding data are not known).

(2021): Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the Länder. Judges and public prosecutors may be entitled to additional payments depending on -
their individual familial situation (married/partnership, children)
- position and function at the court (eg. judges with administrative tasks)
The conditions and amount of any additional payments are determined by the remuneration laws of the Länder.

(2020): Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the Länder. Judges and public prosecutors may be entitled to additional payments depending on -
their individual familial situation (married/partnership, children)
- position and function at the court (eg. judges with administrative tasks)
The conditions and amount of any additional payments are determined by the remuneration laws of the Länder.

(2016): The salaries calculated were based on the following assumptions:
Outset of the career (judge / public prosecutor): remuneration pursuant to R1, salary bracket 1, single, no children
The average was formed as a simple average of the Länder, without weighting the numbers based on the number of judges active in them, since the corresponding data are not known. The figure given as the salary of a judge or public prosecutor of the Supreme Court is the basic salary R6 without any allowance for working at one of the highest federal courts and without family allowance.
No Information on annual net salary is available on the Basis of the personal circumstances of judges and public prosecutors.

(2014): The salaries calculated for 2014 were based on the following assumptions: outset of the career (judge/public prosecutor): remuneration pursuant to R1, salary bracket 1, single, no children. The figure given as the salary of a judge or public prosecutor of the Supreme Court is the basic salary R6 without any allowance for working at one of the highest federal courts and without family allowance.

(2012): The figure given for 2012 as the salary of a judge or public prosecutor of the Supreme Court is the basic salary R6 without any allowance for working at one of the highest federal courts and without family allowance.

Greece

(2016): Data on net annual salaries of judges and prosecutors is not available. In fact, after subtracting from the gross salary the insurance contribution, the amount is still subject to further taxation (22%-35%), depending on the family status of each judge and prosecutor.

(2012): The decrease between 2010 and 2012 of the annual salaries (gross and net) of judges and public prosecutors at the Supreme Court level was a result of a fiscal policy due to the economic crisis.

Hungary

(2020): At its December 2019 session, the National Assembly passed a law increasing the salaries of judges by 32 percent and that of prosecutors by 21 percent.

(2018): The reason for the increase of judicial salaries is the increase of the base salary of judges by 15% in 2017-2018.

Ireland

(2021): The information you are seeking has been retrieved from sources which are available to the public. For figures relating to judicial remuneration please see Association of Judges Ireland and for figures relating to the salaries of other civil servants which includes prosecutors see publicjobs.ie

(2020): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2020.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will
be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade

(2019): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2019.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will
be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade

(2018): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2018.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade

(2016): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2016.

(2014): The Judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court at December 2014 who were appointed to that courts on or after 1 January 2012. It is noteworthy that following a constitutional amendment in 2011, legislation was passed to allow for the reductions in the remuneration of judges. The Financial Emergency Measures in the Public Interest legislation refers.

(2013): There is no equivalent of a public prosecutor of the Supreme Court and so a summary of all lawyer grade salaries are provided below: Director of Public Prosecutions (€176,350); Deputy Director of Public Prosecutions (€156,380); Head of Directing Division (€142,199 (modified scale)); Professional Officer Grade II (€119,572); Professional Officer Grade III (€81,080); Professional Officer Grade IV (€67,434); Chief Prosecution Solicitor (€149,499); Principal Prosecution Solicitor (€85,127); Senior Prosecution Solicitor (€79,401); Prosecution Solicitor AP1 (€67,434); Prosecution Solicitor (€30,218 (new entrant from 1 January 2013)).

(2012): The Judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court at December 2012. Salary for prosecutor reflects the salary of a new entrant solicitor and the salary of a principal Prosecution Solicitor. In line with the Government's fiscal policy the salary or remuneration of public service staff and office holders has been reduced since the 2010 statistics. Following a constitutional amendment, legislation was passed to allow for the reductions in the remuneration of judges. The Financial Emergency Measures in the Public Interest legislation refers.

Italy

(General Comment): It is noteworthy that the salaries of judges and public prosecutors do not depend on the position held but rather on the experience (i.e. years of service). That means that the salary of a judge working in the lowest courts can be the same as the salary of a judge working in the Highest Appellate Court.

Latvia

(2020): Prosecutors shall be entitled to a supplement for the ranking of the public prosecutor, depending on the degree of office assigned. The ranking of a public prosecutor shall be assigned according to the position, professional knowledge, qualifications and experience of work.
Question 132 indicates the minimum gross and net public remuneration.
Discrepancies with data from the previous cycle are connected with changes in the Law On Remuneration of Officials and Employees of State and Local Government Authorities. Between 2019 and 2020 a gradual increase in salary has been introduced, the gross salary has been increased per EUR 1764 and the net annual salary increase per EUR 1203. The salaries for judges are reviewed annually according to the law.

(2019): Discrepancies with data from the previous cycle are connected with changes in the Law On Remuneration of Officials and Employees of State and Local Government Authorities.
Comments on salaries of prosecutors: The increase in salaries is related to changes in the regulatory framework for prosecutors remuneration, which entered into force on 01.01.2019. The discrepancies in the section of salary for public prosecutor at the beginning of his or her career is connected to that in previous cycle the maximum salary was indicated which first instance prosecutor could get, but now it is indicated the salary at the beginning of the career.

(2018): The changes are related to the Law On Remuneration of Officials and Employees of State and Local Government Authorities, which increased the judge's monthly salary to EUR 1966, and the salaries of judges increased significantly in 2018 compared to 2016. Same for prosecutors.
Comment for prosecutors: Prosecutors shall be entitled to a supplement for the ranking of the public prosecutor, depending on the degree of office assigned. The ranking of a public prosecutor shall be assigned according to the position, professional knowledge, qualifications and experience of work. Question 132 shows the maximum gross and net public remuneration.

(2016): Prosecutors, depending on the grade assigned, are provided with an allowance for a post of prosecutor from 7 to 35 percent of the monthly salary. The position of a prosecutor is assigned according to the occupation, professional knowledge, qualification and work experience.
In above stated amount special additional payment to judges depending of their time of service (starting from 7% after 3 years of service, until 35% - after 20 years of service) is already included.

(2012): During the economic crisis, starting from 01.07.2009, the salaries of judges were reduced by 15% and starting from 01.01.2010, they were reduced by 27 %. Starting from 01.01.2011, the determination of the salaries of judges and prosecutors is a part of the unified remuneration system for the officials and employees of the State and local government institutions. Besides, as the consequences of the crisis diminished, the salaries of judges increased.

Lithuania

(2020): From the 1 January 2019 the official salary ratio of district court judges was increased. In 2019 and in 2020 a higher base amount of official salary (salary) was also applied, which is used to calculate the remuneration of judges and public procesutors (2018 - 132,5; 2019 - 173, 2020 - 176)

(2019): From 2019 January 1 the salaries of district court judges increased due to an increase in their official salary coefficients (the official salary ratio of the president of the court increased from 0.5 to 1.5 basic amounts; deputy chief judge - from 1.2 to 1.9 basic amounts, judge - by 2 basic amounts).
From 2019 January 1 the basic amount of the official salary, which is used to calculate the salaries of both prosecutors and judges, was also increased: in 2018 this basic amount was 132.5 euros, in 2019 - 173 euros.

(2018): In 2017 prosecutors' salaries were increased.

(2016): The salary of public prosecutors at the beginning of the carrier was increased.

Luxembourg

(2021): As a starting salary (professional judge of first instance or prosecutor) we consider the salary of the “attachés de justice” after their first appointment. The salary scale of the magistrates provides for 380 index points as a basis, a possible professional experience can be added to it but is not taken into account by our calculations.
As a theoretical basic salary for a judge or prosecutor at the Court of Appeal we consider the grade M4, level 4, which corresponds to 455 points and to the average seniority of a magistrate appointed to the Court (Court and General Prosecutor's Office). However, it should be taken into account that this salary is strongly influenced by the family situation of the person concerned.
To calculate the annual salary, these points must be multiplied by the value of the index point. Between January and September 2021, the value of the index point for a civil servant was 20.17893; after 1 October, the value of the index point was 20.6831871. Taking into consideration these elements, a 12-month salary corresponds to 92 591€ for a first instance professional judge, respectively a salary of 110 865€ for a judge or prosecutor at the Supreme Court. These figures do not include any bonuses, allowances or benefits that may be added to the basic salary depending on the magistrate concerned.
More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates, can be found on the civil service website (https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html).

(2020): "As a starting salary (professional judge of first instance or prosecutor) we consider the salary of the judicial attachés after their first appointment. The salary scale of the magistrates provides for 380 index points as a basis, a possible professional experience can be added to it but is not taken into account by our calculations.
As a theoretical basic salary for a judge or prosecutor at the Court of Appeal we consider the grade M4, step 4, which corresponds to 455 points and to the average seniority of a magistrate appointed to the Court (seat and General Prosecutor's Office). However, it should be taken into account that this salary is strongly influenced by the family situation of the person concerned.
To calculate the annual salary, these points must be multiplied by the value of the index point. In December 2020, the value of the index point for a civil servant was 20.17893, which corresponds to a 12-month salary of 92.016€ for a professional judge of first instance, respectively a salary of 110.177€ for a judge or prosecutor at the Supreme Court. These figures do not include any bonuses, allowances or benefits that may be added to the basic salary depending on the magistrate concerned. More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates, can be found on the civil service website (https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html)."

(2019): As a salary at the beginning of the career (first instance professional judge or prosecutor) we consider the salary of the “attachés de justice” after their first appointment. The salary scale for judges and prosecutors is based on 380 points, any professional experience can be added but is not taken into account in our calculations. To calculate the annual salary, these points must be multiplied by the value of the index point. In December 2019, the value of the index point of a civil servant was 20,17893, which corresponds to a salary of €92,016 over 12 months. In 2016, this figure corresponded to €84,185 and in 2018 to €89,771. More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates (judges and prosecutors), can be found on the civil service website: https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html.

(2016): The salary are those of the Court President and the Prosecutor General as no average salary can be calculated.

Malta

(2020): Wages for the lawyers of the AG were improved following a revision of salaries.

(2019): Public prosecutor at the beginning of his/her career: Actually there was an increase in the gross annual salary which is also reflected in the net annual salary. The difference in the net annual salary is then due to the different tax brackets that apply.

(2018): In 2018, following discussions with the Judiciary Association, the Ministry substantially increased the wage package of the members of the judiciary across all grades (Magistrates, Judges and Chief Justice). The agreement saw an increase in the basic salary and allowances received by the judiciary, with further increases planned over the coming 3 years. This improvement in the wage package reflects the commitment of the current administration to improve the working conditions of the judiciary, and continues to build on the reforms already brought into effect by the Constitutional Reforms (Justice Sector) Act of 2016.

(2014): The 2014 figures include the allowances over and above the ‘basic’ wage. A Magistrate has competence to hear all civil cases up to a value of €11,650 and criminal cases up till an imprisonment of 10 years whilst Judges hear all the other cases. The data provided relates to the salary of a Magistrate (in respect of first instance professional judge) and a Judge (in respect of Judge of the Supreme Court). The Net Annual Salary varies according to the Income Tax Bands announced, from time to time, and therefore it is not possible to indicate the amounts. The figures provided for as net income were calculated on the salary above-indicated for a married person.

(2012): In terms of the Judges and Magistrates Salaries Act, the gross annual salary of the Chief Justice for 2012 was €46 456, this of a judge was €40 221, whilst this of Magistrates was €34 188. A Magistrate has competence to hear all civil cases up till a value of €11,650 and criminal cases up till an imprisonment of 10 years whilst Judges hear all the other cases. The figure mentioned relates to the initial salary of Judge, though the beginning of one’s career in the judicial field is as a Magistrate. The Net Annual Salary varies according to the income tax bands announced, from time to time, and therefore it is not possible to indicate the amounts. The figures provided for as net income were calculated on the salary above-indicated for a married person.

Netherlands

(General Comment): Salary of judge / prosecutor 'at the beginning of career': the salary used is the one for a starting judge / prosecutor, after finalizing a training period of several years. During the training there is a fixed saraly, lower than the salary of a fully functional judge / prosecutor.

(2021): Public prosecution: Numbers are including a vacation stipend and 13th month. There is no new collective labour agreement as of yet, so these numbers are the same as last year. As soon as a new agreement is reached, the salary may change retroactively.
Concer
Courts: Salary of a judge / prosecutor ‘at the beginning of career’: the salary used is one for a starting judge / prosecutor, after finalizing a training period of several years. During the training, there is a fixed salary, lower than the salary of a fully functional judge/prosecutor. Salary includes a holiday stipend, as well as a 13th month.
Supreme Court: the above amount is the average gross salary (11.163,63 euro per month) for a regular Supreme Court judge and includes a holiday allowance (8% of annual salary) and a so-called 13th month (8.3% of annual salary). Please refer to legislation (https://wetten.overheid.nl/BWBR0008365/2021-07-01) on this subject as well as the salary scheme (https://nvvr.org/uploads/documenten/Salaristabellen-RM-juli-2021.pdf).

(2020): Public prosecutor at the beginning of his / her career: The recent salary table RM of the end of 2020 is used (Scale 9, first step). On top of this the holiday stipend and end of year stipend is calculated. The 42.900 is a rough estimate of the net annual salary, after taxes, pensions etc.

(2016): The discrepancy of the answers for gross salary is not clarified.

Poland

(2021): Judges: The basic salary of a judge is determined in rates, the amount of which is determined using multipliers of the basis for determining basic salary. The rates of basic salary in particular judge's positions and multipliers, used for determination of basic salary of judges in particular rates, are specified in the appendix to the Act.
A judge is entitled to a function-related allowance in connection with the performance of his duties.
Judges' remuneration is also differentiated by a long service bonus, amounting, beginning with the sixth year of service, to 5% of basic salary and increasing after each year by 1% until it reaches 20% of basic salary. No social security contributions are payable on judges' salaries. Prosecutors:
The base salary for public prosecutors of universal prosecutorial bodies of the public prosecution services shall be determined based on the table of base salary scale for public prosecutors of universal prosecutorial bodies of the public prosecution services Pursuant to Article 123 of the Act on the Public Prosecutor’s Office of 28 January 2016, the basis for determining the base salary of a public prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Main Statistical Office “Statistics Poland” [GUS]. At the same time, according to Article 124 § 11 of the quoted Act on Public Prosecutor's Office, a public prosecutor is entitled to an supplement for long-time service amounting to 5% of the base salary currently received by the public prosecutor, beginning from the 6th year of his/her employment, and increasing after each successive year of his/her employment by 1% of this salary, until reaching 20% of the base salary. After 20 years of service the long-service supplement shall be paid, irrespective of the length of service beyond that period, at the rate of 20% of the public prosecutor's current base salary.
Supreme court and Main Public Prosecutor Office: Pursuant to Article 124 § 1 of the above-mentioned Act, the base salary of public prosecutors of the National Public Prosecutor’s Office is equal to the base salary of judges of the Supreme Court. Pursuant to Article 48 of the Act on the Supreme Court [Ustawa o Sądzie Najwyższym] of 8 December 2017 (Journal of Laws of 2021, item 154, as amended), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The promotion rate is 115% of the base rate. Upon taking up his/her post, a judge of the Supreme Court receives base pay at the basic rate. After 7 years of service in the Supreme Court, the base salary of a judge of the Supreme Court shall be increased to the promotion rate.

(2020): Judges: The basic salary of a judge is determined in rates, the amount of which is determined using multipliers of the basis for determining basic salary. The rates of basic salary in particular judge's positions and multipliers, used for determination of basic salary of judges in particular rates, are specified in the appendix to the Act.
A judge is entitled to a function-related allowance in connection with the performance of his duties.
Judges' remuneration is also differentiated by a long service bonus, amounting, beginning with the sixth year of service, to 5% of basic salary and increasing after each year by 1% until it reaches 20% of basic salary. No social security contributions are payable on judges' salaries. Prosecutors:
The base salary for public prosecutors of universal prosecutorial bodies of the public prosecution services shall be determined based on the table of base salary scale for public prosecutors of universal prosecutorial bodies of the public prosecution services Pursuant to Article 123 of the Act on the Public Prosecutor's Office of 28 January 2016, the basis for determining the base salary of a public prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Main Statistical Office "Statistics Poland" [GUS]. At the same time, according to Article 124 § 11 of the quoted Act on Public Prosecutor's Office, a public prosecutor is entitled to an supplement for long-time service amounting to 5% of the base salary currently received by the public prosecutor, beginning from the 6th year of his/her employment, and increasing after each successive year of his/her employment by 1% of this salary, until reaching 20% of the base salary. After 20 years of service the long-service supplement shall be paid, irrespective of the length of service beyond that period, at the rate of 20% of the public prosecutor's current base salary.
Supreme court and Main Public Prosecutor Office: Pursuant to Article 124 § 1 of the above-mentioned Act, the base salary of public prosecutors of the National Public Prosecutor's Office is equal to the base salary of judges of the Supreme Court. Pursuant to Article 48 of the Act on the Supreme Court [Ustawa o Sądzie Najwyższym] of 8 December 2017 (Journal of Laws of 2021, item 154, as amended), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The promotion rate is 115% of the base rate. Upon taking up his/her post, a judge of the Supreme Court receives base pay at the basic rate. After 7 years of service in the Supreme Court, the base salary of a judge of the Supreme Court shall be increased to the promotion rate.

(2019): The base salary for public prosecutors of common organisational units of the prosecutor's office is determined on the basis of the table of base salary for prosecutors of common organisational units of the prosecutor's office and the Institute of National Remembrance - Commission for the Prosecution of Crimes against the Polish Nation, and the multipliers used to determine this salary, which constitutes appendix no. 1 to the Regulation of the Council of Ministers of 29 February 2016 on the base salary of the prosecutors and the amount of functional allowances to which the prosecutors are entitled. The above table sets out the rates of base salary for different prosecutorial positions and the corresponding multiplier, which is used to determine the base salary for this position.
Pursuant to Article 123 of the Act of 28 January 2016 – The Prosecutor's Office Law, the basis for determining the base salary of a prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, published in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Central Statistical Office. Pursuant to Article 124 § 1 of the abovementioned Act, the base salary of prosecutors of the National Prosecutor's Office is equal to the base salary of the Supreme Court judges. Pursuant to Article 48 of the Act of 8 December 2017 on the Supreme Court (Journal of Laws of 2018, item 5, as amended), the salary of a judge of the Supreme Court is determined at the base rate or the promotion rate. The promotion rate is 115% of the base rate. A judge of the Supreme Court, taking up a position, receives the base salary at the base rate. After 7 years of service in the Supreme Court, the base salary of a Supreme Court judge is increased to the promotion rate.
At the same time, pursuant to Article 124 § 11 of the quoted Act – The Prosecutor's Office Law, a prosecutor is entitled to an allowance for long-term work amounting to, starting from the 6th year of work, 5% of the base salary currently earned by the prosecutor and increasing after each consecutive year of work by 1% of this salary, until 20% of the base salary is reached. After 20 years of work, the allowance is paid, irrespective of the length of service beyond that period, in the amount of 20% of the base salary currently earned by the prosecutor.
Moreover, pursuant to Article 124 § 10 of the quoted Act – The Prosecutor's Office Law, in connection with the function of a prosecutor, the prosecutor is entitled to a functional allowance, which results from appendix no. 2 Table of functions and multipliers used to determine the amount of functional allowances to the Ordinance of the Council of Ministers of 29 February 2016 on the base salary of the prosecutors and the amount of functional allowances to which the prosecutors are entitled..
Additionally, pursuant to Article 111 § 2 and 4 of the abovementioned Act, due to the nature of work and the scope of tasks performed, a special bonus may also be granted to the prosecutor of the National Prosecutor's Office, in the amount not exceeding 40% of the total base salary and the functional allowance. The allowance shall be granted for a fixed period, and in justified cases - also for an indefinite period.

(2018): Base salary for prosecutors related to general organizational units of the prosecution office is determined by virtue of the Table regarding rates, connected with the base salary for prosecutors related to general organizational units of the prosecution office and for prosecutors related to the Nation's Memory Institute - Commission for the Prosecution of Crimes against Polish Nation. The aforementioned table also includes multipliers used for determining the aforementioned salary and it constitutes Schedule No 1 enclosed to the Regulation of the Council of Ministers of 29th February 2016 on the base salary for prosecutors and the amount of extra duty allowance for prosecutors. The aforementioned table determines rates of the base salary related to particular prosecutor's position and appropriate multiplier used for determining the amount of base salary connected with this position. Pursuant to art. 123 of the Law on Prosecution Act of 28th January 2016 (published in the Journal of Laws 2017, item 1767 and later amendments), the basis of the prosecutor's base salary in a given year shall be - so called - base amount, that is average salary related to second quarter of the previous year, published in the Official Journal of the Republic of Poland by the Chairman of the Central Statistics Office.
Pursuant to art. 124 § 1 of the aforementioned Act, base salary for prosecutors related to the National Public Prosecutor's Office is equal to base salary for the Supreme Court judges.
Pursuant to art. 48 of the Supreme Court Act of 8th December 2017 (published in the Journal of Laws 2018, item 5 and later amendments) salary for the Supreme Court judge is determined at the basic rate or promotion rate. The amount of a promotion rate constitutes 115% of a basic rate. The Supreme Court judge, while taking over the post, acquires base salary related to the basic rate. After seven years of duty connected with the Supreme Court, base salary for the Supreme Court judge is raised up to the promotion rate. At the same time, pursuant to art. 124 § 11 of the aforementioned Law on Prosecution Act, prosecutor is entitled to allowance connected with a long-term service. This allowance constitutes, starting with the 6th year of service, 5% of the base salary currently received by the prosecutor and it rises - after each following year of service - by 1% of the base salary, until it reaches the level of 20% of the base salary. After twenty years of service, the allowance constitutes, independently on the period of service exceeding this time, 20% of the base salary currently received by the prosecutor.
What is more, pursuant to art. 124 § 10 of the aforementioned Law on Prosecution Act, in connection with certain position, prosecutor in entitled to extra duty allowance, which stems from Schedule No 2 of the Table regarding positions and multipliers used for determining the amount of extra duty allowance, enclosed to the Regulation of the Council of Ministers of 29th February 2016 on the base salary for prosecutors and the amount of extra duty allowance for prosecutors.
Additionally, pursuant to art. 111 § 2 and 4 of the aforementioned Act, the National Public Prosecutor - due to the character of service and the scope of duties - can be entitled to the special allowance as well. The amount of the special allowance shall not exceed 40% of base salary and extra duty allowance altogether. The special allowance is granted for a specified period of time or - under particularly justified circumstances - for an unspecified period of time. Salaries of judges and public prosecutors of the Supreme Court or the Highest Appellate Instance - we indicated average salary which contains base salary, allowance connected with a long-term service and allowance connected with occupying post.

Portugal

(General Comment): The net annual salary depends on various factors: personal tax situation; other personal revenues. It would not be accurate to provide a number under this category.

(2020): Source of data: Directorate-General for the Administration of Justice and the High Council for the Judiciary
The increase of salaries resulted from the revision of the statute of judges and prossecutors.

(2019): The increase of the Public Prosecutors' salary in the Supreme Court was due to the revision of the Statute of Judicial Magistrates

Romania

(2016): The increase between 2014 and 2016 is resulting from legislative changes, including the way in which specific legislation is applied in the light of the jurisprudence of the Constitutional Court. The calculation method did not change, but the base of the monthly salaries has grown during the last two years, according to the legislation concerning the public remuneration, as it was interpreted by the Constitutional Court and the ordinary courts of law. Currently, the differences between salaries in the judicial system are eliminated. Since 2000 to the present, the magistrates' salaries have risen steadily, including the latest law on salaries in the public domain (Law no. 153/2017) has set a has set a salary level for magistrates well above the average of the budgetary staff. This law will have its full effect until 2022.

(2012): The 2012 data was based on the Law regarding the unitary remuneration of personnel paid from public funds, no.284/2010, with subsequent amendments and additions.

Slovak Republic

(General Comment): The stated sums represent the basic gross salary of judges/prosecutors without bonuses and supplements. According to the Act on Judges (No. 385/2000 Coll.) the average monthly salary of the judge equals the monthly salary of the Member of Parliament. The monthly salary of the judge at the beginning of the career is 90% of this salary. The monthly salary of the judge of the Supreme Court is 130 % of the monthly salary of the Member of Parliament. The judge is entitled to have 2 additional monthly salaries (in May and in November) unless he/she do not meet the conditions stipulated in law. The sum of annual average salary stated in this questionnaire counts 14 months salaries.
All bonuses and supplements are stipulated by law. Specific supplement belongs to the judges of the Specialized Criminal court and to the judges of the Supreme court deciding on the remedies against the decisions of that court. The value of the net salary depends on several individual criteria, e. g. the number of children, the voluntary pension security scheme etc. Similar rules govern the salaries of prosecutors (Act on Prosecutors and Trainee Prosecutors No.154/2001 Coll.). The average salary of the prosecutor equals the average salary of the judge. The salary of the beginning prosecutor is 85% of this salary, the salary of the prosecutor at the General Prosecutors office is equal to the salary of the Supreme Court judge. Prosecutors are also entitled to 2 additional monthly salaries. Supplements for the heads of the prosecutor offices are similar to supplements of the court presidents at the same level.The prosecutors of the Special Prosecutor´s Office are entitled to same supplement as the judges of the Specialized Criminal Court.

(2019): The stated sums represent the basic gross salary of judges/prosecutors stipulated by law without supplements (methodology comparable to previous years data in the questionnaire). See general comment for details.

(2018): The stated sums represent the basic gross salary of judges/prosecutors stipulated by law without supplements. See general comment for details.

(2014): The salaries of judges and prosecutors in 2014 were at the same level as in 2012. The adjustments of salaries for all State officials (Members of Parliament, Government, judges) were stopped in the years 2013 and 2014 due to State expenditures restrictions.

Slovenia

(General Comment): The basic salary for judges and prosecutors is regulated by law, as well as promotion. The salary of the prosecutor is determined on the same basis, with the same supplements and in the same way as the salary of the judge. All employees in the country (including judges and public prosecutors) are also entitled to the supplement for the period of employment. As the calculation of the average pay would be too complicated, we report figures calculated from above criteria. Please note all figures reported include the supplement for the period of employment.
Judge/prosecutor at the beginning of the career: starting salary for local court judge and for local state prosecutor (without promotion), including the supplement for the period of employment (5 years) - approx. 1-2% of the reported amount.
Judge/Prosecutor at the highest instance: starting salary of a supreme court judge and supreme state prosecutor – counselor (not president of the Supreme Court or State Prosecutor General) including the supplement for the period of employment (44 years) - approx 15% of the reported amount.

Spain

(General Comment): In addition to salary, other concepts must be taken into account: Remuneration for objectives and professional substitutions.
Remuneration according to objectives can be considerable in both cases (judges and prosecutors). Substitution refers to cases in which, according to the law, one judge substitutes another, thereby accruing an increase in remuneration, depending on the circumstances and duration of that substitution

(2021): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Prosecution 3.391.688,99 euros, Judges 6.719.737,10 euros.
- Professional substitutions. Prosecution 596.210,59 euros, Judges 7.666.770,44 euros.

(2020): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Prosecution 3.364.701,68 euros, Judges 6.760.485,89 euros.
- Professional substitutions. Prosecution 624.438,54 euros, Judges 8.852.605,61 euros.

(2019): Other two concepts have to be taken into account:
- Remuneration for objectives. (For 2019, Judges 6.560.790,81, Prosecutors 3.298.733,53)
- Professional substitutions. (For 2019, Judges 6.028.864,05; Prosecutors 726.720,41)
Remuneration according to objectives can be considerable in both cases.Substitution refers to cases in which, according to the law, one judge substitutes another, thereby accruing an increase in remuneration, depending on the circumstances and duration of that substitution.

(2018): Other two concepts have to be taken into account:
- Remuneration for objectives. (For 2018, Judges 6.474.050,91, Prosecutors 3.220.851,03)
- Professional substitutions. (For 2018, Judges 3.220.851,03; Prosecutors 646.740,23)

Question 133

Austria

(General Comment): Judges at Administrative Courts get the same benefits as functionaries (e.g. anniversary reward, child allowance, possibly cost of living bonus, travel fees of transportation allowance)

(2018): Judges at Administrative Courts get the same benefits as functionaries (e.g. anniversary reward, child allowance, possibly cost of living bonus, travel fees of transportation allowance)

(2016): Judges at Administrative Courts get the same benefits as officials (i.e. anniversary reward, child allowance, possibly costs of living Bonus, travel fees or Transportation allowance).

Belgium

(2021): Judges and prosecutors have a specific pension scheme (age limit at 67 + preferential rate).

(2020): Magistrates have a specific pension scheme (age limit at 67 + preferential rate).

Bulgaria

(2021): Pursuant to Article 223 of the Judiciary System Act, judges and prosecutors may use dwellings from the institutional housing stock of the judiciary.

(2020): Pursuant to Article 223 of the Judiciary System Act, judges and prosecutors may use dwellings from the institutional housing stock of the judiciary

(2019): Persuant to art. 223 of the Judiciary System Act, judges and prosecutors may use housing of the departmental housing fund of the judicial authorities.

Croatia

(2019): Additional benefits was recently introduced by the Law amending the Law on Salaries of Judges and Other Judicial Officials (Official Gazette 16/19).

Czech Republic

(2018): Judges and prosecutors are entitled to obtain housing only if they are temporarily transferred to another court/prosecution office.

(2016): Judges and prosecutors are entitled to obtain housing only if they are temporarily transferred to another court/prosecution office.

Estonia

(2012): On the occasion of the 2012 evaluation, it has been stressed that the salary of judges was increased on 1 January 2013. On the same time, the special pension was abolished for judges who are appointed to office after 30 June 2013, while judges appointed to office before 1 July 2013 retain their special pension.

France

(2020): Pursuant to the provisions of the order of April 5, 2017, establishing the lists of functions of the State services of the Ministry of Justice provided for in Articles R. 2124-65 and R. 2124-68 of the General Code of the Property of Public Persons that may give rise to the granting of a concession of housing by absolute necessity of service or of a precarious occupation agreement with penalty, certain heads of courts and jurisdictions benefit from a precarious occupation agreement with penalty._x000D_
A fee is charged to the beneficiary of this agreement. It is equal to 50% of the real rental value of the occupied premises._x000D_

Greece

(2021): judges, except salary, receive two allowances (Article 30 of N.3205/2003), the faster processing allowance and attendance costs. These are not taxed.Article 6, paragraph 6 subparagraph 4, of the decision numbered A.1275 (B ´6375/31.12.2021) indicating what is not included in the certificates of remuneration(page 81063 of the decision).However, if we are to be legally precise, the correct answer to the Cepej question is no. It is not a reduced taxation,but for sums granted, as to other classes of wage-earners, and they face expenses to which they are subjected for the exercise of their work.

Lithuania

(2019): no other financial bennefit.

Malta

(General Comment): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through the introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.

(2020): In respect of 'Special Pension' for Public Prosecutors, The Pensions Ordinance, Chp 93 of the Laws of Malta, stipulates a special pension for the Attorney General only.

(2018): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through he introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.

(2016): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through he introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.

Netherlands

(2021): SC: Other financial benefits for a regular Supreme Court judge would be a tax free monthly allowance for expenses of 1.502 euro. Please refer to the legislation (https://wetten.overheid.nl/BWBR0008365/2021-07-01) and regulation (https://wetten.overheid.nl/BWBR0031765/2021-01-23) on this subject.

Poland

(2021): 1.A judge/prosecutor who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
2) Financial support. A judge/prosecutor may be granted financial support, in the form of a loan, to satisfy their residential needs.
3) Paid health leave. A judge/prosecutor may be granted paid health leave to undergo the prescribed treatment if the treatment requires to refrain from carrying out service. The health leave cannot exceed six months ..
3) Annual additional leave. A judge/prosecutor is entitled to annual additional leave of:
–six business days – after ten years of work,
–twelve business days - after fifteen years of work.
4) Jubilee award. A judge/prosecutor is entitled to a jubilee award . 5) If a judge/prosecutor is posted to a locality other than the locality in which the judge's place of work is located, which is not the judge's place of permanent residence, the judge posted during the period of posting, as an employee on a business trip, is entitled to the following dues, compensating for the inconveniences resulting from the posting outside the permanent place of service: 1) the right to accommodation, free of charge; ; - a monthly lump sum - in an amount not exceeding 78% of the judge's basic salary; - reimbursement of costs of the first journey from the place of permanent residence to the place of secondment, reimbursement of costs of the last journey from the place of secondment to the place of permanent residence and reimbursement of the costs of journeys made not more often than once a week to the place of permanent residence and back under conditions' - a lump sum to cover the costs of travel by means of local transport, - reimbursement of costs incurred for the use of vehicles owned by the employee for business purposes, - reimbursement of costs of daily commuting to the place of delegation;

(2020): 1.A judge/prosecutor who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
2) Financial support. A judge/prosecutor may be granted financial support, in the form of a loan, to satisfy their residential needs.
3) Paid health leave. A judge/prosecutor may be granted paid health leave to undergo the prescribed treatment if the treatment requires to refrain from carrying out service. The health leave cannot exceed six months ..
3) Annual additional leave. A judge/prosecutor is entitled to annual additional leave of:
–six business days – after ten years of work,
–twelve business days - after fifteen years of work.
4) Jubilee award. A judge/prosecutor is entitled to a jubilee award . 5) If a judge/prosecutor is posted to a locality other than the locality in which the judge's place of work is located, which is not the judge's place of permanent residence, the judge posted during the period of posting, as an employee on a business trip, is entitled to the following dues, compensating for the inconveniences resulting from the posting outside the permanent place of service: 1) the right to accommodation, free of charge; ; - a monthly lump sum - in an amount not exceeding 78% of the judge's basic salary; - reimbursement of costs of the first journey from the place of permanent residence to the place of secondment, reimbursement of costs of the last journey from the place of secondment to the place of permanent residence and reimbursement of the costs of journeys made not more often than once a week to the place of permanent residence and back under conditions' - a lump sum to cover the costs of travel by means of local transport, - reimbursement of costs incurred for the use of vehicles owned by the employee for business purposes, - reimbursement of costs of daily commuting to the place of delegation;

(2019): retirement
Pursuant to Article 127 § 1 of the Act of 28 January 2016 – The Prosecutor's Office Law in connection with Article 69 -71 and Article 100 of the Act of 27 July 2001 - Law on the system of common courts (Journal of Laws of 2020, item 365, as amended), the prosecutor shall retire when they reach the age of 65, unless, not later than six months and not earlier than twelve months before reaching this age, they declare to the General Prosecutor their willingness to continue holding the position and present a certificate stating that they are able, due to their health condition, to perform their prosecutorial duties, issued on the terms specified for a candidate for the prosecutor's position. A prosecutor shall, at their request, retire, with the right to the emolument referred to in Article 100 § 2 - in the amount of 75% of the base salary and the length of service allowance earned on their last position - after the age of 55 for a woman, if she has worked for not less than 25 years in the position of a judge or a prosecutor, and the age of 60 for a man, if he has worked for not less than 30 years in the position of a judge or a prosecutor. A prosecutor who is a woman shall, at her request, retire after reaching the age of 60, regardless of the period of service as a prosecutor or judge. A prosecutor who retires or is retired due to age, illness or loss of ability shall be entitled to an emolument of 75% of the base salary and the length of service allowance earned on their last position. The emolument shall be increased in accordance with changes in the base salary of active prosecutors. In addition, a retired prosecutor shall be entitled to a one-time severance payment of six months' salary.
Judges and prosecutors are not given housing, but have, for example, the possibility to apply for financial support - in the form of a loan - to meet possible housing needs.

(2016): A judge who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
The emolument is icresed in line with changes of the basic solaries of active judges. A judge who retires is entitled to a one-off severance payment in the amount of six months' remuneration.

Romania

(2021): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

(2020): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

(2019): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

(2018): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Slovak Republic

(2020): The regulation about housing was included in the Decree of the Ministry of Justice of the Slovak Republic no. 293/2019
Coll., which lays down the conditions and scope of reimbursement of increased expenses for traveling of the hosting judge, or the hosting court can offer accommodation for the judge.

(2019): The regulation about housing is newly included in the Decree of the Ministry of Justice of the Slovak Republic no. 293/2019 Coll., which lays down the conditions and scope of reimbursement of increased expenses for traveling of the hosting judge, or the hosting court can offer accommodation for the judge.

Slovenia

(General Comment): There is a possibility for judges, public prosecutors and state attorneys (as well as other public servants in judiciary) to apply for a non-profit tenancy in an apartment, owned by the Ministry of Justice. However, the number of available apartments is very low (less than 0,5% of all functionaries and public servants in judiciary).

(2018): There is a possibility for judges, public prosecutors and state attorneys (as well as other public servants in judiciary) to apply for a non-profit tenancy in an apartment, owned by the Ministry of Justice. However, the number of available apartments is very low (less than 0,5% of all functionaries and public servants in judiciary).

Question 144

Austria

(General Comment): .

(2021): 2 disciplinary proceedings concern administrative judges, it was not possible to distinguish between different subtypes or categories of grounds. Therefore, only the total of disciplinare proceedings can be provide.

(2020): 2 disciplinary proceedings concern administrative judges, it was not possible to distinguish between different subtypes or categories of grounds. Therefore, only the total of disciplinare proceedings can be provide.

(2016): Austria does not differentiate between the categories mentioned above (numbers 1 to 4). Therefore, we can only refer to the number of disciplinary cases as a whole.

Belgium

(General Comment): These are proceedings before the disciplinary courts competent for major sanctions. There is no consolidated register for disciplinary proceedings at the level of the courts or public prosecutor's offices that have resulted in a dismissal or a minor sanction. The disciplinary sanctions applicable to judges and public prosecutors are set out in Article 405(1) of the Judicial Code. According to this article, minor disciplinary sanctions are: a call to order; a reprimand. Major disciplinary sanctions are: reduction of salary; disciplinary suspension; regression in salary scales or loss of the last salary supplement; position downgrade or withdrawal of the mandate referred to in Article 58 bis; ex officio resignation; removal from office or dismissal.

(2014): A new legislation entered into force in September 2014, establishing disciplinary courts. As a result, the number of disciplinary proceedings initiated against judges decreased between 2012 and 2014.

Bulgaria

(General Comment): Professional inadequacy refers to "systematic non-compliance with the time limits provided for in the procedural laws", "action or inaction that unjustifiably delays the proceedings", "action or inaction that damages the prestige of the judiciary", "Failure to perform official duties".

(2021): Concerning the category "Professional inadequacy": with regard to judges: in 2021, disciplinary proceedings were initiated for culpable failure to fulfil other official duties, resulting in not appearing at work for two consecutive working days. With regard to prosecutors: in 2021, 1 (one) proceeding was instituted for "systematic failure to comply with the deadlines provided for in the procedural laws"; 5 (five) proceedings were instituted for "action or inaction which unjustifiably delays the proceedings".

(2020): Others - 2 / two / disciplinary proceedings have been instituted for culpable non-fulfillment of official duties, expressed in systematic non-observance of the terms, provided in the procedural laws; 1 / one / disciplinary proceeding is instituted for action or inaction, which damages the prestige of the judiciary and 1 / one / disciplinary proceeding is instituted for action or inaction, which unjustifiably delays the proceedings and non-fulfillment of other official duties.
Others - "systematic non-compliance with the time limits provided for in the procedural laws"; "action or inaction that unjustifiably delays the proceedings"; "action or inaction that damages the prestige of the judiciary"; "Failure to perform official duties".

(2018): Other – „ any systematic failure to keep the deadlines provided for in the procedural laws “; „ any act or omission that unjustifiably delays the proceedings“; „any act or omission, which damages the prestige of the Judiciary“; „failure to discharge the official duties“

(2016): "Other": Systematic failure to comply with the deadlines provided for in procedural laws and / or action or omission which unduly slows down proceeding; non-performance of other official duties.

(2014): For 2014, the category “other” refers to “consistent non-observance of the deadlines provided for in the procedural laws”, “action or inaction, which unduly delays the proceedings”, “action or inaction, which undermines the prestige of the judiciary”, “non-observance of the official duties”.

(2012): For 2012, the category “other” refers to “consistent non-observance of the deadlines provided for in the procedural laws”, “action or inaction, which unduly delays the proceedings”, “action or inaction, which undermines the prestige of the judiciary”, “non-observance of the official duties”.

Croatia

(General Comment): Pursuant to the State Judiciary Council, disciplinary offences are: careless performance of judicial office; failure to act pursuant to a decision regarding the right to trial within a reasonable time; performance of any other service or job incompatible with a judicial function; performance of any service, tasks or activities incongruent with judicial office; causing of disruptions in the work of a court which have a significant impact on the exercise of judicial power; disclosure of an official secret concerning the performance of judicial office; damaging of the reputation of the court or of judicial office in any other way; failure to submit a declaration of assets or the untruthful presentation of data in the declaration of assets; failure to subject to the physical and mental evaluation in order to assess the ability to perform judicial duties.

(2021): One disciplinary proceeding against a judge because of damage to the reputation of the court.

(2020): Two disciplinary sanctions against judges because of damage to the reputation of the court.

Czech Republic

(2021): Other: Judges:
- professional incompetence

Prosecutors:
- alcohol consumption

(2020): alcohol consumption

Denmark

(2021): Decorum

(2018): Of the two disciplinary proceedings mentioned regarding judges; one was against a judge and the other was against a deputy judge.
Of the five disciplinary proceedings mentioned regarding prosecutors as "other"; includes 3 breaches of personal data due to loss of documents / files (2) and loss of work computer (1) that was left in court by mistake. Furthermore, it includes incorrect registration of working hours (1) and unacceptable communication with co-workers and leader (1).

Finland

(General Comment): In Finland, anyone who suspects that a public authority or an official has not observed the law or failed to perform a duty may file a complaint with the Ombudsman or with the Chancellor of Justice. Anyone can complain in a matter concerning themself, but a complaint can also be made on behalf of someone else. Most of the complaints initiating disciplinary proceedings do not call for any action. Accordingly, there is a considerable difference between the number of initiated disciplinary proceedings and the number of sanctions.

(2021): Judges: The Parliamentary Ombudsman's office registered 254 new proceedings. However, the Parliamentary Ombudsman compiles their statistics slightly differently. Cases that relate to, for example, tax cases in administrative courts, dept recovery proceedings in the district courts, cases in Insurance Court and land cases are filed under the relevant substance matter and not court cases. Therefore, the Ombudsman handles more court related cases that it statistically looks. The Chancellor of Justice received 237 complaints against the general courts, 50 against the administrative courts and 19 against the specialist courts. So in total he received 306 complaints. He also randomly checked 3 930 criminal judgments, out of which 65 were looked at more closely. In addition, he received 31 notifications of suspected crime in office related to a judge. In addition, on his own initiative, he looked into 2 cases related to conduct of the court. Prosecutors: The Parliamentary Ombudsman's office registered 107 new proceedings in 2021. However, the Parliamentary Ombudsman compiles their statistics slightly differently and some cases that relate also to prosecutors are filed under the police or court cases. Chancellor of Justice received 85 complaints against the prosecutors in 2021.

(2020): Judges: The Parliamentary Ombudsman's office registered 257 new proceedings. However, the Parliamentary Ombudsman compiles their statistics slightly differently. Cases that relate to, for example, tax cases in administrative courts, dept recovery proceedings in the district courts, cases in Insurance Court and land cases are filed under the relevant substance matter and not court cases. Therefore, the Ombudsman handles more court related cases that it statistically looks. The Chancellor of Justice received 274 complaints against the general courts, 67 against the administrative courts and 19 against the specialist courts. So in total he received 360 complaints. He also randomly checked 3 106 criminal judgments, out of which 43 were looked at more closely. In addition, he received 55 notification of suspected crime in office related to a judge. Prosecutors: The Parliamentary Ombudsman's office registered 96 new proceedings. However, the Parliamentary Ombudsman compiles their statistics slightly differently and some cases that relate also to prosecutors are filed under the police or court cases.
Chancellor of Justice received 163 complaints against the prosecutors.

(2018): The Parliamentary Ombudsman initiated 199 disciplinary proceedings against judges and the Chancellor of Justice 466 (out of which 356 complaints, 80 disciplinary proceedings initiated after randomly checking criminal judgments and 30 notifications from the police and the courts of appeal to the Chancellor of Justice regarding suspected criminal offences committed by judges). The category 'criminal offence' includes notifications from the police and the courts of appeal to the Chancellor of Justice regarding suspected criminal offences committed by judges. The category 'other' includes all the other cases for which exact data on which grounds they were initiated is not available.
The Parliamentary Ombudsman initiated 47 disciplinary proceedings against prosecutors , The Chancellor of Justice 101 and the Office of the Prosecutor General 37.

(2016): The number of initiated cases was 737 from which 30 was criminal offence. The category other includes all the other cases for which exact data on what ground they ware initiated is not available. Among the 737 disciplinary proceedings initiated against judges or courts, 404 were before the Chancellor of Justice and 333 before the Parliamentary Ombudsman. However, the number of complaints effectively followed by a sanction was: the Chancellor of Justice: 10, the Parliamentary Ombudsman: 10. In most of the cases no measure is taken.
Total number of disciplinary proceedings initiated against public prosecutors were 165 (The Chancellor of Justice: 91, the Parliamentary Ombudsman: 72, the Prosecutor General: 2) but the number of complaints effectively followed by a sanction was (The Chancellor of Justice: 5, the Parliamentary Ombudsman: 4, the Prosecutor General: 2) . In most of the cases no measure is taken.

(2014): In 2014, the total number of disciplinary proceedings initiated against judges or courts were 620 (376 by the Chancellor of Justice; 244 by the Parliamentary Ombudsman) but the number of complaints effectively followed by a sanction was 28. Likewise, the total number of disciplinary proceedings initiated against public prosecutors was 160 (86 by the Chancellor of Justice; 74 by the Parliamentary Ombudsman) but the number of complaints effectively followed by a sanction was 7.

(2012): In 2012, the total number of disciplinary proceedings initiated against judges or courts were 642 (372 by the Chancellor of Justice; 270 by the Parliamentary Ombudsman) but the number of complaints effectively followed by a sanction was 13. Likewise, the total number of disciplinary proceedings initiated against public prosecutors was 173 (87 by the Chancellor of Justice; 786 by the Parliamentary Ombudsman) but the number of complaints effectively followed by a sanction was 4.

France

(2021): The data filled in the table are those of the civil, criminal and administrative justice.
Source: DSJ and Council of State

(2020): Four of these magistrates have been the subject of a procedure of prohibition from exercising their functions (precautionary procedure taken in the interest of the service)_x000D_
Data from the judicial order.

(2014): In 2014, with regard to administrative judges, there was an ethical misconduct (counted in the table).

Germany

(General Comment): Not all Länder collect data on disciplinary measures. Data are available only in individual cases, meaning that no representative result can be reported.

(2021): Five Länder could not provide any data on the disciplinary proceedings and selected "NA". Three Länder reported "0" for all categories (judges and prosecutors). Therefore, no reliable numbers for the whole of Germany are available.
Länder that could provide data, mentiones the following "other" proceedings: Violation of the duty to provide truthfull information toward the employer.

(2020): Violation of the duty to provide truthfull information toward the employer
These figures were provided by the Länder of Baden-Württemberg, Bayern, Brandenburg, Hamburg, Mecklenburg-Vorpommern, Nordrhein-Westfahlen, Rheinland-Pfalz, Sachsen, Sachsen-Anhalt and Schleswig-Holstein. Other Länder could not provide any relevant data.

(2018): - stating incorrect professional title on social media (Ordinary jurisdiction - judges)
- unspecified (3 cases)
These figures were provided by the Lander of Baden-Württemberg, Bavaria, Berlin, Hamburg, Mecklenburg-Western Pomerania, North Rhine-Westphalia, Rhineland-Palpatinate, Saxony and Thuringia.

Greece

(2021): The answers given by the courts are either numerical, or that the number of disciplinary procedures is zero or that the data is not available. It is noted that the supreme courts have answered numerically. Regarding the choice other to the above question the answer is the petitions of citizens against judicial officers.

(2020): From the majority of the courts, the answer that has been given is not available.

(2016): "Other": Dismissal due to serious illness: 1 Judge; Inadmissible case: 6 Judges

(2014): According to 2014 data, professional inadequacy is considered to be the delay in issuing decisions.

Hungary

(2021): Other for judges: breach of the rules of court management as a court executive

(2020): Prosecutors: In 3. A crime has been suspected and the cases are still under investigation.
Judges: Other category includes a case when a judge carried out an activity for remuneration that (s)he was not allowed by the law.

(2018): "other": the case covered ethical and professional issues as well

(2016): Prosecutors: "Other" - the authority of the profession is violated or threatened by the prosecutor's conduct or behaviour
Judges: A judge commits a disciplinary breach if he/she violates the obligations stemming from his/her service relationship, or his/her lifestyle and/or his/her behaviour harms or jeopardises the reputation of the judiciary.
"Other": 11 procedures were initiated because of the violation of the obligations stemming from the judicial service; 3 procedures were initiated because of the violation of the obligations stemming from the judicial service and also breaching professional ethics.

(2014): In the frame of the 2014 exercise, it has been specified that item 3 refers to criminal offences for which a disciplinary action can be ordered pursuant to the UJT, 82 § 1 b) (abusive or threatening lifestyle to the profession prestige).
The sum of the subcategories does not correspond to the total due to the fact that the number of criminal offenses (2) is also included in the third category "professional inadequacy" (3). As a general rule, in case of criminal offense, the disciplinary action can be ordered on the basis of the Law on prosecutors, article 82 §(1) b) (abusive or threatening lifestyle to the profession prestige).

(2012): In 2012, the category “other” included in respect of judges misdemeanour proceedings. Besides, the attention was drawn on the fact that the proceedings encompassed in items 1 and 2 are the same that the proceedings subsumed in items 3 and 4. As to the disciplinary proceeding against a public prosecutor for professional inadequacy, the penalty was imposed in 2013.

Ireland

(2021): The judicial conduct regime as set out in the Judicial Council Act 2019 has not yet commenced. Draft Guidelines on Conduct and Ethics have been submitted by the Judicial Conduct Committee to the Board of the Council in accordance with this legislation and once adopted by the Council as a whole, the relevant sections of the Act may then be commenced. The legislative timeframe provides that adoption by the Council be done by the end of June 2022

(2020): The judicial conduct regime as set out in the Judicial Council Act 2019 has not yet commenced. Draft Guidelines on Conduct and Ethics have been submitted by the Judicial Conduct Committee to the Board of the Council in accordance with this legislation and once adopted by the Council as a whole, the relevant sections of the Act may then be commenced. The legislative timeframe provides that adoption by the Council be done by the end of June 2022

(2018): There is currently no mechanism in Ireland for disciplinary proceedings against judges. The Judicial Council, when established will provide such a mechanism.

Italy

(General Comment): Figures at Q.144 do not include disciplinary proceedings against administrative judges

(2021): The total number of disciplinary proceedings initiated in Italy in 2021 is 148. Unfortunately, we cannot distinguish neither between judges and prosecutors nor by type of proceeding.
In Italy both judges and prosecutors are governed by the same body, and they are seen as a whole (magistrates). For this reason, when it comes to disciplinary proceeding judges and prosecutors follow the same procedures, hence our statistics do not distinguish between judges and prosecutors. For this cycle the High Judicial Council has only provided the total.

(2018): The above figures do not include 2 disciplinary proceedings against administrative judges.

(2016): "Other" refers to disciplinary proceedings which involve more than one category (e.g. "Breach of professional ethics" and "Professional inadequacy").

Latvia

(2020): Other of prosecutors: By 1 July 2020, the public prosecutor had been held to disciplinary action for the commission of an administrative violation, such as non-compliance with road traffic rules.

(2018): Other for prosecutors - A public prosecutor shall not be held liable for disciplinary action for committing a criminal offence, but shall be held liable for disciplinary action for committing an administrative violation, for example, failure to comply with road traffic regulations.

(2016): not intentionally breach of law, but negligence (breach of procedural terms, accidentally has not observed criminal procedure norms or substantive legal norms).

(2014): According to 2014 data and pursuant to the Judicial Disciplinary Liability Law, a judge may be held liable for: intentional breach of law in adjudication of cases – 14 cases in 2014; non-execution of job responsibilities or gross negligence committed during adjudication – 4 cases in 2014; disrespectful action or gross violation of norms of the Code of Judicial Ethics; administrative violations - 4 cases in 2014; refusal to suspend association with political party or political organisation – no cases in 2014; non-observance of restrictions and prohibitions stipulated in the Law on Prevention of Conflict of Interests in Activity of the State Officials – no cases in 2014.
As to public prosecutors, the category “other” encompassed not intentionally breaches of law, but negligence (breach of procedural terms; the prosecutor has accidentally not observed criminal procedure norms or substantive legal norms).

(2012): For 2012, the category “other” referred to reprimands in respect of judges. As to public prosecutors, the same category encompassed not intentionally breaches of law, but negligence (breach of procedural terms; the prosecutor has accidentally not observed criminal procedure norms or substantive legal norms).

Lithuania

(2021): note as a sanction.

(2020): 2 cases where disciplinary proceedings have not been instituted without evidence of disciplinary action, and
1 case when the disciplinary proceedings were terminated without the subject of disciplinary liability (the judge reached seniority and was dismissed).
in two cases a violation (professional inadequacy) was established, but limited to its consideration, no disciplinary proceedings were instituted; two cases (pbreach of professional ethics) were referred to the Juditial Court of Honor.

(2018): Concerning judges: only 2 of the initiated disciplinary proceedings (16) have been brought to the Judicial Court of Honor. Concerning prosecutors: the decrease of the number of initiated disciplinary proceedings (comparing with 2016) was the outcome of the fact that there were received fewer requests to initiate the inspection of prosecutor's activity or to conduct an investigation at the Prosecutor's Ethics Commission.

(2012): In 2012, the Judicial Ethics and Discipline Commission instituted 9 disciplinary actions (4 on the ground of breach of professional ethics and 5 on the ground of professional inadequacy).

Luxembourg

(2021): Since disciplinary proceedings may also be initiated for acts relating to the magistrate's personal (non-professional) behaviour, the category “other” has been used to take account of such situations.

(2020):
Since disciplinary proceedings may also be initiated for facts relating to the magistrate's personal (non-professional) conduct, the heading OTHER has been used to take account of such situations.

Malta

(General Comment): This data is not available due to issues of professional secrecy.

(2018): This information is not made publicly available.

Netherlands

(2021): Courts: There was one disciplinary proceeding for a replacement-judge (these are usually lawyers, professors, etc. and replace judges when they are absent, ill, etc.), not counted here.
SC: the two disciplinary proceedings concerned a dismissal of a deputy judge. Deputy judges usually perform a main position outside the judiciary. The law has provided for the possibility of the dismissal of a judicial official by the Supreme Court if the judicial officer has not been called upon to perform activities by his or her court leadership for two years. In addition, there should be a sufficiently compelling reason justifying the request for dismissal. In one of the cases, the deputy judge had systematically failed to respond to call notices asking for her availability to perform judicial duties. Nor had she responded to other correspondence. In the other case, the appointment to the position of deputy judge was related to the individual's main position as civil-law notary. Disciplinary measures were imposed on the individual in question. A Disciplinary Court disqualified the individual from acting as a civil-law notary. As a result, this individual lacked authority and credibility. In both cases, the Supreme Court held that there was a sufficiently compelling reason for dismissal.

(2020): A combined integrity issue in work and private life

(2018): private use of a company car

Poland

(General Comment): A judge shall be disciplinarily liable for official (disciplinary) offences, including: - a manifest and flagrant violation of the law; - acts or omissions likely to prevent or substantially impede the functioning of the judicial authority; - actions that question the existence of the official relationship of a judge, the effectiveness of the appointment of a judge or the legitimacy of the constitutional organ of the Republic of Poland; - public activities incompatible with the principles of independence of courts and judges; - offence against the dignity of the office. A judge shall also be held disciplinarily liable for his conduct prior to assuming office if by such conduct he has breached the duties of the state office then held or has proved himself unworthy of the office of judge.
The disciplinary penalties shall be:
- admonition;
- reprimand;
- reduction of the basic salary by 5%-50% for a period from six months to two years;
- a pecuniary penalty in the amount of one month's basic salary, plus the judge's long-service allowance, function allowance and special allowance, payable for the month preceding the issuance of the final sentence; - removal from office (for example, chair of a division) ;
- transfer to another place of employment;
- dismissal of a judge.
A prosecutor is liable to disciplinary action for official (disciplinary) offences, including: - an obvious and gross violation of the law; - acts or omissions which may prevent or seriously obstruct the functioning of the body of justice or the public prosecutor's office; - actions that question the existence of the official relationship of a judge or prosecutor, the effectiveness of the appointment of a judge or prosecutor or the constitutional authority of the Republic of Poland; - public activity incompatible with the principle of independence of the prosecutor; - misconduct on the part of the judge or prosecutor. An act or omission of a prosecutor undertaken exclusively in the public interest shall not constitute a disciplinary offence.
A public prosecutor shall also be liable to discipline for his or her conduct prior to assuming office if he or she has breached the duties or the dignity of the public office then held, or has proved unworthy of the office of public prosecutor.
A public prosecutor shall be liable only to disciplinary action for abuse of freedom of speech in the performance of his or her official duties, constituting a privately prosecutable insult to a party, his or her agent or defence counsel, curator, witness, expert or interpreter.
The disciplinary penalties are:
- admonition;
- reprimand;
- reduction of basic salary by 5% - 50% for the period from six months to two years; - a fine in the amount of one month's basic salary plus the prosecutor's long-service bonus, function bonus and special bonus payable for the month preceding the final conviction; - removal from office;
- transfer to another official position;
- expulsion from the prosecution service.

(2021): "Other": excessive length of the proceedings.
Prosecutors Office: providing information on a common type of disciplinary proceedings is not possible as no statistics are kept in this area. Disciplinary proceedings are carried out at the level of regional public prosecutor's offices by deputies of the disciplinary spokesman.

(2016): The data concern reasons of undertaken disciplinary proceedings agains judges is not available.

Portugal

(General Comment): Judges: the annual report of the High Judicial Council doesn't discriminate the categories of disciplinary proceedings.

Romania

(General Comment): Disciplinary breeches may have only a disciplinary liability. Nevertheless, judges and prosecutors are responsible for criminal acts as any other citizen, according to an ordinary proceeding.

(2021): As previously, in the table above we have indicated the number of disciplinary actions registered in the reference year (2021) before the Sections for judges and prosecutors of the Superior Council of Magistracy in disciplinary matters.
The discrepancies between the number of disciplinary actions and the number of breaches of professional ethics + breaches of the professional inadequacy are due to the fact that one disciplinary action can refer to not only one but more disciplinary offences, as well as to not only one but more magistrates.
The disciplinary offences are expressly regulated under the provisions of art. 99 of the Law no.303/2004 amended and republished in 2018.

(2020): As previously, in the table above we have indicated the number of disciplinary actions registered in the reference year (2020) before the Sections for judges and prosecutors of the Superior Council of Magistracy in disciplinary matters (9 disciplinary cases/disciplinary actions were registered before the Section for Judges of the SCM in disciplinary matters and 9 disciplinary cases were registered before the Section for Prosecutors of the SCM in disciplinary matters).
The discrepancies between the number of disciplinary actions and the number of breaches of professional ethics + breaches of the professional inadequacy are due to the fact that one disciplinary action can refer to not only one but more disciplinary offences, as well as to not only one but more magistrates.
The disciplinary offences are expressly regulated under the provisions of art. 99 of the Law no.303/2004 amended and republished in 2018.

(2018): In the table above we have indicated the number of disciplinary actions registered in the reference year (2018) before the Sections for judges and prosecutors of the Superior Council of Magistracy in disciplinary liability matters.
The inadvertence between the number of disciplinary actions and the number of breaches of professional ethics + breaches of the professional inadequacy is due to the fact that one disciplinary action can refer to not only one but more disciplinary offences, as well as to not only one but more magistrates.
The disciplinary offences are expressly regulated under the provisions of art. 99 of the Law no.303/2004 amended and republished in 2018.

Slovak Republic

(General Comment): Criminal offences of judges and prosecutors are not tried at discipilinary proceedings.

(2021): We would like to draw your attention to the judicial reform adopted in the Slovak Republic last (reference) year, which had also an impact on the disciplinary proceedings against judges and public prosecutors. The Supreme Administrative Court of the Slovak Republic (SAC) was established on 1 January 2021 and became fully operational on 1 August 2021; the competence to decide on the disciplinary liability of judges and prosecutors was transferred to it. The authority responsible for decision-making on the disciplinary liability of judges until the establishment of the SAC was the disciplinary chambers elected by the Judicial Council of the Slovak Republic. Disciplinary Proceedings Code of the Supreme Administrative Court of the Slovak Republic came into force on 1 December 2021. In the absence of this concrete legal regulation of disciplinary proceedings, the disciplinary chambers of SAC were not able to commence their decision-making. The number of disciplinary proceedings initiated against judges refers to the disciplinary proceedings brought before the SAC since 1 August 2021 and those which were brought before the disciplinary chambers of the Judicial Council from 1 January 2021 till 31 July 2021, were pending as of 1 August 2021 and transferred to the SAC.
The number of disciplinary proceedings initiated against public prosecutors refers to the proceeding which was brought before the SAC from 1 August 2021. From 1 January until 31 July 2021, there might have been some other disciplinary proceedings initiated against public prosecutors, which were brought before the disciplinary committees appointed by the Prosecutor General - the authority responsible for decision-making on the disciplinary liability of public prosecutors before the establishment of the SAC. None of the cases were transferred to the SAC and the SAC therefore does not have the data or statistics of the decision-making of those disciplinary committees.
Besides the disciplinary proceedings heard and decided by the SAC, there is a possibility to impose a sanction of minor importance to a judge. According to Article 117 paragraph 7 of the Act on Judges, deficiencies in the work/ethics of minor importance can be dealt with by giving a written warning to a judge if this is sufficient. The SAC does not have the competence to collect the information regarding the written warnings unless the judge proposes to invalidate the written warning since the review of those written warnings is carried out by the SAC. In 2021, there were 6 proposals for determining the written warning as invalid brought before the SAC and the disciplinary chambers of the Judicial Council.

(2020): In the line 4. "Other" are counted motions for a declaration that the written warning is invalid.

(2018): In 2018 there were 21 disciplinary proceedings initiated against judges for these reasons:
Professional inadequacy: 19 disciplinary proceedings, e.g. violation of the duties of a judge; a deliberate breach of the judge's duty to decide impartially and impartially; presence in the workplace under the influence of alcohol, narcotic or psychotropic substances; culpable conduct of a judge resulting in delays in court proceedings, Other: 2 disciplinary proceedings for failure to submit the written declaration along with asset declaration

(2016): With respect to the judges the majority of "other" disciplinary proceedings was initiated due to causing the procedural delays (23 cases), filing an application for declaration of invalidity of a written reprimand filed by a judge itself (3 cases) and failure to meet the obligation of standby duty performance duly and timely and failure to meet the obligation of overtime function performance (1 case).

(2014): In 2014, the category “other” included 1 deliberate violation of the obligation to impartial and unbiased deciding, 9 deliberate conducts of judges leading to undue delays, 1 arbitrary decision, 2 repeated committing of a serious breaching of discipline.

(2012): In 2012, there were 19 disciplinary proceedings against judges for professional inadequacy - undue delays in proceedings (10), failure to elaborate the judgments within the statutory time period (3); failure to decide within the statutory time period (3); other breaches of the professional duties (3). As to the category “other”, it encompassed one misdemeanor against the public order.

Slovenia

(General Comment): The Judicial Service Act provides for 27 different types of conduct of judges that represent a disciplinary breach and the state State Prosecution Service Act provides for 31 different types of conduct of public prosecutors that represent a disciplinary breach.

(2016): Judges: Seven disciplinary proceedings were initiated in 2015.
Prosecutors: One disciplinary proceeding was initiated in 2015 for the reason of professional inadequacy.

(2014): o breach of professional ethics: one disciplinary proceeding was initiated in 2014 because of an action or behaviour on the part of the judge that conflicts with the judge’s impartiality or that damages the reputation of the judicial profession and inappropriate, indecent or insulting behaviour or expression towards individuals, organs of the State and legal entities in connection within the judicial service or outside of it;
o professional inadequacy: two disciplinary proceedings were initiated in 2014 because of careless, untimely inappropriate or negligent performance of judicial service;
o criminal offence: one disciplinary proceeding was initiated in 2014 because of commission of an act that has the statutory definition of a criminal offence while holding judicial office.
o “other”: 11 different breaches, such as illegal or irrational use of means of work, abuse of right to absence from work, infringement of the rules on safety at work, infringement of the Court Rules on the use of service uniform etc.; however there were no discipline proceedings corresponding to such breaches in 2014.

(2013): With regard to public prosecutors, to provide a more comprehensive picture it was mentioned that there were 3 disciplinary proceedings initiated in year 2013.

(2012): In 2012 one disciplinary proceeding was initiated against a judge because of an action or behaviour on the part of the judge that conflicts with the judge’s impartiality or that damages the reputation of the judicial profession. The proposal of the disciplinary prosecutor for the pronouncement of disciplinary sanction was refused.
According to the Judicial Service Act, there are 27 types of breach of discipline in respect of judges. For the purpose of these questions, they were divided to 4 corresponding groups:

Spain

(2020): Other Judges: affiliation to a political party or union; unjustified absence; incompatible activity.
Other Prosecutions: lack of consideration; delay.

(2018): The number total in case of Prosecutors expresses the number of information proceedings opened.

(2016): 2 - Delay 1 - To break the regime of incompatible activities (data for Prosecutors)

Question 145

Austria

(General Comment): The difference between the data of disciplinary proceedings/sanctions against judges and prosecutors is mainly a result of the fact that there are much more judges than prosecutors in Austria. The bulk of disciplinary proceedings against judges are conducted on the ground of the long term of making out/transcription of judgments.

(2016): ---

(2012): In the frame of the 2010 and 2012 exercise, it was specified that “other” does apply to conviction and the order for costs of proceedings. Besides, it was stressed that 16 disciplinary (judge) cases were pending, partly because of pending penal cases, partly because of other reasons, while 3 disciplinary (public prosecutors) cases were pending mainly due to pending penal cases.

Belgium

(General Comment): Number of major disciplinary sanctions pronounced by disciplinary courts and disciplinary courts of appeal. There is no consolidated register of minor sanctions (call to order and reprimand) pronounced by local heads of corps.

(2021): Clarification for one case of suspension: it is a one-month suspension with a 3-year carry-over. Sources: the Dutch-speaking Disciplinary court in Ghent, the French-speaking Disciplinary court in Namur, the Dutch-speaking Disciplinary court of Appeal in Brussels and the French-speaking Disciplinary court of Appeal in Brussels
Disciplinary sanctions foreseen by the Judicial Code (Article 405 §1).

(2020): The number of new disciplinary cases may differ from the number of completed disciplinary cases because some cases are completed in a calendar year later than the year the case was opened.

Bulgaria

(General Comment): The temporary suspension from office (temporary suspension of functions) is not a disciplinary sanction, and for that reason the number of such suspensions is not included in the total number of imposed sanctions. The difference between the number of the initiated disciplinary proceedings and the number of the imposed disciplinary sanctions is due to the fact that part of the imposed sanctions are under proceedings, initiated during the preceding reporting period or are imposed by order of the administrative head.

(2021): There is no such sanction "reprimand" in Article 308 of the Judiciary System Act, since the lightest disciplinary punishment is a "remark". With regard to judges: - a total of 6 /six/ disciplinary proceedings, initiated in previous periods, were concluded, and the Judges' College of the Supreme Judicial Council (SJC) ruled on them as follows:
- "remark" penalty imposed - 1 /one/ disciplinary proceeding;
- imposed sanction "reduction of basic remuneration" - 1 /one/ disciplinary proceeding;
- 1 /one/ disciplinary proceeding was terminated
- in 2 /two/ disciplinary proceedings, the proposals to impose a disciplinary penalty were not accepted.
With a decision of the Judges' College of the SJC, the judge's "remark" imposed by order of the administrative head was confirmed.
Regarding prosecutors:
In 2021, a total of 11 (eleven) disciplinary proceedings were concluded, on which the Prosection College of the SJC ruled as follows:
- Imposed disciplinary punishment "remark" - 8 items (the Prosection College of the SJC issued decisions by which it confirmed on the basis of Art. 314, para. 4 of the Judiciary System Act, 8 (eight) orders of administrative heads to impose disciplinary punishment "remark");
- imposed disciplinary penalty "reduction of basic remuneration by 10 (ten) percent for a period of 7 (seven) months" - 1 ";
- in 2 (two) disciplinary proceedings, the collegium did not impose disciplinary punishments, having accepted that in one case the magistrate did not commit a disciplinary violation, and in the other case, due to the absence of committed disciplinary violations;
For the specified period, 4 (four) disciplinary proceedings have been suspended.

(2020): In 2020 a total of 11 / eleven / disciplinary proceedings, initiated in previous periods, have been completed, and the Judges' College of the SJC has ruled as follows:
- imposed penalty "remark"/"reprimand" - 4 / four / disciplinary proceedings /;
- imposed penalty "disciplinary dismissal" - 1 / one / disciplinary proceedings;
- 6 / six / disciplinary proceedings have been terminated.
In 2020, a total of 9 (nine) disciplinary proceedings were completed, on which the Prosecutors' College of the SJC ruled as follows:
- Imposed disciplinary sanction "remark" /"reprimand"- 4;
(The PC of the SJC has ruled, on the basis of Article 314, paragraph 4 of the JSA, on 3 (three) orders of administrative heads for imposing a disciplinary sanction "remark", and 1 (one) disciplinary proceedings on the list of the Supreme Judicial Council was completed with a decision of the PC of the SJC to impose a disciplinary sanction "remark"/"reprimand")
- 2 (two) disciplinary proceedings have been terminated due to dismissal of the magistrate and death of the magistrate;
- in 2 (two) disciplinary proceedings the college did not impose disciplinary sanctions by assuming that in one case the magistrate had not committed a disciplinary violation,and, on the other, that the subjective element of the infringement was missing, since the magistrate could not understand the nature and significance of what had committed and direct his actions during the period in which the acts had been committed;
- imposed disciplinary sanction "reduction of the basic salary by 20 percent for a period of one year" -1.

(2018): Transfer to another geographical (court) location- in our legal system there is no such sanction, but it's possible the position downgrade to lead to transfer to another geographical (court) location. For 2018 there are no such cases.

(2016): There are imposed sanctions "reprimand" and "removal from post of administrative head and deputy administrative head". The disciplinary proceedings initiated in previous years have been completed. "Suspension" is possible when a judge, prosecutor or investigating magistrate is constituted as a party accused of a publicly prosecutable offence but it is not a disciplinary sanction.

(2014): For 2014, the category "other" subsumes the following disciplinary sanctions: reprimand, demotion in rank at the same judicial system body for a term of one to three years, relief from office as administrative head or deputy of an administrative head.

(2012): For 2012, the category "other" subsumes the following disciplinary sanctions: remark and reprimand.

Croatia

(2016): Conditional dismissal

(2014): In 2014, the following disciplinary sanctions have been declared against judges for committed disciplinary acts: suspended sentences of dismissal from office (5), reprimand (1), temporarily salary reduces (11). In 2 cases, disciplinary proceedings ended with a dismissal, while 3 ended with an acquittal.
In 2014, 2 disciplinary sanctions have been declared against State attorneys for the committed disciplinary acts: one relating to the disciplinary proceeding initiated in 2014 and the second relating to the disciplinary proceeding initiated in 2013, which ended in 2014. For this reason, the number of sanctions imposed in 2014 increased in comparison to the number of disciplinary proceedings initiated in 2014.

Cyprus

(2014): In 2014, there were no sanctions pronounced against judges.

Czech Republic

(2021): Other:
Judges:
1 discharging from sanction
1 acquittal of disciplinary charges
1 discontinuance of disciplinary proceeding
3 proceedings are not finished.
Prosecutors: 1 acquittal of disciplinary charges

(2018): Other:
Judges:
1 acquittal of disciplinary charges
2 discontinuance of disciplinary proceeding
1 dismissal of a motion for a new trial
2 proceedings are not finished.
Prosecutors: 1 acquittal of disciplinary charges
1 discontinuance of disciplinary proceeding

(2016): Judges:
1 removing a judge from the office
1 acquittal of disciplinary charges
1 discharge from disciplinary punishment 5 discontinuance of disciplinary proceeding
3 proceedings are not finished.
Prosecutors: 2 acquittal of disciplinary charges.

(2014): In 2014, the following other disciplinary sanctions have been pronounced against judges: 2 discharges from disciplinary punishment; 1 acquittal of disciplinary charges; 6 discontinuances of proceedings. As for public prosecutors, there were 1 acquittal of disciplinary charges and 3 discharges from disciplinary punishment.

(2012): In 2012, the following other disciplinary sanctions have been pronounced against judges: 2 discharges from disciplinary punishment; 4 acquittals of disciplinary charges; 12 discontinuances of proceedings. As for public prosecutors, there were 5 acquittals of disciplinary charges and 7 discharges from disciplinary punishment.

Denmark

(2018): Of the two sanctions mentioned regarding judges; one was against a judge and the other was against a deputy judge. Of the 9 sanctions mentioned regarind prosecturs as other: 2 cases are yet to be resolved. 7 cases were resolved by a meeting between Human Resources and the employee. The meetings were not a reprimand (disciplinary), however the importance of preventing a similar incident in the future was emphasized. The minutes of the respective meetings have been made part of the personal file of the individual employees.

(2016): Prosecutors: In the reference years, there have been two disciplinary proceedings initiated against public prosecutors, but there have not yet been any sanctions pronounced against public prosecutors.

Estonia

(2012): In 2012, one disciplinary proceeding against a judge was initiated but the sanction was not pronounced in 2012.

Finland

(General Comment): Most of the complaints initiating disciplinary proceedings do not call for any action. Accordingly, there is a considerable difference between the number of initiated disciplinary proceedings and the number of sanctions.

(2021): Judges: The Parliamentary Ombudsman's office gave 283 decisions in 2021. Ombudsman has issued a decision with his position on the matter as well as the steps to be taken in 11 cases. One of those was a reprimand and 9 were opinion which can be either guidance (ohjaava) or reprehension (moittiva). In addition, 1 case lead to rectification (korjaus). However, the Parliamentary Ombudsman compiles their statistics slightly differently. Cases that relate to, for example, tax cases in administrative courts, dept recovery proceedings in the district courts, cases in Insurance Court and land cases are filed under the relevant substance matter and not court cases. Therefore, the Ombudsman handles more court related cases that it statistically looks. The Chancellor of Justice issued 33 reprimands and 49 instructions. In six cases he applied the Supreme Court to nullify a decision.
Prosecutors:The Parliamentary Ombudsman's office gave 105 decisions in 2021. Ombudsman has issued a decision with his position on the matter as well as the steps to be taken in 2 cases. Those were guidance (ohjaava).
Chancellor of Justice issued 2 reprimands and 1 other action. The Office of the Prosecutor General publishes summary descriptions of cases where the decision taken by a prosecutor or their action has resulted the Prosecutor General to take action. In 2021 there were 20 of such published cases. More here (in Finnish):
https://syyttajalaitos.fi/kanteluratkaisuja?tab=2020

(2020): Judges:
The Parliamentary Ombudsman's office gave 228 decisions. Ombudsman has issued a decision with his position on the matter as well as the steps to be taken in 16 cases. 12 of those were guidance (ohjaava) or reprehension (moittiva). In 2 cases he gave a recommendation (esitys) and 2 cases lead to other action (muu toimenpide). However, the Parliamentary Ombudsman compiles their statistics slightly differently. Cases that relate to, for example, tax cases in administrative courts, dept recovery proceedings in the district courts, cases in Insurance Court and land cases are filed under the relevant substance matter and not court cases. Therefore, the Ombudsman handles more court related cases that it statistically looks. Chancellor of Justice issued 22 reprimands and 29 instructions. In six cases he applied the Supreme Court to nullify a decision. He notified the Ombudsman of 14 cases concerning the courts.
Prosecutors:
The Parliamentary Ombudsman's office gave 98 decisions. Ombudsman has issued a decision with his position on the matter as well as the steps to be taken in 5 cases. Those were guidance (ohjaava) or reprehension (moittiva).
Chancellor of Justice issued 3 reprimands and 13 instructions. He transferred 1 case to the Ombudsman.
The Office of the Prosecutor General publishes summary descriptions of cases where the decision taken by a prosecutor or their action has resulted the Prosecutor General to take action. In 2020 there were 30 of such published cases. More here (in Finnish): https://syyttajalaitos.fi/kanteluratkaisuja?tab=2020

(2018): The Parliamentary Ombudsman pronounced 11 sanctions against judges and the Chancellor of Justice 36.
The Parliamentary Ombudsman pronounced 4 sanctions against prosecutors, the Chancellor of Justice 3 and the Office of the Prosecutor General 5.

France

(General Comment): Suspension ("temporary ban on performing duties") is a temporary measure, pronounced in case of emergency. It is a measure taken in the interest of the service and is not a sanction as such. It is intended to be followed by a decision on the merits of the case, concerning the disciplinary fault found.

(2021): The data filled in the table are those of the civil, criminal and administrative justice.
Source: DSJ and Council of State

(2020): The disciplinary sanctions applicable to magistrates are: 1° a reprimand with entry in the file; 2° compulsory removal; 3° removal from certain functions; 3° bis prohibition from being appointed or designated as a single judge for a maximum of five years; 4° lowering of step; 4° bis Temporary exclusion from office for a maximum of one year, with total or partial deprivation of salary; 5° Demotion; 6° Automatic retirement or admission to cease his or her duties when the judge is not entitled to a retirement pension; 7° Removal from office._x000D_
Other prosecutor: compulsory retirement_x000D_
Other judge: refusal of honorary status_x000D_
NB: in France, geographical transfer can be combined with another sanction and this was done on 3 occasions in 2020._x000D_
Data from the judicial order

(2014): In 2014, the category "others" includes temporary exclusion from functions without pay for an administrative judge and two "admissions to leave office", sentence close to dismissal.
There is a difference between the number of disciplinary proceedings initiated and the number of sanctions imposed because of procedural delays. Indeed, sanctions are not necessarily imposed the year of referral to the disciplinary body.

(2012): In 2012, another sanction imposed on a public prosecutor is the sanction of "denial of honorary", sanction applicable against retired judges at the time of the disciplinary decision. The disparity between the number of disciplinary proceedings and the number of penalties imposed results in the absence of obligation on the HJC to rule in the year of referral. It should be noted that in 2012, the Minister of Justice withdrew its request for disciplinary proceedings in a case against a judge.

Germany

(General Comment): Not all Länder collect data on disciplinary measures. Data are available only in individual cases, meaning that no representative result can be reported.

(2021): Four Länder could not provide any data on the number of sanctions and selected "NA". Seven Länder reported "0" for all categories (judges and prosecutors). Therefore, no reliable numbers for the whole of Germany are available.
Länder that could provide data, mentiones the following "other" sanctions: expression of disapproval with a warning.

(2020): - dicontinuation of the disciplinary proceeding
These figures were provided by the Länder of Baden-Württemberg, Mecklenburg-Vorpommern, Nordrhein-Westfahlen, Rheinland-Pfalz, Sachsen, and Schleswig-Holstein. Other Länder could not provide any relevant data. This means that some of the Länder who had data on the number of disciplinary proceedings available, could not provide data on the number of sanctions.

(2018): Ordinary jurisdiction: disapproval
These figures were provided by the Lander of Baden-Württemberg, Bavaria, Berlin, Hamburg, Mecklenburg-Western Pomerania, North Rhine-Westphalia, Rhineland-Palpatinate, Saxony and Thuringia.

Greece

(2021): The answers given by the courts are either numerical, or that the number of penalties is zero or that the data is not available. It is noted that the supreme courts have answered numerically.

(2020): From the majority of the courts, the answer that has been given is not available.

(2016): - Dismissal due to Serious illness: 2 Judges
- Disciplinary offence not committed:5 Judges
- Disciplinary sanction not imposed:2 Judges
- Discussion postponed:5 Judges

(2012): For 2012, the category “other” subsumed 1 repetition of disciplinary proceedings and 1 declaration of a disciplinary action as unacceptable.

Hungary

(2021): Under the Act on Prosecutors, the so-called 'reproof' is a disciplinary sanction less severe than reprimand. In the reference year, 2 cases were ended with reproof. Another less severe disciplinary sanction is the written warning which is given in case of minor disciplinary offences. In the reference year, 8 cases were finished with a written warning. As to the 2 disciplinary cases that ended with dismissal, one case was initiated in 2020 but was finished in 2021.
Judges: Other category includes 4 cases in which the Service Tribunal finished the case without establishing any disciplinary liability of
the judge.
In the light of the coronavirus epidemic, strict protective measures have been introduced within the Hungarian Prosecution Service in order to protect the health of the prosecution staff and to ensure their operational efficiency. A significant part of the increase in disciplinary sanctions indicated by the CEPEJ was due to minor breaches of these protective measures. The disciplinary sanctions listed as possible replies to be indicated in the CEPEJ questionnaire, namely the disciplinary sanctions of 'suspension', 'withdrawal from the case', 'fine', 'transfer to another (prosecution) geographical location' and 'resignation', do not correspond to any of the disciplinary sanctions listed in our Status Act, hence the indicated possible disciplinary sanctions are not applicable. The disciplinary sanctions of ‘downgrading by one pay grade’ and ‘downgrading by two pay grade” corresponding to 'temporary reduction in salary' and ‘downgrading to inferior position or release from managerial position’ corresponding to ‘downgrading of position’ were not imposed in 2021. Nor was the disciplinary sanction of 'withdrawal of an award, including a title, conferred by the Chief Public Prosecutor' applied.

(2020): Prosecutors: In 1. and 10.: one case was initiated in 2019, ie it does not belong to the above 9 proceedings, but due to the issue it had to be included.
Of the 9 proceedings against prosecutors in 2020, three were discontinued, three, as criminal proceedings were also instituted in the case, were suspended, and in 2021 a written warning was applied in 2021 instead of a disciplinary sanction. The remaining two cases are the above-mentioned one-stop and one office-closed procedure.
In the case of prosecutors, no disciplinary proceedings were initiated in a further 11 minor disciplinary cases, and a written warning, which does not constitute a disciplinary sanction, was applied. The reason for the measure was the guilty breach of official duty in 9 cases, and the certification of an act violating or endangering the authority of his profession with his lifestyle and behavior in 2 cases.
Judges: Other category includes 4 cases in which the Service Tribunal finished the case without establishing any disciplinary liability of the judge.

(2018): "Other": In one case the sanction for a court executive was removal from his/her court executive position, altough he/she remained in his/her judicial position. Five cases were finished without any sanction (e.g. the judge resigned before the end of the case).

(2016): Prosecutors: - 2 disciplinary proceedings were completed by using a written warning that was not a disciplinary punishment.
- Other: dismissal as a disciplinary sanction
Judges:
Disciplinary sanctions that may be imposed on judges committing disciplinary breaches: reprimand, censure, demotion by one pay grade, demotion by two pay grades, exemption from the court executive position, motion for dismissal from the judge's position.

(2014): The figure provided for 2014 excludes those who are currently suspending their attorney practice and the so called trainee lawyers (persons who have graduated from law school, work for a law firms but have not passed the BAR exam yet). The figure also excludes the European community lawyers and the foreign legal advisors working in Hungary (the number of such lawyers is insignificant).
In 2014, concerning judges, in 11 cases the proceeding either was dismissed or no sanction was applied against the judge. In respect of prosecutors, in two cases the proceeding was discontinued and in one case it was suspended.

Ireland

(2021): The judicial conduct regime as set out in the Judicial Council Act 2019 has not yet commenced. Draft Guidelines on Conduct and Ethics have been submitted by the Judicial Conduct Committee to the Board of the Council in accordance with this legislation and once adopted by the Council as a whole, the relevant sections of the Act may then be commenced. The legislative timeframe provides that adoption by the Council be done by the end of June 2022

(2020): The judicial conduct regime as set out in the Judicial Council Act 2019 has not yet commenced. Draft Guidelines on Conduct and Ethics have been submitted by the Judicial Conduct Committee to the Board of the Council in accordance with this legislation and once adopted by the Council as a whole, the relevant sections of the Act may then be commenced. The legislative timeframe provides that adoption by the Council be done by the end of June 2022

(2018): There is currently no mechanism in Ireland for issuing sanctions against judges. The Judicial Council, when established will provide such a mechanism.

Italy

(General Comment): Figures at Q.145 do not include sanctions against administrative judges

(2018): The above figures do not include 3 sanctions to administrative judges.

Latvia

(2021): „Other" cases. For judges - no sanction imposed, only examination of the matter. Article 7, para 8 of the Judicial Disciplinary Liability Law: (8) In exceptional cases, the Judicial Disciplinary Committee may restrict themselves to examination of a disciplinary matter at a sitting, without the imposition of a disciplinary sanction. Even without specific sanction this type of decision of the Disciplinary Board is regarded as sanction because the violation is established. The judge has a disciplinary record about this decision
If a significant difference exists between the number of disciplinary proceedings and the number of sanctions, please indicate the reasons: 3 cases: in two cases the case was dismissed: 1) no violation of law; 2) initialization of wrong proceedings (disciplinary instead of administrative); in one case the judge died

(2020): Section 44 of the Prosecutor's Office Law defines the disciplinary sanctions applicable to the public prosecutor: (1) note; (2) reprimand; (3) reduction of the monthly salary of the public prosecutor to 20 per cent for a period not exceeding six months; (4) demotion; (5) dismissal.
The Other column contains a disciplinary sanction - note (Reproof).
Other for judges- as additional sanction was imposed an extraordinary assessment of the professional work of a judge.
One case was terminate, in 4 cases no sanction was imposed.

(2018): Comment for judges - 3 cases pending; 2 cases – examination (discussion) in disciplinary board. Dismissal means that the application for disciplinary proceedings was dismissed. In 2018 there were no cases examined by the Disciplinary court. One appeal was received. Comment for prosecutors - Section 44 of the Prosecutor's Office Law defines the disciplinary sanctions applicable to the public prosecutor: (1) note; (2) reprimand; (3) reduction of the monthly salary of the public prosecutor to 20 per cent for a period not exceeding six months; (4) downgrades; (5) dismissal.
The column "Other" contains a disciplinary sanction - note (Reproof).

(2016): The disciplinary sanctions applicable to the prosecutor by Section 44 of the Office of the Prosecutor Law: 1) an annotation; 2) a reprimand; 3) reduction of the base salary of the prosecutor up to 20 per cent for a period not exceeding six months; 4) reduction in the grade of office; 5) demotion in office; 6) dismissal from employment.
We note that in the box Other is a disciplinary penalty – an annotation.
2 judges received a remark

(2014): In 2014, the examination of 8 cases against judges was postponed to 2015. The other sanctions pronounced included 2 removals from office; 2 remarks; 6 disciplinary cases were dismissed; in one case the Disciplinary Committee confined itself to the examination of the disciplinary case in the sitting of the disciplinary committee. As for public prosecutors, the category “other” referred to annotations.

(2013): For 2012, the category “other” subsumed with regard to judges 1 formal warning; one terminated disciplinary proceeding and disciplinary cases pending in 2013. As for public prosecutors, the same category referred to annotations.

Lithuania

(2020): other for judges - note as a sanction.
other for prosecutors - 6 admonition - the least severe disciplinary sanction, which have been pronounced against prosucutors in 2020.

(2018): Concerning judges: in 2018 the Judicial Court of Honor adopted 2 decisions: in one disciplinary case it was limited to the review of a disciplinary action, in the second - one the part of the case was terminated, in the other part of the case as the sanction a censure (less severe sanction than a reprimand) was pronounced. Concerning prosecutors:
9 admonitions - the least severe disciplinary sanction – have been pronounced against prosecutors in 2018. Disciplinary sanctions that may be imposed on prosecutor in Lithuania (starting from least severe): 1. Admonition (9 in 2018);
2. Reprimand (5 in 2018); 3. Position downgrade (0 in 2018) 4. Dismissal (3 in 2018) The increase of the number of sanctions in 2018 (comparing with 2016) was due to the complexity of the inspections, also investigations carried out by the Prosecutor's Ethics Commission because of the gravity and nature of the violations committed.

(2016): Disciplinary sanctions that may be imposed on prosecutors (starting from least severe):
1. Admonition (6 sanctions pronounced in 2016);
2. Reprimand (2 sanctions pronounced in 2016) ;
3. Qualification rank downgrade (1 in 2016);
4. Position downgrade (1 in 2016);
5. Dismissal (0 in 2016).

(2014): In 2014, the following sanctions have been pronounced against prosecutors: 1 censure; 3 reprimands; 0 qualification rank downgrade; 1 position downgrade; 1 dismissal. There was no qualification rank downgrade.
The Judicial Court of Honour has decided on 5 cases that were initiated by the Judicial Ethics and Discipline Commission and imposed these sanctions on judges: 1 censure; 2 reprimands. In one case, the Court limited itself to the review of a disciplinary action and with regard to another case, it dismissed the disciplinary action.
It is noteworthy that in 2014, the Judicial Ethics and Discipline Commission received 272 complaints, out of which 249 requests were refused for examination (lack of motivation, requests for evaluation of judgments or trials, questions that were raised not on judicial ethics). Besides, the Judicial Ethics and Discipline Commission has decided on 9 requests of judges to provide consultations on whether some of their actions would be treated as violation of ethics of judges.

(2012): In 2012, the following sanctions have been pronounced against prosecutors: 4 admonitions; 1 reprimand; 2 position downgrades; 2 resignations. There was no qualification rank downgrade.
There were 8 decisions of the Judicial Court of Honour in respect of judges: 3 decisions imposing a disciplinary sanction (censure); 3 decisions limited to the review of a disciplinary action; 2 decisions dismissing the disciplinary action.

Luxembourg

(2021): The law still provides for the penalty of a warning as a first level of sanction as well as compulsory retirement. Disciplinary sanctions against magistrates (judges and prosecutors) are listed exhaustively in Article 156 of the Law on Judicial Organisation. Withdrawal from a specific case, position downgrade and transfer to another geographical (court) location are not included in this list.

(2020): The law still provides for a warning as the first level of sanction, as well as compulsory retirement. Disciplinary sanctions against magistrates (judges and prosecutors) are listed exhaustively in Article 156 of the Law on Judicial Organization. Withdrawal from a specific case, retroaction of position and geographical transfer are not included in this list.

(2018): L'unique procédure entamée contre un magistrat du siège pendant la procédure de référence s'est terminée par une décision de classement émanant de la formation de discipline de la Cour supérieure de justice.

(2016): In 2016 there have been two disciplinary actions. One of the cases was dismissed as not sufficiently founded, in the second case the perpetrator was revoked from office.

Malta

(General Comment): This data is not available due to issues of professional secrecy.

(2018): This information is not made publicly available.

(2016): The only case mentioned above is know because it was leaked to the local media. The magistrate in question was reprimanded by the Commission for the Administration of Justice for breaching the judicial code of ethics.

Netherlands

(2021): Prosecutors – other sanctions: one was handled as a type of complaint, and the other was a conditional dismissal for 2 years.

(2020): Resignation: whether or not at the insistence of the board (head of the court administration). Technically judges cannot be fired, as they are appointed for life.

(2012): In the frame of the 2012 exercise, it has been explained that the sanctions enumerated in items 2 to 7 were not available yet in the Dutch legislation. As to the item “resignation”, it subsumes dismissal upon request -early retirement- on a combination of a work and private related integrity issue. In 2010 and 2012, the only possible disciplinary measures were the written warning (for example, in the case of neglect of the dignity of the office and duties) and the dismissal. A dismissal is possible in the case of damaging a good state of affairs in the administration of justice and in its trust.
In 2012, there were 49 reported suspicions of integrity violations, 41 of them were actually fixed (39 prosecutors were involved). Most integrity violations had to do with improper use of service resources and the crossing of internal rules (e.g. unauthorized recording leave and undesirable use of the internet or social media). There was a rise in the number of suspected and confirmed integrity violations due to the increased awareness around integrity. Furthermore, in 2012, an Integrity Agency (BI-to) started working. It is a national expertise centre with an advisory, stimulating and controlling role in the area of integrity. Besides, in 2012, the renewed code of conduct was introduced focusing on five core values: professionalism, environmental focus, integrity, openness and diligence.

Poland

(2021): other :
- acquittal;
- consideration of the objection to the remark;
- finding guilty and waiving disciplinary sanction;
- Referral to other courts with jurisdiction;
- pending cases;
- uphold the contested order;

Prosecutors Office: statistical data of the Disciplinary Courts at the Prosecutor General's Office

(2020): Penalties of judges-. Data collected from Disciplinary Courts at the Courts of Appeal in Poland. Disciplinary Court at the Court of Appeal in Wrocław - 2 penalties of admonition;
Disciplinary Court at the Court of Appeal in Gdańsk - 1 penalty of a warning; Disciplinary Court of the Court of Appeal in Białystok - 5 decisions on discontinuance of proceedings and in one case the penalty was waived;
Disciplinary Court of the Court of Appeals in Kraków - 2 pending proceedings; Disciplinary Court of the Court of Appeals in Rzeszów - finding of guilt and waiver of punishment;
Disciplinary Court of the Court of Appeals in Szczecin - 2 penalties of admonition and 1 proceeding has not been completed yet;
Disciplinary Court of the Court of Appeal in Łódź - 1 withdrawal from imposing a disciplinary penalty Disciplinary Court of the Court of Appeals in Warsaw - 1 reprimand;
Disciplinary Court at the Court of Appeals in Lublin - guilt found, penalty waived, transferred according to jurisdiction;

(2018): According to art. 142 par. 1 of the Law on Prosecution Act of 28th January 2016 (published in the Journal of Laws 2017, item 1767 and later amendments) disciplinary penalties include: admonition, reprimand, dismissal from function, transfer to another place of service, dismissal from prosecutorial service. In view of the above mentioned regulation “other type of sanctions” means admonition and dismissal from prosecutorial service.

(2016): 16- number of admonition of judges
1-suspension of increasing the salary of a judge in repose.

Portugal

(2021): Regarding judges, on n.1 (2 sanctions were registered and 6 non registered), on n.9 (2 are sanctions of compulsory retirement and 1 of pension loss)

(2020): According to article 227 (2) of the Public Prosecution Statute, reprimands may not be registered. One of the reprimands applied in the year 2020 was not registered in the individual file of the sanctioned prosecutor.
Some of the sanctions applied in 2020 concern disciplinary proceedings started in 2019. Some of the disciplinary proceedings started in 2020 (Q144) have been filed (2).
With regard to judges, one of the reprimands was registered in the individual file of the sanctioned prossecutor, one was not and the third one is unknowed. Sanction 7 (transfer to another geographical (court) location) was applied as na accessory penalty of the suspension sanction).

(2018): 9. other: compulsory retirement

(2016): For public prosecutors other include temporary inactivity (2) and compulsory retirement (1).
For judges other include compulsory retirement (5)and dismissal (1).

(2014): For 2012 and 2014, the category “other” encompasses mandatory retirements. Sanctions indicated in items 2 and 4 imply salary reduction.

(2012): For 2012 and 2014, the category “other” encompasses mandatory retirements. Sanctions indicated in items 2 and 4 imply salary reduction.

Romania

(General Comment): In the case of breach of the Deontological Code, there is no disciplinary sanction applicable.
According to our legislation (art. 100 of the Law no. 303/2004 modified and republished) the sanctions that may be applied to judges and prosecutors, according to the seriousness of their violations, are the following: warning; decreasing the gross monthly indemnity by up to 25% for a period from one to 3 months; disciplinary transfer for a period from one to 3 years to another court or prosecutor's office, even lover in rank; suspension from office for a period of up to 6 months; position downgrade; exclusion from the magistracy.

(2021): There should be taken into account that the above mentioned data reflect the number of the disciplinary sanctions rendered in the reference year (2021) irrespectively of the year the disciplinary action was registered in, therefore this number is not necessary equal to the number of disciplinary actions registered in 2021, as these sanctions can be rendered for disciplinary actions registered before 2021 while there are also disciplinary actions registered in 2021 but not yet solved before the end of 2021; moreover, most of the decisions are final but there are also several ones are not final yet (the recourse procedure).
“Position downgrade” - this type of disciplinary sanction did not exist and it has been introduced by the Law no. 242/2018.

(2020): There should be taken into account that the above mentioned data reflect the number of the disciplinary sanctions rendered in the reference year (2020) irrespectively of the year the disciplinary action was registered in, therefore this number is not necessary equal to the number of disciplinary actions registered in 2020, as these sanctions can be rendered for disciplinary actions registered before 2020 while there are also disciplinary actions registered in 2020 but not yet solved before the end of 2020; moreover, most of the decisions are final but there are also several ones are not final yet (the recourse procedure).
“Position downgrade” - this type of disciplinary sanction did not exist and it has been introduced by the Law no. 242/2018.

(2018): There should be taken into account that the above mentioned data reflect the number of the disciplinary sanctions rendered in the reference year (2018) irrespectively of the year the disciplinary action was registered in, therefore this number is not necessary equal to the number of disciplinary actions registered in 2018, as these sanctions can be rendered for disciplinary actions registered before 2018 while there are also disciplinary actions registered in 2018 but not yet solved before the end of 2018.

Slovak Republic

(General Comment): The disciplinary judiciary at the Judicial Council of the Slovak Republic consisted of the Disciplinary Boards (senates) and the Disciplinary Boards (senates) of Appeal. The senates were created by the Judicial Council of the Slovak Republic, which supervised them to the extent specified by law. The first instance disciplinary board/senat consists of 3 members - the president of the board has to be a judge, 1 member is a judge and 1 member is experienced legal professional. The appeal disciplinary board consists of 5 members - the president of the tribunal and 2 members have to be judges, 2 members are experienced legal professionals. In the case of the president and the vice-president of the Supreme Court, the role of disciplinary court is performed by the Constitutional court of the Slovak republic.
The disciplinary judiciary exercised its powers in the above mentioned proces from 1st of July 2017 untill 31st of July 2021. From 1st of August 2021, the Supreme Administrative Court of the Slovak Republic is the disciplinary court for judges of the Slovak Republic.

(2021): In the light of the above-mentioned information concerning the judicial reform, there were no sanctions against judges and public prosecutors imposed by the SAC in 2021. The disciplinary chambers of the SAC started the decision-making process in February/March 2022. Due to the de facto inoperability of the disciplinary chambers of the Judicial Council, there were no sanctions against judges imposed by Judicial Council either. Regarding the sanctions against public prosecutors imposed before 1 August 2021, the SAC does not have the data or statistics of the decision-making of the disciplinary committees.

(2020): Prosecutors: In 2020, no disciplinary measure was imposed by the prosecutor, only one disciplinary was legally terminated, namely with the acquittal of the prosecutor. Judges: In the line 4. "Other" are counted suspension of disciplinary proceedings (16) and liberation (2).

(2018): The difference between the number of disciplinary proceedings initiated and the number of sanctions imposed is caused by the fact that not every initiated disciplinary proceedings results in sanction or finding the defendant guilty. The other reason is that some proceedings were not terminated within the same year.

(2016): In relation to the judges the majority of “other” disciplinary proceedings was ended by the judge being acquitted (9 cases), the disciplinary proceedings being terminated (11 cases), the disciplinary sentence being withheld (1 case) or the sanction being pronounced to be invalid (2 cases). There were situations within one disciplinary proceeding of partly deciding one way and partly deciding the other (for example partly imposing a sanction and partly terminating the disciplinary proceedings), therefore the number of initiated disciplinary proceedings differs from the number of sanctions. In relation to the prosecutors the “other” sanctions include suspension of the disciplinary proceedings due to the initiation of public prosecution in criminal proceedings against the prosecutor (1 case), termination of the disciplinary proceedings due to its inadmissibility because of lapse of the period of two years since commitment of the disciplinary misconduct (5 cases), termination of the disciplinary proceedings due to its inadmissibility because of failure to file an application on time (1 case), termination of disciplinary proceedings due to its inadmissibility because of termination of function of the prosecutor accused (2 cases), termination of the disciplinary proceedings due to its inadmissibility because of the application being filed by an unauthorised person (1 case), termination of the disciplinary proceedings due to its inadmissibility because the act was not considered to be a disciplinary misconduct (2 cases) and the prosecutor being acquitted (2 cases).
There were situations within one disciplinary proceeding of partly deciding one way and partly deciding the other (for example partly imposing a sanction and partly terminating the disciplinary proceedings), therefore the number of initiated disciplinary proceedings differs from the number of sanctions.

(2014): In 2014, only 6 disciplinary proceedings were resolved with final and conclusive decision. The remaining proceedings were pending. As concerns the category “other”, it subsumed a removal from the office of the vice-president of a court.
It is noteworthy that in 2014, several essential changes of legislation were made regarding disciplinary sanctioning of prosecutors. As a result, ongoing disciplinary procedures took more time and a low number of disciplinary sanctions were imposed.

(2012): In 2012, only 9 cases were decided by the Disciplinary court, the rest of the proceedings being pending. Besides, as regards the category “other”, in 3 cases the motion was withdrawn, while in 1 case the motion was dismissed.

Slovenia

(General Comment): According to the Judicial Service Act, the following disciplinary sanctions are possible: written warning (CEPEJ: reprimand), suspension of promotion (but not position downgrade, therefore CEPEJ: other), wage reduction (CEPEJ: temporary reduction of salary), transfer to another court (CEPEJ: transfer to another geographical (court) location) and termination of judicial office (CEPEJ: resignation). There are no other disciplinary sanctions corresponding to the rest of the CEPEJ categories.

(2021): In 2021, 4 procedures against judges has ended (2 finding alleged offender not responsible and 2 has been stopped due to procedural reasons).

(2020): In 2020, one procedure agains judges has ended (finding alleged offender not responsible).

(2018): Suspension (judges and public prosecutors): In previous campaigns, the answer was “NAP”, as suspension de facto includes withdrawal from cases, but is not a disciplinary sanction strictly speaking. In terms of the Judial Council Act suspension is a temporary dismissal from the judicial service that is related to the conduct of disciplinary proceedings and may last until the adoption of the final decision of the disciplinary court. In the reference year, one judge was suspended.
Other (judges): Cessation/suspension of promotion.
The difference between the number of disciplinary proceedings and the number of sanctions for judges is due to the fact that not all initiated disciplinary proceedings have been finished during the reference year. In the reference year 2018 two disciplinary proceedings were finished: one initiated already in 2017 and one initiated in 2018. Two disciplinary proceedings initiated in 2018 have not been finished in 2018, but only in 2019.

(2016): Judges, other: Cessation/suspension of promotion.

(2012): In 2012 the following sanctions have been pronounced: 1 reprimand because of an unconscious, late, inappropriate or negligent performance of judicial service. There has been no termination of judicial office for a judge on the grounds that he/she is not suitable for performing judicial service.

Spain

(2012): For 2012, the category “other” encompasses disciplinary proceedings resolved without a sanction for the judge.

Question 146

Austria

(2021): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31 December 2021 (available at www.rechtsanwaelte.at). The data only include lawyers registered in the list of Austrian lawyers, lawyers registered in the list of established European lawyers according to the Lawyers’ Directives registered by 31 December 2021. It does not include legal advisors as such a professions/type of service provider does not exist in Austria.

(2017): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2017 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.238), lawyers registered in the list of established European lawyers (87) registered by 31st of December 2017. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

(2016): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2016 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.132), lawyers registered in the list of established European lawyers (84) registered by 31st of December 2016. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

(2015): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2015 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.057), lawyers registered in the list of established European lawyers (81) registered by 31st of December 2015. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

(2014): The 2014 data includes lawyers registered in the list of Austrian lawyers (5940), lawyers registered in the list of established European lawyers (80) and trainee lawyers (2072) registered by 31 December 2014. It does not encompass solicitors or legal advisors as such professions do not exist in Austria.

Belgium

(2021): The figures are for the Orde Van Vlaamse Balies, 10 973, and for the Order of the French-speaking and German-speaking Bars, 8 188 as of 1 December 2021: a total of 19 161 lawyers.
Unfortunately, none of the Bars was able to provide figures by gender. The Bars report a stable annual increase. According to the latest "barometers of the profession" carried out by the Bar Associations (in 2018 and 2020), it seems that the legal profession is becoming more and more feminised, and the age pyramid suggests that this feminisation will increase in the years to come.

(2020): For the Order of the French- and German-speaking Bars: 8,160 and for the Orde van Vlaamse Balies (Order of the Flemish Bars) 10715--> total 18,875. According to a recent study (2020), in December 2019, 64.8% of trainee lawyers were women. On the other hand, 57.6% of the lawyers on the roll (who have completed the traineeship) were men. However, if these percentages are compared with those in previous similar studies, it must be concluded that the legal profession in Belgium is becoming more female.

(2019): The data correspond to the number of lawyers registered with the Belgian bars on September 1, 2019, therefore at the start of the judicial year 2019-2020. This number fluctuates during the judicial year.
Number of lawyers registered with Flemish bars: 10,862.
Number of lawyers registered with French and German speaking bars: 8,043.

(2018): 8002 for the French and German-speaking Bar Association
10656 for the Flemish Bar Association (OVB)

(2017): 7 939 lawyers for the French and German-speaking Bar Association on 1 December 2017
10 665 lawyers at the Flemish Bar (OVB)

(2016): 7,930 lawyers for the French- and German-speaking Bar Association on 1 December 2016
10,602 lawyers at the Flemish Bar (OVB)

(2015): As at 1 December 2015, there were 7,882 French-speaking and German-speaking lawyers (avocats.be) and 10,520 Dutch-speaking lawyers (Orde van Vlaamse balies).

Czech Republic

(2020): Data to: 31.12.2020

(2018): Data to: 31.12. 2018

(2017): There are 11587 active lawyers and 1496 inactive.

(2015): From the above mentioned number of lawyers there are 11011 active practising and 1289 temporary inactive.

(2013): In 2013, 10 255 lawyers are practicing in an active manner, while 1 141 lawyers discontinued their practicing.

Denmark

(2021): The figures given above are the number of lawyers at the end of 2021.

(2013): The 2013 data corresponds to the statistical data for September 2014.

(2012): The 2012 data does not include assistant attorneys.

Finland

(General Comment): As of 2014, only attorneys-at-law, public legal aid lawyers and licenced legal counsels are allowed to represent a client in court. In addition, in-house lawyers can represent their company in court. Lawyers working for trade unions can represent a client in a district court and in the Labour Court in disputes regarding employment relationship. Lawyers working for public authorities can represent the public authority in court.
In order to qualify as an attorney-at-law, a lawyer needs to have at least four years of work experience and must pass the demanding three-part professional qualification test known as the bar examination. The titles of attorney-at-law and attorney's office are protected by law and can only be used by lawyers accepted into the Finnish Bar Association. Attorney's offices employ also associate lawyers, that is lawyers who are not yet members of the bar.

(2021): The total number of lawyers includes 2230 attorneys-at-law, 1738 licensed legal counsels and 205 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
The total number of in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

(2020): In 2020, the total number of lawyers includes 2211 attorneys-at-law, 1664 licensed legal counsels and 212 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
The total number of in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

(2019): It is estimated that there are 16.000 people with law degree in Finland – it is no possible to provide an exact number of "legal advisors".
Approx. 4.000 lawyers can represent their clients in Court. These consist of 1631 licensed legal councels, 2177 members of the Finnish Bar Association (attorneys-at-law) and 214 public legal assistants in state legal aid offices.
The Finnish Bar Association states that 66% are men and 34% women. However, 52% of their new members are women.

(2018): In 2018, the total number of 3965 lawyers includes 2143 attorneys-at-law, 1603 licensed legal counsels and 219 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
In addition, in-house lawyers can represent their company in court. Lawyers working for trade unions can represent a client in a district court and in the Labour Court in disputes regarding employment relationship. Lawyers working for public authorities can represent the public authority in court. The total number of these in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

(2017): The total number of lawyers 3,846 includes 2,137 members of the Finnish Bar Association, 1,588 licensed lawyers and 228 public legal aid lawyers. 107 legal aid lawyers were also members of the Finnish Bar Association.

(2016): The number of lawyers indicated for 2012, 2013 and 2014 refers to members of the Finnish Bar Association who are entitled to use the professional titles advokat (advocate). Law firms (firms owned by members of the Bar) employ also associates. Besides, legal aid offices employ also legal advisers who are not all members of the Bar Association. Till 2014, jurists (persons who have a Master's Degree in law) could offer similar legal services than members of the Bar. From the beginning of the year 2014, only advocates, public legal aid attorneys and counsels who have obtained the license referred to in the Licensed Counsel Act are allowed to represent a client in the court.
In 2016,the total number of lawyers 3,791 includes 2,119 members of the Finnish Bar Association, 1,540 licensed lawyers and 229 public legal aid lawyers (97 public legal aid lawyers are also members of the Finnish Bar Association). Only members of the Finnish Bar Association are entitled to use the professional title "advocate".

(2017): A new act on the attorneys entered into force, as of January 1, 2018. The next year's report will reflect the changes.

(2016): A new act on the attorneys will enter into force, as of January 1, 2018. The next year's report will reflect the changes.

Ireland

(2021): As of 31 December 2021, there were 11,316 practicing solicitors in Ireland. 5,319 male, 5971 female and 26 undefined. For the undefined classification, this is due to the Society not being provided with information on the solicitor's gender. These statistics include solicitors with a practicing certificate in the Republic of Ireland, including practicing solicitors employed by the State. Reply from the Law Library: total n: 2118; males 1354; female 764. Please note that the numbers above are as at June 2021 and per our Annual Report https://www.lawlibrary.ie/about/governance/annual-report/ The figures only relate to barristers who are members of the Bar of Ireland, and do not include barristers operating outside of the Bar of Ireland. The Roll of Barristers, held by the LSRA, contain that list. Further the above does not include solicitor numbers, which are available via the Law Society of Ireland and the LSRA.

(2020): The above figure is the sum membership of the Bar of Ireland and the Law Society. Total figure includes 24 lawyers with a gender reported as "Unknown".

(2019): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

(2018): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

(2017): This figure represents the total number of barristers practising as members of the Law Library/Bar of Ireland and the total number of solicitors who held practising certificates for 2017.

(2016): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

(2014): The number of lawyers comprises Solicitors and Barristers in the end of December 2014.

Italy

(2013): For 2013, the number of practicing lawyers was not available. The provided figure corresponds to the number of lawyers in 2012, assuming that data should be almost the same for both years.

Latvia

(2017): This number includes sworn advocates and assistants to sworn advocates.

(2013): There were 1 336 sworn lawyers in Latvia on December 31, 2013, of which 70 - assistants to lawyers and 13 - lawyers from other countries. 116 State legal aid providers have been concluded contracts with the Legal Aid Administration about State-guaranteed legal assistance in civil cases, administrative cases, cross-border disputes and provision of out of court legal assistance. State provided legal assistance in criminal matters in Latvia is provided by sworn lawyers, not by legal aid providers.

Lithuania

(2019): There are also 1008 lawyers' assistants (449 males, 559 females). They can provide some legal service but are not included in the number of lawyers above.

(2018): There are also 943 lawyers' assistants. They can provide some legal service but are not included in the number of lawyers above.

(2017): The number is provided by the Lithuanian Bar Association (the number of practising lawyers (advocats) - 2207. Also there are 925 lawyers' assistants who provide legal service).

(2016): The number is provided by the Lithuanian Bar Association (the number of practising lawyers (advocats). Also there are 870 lawyers' assistants who provide legal service also.

(2015): Numbers are taken from the List of Practising Advocates of Lithuania. The list is regulated by the Law on the Bar and administered by Lithuanian Bar Association. The assistants of advocates is not presented in the data.

Luxembourg

(2021): The Diekirch Bar did not provide details on the breakdown of the number of lawyers by gender. Among lawyers registered at the Luxembourg Bar, who represent 98% of the lawyers registered at the two Luxembourg Bars, 52% were male and 48% were female.

(2015): The number indicated includes the number of lawyers, trainee lawyer, lawyers practising under their home-country professional titles and independent lawyers at September 1st, 2016.

Malta

(2021): The answer to Q146 represents the warranted lawyers who have registered themselves in the Register of Legal Professionals and Law Firms as per Act XIX of 2021. As from this evaluation onwards, the number of lawyers quoted will always be sourced from this official register.

(2017): The number of lawyers quoted in this answer refers to the number of warranted lawyers at the end of 2017. This data is based on a list of warranted lawyers practicing in Malta, compiled by the Department of Justice. Work on this list is ongoing but it is important to note that the figure quoted above, reflects a more faithful representation of the number of warranted lawyers in Malta.

(2016): The number of lawyers quoted in this answer refers to the number of warranted lawyers who are also members of the Chamber of Advocates, at the end of 2016. Throughout 2016, the Chamber of Advocates has been updating their list of members in order to clear the names of the lawyers who have either retired or have passed away. Furthermore, it is important to note that at present membership with the Chamber of Advocates, which is the sole Bar Association in Malta, is not mandatory. Hence over the past few months, the Department of Justice is drawing up the first complete list of warranted and non-warranted lawyers in Malta. Work is still underway so it is important to note that the figure quoted above, which is less than that submitted in the previous evaluation, reflects a more faithful representation of the number of warranted lawyers in Malta.

(2015): The number of lawyers quoted in this answer refers to the number of warranted lawyers on the list of advocates at the end of 2015. It is possible that some of these lawyers have retired so whilst the warrant remains valid, it does not necessarily mean that all 1569 lawyers are practising the profession. At present there does not exist any mechanism wherein lawyers register once they are given the Warrant to practice, and membership with the Chamber of Advocates, which is the sole Bar Association in Malta, is not mandatory to practice as a lawyer.

Netherlands

(2021): On 1-1-2021: 17 964 (9 837 male, 8 127 female)

(2020): This is the number of lawyers on 1-1-2021
Number of lawyers on 1-1-2020: 17.829 (total), 9867 (males), 7962 (females)

(2019): Numbers on 1/1/2020

(2017): Annual report NOVA 2017

Poland

(2020): Number of advocates: total: 19954, male- 10513, female - 8845
Incomplete data: No information on sex of 596 advocates;
Number of legal counsels: total: 37411, male - 17746, female - 19665
It is noteworthy that legal advisers have the same powers as advocates.

(2019): It is the total number of legal advisers and advocates.
It is noteworthy that legal advisers have the same powers as advocates.

(2012): Since 2010, the part-deregulation (carried out in 2007/2008) of the lawyer's profession has been implemented and resulted in a major change in the number of lawyers.

Romania

(2020): There is no official explanation due to legal norms, in principle such fluctuations can be registered within the profession, as long as the total number has not registered significant fluctuations.

Slovak Republic

(2016): The number represents all lawyers registered in the list of the Slovak Bar Association.
Out of this number 848 lawyers have their practise suspended.

(2012): The number of practising lawyers is increasing constantly.

Slovenia

(2017): (Male: 939, 798: female).

Spain

(2021): The data are obtained through the General Bar Association Annual Report 2021. On practicing and resident lawyers.

(2020): The data are obtained through the General Bar Association Annual Report 2020. On practicing and resident lawyers.

(2017): Resident Lawyers (Memory of the General Bar Association 2017)

(2016): Resident Lawyers (31 December 2016)

(2015): In civil cases, mainly the legal representation is for Procuradores. In criminal cases, lawyers can assume legal representation until a Procurador is appointed for the case. In administrative cases legal representation is mostly assumed by lawyers. Graduados sociales' (consultants on labour and social security matters) may represent the parties in labour law proceedings. The responses above are given is on the basis that lawyers have a monopoly on practising the defence at Court which, in Spain, is not equivalent to "legal representation".

Question 147

Austria

(2017): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2017 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.238), lawyers registered in the list of established European lawyers (87) registered by 31st of December 2017. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

(2016): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2016 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.132), lawyers registered in the list of established European lawyers (84) registered by 31st of December 2016. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

(2015): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2015 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.057), lawyers registered in the list of established European lawyers (81) registered by 31st of December 2015. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Croatia

(2020): Not applicable

Cyprus

(2018): This figure represents the Lawyers who are registered and have a license for registering practicing advocates

(2017): the lawyers who do not renew their license are not included in this number

Czech Republic

(2016): There are no legal advisors (as decribed in the question above) in the Czech Republic.

Denmark

(2019): License to practice as an "advokat" is mandatory in Denmark.

Finland

(2019): The Association of Finnish Lawyers, which is the only association in Finland for all lawyers, has approximately 16.000 members. 55% of their lawyer members are women, and 57% of the student members are women. (https://www.lakimiesliitto.fi/liitto/jasenet/)

France

(2019): This category does not exist. The profession of legal adviser was integrated into the legal profession by the law of 31 December 1990. The activity of legal advice is open to certain professionals by virtue of their status but also to other professionals after an approval has been issued by the Ministry of Justice.

Germany

(General Comment): All lawyers in Germany are empowered to plead before court. No distinction is made between different groups of lawyers in Germany, such as between solicitors and barristers. The stated within question 146 include in-house lawyers according to section 46 para. 2 of the Federal Code for Lawyers (Bundesrechtsanwaltsordnung – BRAO). These are persons, who exercise their profession as salaried employees of persons or companies other than lawyers or patent attorneys or in a company for the joint practice of law or patent law. They shall be deemed to be practising as a lawyer if they are working as a lawyer for their employer under an employment agreement The conditions to be met with regard to the requirement “working as a lawyer” are set out in section 46 para. 3. Compared to lawyers, their powers to provide for legal advice and representation in court are restricted according to section 46 para. 5 (restriction to the employer’s legal affairs) and according to section 46c para. 2 BRAO. Like lawyers, in-house lawyers have to be admitted to the legal profession by the competent regional bar association. There are 22 765 in-house lawyers admitted to the legal profession in Germany. In addition to lawyers, certain other individuals may also appear in court as legal advisers but there are no statistical data on these individuals.

(2021): See the general comments

(2020): See the general comments

(2019): See the general comments

Greece

(2021): All lawyers can be legal advisers and therefore have the right to be represented in court.

(2020): All lawyers can be legal advisers and therefore have the right to be represented in court.

Hungary

(General Comment): Legal advisors (jogtanácsos) facilitate the functioning of the organisation by which they are employed. They conduct legal representation within the organisation, provide legal advice and information; prepare applications, contracts and other documents; participate in organising legal work. As a general rule, legal advisors, in contrast to attorneys, discharge their duties (which are not as extensive as those of attorneys) as employees. Their compensation is based on the regulations concerning employment. Any person entered in the register maintained by the county court in Budapest can become a legal advisor. Besides, applicants must hold citizenship in one of the member States participating in the Agreement on the European Economic Area; have no criminal record; hold a university degree; have passed the Hungarian professional examination in law.

(2020): Legal advisors (jogtanácsos) facilitate the functioning of the organisation by which they are employed. They conduct legal representation within the organisation, provide legal advice and information; prepare applications, contracts and other documents; participate in organising legal work. As a general rule, legal advisors, in contrast to attorneys, discharge their duties (which are not as extensive as those of attorneys) as employees. Their compensation is based on the regulations concerning employment. Any person entered in the register maintained by the county court in Budapest can become a legal advisor. Besides, applicants must hold citizenship in one of the member States participating in the Agreement on the European Economic Area; have no criminal record; hold a university degree; have passed the Hungarian professional examination in law.

Ireland

(2021): Traditionally, solicitors in Ireland could only represent their clients at the District Court and Circuit Court and would be required to engage a barrister to advocate on behalf of their clients at the higher courts. However, this has changed in recent years, and practicing solicitors are now entitled to a rights of audience and may argue cases at all courts. More information is available here:
https://mcmahonsolicitors.ie/parties/#:~:text=Originally%2C%20only%20barristers%20had%20rights,majority%20of%20Circuit%20Court%20cases.
https://www.citizensinformation.ie/en/justice/courtroom/solicitors.html

Latvia

(2017): According to Advocacy Law of the Republic of Latvia in accordance with the procedures specified by this Law, the following persons may work as advocates in Latvia:
1) sworn advocates;
2) assistants to sworn advocates;
3) citizens of European Union Member States who have obtained the qualification of an advocate in one of the European Union Member States (hereinafter - advocates of European Union Member States).
Foreign advocates, except for advocates of European Union Member States, may practice in Latvia in accordance with the international agreements on legal assistance binding to the Republic of Latvia. Solicitors, in-house counsellors and others is an unregulated profession in Latvia and consequently is not counted, controlled or otherwise supervised.

Lithuania

(2015): Numbers are taken from the List of Practising Advocates of Lithuania. The list is regulated by the Law on the Bar and administered by Lithuanian Bar Association. The assistants of advocates is not presented in the data.

Netherlands

(2017): NA

(2016): NA.

Slovenia

(General Comment): Persons entered in the directory of the Bar Association of Slovenia are only lawyers (and not other legal experts, in-house counsellors etc.)

Question 148

Bulgaria

(2019): With a comment that legal advisors, other legal educated staff at institutions, businesses, legal entities and sole traders who are hired employees represent only their employer in court ("as a client")

(2018): With a comment that legal advisors, other legal educated staff at institutions, businesses, legal entities and sole traders who are hired employees represent only their employer in court ("as a client").

Croatia

(2020): Not applicable

Czech Republic

(2016): There are no legal advisors (as decribed in the question 147) in the Czech Republic.

Denmark

(2019): This number include lawyers who have deposited their Danish license to practice as a lawyer. The number is limited to persons born after the 1st of October 1954. Please note that all lawyers have a degree in law (cand.jur), but to practice law in Denmark as an "advokat", lawyers need a license. Lawyers without a license are not included in the number.

Estonia

(General Comment): Data on the number of legal advisors who cannot represent their clients in court is not collected.

Finland

(2018): The exact number of legal advisors who cannot represent their clients in court is not available.

France

(2021): Source DACS

(2018): There is no regulated profession in France for lawyers who cannot represent clients in court.

Greece

(2021): All lawyers can be legal advisers and therefore have the right to be represented in court.

(2020): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

(2019): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

(2018): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

(2016): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Ireland

(2021): Solicitors may represent their clients in all court. However, many prefer to engage a barrister to do so on behalf of their client particularly in the higher courts. The Society is not aware of any exact figure of legal advisors who are prevented from representing their clients in court.

Latvia

(2017): Solicitors, in-house counsellors and others is an unregulated profession in Latvia and consequently is not counted, controlled or otherwise supervised. Also, for example, Civil Procedure Law provides that in some case categories/the Supreme Court persons can conduct cases by themselves or with the intermediation of an advocate. Due to this it is not possible to count persons who cannot represent their clients in court.

(2016): There was a mistake in last cycle. Not all legal advisors can represent their clients in court, for instance, in criminal cases only sworn advocate can represent their clients in court.

Malta

(General Comment): This data was not available prior to 2014. It started being collected by the Department of Justice in 2015.

(2021): Throughout 2021, 4 new applications have been submitted out of which 3 were accepted.

(2019): Throughout 2019, only 5 EU legal professionals were granted the respective certificate of registration with the limitation that they cannot represent their clients in court. Many more applications are pending evaluation.

(2018): The figure of 135 legal advisors is derived form the composite of 101 legal advisors at the end of 2017 and 34 new applications throughout 2018. hence at the end of 2018, there were 135 legal advisors who could practice with an established lawyer in Malta but cannot represent clients in court.

(2017): In 2017, there have been 25 newly registered legal advisors.

Poland

(2019): "0" in principle, however: 4078 advocates and 10449 legal advisers - because of their non-practition.
Non-practitioners who have not lost their qualifications but who are registered on the list of non-practitioners, cannot provide services to clients, including representation in courts.

Portugal

(2021): We do not have this figure in Portugal.

(2020): We do not have this figure in Portugal.

Slovak Republic

(2018): Slovak legal order does not regulate this type of legal advisors.

(2017): The Slovak legal system does not recognize this kind of legal advisors.

Indicator 8: The existence and use of alternative dispute resolution methods

Indicator 8: The existence and use of alternative dispute resolution methods

comments provided by the national correspondents

organised by country

Question 166. Number of accredited or registered mediators for court-related mediation:

Question 167. Number of court-related mediations:

Austria

Q166 (2019): The list of mediators started in 2004; registration is always limited for a specific period: five years after the initial registration and ten years for continuation of an existing registration. Many mediators registered in 2004, applied for continuation of the registration in 2009 but did not do so in 2019. This explains the significant drop in registered mediators.

Q166 (2015): Q166
http://www.mediatorenliste.justiz.gv.at

Q168
Sec. 198 – 209 CPC

Q167 (2021): Datewarehouse (register data of the case management application “Verfahrensautomation Justiz”). There is no data available if the settlement agreements are the results of court-related mediations. Parties may agree on a settlement agreement without mediation.

Q167 (2020): Datewarehouse (register data of the case management application “Verfahrensautomation Justiz”). There is no data available if the settlement agreements are the results of court-related mediations. Parties may agree on a settlement agreement without mediation.

Belgium

Q166 (General Comment): A mediator may receive several accreditations. The Federal Mediation Commission determines the criteria for the accreditation of mediators under Articles 1726 and 1727 § 6 of the Judicial Code.

Q166 (2021): Data provided by the Federal Mediation Commission: https://www.cfm-fbc.be/fr.
The difference (in figures) with the previous cycle is explained in particular by the removal of mediators who are no longer up to date with their continuing training obligation.
Mediation Barometer 2021 (some figures and trends), link:
https://www.cfm-fbc.be/sites/default/files/content/explorer/slides_barometer_-_fr.pdf
A mediator may receive several accreditations. The Federal Mediation Commission determines the criteria for the accreditation of mediators under Articles 1726 and 1727 § 6 of the Judicial Code.

Q166 (2020):
"The difference in the number of mediators compared to the previous cycle is explained in particular by the removal of mediators who are no longer up to date with their continuing education obligation.
As of 31/12/2020, 2577 mediators are accredited by the Federal Mediation Commission (CFM) and more than 3400 accreditations with this same CFM (some mediators having in fact several accreditations in family, civil and commercial, social, administrative matters).
The difference (as for the figure) with the previous cycle is explained in particular by the striking off of mediators who are no longer up to date with their obligation of permanent training.
"

Q166 (2019): The number of accredited mediators in 2019 was 2,399. The number of approvals (by type of civil litigation) granted to mediators: 3,177, including 2,178 to women and 999 to men.
A mediator can be accredited in family matters as well as in civil and commercial matters. S/he may have one or all of the accreditation (family, civil and commercial, social affairs, mediation with public authorities). So one mediator is not equal to one acreditation.
Q166 (2018): 2122 accredited mediators with 2788 accreditations granted, 907 for male mediators and 1881 accreditations for female mediators
Q166 (2017): Information on mediation: http://www.mediation-justice.be

Q166 (2016): Information on mediation: http://www.mediation-justice.be

Q166 (2015): number of médiators at 13/10/2016

Q166 (2012): 2012: the competence over the court houses is transferred from the federal level to the authorities.

Q167 (2021): The Federal Mediation Commission does not have data on the number of court related mediation procedures.

Q167 (2020): We do not have figures on the number of mediations per year in Belgium.

Q167 (2017): Federal Mediation Commission

Q167 (2016): There are no official statistics

Q167 (2014): In 2014, there has been 2 763 resolved criminal mediation procedures.

Q167 (2012): In 2012, the number of mediation proceedings initiated in criminal matters was 6 352, according to the 2012 annual activity report of the Directorate General of the Court House. The number of resolved mediation proceedings in criminal matters was 2 800, according to the College of Public Prosecutors.

Bulgaria

Q166 (2021): The information about the number of registered court-related mediators is not available (NA). As of June 2022 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2929 (for 2021 the number of newly registered is 214).
Q166 (2020): The information about the number of registered court-related mediators is not available (NA). As of July 2021 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2767 (for 2020 the number of newly registered is 233).
Q166 (2019): The information about the number of registered court-related mediators is not available (NA). At the end of 2019 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2419.

Q166 (2018): The information about the number of registered court-related mediators is not available (NA). As of May 2019 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2311 (for 2018 the number of newly registered is 250).
Q166 (2015): Number of registered mediators is 1501 up to 31.12.2015.

Croatia

Q167 (2021): Ministry of Justice and Public Administration

Cyprus

Q167 (2020): court registry

Czech Republic

Q166 (2021): From the above mentioned number of mediators there are 359 probate and mediation officials and 327 mediators in non criminal cases.
Q166 (2020): From the above mentioned number of mediators there are 356 probate and mediation officials and 313 mediators in non criminal cases.
Q166 (2019): From the above mentioned number of mediators there are 347 probate and mediation officials and 242 mediators in non criminal cases.
Q166 (2018): From the above mentioned number of mediators there are 429 probate and mediation officials and 228 mediators in non criminal cases. The number of mediators is increasing since the Ministry of Justice supports broader use of other criminal sanctions which are alternatives to imprisonment such as house arrest.
Q166 (2017): From the above mentioned number of mediators there are 421 probate and mediation officials and 239 (from this number 211 active and 28 inactive) mediators in non criminal cases. The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

Q166 (2016): From the above mentioned number of mediators there are 398 probate and mediation officials and 222 mediators in non criminal cases. The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

Q166 (2015): From the mentioned number of mediators there are 381 probate and mediation officials and 208 mediators in non criminal cases.
The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

Q167 (2021): Probation and Mediation Service

Q167 (2020): Probation and Mediation Service

Q167 (2019): There could be three types of outcomes: 1. settlement agreement - 659
2. partly settlement agreement (e.g. with one victim and not with the other one) - 64
3. non-agreement - 45
Source:Probation and Mediation Service

Q167 (2018): There could be three types of outcomes: 1. settlement agreement - 602
2. partly settlement agreement (e.g. with one victim and not with the other one) - 48
3. non-agreement - 31
Source:Probation and Mediation Service

Q167 (2017): Mediation in criminal cases is mostly voluntary. The decrease in the number of mediations is mainly due to the decrease in the number of cases in the pre-trial proceedings to which Probation and Mediation Service (PMS) has entered. The enters of probation officers into the pre-trial proceedings is mostly dependent on the available capacities of the staff PMS that they can allocate for the selection, the preparing and the implementation of mediation. PMS and her employees are overloaded by the control of alternative sanctions such as probation and community sanctions, which they are delegated directly by the court. This causes a decreasing of the enters into the pre-trial proceedings and thus a decreasing of the numbers of mediations. Source:
Probation and Mediation Service

Q167 (2016): Probation and Mediation Service

Denmark

Q166 (2021): The number of registered attorneys who are appointed to serve as mediators in court mediation in 2021 is 53. The number of registred jugdes who serves as mediators in court mediation in 2021 is 90.

Q166 (2020): The number of registered attorneys who are appointed to serve as mediators in court mediation in 2020 is 53. The number of registred jugdes who serves as mediators in court mediation in 2020 is 90.

Q166 (2018): The number of registered judges who serve as mediators in court mediation in 2018 is 86. The number of registered attorneys
who are appointed to serve as mediators in court mediation in 2018 is 57.

Q166 (2017): In 2017 there are 57 registered attorneys and 78 judges with a special mediation education as of 1st July 2017. There is a different process of appointment. Judge mediators go through a special education, and registered attorneys must file a job application to become mediator. There we have updated numbers for judge mediators. Attorneys are appointed every 4 years and the last appointment window was in 2016. The number of attorneys is therefore the same as last year. Source: http://www.domstol.dk/saadangoerdu/retsmaegling/Documents/Liste%20over%20advokatmaeglere.pdf

Q166 (2016): The number of registered judges who serve as mediators in court mediation in 2016 is 86. The number of registered attorneys who are appointed to serve as mediators in court mediation in 2016 is 57.

Q167 (General Comment): Data above all relates to the district courts. The two High Courts also mediate a small number of cases, but due to data problems from a new system to deal with civil cases, the Western High Court wrote in their annual report, that they were unable to see from the system how many cases they had where mediation was used. Therefor Danish Court Administration ignores the two High Courts. There are data breaches as to see when a case surpasses to mediation. In the new Civil system that was introduced gradually from September 2017 to February 2018, data on surpasses can only be seen when the case is finalized. Before we could see it when the case surpassed to mediation. The transition does not give problems to measure finished mediation as in both the new and the old civil system, a mediation is finished when it is finished. The data breach gives some problems to measure number of finished court-related mediations as this figure is combined by finished cases and cases where mediation was abandoned. The abandoned cases are first measured when the cases are finished in the court system with a court decision and not when they were first abandoned. In the figure for “number of finished court-related mediations”, Danish Court Administration has ignored cases where the parties did not meet at least one time. Danish Court Administration have 5 so-called private criminal cases. In Denmark, there is no procedure for mediation of criminal cases, but private criminal cases may be mediated. Private criminal cases are cases where private legal entities (people or companies) sue others for criminal offenses. It seems that earlier data are only data of mediation where the mediation ended up with an agreement. Now the questions from CEPEJ both include start of mediation, finished court-related mediation and number of cases where an agreement is obtained.

Q167 (2021): https://www.domstol.dk/media/0sxivq1d/retsmaegling-2021.pdf
Data above all relates to the district courts. In the Civil system can only be seen when the case is finalized. Before we could see it when the case surpassed to mediation. The abandoned cases are first measured when the cases are finished in the court system with a court decision and not when they were first abandoned. In the figure for “number of finished court-related mediations”, Danish Court Administration has ignored cases where the parties did not meet at least one time.

Q167 (2020): Data is not available.

Q167 (2019): Please note that the definitions have been changed. Mediation is now measured when the case is finalized. So the number of cases for which the parties agreed to start mediation is therefore the same as the number of cases of finished court-related mediations. It should also be noted that it is not a possibility in general to mediate a criminal case. What is included here is ONLY criminal cases dealt with in the Civil court.

Q167 (2017): The figures in the table relate only to judge mediations.
Total amount of cases that has been transferred to a mediation process in 2017 is 1130 (both judge and attorney mediations). Mediation in district courts is 1031. Mediation in appeal courts is 99. The number for the appeal courts does not state what type of case. Question 1+2+3+4+5 is therefore only completed with district courts numbers. 528 of the 1130 cases has been finalized with an agreement due to mediation. Source:
http://www.domstol.dk/om/talogfakta/statistik/Documents/Civile%20sager/2017/Civile%20sager_byretter%202017%20-%20retsmægling.pdf and statistics from the Danish Court Administration
Concerning the sub-category "criminal cases" the data refers to privately prosecuted criminal cases which are subject to the same process as civil cases (acc. the Justice Administration Act § 989). This means that mediation will be offered in this type of criminal cases as well.

Q167 (2016): At the level of district courts, 548 cases are finalized with an agreement. The total encompasses also 40 cases before the two High Courts. The source concerning "Civil and commercial cases" and "Family cases" is the Danish Court Administration. Please note that a focus area and project for the Courts of Denmark in 2015 and 2016 was ADR. Desired outcomes were to extend people’s knowledge of ADR as an alternative to court rulings and orders, to lower the case processing time and to reach better solutions. The project identified 3 main action areas: more cases should be settled through judicial mediation, uniformity in the process prior to the settlement of a case through ADR and knowledge of ADR is disseminated both internally and externally in the courts. The implementation and communication during and after this project has increased public awareness and the increase in the number of mediation proceedings is a results of these efforts.

Q167 (2014): In 2014, as regards the number of administrative cases and employment dismissals cases, these are included in the category “civil cases”. Judicial mediation procedures are not available in Denmark for criminal cases. Only the number of successful mediation proceedings is indicated within the table. The number of proposed mediation proceedings was the following: civil cases: 518; family cases: 294.

Q167 (2012): In 2012, in the district courts there were 962 mediation cases divided in civil cases and family cases. In addition,the two high courts had 185 mediation cases (included in the total) which are not divided per category. Only the number of successful mediation proceedings is indicated within the table. The number of proposed mediation proceedings was the following: civil cases: 600; family cases: 338.

Estonia

Q167 (General Comment): Data on the number of court-related mediations are not recorded in any information system and are therefore not available.

Finland

Q166 (General Comment): In Finland there is no accreditation or a register for court-related mediators, all mediators being trained in a special training program for mediation.
Q166 (2019): In Finland there is no accreditation or a register for court-related mediators. All mediators are trained in a special training program for mediation.
Q167 (General Comment): Consumer cases are not statistically specified. The number of cases in which consumers are involved, are included in the number of the civil and commercial cases.
Q167 (2021): National Courts Administration and the Le-gal Reg-is-ter Cen-tres (ORK) / Case management database of the District Courts
Q167 (2020): National Courts Administration

Q167 (2019): The National Courts Administration is currently working on improving the method of calculating the numbers related to mediation. Therefore, the numbers given this year are not strictly compatible with last years numbers. With this new calculation method the number of cases for which the parties agreed to start mediation would in 2018 have been 2255 cases. The number of finished court-related mediations includes cases in which the mediation has started before 2019 and which have been concluded 2019. The number of civil and commercial cases include all other cases than those in the section 2 and 4 in which the parties agreed to start mediation. Consumer cases are not statistically specified. The number of cases in which consumers are involved, are therefore included in the number of the civil and commercial cases. Number of cases in which there is a settlement agreement include only the cases in which full settlement has been reached. However, it is typical that there are partial settlements. So, the number of of settlements in total, including cases in which there is a partial settlement (and some minor issue t.eg legal costs has been forwarded back to civil proceedings) is 1773.

Q167 (2018): The number of finished court-related mediations includes cases in which the mediation has started before 2018 and which have been concluded 2018.

France

Q166 (2021): 2854 of which 2542 are natural persons, the others are legal persons
source SADJAV
Q166 (2020): "There are also 312 legal persons
These data concern only civil mediation and come from the SADJAV and the DACS. The increase in the number of mediators registered on the lists of mediators established by the seond instance courts is indicative of the development of the use of alternative dispute resolution methods and more particularly mediation.
The Ministry of Justice strongly encourages mediators to register on these lists. Registration on the lists of mediators with the second instance courts obeys certain conditions as mentioned in the decree n°2021-95 of January 29, 2021 amending the decrees n°2017-1457 of October 9, 2017 relating to the list of mediators with the second instance court. In addition, the mediator wishing to be registered must provide, in support of his application, supporting documents attesting in particular to his training (decree of January 29, 2021 fixing the list of supporting documents to be provided for registration on the list provided for in article 22-1 A of law n°95-125 of February 8, 1995 relating to the organization of the jurisdictions and to civil, criminal and administrative procedure). A verification of his or her criminal record is also carried out.
These requirements help to ensure the minimum guarantees (training, impartiality, independence and verification of criminal status) required of a mediator recommended by the courts. Finally, the mediators registered on these lists have a better visibility since the litigants are led to go to the lists of the second instance court to find a mediator (https://www.justice.fr/r%C3%A9gler-litiges-autrement/m%C3%A9diation).
A mediator recommended by the justice is, moreover, a guarantee of confidence for the litigants. "

Q166 (2018): The data are approximate because they have been compiled manually from the lists of mediators at the courts of appeal, published and provided for by article 8 of Act No. 2016-1547 of 18 November 2016 on the modernization of 21st century justice and partial because the service is still waiting for the publication and/or registration of 13 lists, on 05 June 2019. It is recalled that in the French judicial system, the judge remains free to appoint a mediator who does not appear on the lists drawn up by the courts of appeal. Indeed, these lists are intended for the information of the judge.

Q166 (2016): Except for the profession of family mediator for which a diploma is required, the profession of mediator in civil and commercial matters is not regulated and there is no national register of mediators. Nevertheless, it is possible to consider as registered: mediators in criminal matters entrusted with tasks by public prosecutors (312), justice conciliators who are volunteers and selected by judicial bodies (1958), and the family mediators empowered by the family allowances funds (670). Data is not presented in full time equivalent.

Q166 (2015): Accredited mediators are family mediators, criminal mediators and legal conciliators, who work in courts or are subsidised by the family allowance funds.

Source: Ministry of Justice, General Secretariat, Sub-Directorate of Statistics and Studies, Access to Law and Victim Assistance Unit

Q167 (General Comment): In criminal matters, mediation does not strictly speaking lead to a settlement. In fact, in the event of successful mediation, the public prosecutor's office will close the case on the grounds of successful "criminal mediation". If the mediation fails, the prosecutor's office takes over the prosecution, based on the opportunity principle, and can decide to prosecute the perpetrator in court.

Q167 (2021): It is useful to recall here that a voluntary project has been launched in the field of mediation at the initiative of the judge before the administrative courts, with each court having to reach a quantified objective of mediations proposed by the judge and accepted by the parties (but without any obligation to see these mediations lead to an agreement, which the court does not control. The objective is, over the period 2019-2022, to reach approximately 2000 mediations initiated by the judge before the administrative courts (i.e. approximately 1% of the entries of the TA and CAA).
As regards administrative justice, the data come from the Council of State.

Q167 (2020): "We have started a voluntarist project in the field of mediation at the initiative of the judge before the administrative jurisdiction, each jurisdiction having to reach a quantified objective of mediations proposed by the judge and accepted by the parties (but without obligation to see these mediations leading to an agreement, which the jurisdiction does not control. The objective is, over the period 2019-2022, to reach about 2000 mediations initiated by the judge before the administrative courts (i.e. about 1% of the entries of the TA and CAA).
Source : highest administrative Court "

Q167 (2018): Statistics 2017 for family mediation
General Secretariat of the Council of State for Administrative Affairs
For successful criminal mediation (alternative procedures to prosecution), the data in 2018 are 7656, down from 2016, which had 9894 data, without any explanation on this evolution. In labour law cases, there are 8220 resolved cases after conciliation between the parties.

Q167 (2017): General Secretariat of the Council of State

Germany

Q166 (General Comment): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Q166 (2018): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Q166 (2017): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available
on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Q166 (2016): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Q167 (2014): Statistics on the situation given in the Federal Republic exist only for court-internal mediations/proceedings before a conciliation judge. The latter have been performed in 2013 before the civil courts, family courts, administrative courts, labour courts, social courts, and finance courts. Judges sitting on court-internal mediation proceedings have no authority to hand down a decision. However, the statistics on the situation given in the Federal Republic do not reflect any cases in which parties are instructed to pursue out-of-court mediation.

Greece

Q166 (2021): Of the 2985 mediators active are 2963.

Q166 (2020): There is no relevant information regarding the data.

Q166 (2019): The interest of people to acquire the status of mediator increased in 2019 without any special or official reason.

Q167 (2021): Question 167 was answered by justStat of the Ministry of Justice.

Q167 (2020): In question 167 it is impossible to collect statistics for the following reasons. If it is a mediation of law 4640/2019, the minutes are not submitted to any public authority or file, but to the competent courts and are probably not recorded in a file. It is much more impossible to distinguish between such cases. In the case of judicial mediation under Article 214b of the Code of Civil Procedure, this information can only be gathered by the competent courts.

Q167 (2017): As mentioned in Q163-1, the substantial application of Law 4446/2016 started to take effect during 2017, therefore, there were 1782 judicial mediations in administrative cases.

Hungary

Q166 (2016): There is a continuous training for court secretaries and judges in the field of mediation so that is the reason for the increasing number. To be registered as a court mediator one must finish this training (organized by the National Office for the Judiciary).
Q166 (2014): The increase in the number of judicial mediators between 2013 and 2014 is a result of constant training organized by the National Office for the Judiciary.
Q166 (2013): Registered mediator can be any natural or legal person, who complies with the legal requirements (concerning university degree, mediation training etc.). According to the relevant legislation (Act LV of 2002 on Mediation) mediators established in other EEA Member States (i.e. living in the European Economic Area) can act in a current case in Hungary. The foreign mediator should inform the Ministry of Justice, which shall specify the rights for one year.

Q167 (2021): Consumer cases are included in category 1 "civil and commercial cases".

Q167 (2020): Consumer cases are included in category 1 "civil and commercial cases".

Q167 (2019): Administrative cases (nr.3.) and consumer cases (nr.6.) are included in category civil and commercial cases (nr.1.)
Q167 (2018): Consumer cases are included in the category "civil and commercial cases".
National Office for the Judiciary

Q167 (2016): National Office for the Judiciary

Ireland

Q166 (2014): 2014: Reforms are also under consideration. Legislation is being prepared to promote mediation as a viable, effective and efficient alternative to court proceedings thereby reducing legal costs, speeding up the resolution of disputes and relieving the stress involved in court proceedings. It is anticipated that a Mediation Bill will be published in 2015 with a view to enactment of the legislation quickly thereafter.
Q167 (General Comment): In Ireland we don't have court ordered mediation, as per section 16 of the Mediation act 2017: Courts may invite parties to attend mediation (but it is not mandated or ordered). For this reason, and in the absence of the establishment of the mediation council, there is currently no central area for recording data on mediation. When the mediation council is established, we hope we can provide this data.

Italy

Q166 (2018): The above figures refer to public mediators who deal with civil and commercial mediation procedures. Therefore these figures do not include mediators in family matters (818) nor in consumer cases.
Q166 (2016): The number of accredited mediators is destined to grow. Probably at a lower growth rate.

Q167 (General Comment): In Italy one party may initiate a mediation procedure and the other party may decide to take part to it or not. To clarify things, please consider that in 2021 in Italy 267.270 mediation proceedings were initiated. Both parties showed up at the first mediation meeting in 83.256 cases. Please also note that these figures refer to private mediation. For some matter subjects the mediation is mandatory and it is managed by private mediation companies. Please note that the above figures refer to mediation procedures monitored by the Ministry of Justice. In Italy, there is a plethora of different forms of ADR procedures and some are not so widespread. Court-related mediations do exist for both family cases and labour cases but such mediation proceedings are not monitored by the Ministry of Justice. In 2020 the procedures subject to mediation were extended to the disputes related to COVID.

Q167 (2020): Mediation is not provided for administrative justice (NAP). The other forms of mediation are provided by bodies external to the judiciary (e.g. Corecom) and therefore they do not fall under the control/vision of the Ministry of Justice. In 2020 the numbers are deeply affected by the Pandemic. If we look at the first half of 2021, we can already see a “recovery” in this respect.

Q167 (2019): In Italy one party may initiate a mediation procedure and the other party may decide to take part to it or not. To clarify things, please consider that in 2019 in Italy 256.311 mediation proceedings were initiated. Both parties showed up at the first mediation meeting in only 72.664 mediation proceedings. Please also note that these figures refer to private mediation. For some matter subjects the mediation is mandatory and it is managed by private mediation companies. Please note that the above figures refer to mediation procedures monitored by the Ministry of Justice. In Italy, there is a plethora of different forms of ADR procedures and some are not so widespread. Court-related mediations do exist for both family cases and labour cases but such mediation proceedings are not monitored by the Ministry of Justice.

Q167 (2018): Figures for this question cannot be compared between 2018 and previous years. The current answer reflects the way the question has been rephrased compared to 2016. In 2016 it read “Number of judicial mediation procedures” whereas in 2018 it was changed into “Number of cases for which the parties agreed to start mediation”.In Italy one party may initiate a mediation procedure and the other party may decide to take part to it or not. To clarify things, please consider that in 2018 in Italy 258.786 mediation proceedings were initiated. Both parties showed up at the first mediation meeting in only 76.569 mediation proceedings. Please also note that these figures refer to private mediation. For some matter subjects the mediation is mandatory and it is managed by private mediation companies. Please note that the above figures refer to mediation procedures monitored by the Ministry of Justice. In Italy, there is a plethora of different forms of ADR procedures and some are not so widespread. Court-related mediations do exist for both family cases and labour cases but such mediation proceedings are not monitored by the Ministry of Justice; this is why they were not considered in 2016.

Q167 (2017): Please amend the "Civil and commercial case" time series as follows:
Year 2014: 295010
Year 2015: 300455
Year 2016: 269988
Year 2017: 263263
The figures provided during the last few years did not include all mediation agencies. In particular, there was one mediation agency which was not included in our analysis because it was considered (from a statistical perspective) an outlier. After an investigation of the inspection body we recognize that there are no ground to keep this agency out of the analysis.

Q167 (2016): The Department of Statistics and Organizational Analysis (within the Ministry of Justice) periodically publish reports on mediation procedures on its website:
https://webstat.giustizia.it/_layouts/15/start.aspx#/Analisi%20e%20ricerche/forms/mediazione.aspx
The latest reports are available in English as well.
The 2016 data has been up-dated in order to reflect data from all mediation agencies in Italy (the previous data (183977) did not include one mediation agency).
Q167 (2014): The Department of Statistics and Organizational Analysis of the Ministry of Justice periodically publishes reports on mediation procedures on its
website:https://webstat.giustizia.it/_layouts/15/start.aspx#/Analisi%20e%20ricerche/forms/mediazione.aspx

Q167 (2012): The Department of Statistics and Organizational Analysis of the Ministry of Justice periodically publishes reports on mediation procedures on its
website:https://webstat.giustizia.it/_layouts/15/start.aspx#/Analisi%20e%20ricerche/forms/mediazione.aspx

Latvia

Q166 (2021): Source for question no.166 – website of Council of Certified Mediators https://sertificetimediatori.lv/mediatori/

Q166 (2020): Data are available only about certified mediators. According legislation there can be practicing mediators and certified mediators. The former is a natural person selected freely by the parties who have agreed to conduct mediation while the latter, is a mediator who, in accordance with the procedures laid down in the laws and regulations, has acquired mediation and received a certificate which gives him/her the right to be included in the list of mediators.

Q166 (2019): Data are available only about certified mediators. According legislation there can be practicing mediators and certified mediators. The former is a natural person selected freely by the parties who have agreed to conduct mediation while the latter, is a mediator who, in accordance with the procedures laid down in the laws and regulations, has acquired mediation and received a certificate which gives him/her the right to be included in the list of mediators.

Q166 (2015): Variation of the number of mediators is constant since every year new mediators pass the exam and become certified mediators

Q167 (2018): Ministry of Justice

Lithuania

Q166 (General Comment): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country and the development of the application of mediation might have impact on the significant increase of the number of people that gained the status of mediator.
Till 1st January, 2019 National Couts Administration have been maintained the list of court mediators which included judges and other persons (not judges). Due to a change in legal regulation (from 1st January, 2019), National Courts Administration maintains only the list of Judges who have been granted the status of mediators (Article 5 (2) of the Law on Mediation of the Republic of Lithuania) and transmits this data to the State Garanteed Legal Aid Service. The latter maintains the common list of mediators and decides on the status of mediator for persons who are not judges. The mentioned list is published on the website of the The State Garanteed Legal Aid Service (Article 5 (6) of the Law on Mediation). It is to notice that court-related mediation in practice is more often executed by mediators judges however the mediators who are not judges are also allowed to mediate at this stage when they are appointed by the State Garanteed Legal Aid Service.

Q166 (2021): from 2021 January 1 all mediators registered in the list of mediators of the Republic of Lithuania have the right to conduct judicial mediation in both civil and administrative cases.
Q166 (2020): In 2020 the list contained 438 mediators not judges (of which 100 males and 338 females), and 114 mediators judges (of which 27 males and 87 females).
The Ministry of Justice of the Republic of Lithuania, implementing the project co-financed by the European Union Structural Funds No. 10.1.4-V-922-01-005 "Development of the Conciliation Mediation System", taking into account the expansion of the Institute of Mediation and the consequent increased need for mediators, initiated the organization of training for mediators, during which a total of 420 persons (320 people were trained in the training of 40 academic hours, 100 people took part in the training of 24 academic hours).
This training took place in May – October, 2019. All participants signed a contract for the provision of training services, one of the conditions of which was the obligation to register to take the qualification exam for mediators and to come to take it. Due to the fact that the Training Participants' Agreement did not provide for the obligation to pass the mediators' qualification examination but to come to take it, the Ministry of Justice did not collect information on the proportion of trainees who passed the mediators' qualification examination, but the persons who took part in this training were very active in applying for the qualification examination for mediators. There were also cases when those who did not pass the mediator qualification exam for the first time registered to take the exam again six months later.
October – November in 2020 specialized training for mediators on the topic “Mediation in family disputes in the presence of signs of domestic violence” was organized on the order of the Ministry of Justice. A total of 60 mediators participated in the training. These training were intended to improve the qualification of mediators in disputes where are possible signs of domestic violence, therefore only mediators registered in the list of mediators of the Republic of Lithuania and having signed agreements with the State Guaranteed Legal Aid Service on the provision of compulsory mediation services could participate in.
It is noteworthy that the organized training, which were free of charge for their participants, increased the number of mediators in both 2019 and 2020. In this context, it would not be appropriate to compare the increase between 2019 and 2020 .

Q166 (2019): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country might have impact on the significant increase of the number of people that gained the status of mediator.
Till 1st January, 2019 National Couts Administration have been maintained the list of court mediators which included judges and other persons (not judges). Due to a change in legal regulation (from 1st January, 2019), National Courts Administration maintains only the list of Judges who have been granted the status of mediators (Article 5 (2) of the Law on Mediation of the Republic of Lithuania) and transmits this data to the State Garanteed Legal Aid Service. The latter maintains the common list of mediators and decides on the status of mediator for persons who are not judges. The mentioned list is published on the website of the The State Garanteed Legal Aid Service (Article 5 (6) of the Law on Mediation). On 31 December, 2019 the list contained 286 mediators not judges (of which 71 males and 215 females), and 106 mediators judges (of which 25 males and 81 females).
It is to notice that court-related mediation in practice is more often executed by mediators judges however the mediators who are not judges are also allowed to mediate at this stage when they are appointed by the State Garanteed Legal Aid Service.

Q166 (2018): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country might have impact on the significant increase of the number of people that gained the status of mediator.

Q166 (2017): The number of the mediators could increase due to the more effective spread of the information about the judicial mediation.
Q166 (2016): Judicial mediation is becoming more popular, efforts made by the judiciary and the National Courts Administration, as well as the legislator, resulted in an increased number of mediators.
Q166 (2015): National Courts Administration, data of the Activities report of 2015 of the Commission of the Judicial Mediation (http://www.teismai.lt/data/public/uploads/2016/03/teismines-mediacijos-komisijos-2015-m.-veiklos-apibendrinimas.pdf)

The main reforms that have been implemented over the last two years in judicial mediation:
From the 1st January 2015 the judicial mediation is available in all the courts of general jurisdiction. Before it was only available in courts, who participated in the pilot project. It is only available in civil cases. The judicial mediation is free of charge and parties may choose the judicial mediator from the List of Judicial Mediators (the List of Judicial Mediators is available at website https://e.teismas.lt/lt/public/teismin%C4%97-mediacija/). Judges, assisstants of judges, lawyers, psichologists and other persons of different background are on the List of Judicial Mediators.

The peculiarity is that judges can also have the status of judicial mediator. The parties may choose the judge, who deals with the case (if she/he has the status of judicial mediator) to act as judicial mediator. If a peaceful agreement is reached in such a case he/she has also the power to validate it.
Parties may also choose the judge of the Court of Appeal, the Supreme Court of Lithuania to deal with their dispute, which is heard by the court of lower instance, i.e. the dispute, which arose in the court of first instance, can be dealt with by the judge of the higher court.
In order to secure the impartiality of a judge, the judge, who was dealing with the dispute as judicial mediator has an obligation to opt out from the case at later stage.

In order to promote the peaceful settlement of disputes, the Judicial Council has also decided, that judges in every case should decide on suitability of the case for judicial mediation. It was also decided to set at least 4 hours of trainings on judicial mediation in the training programmes of judges.

National Courts Administration has implemented the EU project on e-services in administration of justice in 2015. During the project, management of the process of judicial mediation was created in the Information System of Lithuanian Courts LITEKO. Parties have a possibility to make a statement in the claim or other document on judicial mediation, the judicial mediator can access the case via electronic means, can arrange the judicial mediation session via electronic means, the parties can discuss on a peaceful agreement, can sign and deliver it to the court via electronic means, i.e. E-Service Portal of Lithuanian Courts (https://e.teismas.lt/en/public/home/).

Q166 (2014): One of the reasons explaining the increase of the number of judicial mediators in 2014 is that from 1st January, 2015 new regulations on judicial mediation came into force, which set stricter requirements for candidates to judicial mediators (requirement for longer trainings (32 hours instead of 16 hours), requirement to attend the meetings of the Judicial Mediation Commission). Therefore persons, who wished to act as judicial mediators hurried to deliver their documents before the 1st. January, 2015, so that their request would be considered under rules, which were valid before 1st. January, 2015.

Q167 (2021): family, labor and consumer cases are civil cases, so the number of cases in these respective categories is subtracted from the total number of civil cases. LITEKO
Q167 (2020): Observing the general trend of court proceedings, it can be seen that in 2020, compared to the previous year, the number of family law cases (due to divorce, child support, etc.) decreased significantly: 15,709 cases were examined (18,066 in 2019; 18,564 in 2018). It is believed that it was mandatory mediation (the requirement to initiate mediation proceedings in such cases before applying to the court for the settlement of a family dispute) that allowed to reduce the number of cases in court and court-related mediations.
The decrease in the number of completed mediation proceedings in 2020 compared to the previous year is thought to be due to an overall decrease in the number of court cases received (the number of civil cases heard in district and regional courts (I instance) decreased by 6% in 2020 compared to 2019 and was 13.646% less than in 2018). The reduction in numbers may also have been influenced by the restrictions imposed following the quarantine in the country following the COVID-19 pandemic, the lack of court hearings and judicial mediation proceedings.

Q167 (2019): As a result of mediation publicity campaigns conducted by the Ministry of Justice, the National Judicial Administration and other entities, those who go to court have more and more information about the possibility of resolving a dispute amicably through judicial mediation. Participants in the proceedings receive an explanation of the possibility to use judicial mediation together with the procedural documents. Judges also explain the essence of mediation to the parties in the cases before them and suggest the use of judicial mediation procedure (such an obligation is enshrined in law).
On 1 March 2019 the provisions of the Law on Administrative Proceedings of the Republic of Lithuania entered into force, enabling administrative disputes to be resolved with the help of judicial mediation. Judicial mediation is possible for an administrative dispute that allows the parties to enter into an amicable settlement under the law.
In order to positively assess the contribution of judges to the promotion of judicial mediation processes and the involvement of judges in judicial mediation, in 2019 the procedure for evaluating the performance of judges has been updated, which provides that during the evaluation of a judge's performance he may be awarded a certain amount of points for his activities as a mediator, the number of cases transferred to mediation by the judge is also taken into consideration.
It should be noted that family, labour cases and consumer cases, as well as civil and commercial cases, are heard by courts of general jurisdiction (in Lithuania there are no specialized courts for these cathegories of cases).

Q167 (2018): It should be noted that family, labour cases and consumer cases, as well as civil and commercial cases, are heard by courts of general jurisdiction (in Lithuania there are no specialized courts for these cathegories of cases).

Q167 (2017): The total number of judicial mediation procedures increased due to the more frequent use of this type of a procedure (in all fields - civil and commercial law, family law, labour law).
The number of judicial mediation procedures concerning civil and commercial cases increased because the judicial mediation becomes more popular.
Q167 (2016): The number of judicial mediation procedures concerning civil and commercial cases increased because the judicial mediation becomes more popular.
Q167 (2014): Judicial mediation is available in civil cases, where an agreement can be reached (family cases are treated as civil cases). As a matter of fact, 60% of the judicial mediation cases were family cases, 12% were cases on compensation of damages and loss, 10% - cases on property rights, 8% - employment cases.
Q167 (2012): There is no possibility to deliver accurate statistical data about cases in courts, in which the mediation was applied in 2012 (only 44 courts out of 67 replied). Pursuant to these data, in 17 cases the mediation procedure has been started in 2012. It should be noted that some of the courts have actively reconciled the parties in civil cases during the hearing: according to the data of the survey, there were signed 397 peace treaties in 2012 (not during the mediation procedure).

Luxembourg

Q166 (General Comment): The figures provided represent the total number of accredited mediators as of 31.12. of the reference year (in civil, commercial and criminal matters) without taking into account mediators who have ceased their activity.
Source: Ministry of Justice
Q166 (2020): The increase in the number of mediators is the consequence of a political decision to focus on alternative methods of dispute resolution. This political decision has been translated in particular by a strengthening of the mediation offer.

Q166 (2019): The figures provided represent the total number of accredited mediators (in civil, commercial and criminal matters) without taking into account mediators who have ceased their activity.
Q166 (2016): There are 92 mediators for criminal matter and 81 in civil and commercial matter.

Q167 (2020):
"Criminal Mediations: JUCHA, 2021
"

Q167 (2019): Criminal mediations: JUCHA, 2019

Q167 (2018): Criminal mediations: JUCHA 2008

Malta

Q166 (2017): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

Q166 (2016): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

Q166 (2015): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

Q167 (2021): The answers in Question 167.1 reflect Court-referred mediation and not voluntary mediation (outside a court context). Throughout 2021, 7 new cases were sent to mediation by the court, 3 of which were unsuccessful, 3 were revoked by the court and 1 was successful.
Q167 (2019): The Malta Mediation Centre received for the first time in 2019, the first case at mediation according to Art 10.2 of the Chp 579 Media and Defamation Act. This case was actually filed in court in 2018 but was then referred for mediation in 2019, and it is still ongoing.
Q167 (2017): This data has been provided by the Mediation Coordinator at the Family Court.

Netherlands

Q166 (2018): In campaigns to promote mediation, many people have been trained to become a mediator, and were accredited. Therefore, we observe that there are more people that want to be professional mediators than there is demand for the mediation services. The decrease of the number of mediators was discussed in the news media. The explanation given for the decrease was that the fee for being registered went up substantially. Many mediators who did hardly have cases to mediate, gave up.
Q166 (2015): In the frame of the 2015 exercise the number of mediatiors has increased, especially since the increase of the own financial contribution in divorce cases. Lawyers practice more often judicial mediation, which is less expensive.

Q166 (2014): In the frame of the 2014 exercise, it has been explained that the number of mediations has increased, especially since the increase of the own financial contribution in divorce cases. Lawyers practice more often judicial mediation, which is less expensive.
Q166 (2012): The number provided for 2012 refers to accredited judicial mediators. In 2010 there were 4 015 mediators registered at the Dutch Mediation Institute (NMI).
The number provided for 2012 refers to accredited judicial mediators. The number of accredited mediators in general was 2 949. The decrease observed between 2010 and 2012 was due to new registration directives of the Dutch Mediation Institute.

Q167 (2021): A total of 65,4% of finished mediations ended in a settlement (either completely, or partially).
For criminal cases, 83,3% of finished mediations ended in a settlement (either completely or partially).
https://jaarverslagrechtspraak.nl/wp-content/uploads/sites/3/2022/05/Jaarverslag-Rechtspraak-2021.pdf#page=56

Q167 (2020): Lower numbers in 2020 are due to the corona pandemic, as not al mediations can be done digitally, for example. Raad voor de rechtspraak en gerechten (Judicial Council and the Courts). https://jaarverslagrechtspraak.nl/wp-content/uploads/sites/2/2021/04/Jaarverslag-Rechtspraak-2020.pdf#page=45

Q167 (2019): Data are produced by Judicial Council and courts

Q167 (2018): Mediation has been promoted for many years in the Netherlands. In that sense nothing special happened in 2017/2018. In 2018 a new program started to promote mediation in criminal cases. The rise of the number of cases for which the parties agreed to start mediation may be explained by the implementation of this program . The data are produced by the Judicial council and the Courts

Q167 (2017): The indicated data refers to the number of mediation procedures started in 2017. The number of completed mediation procedures for this year is 2 316.
Q167 (2016): The Council of Judiciairy annual report 2016. The categorization in our source is different from the categorization above, so we cannot give the breakdown.
The indicated data refers to the number of mediation procedures started in 2016. The number of completed mediation procedures for this year is 2 326.
Q167 (2012): In 2012, the number of mediations decreased because in January 2011 the so called ‘mediation incentive contribution’ of € 200 stopped.

Poland

Q166 (2021): *2020 data

Q166 (2019): The Ministry of Justice is currently working on the project "Dissemination of alternative dispute resolution methods by raising the competence of mediators, establishing the National Register of Mediators (KRM) and information activities.". The National Register of Mediators (KRM) will be a public register containing information on persons practicing the profession of mediator. The functioning of KRM will allow for ordering and increasing the ministry's control over the activity and number of mediators in Poland.

Q166 (2017): The central register of mediators in Poland is not maintained. There are two separate list of registered mediators maintained by each regional courts – a list of permanent mediators created by the president of a reginal court and a list of mediators created by mediation organisations. There is no possibility to account number of registered mediators because mediators are repeated on both lists and in different courts also.

Q166 (2016): The central register of mediators in Poland is not maintained. There are two separate list of registered mediators maintained by each regional courts – a list of permanent mediators created by the president of a reginal court and a list of mediators created by mediation organisations. There is no possibility to account number of registered mediators because mediators are repeated on both lists and in different courts also.

Q167 (2020): Mediation proceedings based on statistical data - regional and district courts in the years 2006-2020) – developed by the Ministry of Justice.
*In accordance with the regulation which is contained in the Ordinance of the Council of Ministers of March 31, 2020 on the establishment of restrictions, orders and prohibitions in relation with the COVID19 epidemic, in the period from March 31, 2020, the performance of tasks by common courts was limited due to remote work and quarantine of employees of court departments. Mediation can be conducted in any case in the field of labour law, in which it is possible to sign a settlement, and most labour matters belong to this category. In the period 2019-2020 (at the time when an up-ward trend was observed), they mainly concerned conflicts that could have been influenced by remote work, e.g. lack of accurate, correct communication and direct contact between employees. That is why labour courts began to direct disputes towards an ADR methods, indicating that mediation may not only faster finish a case, but also be more financially attractive, which - as the data shows - resulted in a greater interest in this method of alternative dispute resolution in employee matters, as well as parties to conclude agreements.
*In 2020 total impact of cases before common courts was lower by 21.1% compared to 2019. The reduced impact of cases was caused among others by the COVID19 epidemic and related limitations. Limitations related to the pandemic have also affected the prisons and custodies closings, where mediation takes place after the sentence, representing a large percentage of mediation in criminal cases. Courts, in order not to extend the proceedings, resigned from referring cases to mediation.

Q167 (2019): “Postępowanie mediacyjne w świetle danych statystyczych – sądy rejonowe i okręgowe w latach 2006-2019” (eng. Mediation proceedings based on statistical data - regional and district courts in the years 2006-2019) – developed by the Ministry of Justice
There are no separate statistics for cases involving consumer cases. Such cases are classified as civil cases.
Q167 (2018): There are no separate statistics for cases involving consumer cases. Such cases are classified as civil cases.

Q167 (2017): Information gathered by the Managerial Statistical Information Division in Department of the Strategy and European Funds in Ministry of Justice
https://isws.ms.gov.pl/pl/baza-statystyczna/publikacje/download,2779,7.html With regard to administrative cases: Supreme Administrative Court – Information about activities of Administrative Courts in 2017
http://www.nsa.gov.pl/download.php?plik=1551
Q167 (2016): The number of mediation procedure increased significantly caused by implemented changes in law, esspecially in Code of Civil Procedure. We can notice that percentage of mediation cases raise in relation to cases in which mediation procedure can be apply.

Portugal

Q166 (2020): There is a national registry on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration is not mandatory, there are also some mediators that are not registered and may practice court-related mediation.)

Q166 (2018): There is a national registry on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration is not mandatory, there are also some mediators that are not registered and may practice court-related mediation.)

Q166 (2017): this number includes mediators of the Ministry of Justice registered public systems mediation and mediators of the Peace Courts. Unlike previous data (before 2016), the 2016 and 2017 data also include accredited conflict mediators in accordance with Law n.29/2013 of 19 April (Mediation Law).
The slight increase in the number of accredited mediators between the years of 2016 and 2017 is due to the increased number of applications for inclusion on the list organized by the Ministry of Justice submitted by private mediators.

Q166 (2016): this number includes mediators of the Ministry of Justice registered public systems mediation and mediators of the Peace Courts. Unlike previous data, it also includes accredited conflict mediators in accordance with Law n.29/2013 of 19 April (Mediation Law).

Q166 (2015):

The given number in question 166 includes the mediators of the Ministry of Justice' registered public systems mediation and mediators of the Peace Courts. In addition to this number there are 234 accredited conflict mediators in accordance with article 9 (1) (e) of Law No. 29/2013, of 19 April (Mediation Law), regulated by Ministerial Ordinance No. 344/2013, of 27 November.

Please acknowledge that registered public system mediators and mediators of the Peace Courts can also be accredited conflict mediators but not the other way around.

Q167 (2021): Directorate General of Justice Policy (Ministry of Justice)

Q167 (2020): Directorate-General for Justice Policy - Ministry of Justice

Q167 (2019): The total number of cases doesn't include data on criminal cases. This number is protected by statistical confidentiality.
Data on criminal cases is protected by statistical confidentiality.
Data on consumer cases is included in civil and commercial cases.

Q167 (2018): As for the years 2016 and 2017, we have provided the numbers, according to the Justice Statistics – Directorate-General for Justice Policy - and these statistics do not include the number of cases for which parties agreed to start mediation, but only the number of procedures that were concluded with a mediation agreement in a given year. For 2018, we have called upon another statistic source - the annual report of the Council of the Courts of Peace – which provides indeed the number of cases for which parties agreed to start mediation in the courts of peace. Concerning "family cases", the numbers are correct, since the indicated number of finished court-related mediations also include procedures that had begun in 2017, but were concluded in 2018, whereas the number of cases for which the parties agreed to start such mediation only refers to 2018.

Q167 (2017): 167.2 -The number of family mediation has decreased in 2017. In 2016 the number had increased as a result of the entry into force of the General Regime of the Civil Juvenile Procedure (RGPTC) which established that the judge had to determine the intervention of either the family mediation system or send the parties to a technical hearing if they couldn´t reach an agreement. After the entry into force of this new legal framework, as judges became familiar with the new procedure, they are forwarding more cases to the technical hearings instead of mediation. In addition, the number of family cases brought to court has decreased, as well as the direct requests for mediation from the parties.
167.5 - In 2017, for reasons of statistical disclosure, data is protected due to the small number.

Q167 (2016): Directorate-General for Justice Policy - Ministry of Justice

Romania

Q166 (2021): The data were communicated by the Mediation Council, reflecting the pace of the authorization process as a mediator by the Mediation Council (which may register fluctuations from year to year), of persons who meet the conditions provided by law. The decrease in the number of mediators is caused by withdrawals or suspensions of mediators' authorizations (possibly because of the low number of requests for mediation).

Q166 (2020): The data were communicated by the Mediation Council, reflecting the pace of the authorization process as a mediator by the Mediation Council (which may register fluctuations from year to year), of persons who meet the conditions provided by law.

Q166 (2019): The number of mediators accredited annually by the Mediation Council registers fluctuations, from year to year, being related most of the times to the legislative amendments brought to the mediation law, which can determine the increase in the number of persons requesting the accreditation as mediator, after the training courses required by law.

Q166 (2016): Regarding the variation registered in the number of authorizations granted to the mediators during the period 2014-2016, we mention that this was due to the legislative changes in the field of mediation occurred during that period.

Q166 (2013): The increase of the number of mediators in 2012 and 2013 comparing to 2010 is a result of the legislative reforms, stimulating the ADR.

Q166 (2012): The increase of the number of mediators in 2012 and 2013 comparing to 2010 is a result of the legislative reforms, stimulating the ADR.

Q167 (2021): Although we cannot offer a total of the cases of court-related mediation, divided into the categories above, according to the statistical system in the field (which is ongoing at this moment), we could extract a number of 476 mediation agreement authorized by the court (2021) on December 31, of which 188 in stock/ pending cases (on December 31, 2020) and 288 received/incoming cases during 2021.
Background and legislation elements (remain valid from the last cycle):
The control of the state regarding the mediation is indirect and it concerns the agreement concluded by the parties after following the mediation procedure – such an agreement constitutes an act under private signature. In order to become an authentic act, it has to be authenticated by the notary public or authorized by the court. Thus, if the conflict has already been submitted to a court, the settlement by mediation of such a case can be possible at the initiative of the involved parties or at the recommendation of the court and accepted by the parties, concerning rights the parties can dispose over in accordance with the legal provisions. Mediation can deal with the total or partial settlement of the concerned litigation. The court shall, on the request of the parties, issue a decision in accordance with the provisions of the Civil Procedure Code regarding the expedient court decision.
According with the provisions of article 59 para. 2 of the Law no. 192/2006, the parties to the mediation agreement may go to court to request, in compliance with the legal proceedings, to give a decision to legalize their understanding. Competence shall lay with the court in whose jurisdiction any of the parties have their domicile or residence or, where appropriate, the head office or the court of first instance in whose jurisdiction is located the place where it has been signed mediation agreement. The decision whereby the court consents on the understanding between parties shall be delivered in the council room and shall be an enforcement order under the law. The provisions of articles 438 - 441 of the Law no 134/2010 (New Civil Procedure Code), republished, as amended, shall apply accordingly.
Mediation in case of a dispute before the law courts, according with the provisions of article 61 para. 1 of the Law no. 192/2006. in case the conflict was brought to justice, its settlement by mediation may take place at the initiative of the parties or at the proposal of any of them or on the recommendation of the court, concerning the rights which the parties may enjoy under the law. Mediation may have as subject settlement of all or part of the dispute. The mediator may not charge fees for informing the parties. Also, according with the provisions of art. 63 para. 1 of the Law no. 192/2006, in case the matter has been settled by means of mediation, the court shall deliver, at the request of the parties and in compliance with the requirements of law, a judgment, the provisions of articles 438 - 441 of the Law No 134/2010, republished, as amended, being applied accordingly.

Q167 (2020): Although we cannot offer a total of the cases of court-related mediation, divided into the categories above, according to the statistical system in the field (which is ongoing at this moment), we could extract a number of 614 mediation agreement authorized by the court (2020).
Background and legislation elements (remain valid from the last cycle):
The control of the state regarding the mediation is indirect and it concerns the agreement concluded by the parties after following the mediation procedure – such an agreement constitutes an act under private signature. In order to become an authentic act, it has to be authenticated by the notary public or authorized by the court. Thus, if the conflict has already been submitted to a court, the settlement by mediation of such a case can be possible at the initiative of the involved parties or at the recommendation of the court and accepted by the parties, concerning rights the parties can dispose over in accordance with the legal provisions. Q167 (2016): There are no statistics on the number of mediation procedures (Council of Mediation)

Slovak Republic

Q166 (2021): In criminal matters is mediation provided by the 84 Probation officers located on District Courts.

Q166 (2020): In criminal matters is mediation provided by the 81 Probation officers located on District Courts.

Q166 (2019): In criminal matters is mediation provided by the 81 Probation officers located on District Courts.

Q166 (2018): In previous cycles the number of registered mediators provided by the Ministry of Justice included all persons listed in the register of mediators, including those who has been stroke out of a list or suspended. For this evaluation cycle we can provide the number of active registered mediators.
Q166 (2012): In 2012, all disciplinary proceedings against lawyers were initiated on the basis of alleged breach of professional obligations laid down by the Act on the Legal Profession or the Code on Professional Conduct for Lawyers. A criminal offence committed by a lawyer (who was found guilty by the criminal court in final judgment) is the reason for suspension or disbarment under the Act on the Legal Profession. However, it is not an issue of disciplinary proceedings.

Q167 (2019): Ministry of Justice of the Slovak republic

Slovenia

Q166 (General Comment): The procedures for listing (and un-listing) individual medators are led by individual courts.

Q166 (2021): The procedures for listing (and un-listing) individual mediators are led by individual courts.

Q167 (General Comment): Under category “1. Civil and commercial cases”, all mediation cases at local and district courts are reported (including family cases and consumer cases).
Q167 (2021): The number of finished mediations and settlement decreased from 2019 to 2020 (by 22% and 26% respecitvely; due to the impact of Covid-19 pandemics) and increased in 2021 (by 23% and 33% respectively). The number of mediations and settlements in 2021, compared to 2019, stayed roughly the same.
Q167 (2017): Data source: The Supreme Court`s Data Warehouse.
Data source: The Supreme Court`s Data Warehouse. The figures represent resolved mediation cases (no matter what was the outcome of mediaton). The category 1. Civil cases includes family cases. The figure at the category 4. Employment dismissals cases is the number of mediations at the labour and social courts and includes employment dismissal cases.

Q167 (2016): Data source: The Supreme Court`s Data Warehouse.
The figures represent resolved mediation cases (no matter what was the outcome of mediaton). The category 1. Civil cases includes family cases. The figure at the category 4. Employment dismissals cases is the number of mediations at the labour and social courts and includes employment dismissals cases.
The difference (decrease) in number of mediation cases compared to 2014 can be partially due to decrease in number of incoming court cases (see Q91). In 2016, the mediation was offered in 7.969 civil and 1.475 labour cases.

Q167 (2014): The figures represent resolved mediation cases (no matter what was the outcome of mediation). The category 1. Civil cases includes family cases. The figure at the category 4. Employment dismissals cases is the number of mediations at the labour and social courts and includes employment dismissals cases.
In 2014, the mediation was offered in 10.854 civil and 2.003 labour cases.
Differences to 2012: in 2012, data was reported by the Ministry of Justice, since 2014 the data source is the Supreme Court`s Data Warehouse.

Q167 (2012): The 2012 data show rising trends of readiness of parties to use judicial meditation and capacities of the courts to supply it. The area of judicial mediation and alternative resolution procedures in general has been the focus of legislative changes in 2009 according to which courts of first and second instances had to adopt mediation procedures.

Spain

Q166 (2021): The figure provided is the addition of number of mediators (natural persons), Institutions of mediation, Mediators in insolvency cases and Mediators in insolvency cases (legal persons); all of them registered in the Registry of Mediators.
This Registry is not compulsory for civil cases, so the number of persons that act as mediatos may be higher.

Q166 (2020): The figure provided is the number of mediators (natural and legal persons) registered in the Registry of Mediators.
This Registry is not compulsory, so the number of persons that act as mediatos may be higher.
Mediation does not have a long tradition in Spain. However, it has good legislative support, and broad institutional support (for example, from the General Council of the Judiciary).
The Draft Law on Procedural Efficiency Measures contains rules that will enhance it (such as providing that the attempted solution be a prior procedural requirement).

Q166 (2019): The figure indicated is the sum of [Mediators + Insolvency mediators + Institutions of Mediation + Legal Persons Insolvency
mediators] registered in the Registry of Mediation of the Ministry of Justice.
The registry is not compulsory and there are other Registries in Autonomous Regions.

Q166 (2018): The figure indicated is the sum of [Mediators + Insolvency mediators + Institutions of Mediation + Legal Persons Insolvency mediators] registered in the Registry of Mediation of the Ministry of Justice.
The registry is not compulsory and there are other Registries in Autonomous Regions. Therefore, the figure is not a complete and perfect national data.

Q166 (2017): The data indicates the number of natural persons registered as Mediators and Mediators on Insolvency, in the Registry of Mediators and Mediation Institutions. (Registration is not compulsory).
Moreover, there are 123 Institutions of Mediation, and other 132 legal persons registered as Mediators on Insolvency. Law 5/2012 on mediation in civil and commercial matters regulated mediation. The Royal Decree 980/2013, develops the previous Law and creates the Register of Mediators and Mediation Institutions. Registration in the Register is voluntary, therefore, its figures are still indicative. But in general the regulation offers a better structuring of the Mediation Institution and a progressive improvement of the quality of the data. Moreover, Mediation is being developed and implemented more and more, both by public initiatives and by professional Associations.

Q166 (2016): In the Registry of the Ministry of Justice there are 1160 private mediators registered who work in the whole territory. The mediation takes place out of Courts. The Court during the first hearing informs to the parties about the possibility of going to mediation, and can suspend the procedure if the parties decide to try the mediation.
The registry mentioned is voluntary (not mandatory), so the figure is a posible approximation. The number of Institutions of Mediation is 66.

Q166 (2015): The approval in 2012 of the Act on mediation in civil and commercial matters could have influence on the increase in the number of mediators.

Q167 (2021): Judicial Statistics department (General Council for the Judiciary)

Q167 (2020): Given the severe restrictions between March and May of 2020, the pandemic is a possible explanation of the decreased number of court-related mediation proceedings in respect of all legal matters.

Q167 (2017): The figures indicate the files transferred by Courts to mediation procedures. There is not data about issues directly solved in mediation before starting the judicial proceeding.
The advancement in the implementation of mediation explains the increase in the number of “civil and commercial cases” on the one hand and “criminal cases” on the other hand. There are no specific reasons explaining the decreases in the number of mediation procedures concerning family law cases and employment dismissal cases.

Q167 (2016): A reform of the Civil Procedural Law in 2015, introduced certain obligations of the Court and of the Judge to inform the parties about the possibility to bring the case to mediation. Accordingly, the number of civil and commercial cases, as well as the number of family cases increased in a significant way between 2014 and 2016. No particular explanation can be provided in respect of the decrease in the number of judicial mediation procedures in criminal matters.

Q167 (2014): In 2014, regarding labour cases, 460 609 mediation procedures were conducted prior to the initiation of cases before the labour courts, but there is not specific data available about the employment dismissals cases.

Q167 (2012): In 2012, regarding labour matters, 12 725 cases were diverted to mediation, 3 464 granted an agreement, but there was no data available on employment dismissals cases. As for criminal matters, 1 166 cases were diverted to mediation during the instruction phase and 16 953 cases were diverted to mediation before the Criminal Court.

Indicator 8: The existence and use of alternative dispute resolution methods

comments provided by the national correspondents

organised by question no.

Question 166. Number of accredited or registered mediators for court-related mediation:

Question 167. Number of court-related mediations:

Question 166

Austria

(2019): The list of mediators started in 2004; registration is always limited for a specific period: five years after the initial registration and ten years for continuation of an existing registration. Many mediators registered in 2004, applied for continuation of the registration in 2009 but did not do so in 2019. This explains the significant drop in registered mediators.

(2015): Q166

Q168
Sec. 198 – 209 CPC

Belgium

(General Comment): A mediator may receive several accreditations. The Federal Mediation Commission determines the criteria for the accreditation of mediators under Articles 1726 and 1727 § 6 of the Judicial Code.

(2021): Data provided by the Federal Mediation Commission: https://www.cfm-fbc.be/fr.
The difference (in figures) with the previous cycle is explained in particular by the removal of mediators who are no longer up to date with their continuing training obligation.
Mediation Barometer 2021 (some figures and trends), link:
https://www.cfm-fbc.be/sites/default/files/content/explorer/slides_barometer_-_fr.pdf
A mediator may receive several accreditations. The Federal Mediation Commission determines the criteria for the accreditation of mediators under Articles 1726 and 1727 § 6 of the Judicial Code.

(2020):
"The difference in the number of mediators compared to the previous cycle is explained in particular by the removal of mediators who are no longer up to date with their continuing education obligation.
As of 31/12/2020, 2577 mediators are accredited by the Federal Mediation Commission (CFM) and more than 3400 accreditations with this same CFM (some mediators having in fact several accreditations in family, civil and commercial, social, administrative matters).
The difference (as for the figure) with the previous cycle is explained in particular by the striking off of mediators who are no longer up to date with their obligation of permanent training.
"

(2019): The number of accredited mediators in 2019 was 2,399. The number of approvals (by type of civil litigation) granted to mediators: 3,177, including 2,178 to women and 999 to men.
A mediator can be accredited in family matters as well as in civil and commercial matters. S/he may have one or all of the accreditation (family, civil and commercial, social affairs, mediation with public authorities). So one mediator is not equal to one acreditation.

(2018): 2122 accredited mediators with 2788 accreditations granted, 907 for male mediators and 1881 accreditations for female mediators

(2017): Information on mediation: http://www.mediation-justice.be

(2016): Information on mediation: http://www.mediation-justice.be

(2015): number of médiators at 13/10/2016

(2012): 2012: the competence over the court houses is transferred from the federal level to the authorities.

Bulgaria

(2021): The information about the number of registered court-related mediators is not available (NA). As of June 2022 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2929 (for 2021 the number of newly registered is 214).

(2020): The information about the number of registered court-related mediators is not available (NA). As of July 2021 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2767 (for 2020 the number of newly registered is 233).

(2019): The information about the number of registered court-related mediators is not available (NA). At the end of 2019 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2419.

(2018): The information about the number of registered court-related mediators is not available (NA). As of May 2019 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2311 (for 2018 the number of newly registered is 250).

(2015): Number of registered mediators is 1501 up to 31.12.2015.

Czech Republic

(2021): From the above mentioned number of mediators there are 359 probate and mediation officials and 327 mediators in non criminal cases.

(2020): From the above mentioned number of mediators there are 356 probate and mediation officials and 313 mediators in non criminal cases.

(2019): From the above mentioned number of mediators there are 347 probate and mediation officials and 242 mediators in non criminal cases.

(2018): From the above mentioned number of mediators there are 429 probate and mediation officials and 228 mediators in non criminal cases. The number of mediators is increasing since the Ministry of Justice supports broader use of other criminal sanctions which are alternatives to imprisonment such as house arrest.

(2017): From the above mentioned number of mediators there are 421 probate and mediation officials and 239 (from this number 211 active and 28 inactive) mediators in non criminal cases. The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

(2016): From the above mentioned number of mediators there are 398 probate and mediation officials and 222 mediators in non criminal cases. The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

(2015): From the mentioned number of mediators there are 381 probate and mediation officials and 208 mediators in non criminal cases.
The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

Denmark

(2021): The number of registered attorneys who are appointed to serve as mediators in court mediation in 2021 is 53. The number of registred jugdes who serves as mediators in court mediation in 2021 is 90.

(2020): The number of registered attorneys who are appointed to serve as mediators in court mediation in 2020 is 53. The number of registred jugdes who serves as mediators in court mediation in 2020 is 90.

(2018): The number of registered judges who serve as mediators in court mediation in 2018 is 86. The number of registered attorneys
who are appointed to serve as mediators in court mediation in 2018 is 57.

(2017): In 2017 there are 57 registered attorneys and 78 judges with a special mediation education as of 1st July 2017. There is a different process of appointment. Judge mediators go through a special education, and registered attorneys must file a job application to become mediator. There we have updated numbers for judge mediators. Attorneys are appointed every 4 years and the last appointment window was in 2016. The number of attorneys is therefore the same as last year. Source: http://www.domstol.dk/saadangoerdu/retsmaegling/Documents/Liste%20over%20advokatmaeglere.pdf

(2016): The number of registered judges who serve as mediators in court mediation in 2016 is 86. The number of registered attorneys who are appointed to serve as mediators in court mediation in 2016 is 57.

Finland

(General Comment): In Finland there is no accreditation or a register for court-related mediators, all mediators being trained in a special training program for mediation.

(2019): In Finland there is no accreditation or a register for court-related mediators. All mediators are trained in a special training program for mediation.

France

(2021): 2854 of which 2542 are natural persons, the others are legal persons
source SADJAV

(2020): "There are also 312 legal persons
These data concern only civil mediation and come from the SADJAV and the DACS. The increase in the number of mediators registered on the lists of mediators established by the seond instance courts is indicative of the development of the use of alternative dispute resolution methods and more particularly mediation.
The Ministry of Justice strongly encourages mediators to register on these lists. Registration on the lists of mediators with the second instance courts obeys certain conditions as mentioned in the decree n°2021-95 of January 29, 2021 amending the decrees n°2017-1457 of October 9, 2017 relating to the list of mediators with the second instance court. In addition, the mediator wishing to be registered must provide, in support of his application, supporting documents attesting in particular to his training (decree of January 29, 2021 fixing the list of supporting documents to be provided for registration on the list provided for in article 22-1 A of law n°95-125 of February 8, 1995 relating to the organization of the jurisdictions and to civil, criminal and administrative procedure). A verification of his or her criminal record is also carried out.
These requirements help to ensure the minimum guarantees (training, impartiality, independence and verification of criminal status) required of a mediator recommended by the courts. Finally, the mediators registered on these lists have a better visibility since the litigants are led to go to the lists of the second instance court to find a mediator (https://www.justice.fr/r%C3%A9gler-litiges-autrement/m%C3%A9diation).
A mediator recommended by the justice is, moreover, a guarantee of confidence for the litigants. "

(2018): The data are approximate because they have been compiled manually from the lists of mediators at the courts of appeal, published and provided for by article 8 of Act No. 2016-1547 of 18 November 2016 on the modernization of 21st century justice and partial because the service is still waiting for the publication and/or registration of 13 lists, on 05 June 2019. It is recalled that in the French judicial system, the judge remains free to appoint a mediator who does not appear on the lists drawn up by the courts of appeal. Indeed, these lists are intended for the information of the judge.

(2016): Except for the profession of family mediator for which a diploma is required, the profession of mediator in civil and commercial matters is not regulated and there is no national register of mediators. Nevertheless, it is possible to consider as registered: mediators in criminal matters entrusted with tasks by public prosecutors (312), justice conciliators who are volunteers and selected by judicial bodies (1958), and the family mediators empowered by the family allowances funds (670). Data is not presented in full time equivalent.

(2015): Accredited mediators are family mediators, criminal mediators and legal conciliators, who work in courts or are subsidised by the family allowance funds.

Source: Ministry of Justice, General Secretariat, Sub-Directorate of Statistics and Studies, Access to Law and Victim Assistance Unit

Germany

(General Comment): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

(2018): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

(2017): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available
on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

(2016): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Greece

(2021): Of the 2985 mediators active are 2963.

(2020): There is no relevant information regarding the data.

(2019): The interest of people to acquire the status of mediator increased in 2019 without any special or official reason.

Hungary

(2016): There is a continuous training for court secretaries and judges in the field of mediation so that is the reason for the increasing number. To be registered as a court mediator one must finish this training (organized by the National Office for the Judiciary).

(2014): The increase in the number of judicial mediators between 2013 and 2014 is a result of constant training organized by the National Office for the Judiciary.

(2013): Registered mediator can be any natural or legal person, who complies with the legal requirements (concerning university degree, mediation training etc.). According to the relevant legislation (Act LV of 2002 on Mediation) mediators established in other EEA Member States (i.e. living in the European Economic Area) can act in a current case in Hungary. The foreign mediator should inform the Ministry of Justice, which shall specify the rights for one year.

Ireland

(2014): 2014: Reforms are also under consideration. Legislation is being prepared to promote mediation as a viable, effective and efficient alternative to court proceedings thereby reducing legal costs, speeding up the resolution of disputes and relieving the stress involved in court proceedings. It is anticipated that a Mediation Bill will be published in 2015 with a view to enactment of the legislation quickly thereafter.

Italy

(2018): The above figures refer to public mediators who deal with civil and commercial mediation procedures. Therefore these figures do not include mediators in family matters (818) nor in consumer cases.

(2016): The number of accredited mediators is destined to grow. Probably at a lower growth rate.

Latvia

(2021): Source for question no.166 – website of Council of Certified Mediators https://sertificetimediatori.lv/mediatori/

(2020): Data are available only about certified mediators. According legislation there can be practicing mediators and certified mediators. The former is a natural person selected freely by the parties who have agreed to conduct mediation while the latter, is a mediator who, in accordance with the procedures laid down in the laws and regulations, has acquired mediation and received a certificate which gives him/her the right to be included in the list of mediators.

(2019): Data are available only about certified mediators. According legislation there can be practicing mediators and certified mediators. The former is a natural person selected freely by the parties who have agreed to conduct mediation while the latter, is a mediator who, in accordance with the procedures laid down in the laws and regulations, has acquired mediation and received a certificate which gives him/her the right to be included in the list of mediators.

(2015): Variation of the number of mediators is constant since every year new mediators pass the exam and become certified mediators

Lithuania

(General Comment): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country and the development of the application of mediation might have impact on the significant increase of the number of people that gained the status of mediator.
Till 1st January, 2019 National Couts Administration have been maintained the list of court mediators which included judges and other persons (not judges). Due to a change in legal regulation (from 1st January, 2019), National Courts Administration maintains only the list of Judges who have been granted the status of mediators (Article 5 (2) of the Law on Mediation of the Republic of Lithuania) and transmits this data to the State Garanteed Legal Aid Service. The latter maintains the common list of mediators and decides on the status of mediator for persons who are not judges. The mentioned list is published on the website of the The State Garanteed Legal Aid Service (Article 5 (6) of the Law on Mediation). It is to notice that court-related mediation in practice is more often executed by mediators judges however the mediators who are not judges are also allowed to mediate at this stage when they are appointed by the State Garanteed Legal Aid Service.

(2021): from 2021 January 1 all mediators registered in the list of mediators of the Republic of Lithuania have the right to conduct judicial mediation in both civil and administrative cases.

(2020): In 2020 the list contained 438 mediators not judges (of which 100 males and 338 females), and 114 mediators judges (of which 27 males and 87 females).
The Ministry of Justice of the Republic of Lithuania, implementing the project co-financed by the European Union Structural Funds No. 10.1.4-V-922-01-005 "Development of the Conciliation Mediation System", taking into account the expansion of the Institute of Mediation and the consequent increased need for mediators, initiated the organization of training for mediators, during which a total of 420 persons (320 people were trained in the training of 40 academic hours, 100 people took part in the training of 24 academic hours).
This training took place in May – October, 2019. All participants signed a contract for the provision of training services, one of the conditions of which was the obligation to register to take the qualification exam for mediators and to come to take it. Due to the fact that the Training Participants' Agreement did not provide for the obligation to pass the mediators' qualification examination but to come to take it, the Ministry of Justice did not collect information on the proportion of trainees who passed the mediators' qualification examination, but the persons who took part in this training were very active in applying for the qualification examination for mediators. There were also cases when those who did not pass the mediator qualification exam for the first time registered to take the exam again six months later.
October – November in 2020 specialized training for mediators on the topic “Mediation in family disputes in the presence of signs of domestic violence” was organized on the order of the Ministry of Justice. A total of 60 mediators participated in the training. These training were intended to improve the qualification of mediators in disputes where are possible signs of domestic violence, therefore only mediators registered in the list of mediators of the Republic of Lithuania and having signed agreements with the State Guaranteed Legal Aid Service on the provision of compulsory mediation services could participate in.
It is noteworthy that the organized training, which were free of charge for their participants, increased the number of mediators in both 2019 and 2020. In this context, it would not be appropriate to compare the increase between 2019 and 2020 .

(2019): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country might have impact on the significant increase of the number of people that gained the status of mediator.
Till 1st January, 2019 National Couts Administration have been maintained the list of court mediators which included judges and other persons (not judges). Due to a change in legal regulation (from 1st January, 2019), National Courts Administration maintains only the list of Judges who have been granted the status of mediators (Article 5 (2) of the Law on Mediation of the Republic of Lithuania) and transmits this data to the State Garanteed Legal Aid Service. The latter maintains the common list of mediators and decides on the status of mediator for persons who are not judges. The mentioned list is published on the website of the The State Garanteed Legal Aid Service (Article 5 (6) of the Law on Mediation). On 31 December, 2019 the list contained 286 mediators not judges (of which 71 males and 215 females), and 106 mediators judges (of which 25 males and 81 females).
It is to notice that court-related mediation in practice is more often executed by mediators judges however the mediators who are not judges are also allowed to mediate at this stage when they are appointed by the State Garanteed Legal Aid Service.

(2018): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country might have impact on the significant increase of the number of people that gained the status of mediator.

(2017): The number of the mediators could increase due to the more effective spread of the information about the judicial mediation.

(2016): Judicial mediation is becoming more popular, efforts made by the judiciary and the National Courts Administration, as well as the legislator, resulted in an increased number of mediators.

(2015): National Courts Administration, data of the Activities report of 2015 of the Commission of the Judicial Mediation (http://www.teismai.lt/data/public/uploads/2016/03/teismines-mediacijos-komisijos-2015-m.-veiklos-apibendrinimas.pdf)

The main reforms that have been implemented over the last two years in judicial mediation:
From the 1st January 2015 the judicial mediation is available in all the courts of general jurisdiction. Before it was only available in courts, who participated in the pilot project. It is only available in civil cases. The judicial mediation is free of charge and parties may choose the judicial mediator from the List of Judicial Mediators (the List of Judicial Mediators is available at website https://e.teismas.lt/lt/public/teismin%C4%97-mediacija/). Judges, assisstants of judges, lawyers, psichologists and other persons of different background are on the List of Judicial Mediators.

The peculiarity is that judges can also have the status of judicial mediator. The parties may choose the judge, who deals with the case (if she/he has the status of judicial mediator) to act as judicial mediator. If a peaceful agreement is reached in such a case he/she has also the power to validate it.
Parties may also choose the judge of the Court of Appeal, the Supreme Court of Lithuania to deal with their dispute, which is heard by the court of lower instance, i.e. the dispute, which arose in the court of first instance, can be dealt with by the judge of the higher court.
In order to secure the impartiality of a judge, the judge, who was dealing with the dispute as judicial mediator has an obligation to opt out from the case at later stage.

In order to promote the peaceful settlement of disputes, the Judicial Council has also decided, that judges in every case should decide on suitability of the case for judicial mediation. It was also decided to set at least 4 hours of trainings on judicial mediation in the training programmes of judges.

National Courts Administration has implemented the EU project on e-services in administration of justice in 2015. During the project, management of the process of judicial mediation was created in the Information System of Lithuanian Courts LITEKO. Parties have a possibility to make a statement in the claim or other document on judicial mediation, the judicial mediator can access the case via electronic means, can arrange the judicial mediation session via electronic means, the parties can discuss on a peaceful agreement, can sign and deliver it to the court via electronic means, i.e. E-Service Portal of Lithuanian Courts (https://e.teismas.lt/en/public/home/).

(2014): One of the reasons explaining the increase of the number of judicial mediators in 2014 is that from 1st January, 2015 new regulations on judicial mediation came into force, which set stricter requirements for candidates to judicial mediators (requirement for longer trainings (32 hours instead of 16 hours), requirement to attend the meetings of the Judicial Mediation Commission). Therefore persons, who wished to act as judicial mediators hurried to deliver their documents before the 1st. January, 2015, so that their request would be considered under rules, which were valid before 1st. January, 2015.

Luxembourg

(General Comment): The figures provided represent the total number of accredited mediators as of 31.12. of the reference year (in civil, commercial and criminal matters) without taking into account mediators who have ceased their activity. Source: Ministry of Justice

(2020): The increase in the number of mediators is the consequence of a political decision to focus on alternative methods of dispute resolution. This political decision has been translated in particular by a strengthening of the mediation offer.

(2019): The figures provided represent the total number of accredited mediators (in civil, commercial and criminal matters) without taking into account mediators who have ceased their activity.

(2016): There are 92 mediators for criminal matter and 81 in civil and commercial matter.

Malta

(2017): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

(2016): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

(2015): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

Netherlands

(2018): In campaigns to promote mediation, many people have been trained to become a mediator, and were accredited. Therefore, we observe that there are more people that want to be professional mediators than there is demand for the mediation services. The decrease of the number of mediators was discussed in the news media. The explanation given for the decrease was that the fee for being registered went up substantially. Many mediators who did hardly have cases to mediate, gave up.

(2015): In the frame of the 2015 exercise the number of mediatiors has increased, especially since the increase of the own financial contribution in divorce cases. Lawyers practice more often judicial mediation, which is less expensive.

(2014): In the frame of the 2014 exercise, it has been explained that the number of mediations has increased, especially since the increase of the own financial contribution in divorce cases. Lawyers practice more often judicial mediation, which is less expensive.

(2012): The number provided for 2012 refers to accredited judicial mediators. In 2010 there were 4 015 mediators registered at the Dutch Mediation Institute (NMI).
The number provided for 2012 refers to accredited judicial mediators. The number of accredited mediators in general was 2 949. The decrease observed between 2010 and 2012 was due to new registration directives of the Dutch Mediation Institute.

Poland

**(2021): ***2020 data

(2019): The Ministry of Justice is currently working on the project "Dissemination of alternative dispute resolution methods by raising the competence of mediators, establishing the National Register of Mediators (KRM) and information activities.". The National Register of Mediators (KRM) will be a public register containing information on persons practicing the profession of mediator. The functioning of KRM will allow for ordering and increasing the ministry's control over the activity and number of mediators in Poland.

(2017): The central register of mediators in Poland is not maintained. There are two separate list of registered mediators maintained by each regional courts – a list of permanent mediators created by the president of a reginal court and a list of mediators created by mediation organisations. There is no possibility to account number of registered mediators because mediators are repeated on both lists and in different courts also.

(2016): The central register of mediators in Poland is not maintained. There are two separate list of registered mediators maintained by each regional courts – a list of permanent mediators created by the president of a reginal court and a list of mediators created by mediation organisations. There is no possibility to account number of registered mediators because mediators are repeated on both lists and in different courts also.

Portugal

(2020): There is a national registry on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration is not mandatory, there are also some mediators that are not registered and may practice court-related mediation.)

(2018): There is a national registry on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration is not mandatory, there are also some mediators that are not registered and may practice court-related mediation.)

(2017): this number includes mediators of the Ministry of Justice registered public systems mediation and mediators of the Peace Courts. Unlike previous data (before 2016), the 2016 and 2017 data also include accredited conflict mediators in accordance with Law n.29/2013 of 19 April (Mediation Law).
The slight increase in the number of accredited mediators between the years of 2016 and 2017 is due to the increased number of applications for inclusion on the list organized by the Ministry of Justice submitted by private mediators.

(2016): this number includes mediators of the Ministry of Justice registered public systems mediation and mediators of the Peace Courts. Unlike previous data, it also includes accredited conflict mediators in accordance with Law n.29/2013 of 19 April (Mediation Law).

(2015):

The given number in question 166 includes the mediators of the Ministry of Justice' registered public systems mediation and mediators of the Peace Courts. In addition to this number there are 234 accredited conflict mediators in accordance with article 9 (1) (e) of Law No. 29/2013, of 19 April (Mediation Law), regulated by Ministerial Ordinance No. 344/2013, of 27 November.

Please acknowledge that registered public system mediators and mediators of the Peace Courts can also be accredited conflict mediators but not the other way around.

Romania

(2021): The data were communicated by the Mediation Council, reflecting the pace of the authorization process as a mediator by the Mediation Council (which may register fluctuations from year to year), of persons who meet the conditions provided by law. The decrease in the number of mediators is caused by withdrawals or suspensions of mediators' authorizations (possibly because of the low number of requests for mediation).

(2020): The data were communicated by the Mediation Council, reflecting the pace of the authorization process as a mediator by the Mediation Council (which may register fluctuations from year to year), of persons who meet the conditions provided by law.

(2019): The number of mediators accredited annually by the Mediation Council registers fluctuations, from year to year, being related most of the times to the legislative amendments brought to the mediation law, which can determine the increase in the number of persons requesting the accreditation as mediator, after the training courses required by law.

(2016): Regarding the variation registered in the number of authorizations granted to the mediators during the period 2014-2016, we mention that this was due to the legislative changes in the field of mediation occurred during that period.

(2013): The increase of the number of mediators in 2012 and 2013 comparing to 2010 is a result of the legislative reforms, stimulating the ADR.

(2012): The increase of the number of mediators in 2012 and 2013 comparing to 2010 is a result of the legislative reforms, stimulating the ADR.

Slovak Republic

(2021): In criminal matters is mediation provided by the 84 Probation officers located on District Courts.

(2020): In criminal matters is mediation provided by the 81 Probation officers located on District Courts.

(2019): In criminal matters is mediation provided by the 81 Probation officers located on District Courts.

(2018): In previous cycles the number of registered mediators provided by the Ministry of Justice included all persons listed in the register of mediators, including those who has been stroke out of a list or suspended. For this evaluation cycle we can provide the number of active registered mediators.

(2012): In 2012, all disciplinary proceedings against lawyers were initiated on the basis of alleged breach of professional obligations laid down by the Act on the Legal Profession or the Code on Professional Conduct for Lawyers. A criminal offence committed by a lawyer (who was found guilty by the criminal court in final judgment) is the reason for suspension or disbarment under the Act on the Legal Profession. However, it is not an issue of disciplinary proceedings.

Slovenia

(General Comment): The procedures for listing (and un-listing) individual medators are led by individual courts.

(2021): The procedures for listing (and un-listing) individual mediators are led by individual courts.

Spain

(2021): The figure provided is the addition of number of mediators (natural persons), Institutions of mediation, Mediators in insolvency cases and Mediators in insolvency cases (legal persons); all of them registered in the Registry of Mediators.
This Registry is not compulsory for civil cases, so the number of persons that act as mediatos may be higher.

(2020): The figure provided is the number of mediators (natural and legal persons) registered in the Registry of Mediators.
This Registry is not compulsory, so the number of persons that act as mediatos may be higher.
Mediation does not have a long tradition in Spain. However, it has good legislative support, and broad institutional support (for example, from the General Council of the Judiciary).
The Draft Law on Procedural Efficiency Measures contains rules that will enhance it (such as providing that the attempted solution be a prior procedural requirement).

(2019): The figure indicated is the sum of [Mediators + Insolvency mediators + Institutions of Mediation + Legal Persons Insolvency
mediators] registered in the Registry of Mediation of the Ministry of Justice.
The registry is not compulsory and there are other Registries in Autonomous Regions.

(2018): The figure indicated is the sum of [Mediators + Insolvency mediators + Institutions of Mediation + Legal Persons Insolvency mediators] registered in the Registry of Mediation of the Ministry of Justice.
The registry is not compulsory and there are other Registries in Autonomous Regions. Therefore, the figure is not a complete and perfect national data.

(2017): The data indicates the number of natural persons registered as Mediators and Mediators on Insolvency, in the Registry of Mediators and Mediation Institutions. (Registration is not compulsory).
Moreover, there are 123 Institutions of Mediation, and other 132 legal persons registered as Mediators on Insolvency. Law 5/2012 on mediation in civil and commercial matters regulated mediation. The Royal Decree 980/2013, develops the previous Law and creates the Register of Mediators and Mediation Institutions. Registration in the Register is voluntary, therefore, its figures are still indicative. But in general the regulation offers a better structuring of the Mediation Institution and a progressive improvement of the quality of the data. Moreover, Mediation is being developed and implemented more and more, both by public initiatives and by professional Associations.

(2016): In the Registry of the Ministry of Justice there are 1160 private mediators registered who work in the whole territory. The mediation takes place out of Courts. The Court during the first hearing informs to the parties about the possibility of going to mediation, and can suspend the procedure if the parties decide to try the mediation.
The registry mentioned is voluntary (not mandatory), so the figure is a posible approximation. The number of Institutions of Mediation is 66.

(2015): The approval in 2012 of the Act on mediation in civil and commercial matters could have influence on the increase in the number of mediators.

Question 167

Austria

(2021): Datewarehouse (register data of the case management application “Verfahrensautomation Justiz”). There is no data available if the settlement agreements are the results of court-related mediations. Parties may agree on a settlement agreement without mediation.

(2020): Datewarehouse (register data of the case management application “Verfahrensautomation Justiz”). There is no data available if the settlement agreements are the results of court-related mediations. Parties may agree on a settlement agreement without mediation.

Belgium

(2021): The Federal Mediation Commission does not have data on the number of court related mediation procedures.

(2020): We do not have figures on the number of mediations per year in Belgium.

(2017): Federal Mediation Commission

(2016): There are no official statistics

(2014): In 2014, there has been 2 763 resolved criminal mediation procedures.

(2012): In 2012, the number of mediation proceedings initiated in criminal matters was 6 352, according to the 2012 annual activity report of the Directorate General of the Court House. The number of resolved mediation proceedings in criminal matters was 2 800, according to the College of Public Prosecutors.

Croatia

(2021): Ministry of Justice and Public Administration

Cyprus

(2020): court registry

Czech Republic

(2021): Probation and Mediation Service

(2020): Probation and Mediation Service

(2019): There could be three types of outcomes: 1. settlement agreement - 659
2. partly settlement agreement (e.g. with one victim and not with the other one) - 64
3. non-agreement - 45
Source:Probation and Mediation Service

(2018): There could be three types of outcomes: 1. settlement agreement - 602
2. partly settlement agreement (e.g. with one victim and not with the other one) - 48
3. non-agreement - 31
Source:Probation and Mediation Service

(2017): Mediation in criminal cases is mostly voluntary. The decrease in the number of mediations is mainly due to the decrease in the number of cases in the pre-trial proceedings to which Probation and Mediation Service (PMS) has entered. The enters of probation officers into the pre-trial proceedings is mostly dependent on the available capacities of the staff PMS that they can allocate for the selection, the preparing and the implementation of mediation. PMS and her employees are overloaded by the control of alternative sanctions such as probation and community sanctions, which they are delegated directly by the court. This causes a decreasing of the enters into the pre-trial proceedings and thus a decreasing of the numbers of mediations. Source:
Probation and Mediation Service

(2016): Probation and Mediation Service

Denmark

(General Comment): Data above all relates to the district courts. The two High Courts also mediate a small number of cases, but due to data problems from a new system to deal with civil cases, the Western High Court wrote in their annual report, that they were unable to see from the system how many cases they had where mediation was used. Therefor Danish Court Administration ignores the two High Courts. There are data breaches as to see when a case surpasses to mediation. In the new Civil system that was introduced gradually from September 2017 to February 2018, data on surpasses can only be seen when the case is finalized. Before we could see it when the case surpassed to mediation. The transition does not give problems to measure finished mediation as in both the new and the old civil system, a mediation is finished when it is finished. The data breach gives some problems to measure number of finished court-related mediations as this figure is combined by finished cases and cases where mediation was abandoned. The abandoned cases are first measured when the cases are finished in the court system with a court decision and not when they were first abandoned. In the figure for “number of finished court-related mediations”, Danish Court Administration has ignored cases where the parties did not meet at least one time. Danish Court Administration have 5 so-called private criminal cases. In Denmark, there is no procedure for mediation of criminal cases, but private criminal cases may be mediated. Private criminal cases are cases where private legal entities (people or companies) sue others for criminal offenses. It seems that earlier data are only data of mediation where the mediation ended up with an agreement. Now the questions from CEPEJ both include start of mediation, finished court-related mediation and number of cases where an agreement is obtained.

(2021): https://www.domstol.dk/media/0sxivq1d/retsmaegling-2021.pdf
Data above all relates to the district courts. In the Civil system can only be seen when the case is finalized. Before we could see it when the case surpassed to mediation. The abandoned cases are first measured when the cases are finished in the court system with a court decision and not when they were first abandoned. In the figure for “number of finished court-related mediations”, Danish Court Administration has ignored cases where the parties did not meet at least one time.

(2020): Data is not available.

(2019): Please note that the definitions have been changed. Mediation is now measured when the case is finalized. So the number of cases for which the parties agreed to start mediation is therefore the same as the number of cases of finished court-related mediations. It should also be noted that it is not a possibility in general to mediate a criminal case. What is included here is ONLY criminal cases dealt with in the Civil court.

(2017): The figures in the table relate only to judge mediations.
Total amount of cases that has been transferred to a mediation process in 2017 is 1130 (both judge and attorney mediations). Mediation in district courts is 1031. Mediation in appeal courts is 99. The number for the appeal courts does not state what type of case. Question 1+2+3+4+5 is therefore only completed with district courts numbers. 528 of the 1130 cases has been finalized with an agreement due to mediation. Source:
http://www.domstol.dk/om/talogfakta/statistik/Documents/Civile%20sager/2017/Civile%20sager_byretter%202017%20-%20retsmægling.pdf and statistics from the Danish Court Administration
Concerning the sub-category "criminal cases" the data refers to privately prosecuted criminal cases which are subject to the same process as civil cases (acc. the Justice Administration Act § 989). This means that mediation will be offered in this type of criminal cases as well.

(2016): At the level of district courts, 548 cases are finalized with an agreement. The total encompasses also 40 cases before the two High Courts. The source concerning "Civil and commercial cases" and "Family cases" is the Danish Court Administration. Please note that a focus area and project for the Courts of Denmark in 2015 and 2016 was ADR. Desired outcomes were to extend people's knowledge of ADR as an alternative to court rulings and orders, to lower the case processing time and to reach better solutions. The project identified 3 main action areas: more cases should be settled through judicial mediation, uniformity in the process prior to the settlement of a case through ADR and knowledge of ADR is disseminated both internally and externally in the courts. The implementation and communication during and after this project has increased public awareness and the increase in the number of mediation proceedings is a results of these efforts.

(2014): In 2014, as regards the number of administrative cases and employment dismissals cases, these are included in the category "civil cases". Judicial mediation procedures are not available in Denmark for criminal cases. Only the number of successful mediation proceedings is indicated within the table. The number of proposed mediation proceedings was the following: civil cases: 518; family cases: 294.

(2012): In 2012, in the district courts there were 962 mediation cases divided in civil cases and family cases. In addition,the two high courts had 185 mediation cases (included in the total) which are not divided per category. Only the number of successful mediation proceedings is indicated within the table. The number of proposed mediation proceedings was the following: civil cases: 600; family cases: 338.

Estonia

(General Comment): Data on the number of court-related mediations are not recorded in any information system and are therefore not available.

Finland

(General Comment): Consumer cases are not statistically specified. The number of cases in which consumers are involved, are included in the number of the civil and commercial cases.

(2021): National Courts Administration and the Le-gal Reg-is-ter Cen-tres (ORK) / Case management database of the District Courts

(2020): National Courts Administration

(2019): The National Courts Administration is currently working on improving the method of calculating the numbers related to mediation. Therefore, the numbers given this year are not strictly compatible with last years numbers. With this new calculation method the number of cases for which the parties agreed to start mediation would in 2018 have been 2255 cases. The number of finished court-related mediations includes cases in which the mediation has started before 2019 and which have been concluded 2019. The number of civil and commercial cases include all other cases than those in the section 2 and 4 in which the parties agreed to start mediation. Consumer cases are not statistically specified. The number of cases in which consumers are involved, are therefore included in the number of the civil and commercial cases. Number of cases in which there is a settlement agreement include only the cases in which full settlement has been reached. However, it is typical that there are partial settlements. So, the number of of settlements in total, including cases in which there is a partial settlement (and some minor issue t.eg legal costs has been forwarded back to civil proceedings) is 1773.

(2018): The number of finished court-related mediations includes cases in which the mediation has started before 2018 and which have been concluded 2018.

France

(General Comment): In criminal matters, mediation does not strictly speaking lead to a settlement. In fact, in the event of successful mediation, the public prosecutor's office will close the case on the grounds of successful "criminal mediation". If the mediation fails, the prosecutor's office takes over the prosecution, based on the opportunity principle, and can decide to prosecute the perpetrator in court.

(2021): It is useful to recall here that a voluntary project has been launched in the field of mediation at the initiative of the judge before the administrative courts, with each court having to reach a quantified objective of mediations proposed by the judge and accepted by the parties (but without any obligation to see these mediations lead to an agreement, which the court does not control. The objective is, over the period 2019-2022, to reach approximately 2000 mediations initiated by the judge before the administrative courts (i.e. approximately 1% of the entries of the TA and CAA).
As regards administrative justice, the data come from the Council of State.

(2020): "We have started a voluntarist project in the field of mediation at the initiative of the judge before the administrative jurisdiction, each jurisdiction having to reach a quantified objective of mediations proposed by the judge and accepted by the parties (but without obligation to see these mediations leading to an agreement, which the jurisdiction does not control. The objective is, over the period 2019-2022, to reach about 2000 mediations initiated by the judge before the administrative courts (i.e. about 1% of the entries of the TA and CAA).
Source : highest administrative Court "

(2018): Statistics 2017 for family mediation
General Secretariat of the Council of State for Administrative Affairs
For successful criminal mediation (alternative procedures to prosecution), the data in 2018 are 7656, down from 2016, which had 9894 data, without any explanation on this evolution. In labour law cases, there are 8220 resolved cases after conciliation between the parties.

(2017): General Secretariat of the Council of State

Germany

(2014): Statistics on the situation given in the Federal Republic exist only for court-internal mediations/proceedings before a conciliation judge. The latter have been performed in 2013 before the civil courts, family courts, administrative courts, labour courts, social courts, and finance courts. Judges sitting on court-internal mediation proceedings have no authority to hand down a decision. However, the statistics on the situation given in the Federal Republic do not reflect any cases in which parties are instructed to pursue out-of-court mediation.

Greece

(2021): Question 167 was answered by justStat of the Ministry of Justice.

(2020): In question 167 it is impossible to collect statistics for the following reasons. If it is a mediation of law 4640/2019, the minutes are not submitted to any public authority or file, but to the competent courts and are probably not recorded in a file. It is much more impossible to distinguish between such cases. In the case of judicial mediation under Article 214b of the Code of Civil Procedure, this information can only be gathered by the competent courts.

(2017): As mentioned in Q163-1, the substantial application of Law 4446/2016 started to take effect during 2017, therefore, there were 1782 judicial mediations in administrative cases.

Hungary

(2021): Consumer cases are included in category 1 "civil and commercial cases".

(2020): Consumer cases are included in category 1 "civil and commercial cases".

(2019): Administrative cases (nr.3.) and consumer cases (nr.6.) are included in category civil and commercial cases (nr.1.)

(2018): Consumer cases are included in the category "civil and commercial cases".
National Office for the Judiciary

(2016): National Office for the Judiciary

Ireland

(General Comment): In Ireland we don't have court ordered mediation, as per section 16 of the Mediation act 2017: Courts may invite parties to attend mediation (but it is not mandated or ordered). For this reason, and in the absence of the establishment of the mediation council, there is currently no central area for recording data on mediation. When the mediation council is established, we hope we can provide this data.

Italy

(General Comment): In Italy one party may initiate a mediation procedure and the other party may decide to take part to it or not. To clarify things, please consider that in 2021 in Italy 267.270 mediation proceedings were initiated. Both parties showed up at the first mediation meeting in 83.256 cases. Please also note that these figures refer to private mediation. For some matter subjects the mediation is mandatory and it is managed by private mediation companies. Please note that the above figures refer to mediation procedures monitored by the Ministry of Justice. In Italy, there is a plethora of different forms of ADR procedures and some are not so widespread. Court-related mediations do exist for both family cases and labour cases but such mediation proceedings are not monitored by the Ministry of Justice. In 2020 the procedures subject to mediation were extended to the disputes related to COVID.

(2020): Mediation is not provided for administrative justice (NAP). The other forms of mediation are provided by bodies external to the judiciary (e.g. Corecom) and therefore they do not fall under the control/vision of the Ministry of Justice. In 2020 the numbers are deeply affected by the Pandemic. If we look at the first half of 2021, we can already see a “recovery” in this respect.

(2019): In Italy one party may initiate a mediation procedure and the other party may decide to take part to it or not. To clarify things, please consider that in 2019 in Italy 256.311 mediation proceedings were initiated. Both parties showed up at the first mediation meeting in only 72.664 mediation proceedings. Please also note that these figures refer to private mediation. For some matter subjects the mediation is mandatory and it is managed by private mediation companies. Please note that the above figures refer to mediation procedures monitored by the Ministry of Justice. In Italy, there is a plethora of different forms of ADR procedures and some are not so widespread. Court-related mediations do exist for both family cases and labour cases but such mediation proceedings are not monitored by the Ministry of Justice.

(2018): Figures for this question cannot be compared between 2018 and previous years. The current answer reflects the way the question has been rephrased compared to 2016. In 2016 it read “Number of judicial mediation procedures” whereas in 2018 it was changed into “Number of cases for which the parties agreed to start mediation”.In Italy one party may initiate a mediation procedure and the other party may decide to take part to it or not. To clarify things, please consider that in 2018 in Italy 258.786 mediation proceedings were initiated. Both parties showed up at the first mediation meeting in only 76.569 mediation proceedings. Please also note that these figures refer to private mediation. For some matter subjects the mediation is mandatory and it is managed by private mediation companies. Please note that the above figures refer to mediation procedures monitored by the Ministry of Justice. In Italy, there is a plethora of different forms of ADR procedures and some are not so widespread. Court-related mediations do exist for both family cases and labour cases but such mediation proceedings are not monitored by the Ministry of Justice; this is why they were not considered in 2016.

(2017): Please amend the "Civil and commercial case" time series as follows:
Year 2014: 295010
Year 2015: 300455
Year 2016: 269988
Year 2017: 263263
The figures provided during the last few years did not include all mediation agencies. In particular, there was one mediation agency which was not included in our analysis because it was considered (from a statistical perspective) an outlier. After an investigation of the inspection body we recognize that there are no ground to keep this agency out of the analysis.

(2016): The Department of Statistics and Organizational Analysis (within the Ministry of Justice) periodically publish reports on mediation procedures on its website:
https://webstat.giustizia.it/_layouts/15/start.aspx#/Analisi%20e%20ricerche/forms/mediazione.aspx
The latest reports are available in English as well.
The 2016 data has been up-dated in order to reflect data from all mediation agencies in Italy (the previous data (183977) did not include one mediation agency).

(2014): The Department of Statistics and Organizational Analysis of the Ministry of Justice periodically publishes reports on mediation procedures on its
website:https://webstat.giustizia.it/_layouts/15/start.aspx#/Analisi%20e%20ricerche/forms/mediazione.aspx

(2012): The Department of Statistics and Organizational Analysis of the Ministry of Justice periodically publishes reports on mediation procedures on its
website:https://webstat.giustizia.it/_layouts/15/start.aspx#/Analisi%20e%20ricerche/forms/mediazione.aspx

Latvia

(2020): Source for question 166 – Council of Certified Mediators (https://sertificetimediatori.lv/mediatori/)

(2018): Ministry of Justice

Lithuania

(2021): family, labor and consumer cases are civil cases, so the number of cases in these respective categories is subtracted from the total number of civil cases. LITEKO

(2020): Observing the general trend of court proceedings, it can be seen that in 2020, compared to the previous year, the number of family law cases (due to divorce, child support, etc.) decreased significantly: 15,709 cases were examined (18,066 in 2019; 18,564 in 2018). It is believed that it was mandatory mediation (the requirement to initiate mediation proceedings in such cases before applying to the court for the settlement of a family dispute) that allowed to reduce the number of cases in court and court-related mediations.
The decrease in the number of completed mediation proceedings in 2020 compared to the previous year is thought to be due to an overall decrease in the number of court cases received (the number of civil cases heard in district and regional courts (I instance) decreased by 6% in 2020 compared to 2019 and was 13.646% less than in 2018). The reduction in numbers may also have been influenced by the restrictions imposed following the quarantine in the country following the COVID-19 pandemic, the lack of court hearings and judicial mediation proceedings.

(2019): As a result of mediation publicity campaigns conducted by the Ministry of Justice, the National Judicial Administration and other entities, those who go to court have more and more information about the possibility of resolving a dispute amicably through judicial mediation. Participants in the proceedings receive an explanation of the possibility to use judicial mediation together with the procedural documents. Judges also explain the essence of mediation to the parties in the cases before them and suggest the use of judicial mediation procedure (such an obligation is enshrined in law).
On 1 March 2019 the provisions of the Law on Administrative Proceedings of the Republic of Lithuania entered into force, enabling administrative disputes to be resolved with the help of judicial mediation. Judicial mediation is possible for an administrative dispute that allows the parties to enter into an amicable settlement under the law.
In order to positively assess the contribution of judges to the promotion of judicial mediation processes and the involvement of judges in judicial mediation, in 2019 the procedure for evaluating the performance of judges has been updated, which provides that during the evaluation of a judge's performance he may be awarded a certain amount of points for his activities as a mediator, the number of cases transferred to mediation by the judge is also taken into consideration.
It should be noted that family, labour cases and consumer cases, as well as civil and commercial cases, are heard by courts of general jurisdiction (in Lithuania there are no specialized courts for these cathegories of cases).

(2018): It should be noted that family, labour cases and consumer cases, as well as civil and commercial cases, are heard by courts of general jurisdiction (in Lithuania there are no specialized courts for these cathegories of cases).

(2017): The total number of judicial mediation procedures increased due to the more frequent use of this type of a procedure (in all fields - civil and commercial law, family law, labour law).
The number of judicial mediation procedures concerning civil and commercial cases increased because the judicial mediation becomes more popular.

(2016): The number of judicial mediation procedures concerning civil and commercial cases increased because the judicial mediation becomes more popular.

(2014): Judicial mediation is available in civil cases, where an agreement can be reached (family cases are treated as civil cases). As a matter of fact, 60% of the judicial mediation cases were family cases, 12% were cases on compensation of damages and loss, 10% - cases on property rights, 8% - employment cases.

(2012): There is no possibility to deliver accurate statistical data about cases in courts, in which the mediation was applied in 2012 (only 44 courts out of 67 replied). Pursuant to these data, in 17 cases the mediation procedure has been started in 2012. It should be noted that some of the courts have actively reconciled the parties in civil cases during the hearing: according to the data of the survey, there were signed 397 peace treaties in 2012 (not during the mediation procedure).

Luxembourg

(2020):
"Criminal Mediations: JUCHA, 2021
"

(2019): Criminal mediations: JUCHA, 2019

(2018): Criminal mediations: JUCHA 2008

Malta

(2021): The answers in Question 167.1 reflect Court-referred mediation and not voluntary mediation (outside a court context). Throughout 2021, 7 new cases were sent to mediation by the court, 3 of which were unsuccessful, 3 were revoked by the court and 1 was successful.

(2019): The Malta Mediation Centre received for the first time in 2019, the first case at mediation according to Art 10.2 of the Chp 579 Media and Defamation Act. This case was actually filed in court in 2018 but was then referred for mediation in 2019, and it is still ongoing.

(2017): This data has been provided by the Mediation Coordinator at the Family Court.

Netherlands

(2021): A total of 65,4% of finished mediations ended in a settlement (either completely, or partially).
For criminal cases, 83,3% of finished mediations ended in a settlement (either completely or partially).
https://jaarverslagrechtspraak.nl/wp-content/uploads/sites/3/2022/05/Jaarverslag-Rechtspraak-2021.pdf#page=56

(2020): Lower numbers in 2020 are due to the corona pandemic, as not al mediations can be done digitally, for example. Raad voor de rechtspraak en gerechten (Judicial Council and the Courts). https://jaarverslagrechtspraak.nl/wp-content/uploads/sites/2/2021/04/Jaarverslag-Rechtspraak-2020.pdf#page=45

(2019): Data are produced by Judicial Council and courts

(2018): Mediation has been promoted for many years in the Netherlands. In that sense nothing special happened in 2017/2018. In 2018 a new program started to promote mediation in criminal cases. The rise of the number of cases for which the parties agreed to start mediation may be explained by the implementation of this program . The data are produced by the Judicial council and the Courts

(2017): The indicated data refers to the number of mediation procedures started in 2017. The number of completed mediation procedures for this year is 2 316.

(2016): The Council of Judiciairy annual report 2016. The categorization in our source is different from the categorization above, so we cannot give the breakdown.
The indicated data refers to the number of mediation procedures started in 2016. The number of completed mediation procedures for this year is 2 326.

(2012): In 2012, the number of mediations decreased because in January 2011 the so called ‘mediation incentive contribution’ of € 200 stopped.

Poland

(2020): Mediation proceedings based on statistical data - regional and district courts in the years 2006-2020) – developed by the Ministry of Justice.
*In accordance with the regulation which is contained in the Ordinance of the Council of Ministers of March 31, 2020 on the establishment of restrictions, orders and prohibitions in relation with the COVID19 epidemic, in the period from March 31, 2020, the performance of tasks by common courts was limited due to remote work and quarantine of employees of court departments. Mediation can be conducted in any case in the field of labour law, in which it is possible to sign a settlement, and most labour matters belong to this category. In the period 2019-2020 (at the time when an up-ward trend was observed), they mainly concerned conflicts that could have been influenced by remote work, e.g. lack of accurate, correct communication and direct contact between employees. That is why labour courts began to direct disputes towards an ADR methods, indicating that mediation may not only faster finish a case, but also be more financially attractive, which - as the data shows - resulted in a greater interest in this method of alternative dispute resolution in employee matters, as well as parties to conclude agreements.
*In 2020 total impact of cases before common courts was lower by 21.1% compared to 2019. The reduced impact of cases was caused among others by the COVID19 epidemic and related limitations. Limitations related to the pandemic have also affected the prisons and custodies closings, where mediation takes place after the sentence, representing a large percentage of mediation in criminal cases. Courts, in order not to extend the proceedings, resigned from referring cases to mediation.

(2019): "Postępowanie mediacyjne w świetle danych statystyczych – sądy rejonowe i okręgowe w latach 2006-2019" (eng. Mediation proceedings based on statistical data - regional and district courts in the years 2006-2019) – developed by the Ministry of Justice
There are no separate statistics for cases involving consumer cases. Such cases are classified as civil cases.

(2018): There are no separate statistics for cases involving consumer cases. Such cases are classified as civil cases.

(2017): Information gathered by the Managerial Statistical Information Division in Department of the Strategy and European Funds in Ministry of Justice
https://isws.ms.gov.pl/pl/baza-statystyczna/publikacje/download,2779,7.html With regard to administrative cases: Supreme Administrative Court – Information about activities of Administrative Courts in 2017
http://www.nsa.gov.pl/download.php?plik=1551

(2016): The number of mediation procedure increased significantly caused by implemented changes in law, esspecially in Code of Civil Procedure. We can notice that percentage of mediation cases raise in relation to cases in which mediation procedure can be apply.

Portugal

(2021): Directorate General of Justice Policy (Ministry of Justice)

(2020): Directorate-General for Justice Policy - Ministry of Justice

(2019): The total number of cases doesn't include data on criminal cases. This number is protected by statistical confidentiality.
Data on criminal cases is protected by statistical confidentiality.
Data on consumer cases is included in civil and commercial cases.

(2018): As for the years 2016 and 2017, we have provided the numbers, according to the Justice Statistics – Directorate-General for Justice Policy - and these statistics do not include the number of cases for which parties agreed to start mediation, but only the number of procedures that were concluded with a mediation agreement in a given year. For 2018, we have called upon another statistic source - the annual report of the Council of the Courts of Peace – which provides indeed the number of cases for which parties agreed to start mediation in the courts of peace. Concerning "family cases", the numbers are correct, since the indicated number of finished court-related mediations also include procedures that had begun in 2017, but were concluded in 2018, whereas the number of cases for which the parties agreed to start such mediation only refers to 2018.

(2017): 167.2 -The number of family mediation has decreased in 2017. In 2016 the number had increased as a result of the entry into force of the General Regime of the Civil Juvenile Procedure (RGPTC) which established that the judge had to determine the intervention of either the family mediation system or send the parties to a technical hearing if they couldn´t reach an agreement. After the entry into force of this new legal framework, as judges became familiar with the new procedure, they are forwarding more cases to the technical hearings instead of mediation. In addition, the number of family cases brought to court has decreased, as well as the direct requests for mediation from the parties.
167.5 - In 2017, for reasons of statistical disclosure, data is protected due to the small number.

(2016): Directorate-General for Justice Policy - Ministry of Justice

Romania

(2021): Although we cannot offer a total of the cases of court-related mediation, divided into the categories above, according to the statistical system in the field (which is ongoing at this moment), we could extract a number of 476 mediation agreement authorized by the court (2021) on December 31, of which 188 in stock/ pending cases (on December 31, 2020) and 288 received/incoming cases during 2021.
Background and legislation elements (remain valid from the last cycle):
The control of the state regarding the mediation is indirect and it concerns the agreement concluded by the parties after following the mediation procedure – such an agreement constitutes an act under private signature. In order to become an authentic act, it has to be authenticated by the notary public or authorized by the court. Thus, if the conflict has already been submitted to a court, the settlement by mediation of such a case can be possible at the initiative of the involved parties or at the recommendation of the court and accepted by the parties, concerning rights the parties can dispose over in accordance with the legal provisions. Mediation can deal with the total or partial settlement of the concerned litigation. The court shall, on the request of the parties, issue a decision in accordance with the provisions of the Civil Procedure Code regarding the expedient court decision.
According with the provisions of article 59 para. 2 of the Law no. 192/2006, the parties to the mediation agreement may go to court to request, in compliance with the legal proceedings, to give a decision to legalize their understanding. Competence shall lay with the court in whose jurisdiction any of the parties have their domicile or residence or, where appropriate, the head office or the court of first instance in whose jurisdiction is located the place where it has been signed mediation agreement. The decision whereby the court consents on the understanding between parties shall be delivered in the council room and shall be an enforcement order under the law. The provisions of articles 438 - 441 of the Law no 134/2010 (New Civil Procedure Code), republished, as amended, shall apply accordingly.
Mediation in case of a dispute before the law courts, according with the provisions of article 61 para. 1 of the Law no. 192/2006. in case the conflict was brought to justice, its settlement by mediation may take place at the initiative of the parties or at the proposal of any of them or on the recommendation of the court, concerning the rights which the parties may enjoy under the law. Mediation may have as subject settlement of all or part of the dispute. The mediator may not charge fees for informing the parties. Also, according with the provisions of art. 63 para. 1 of the Law no. 192/2006, in case the matter has been settled by means of mediation, the court shall deliver, at the request of the parties and in compliance with the requirements of law, a judgment, the provisions of articles 438 - 441 of the Law No 134/2010, republished, as amended, being applied accordingly.

(2020): Although we cannot offer a total of the cases of court-related mediation, divided into the categories above, according to the statistical system in the field (which is ongoing at this moment), we could extract a number of 614 mediation agreement authorized by the court (2020).
Background and legislation elements (remain valid from the last cycle):
The control of the state regarding the mediation is indirect and it concerns the agreement concluded by the parties after following the mediation procedure – such an agreement constitutes an act under private signature. In order to become an authentic act, it has to be authenticated by the notary public or authorized by the court. Thus, if the conflict has already been submitted to a court, the settlement by mediation of such a case can be possible at the initiative of the involved parties or at the recommendation of the court and accepted by the parties, concerning rights the parties can dispose over in accordance with the legal provisions. (2016): There are no statistics on the number of mediation procedures (Council of Mediation)

Slovak Republic

(2019): Ministry of Justice of the Slovak republic

Slovenia

(General Comment): Under category “1. Civil and commercial cases”, all mediation cases at local and district courts are reported (including family cases and consumer cases).

(2021): The number of finished mediations and settlement decreased from 2019 to 2020 (by 22% and 26% respecitvely; due to the impact of Covid-19 pandemics) and increased in 2021 (by 23% and 33% respectively). The number of mediations and settlements in 2021, compared to 2019, stayed roughly the same.

(2017): Data source: The Supreme Court`s Data Warehouse.
Data source: The Supreme Court`s Data Warehouse. The figures represent resolved mediation cases (no matter what was the outcome of mediaton). The category 1. Civil cases includes family cases. The figure at the category 4. Employment dismissals cases is the number of mediations at the labour and social courts and includes employment dismissal cases.

(2016): Data source: The Supreme Court`s Data Warehouse.
The figures represent resolved mediation cases (no matter what was the outcome of mediaton). The category 1. Civil cases includes family cases. The figure at the category 4. Employment dismissals cases is the number of mediations at the labour and social courts and includes employment dismissals cases.
The difference (decrease) in number of mediation cases compared to 2014 can be partially due to decrease in number of incoming court cases (see Q91). In 2016, the mediation was offered in 7.969 civil and 1.475 labour cases.

(2014): The figures represent resolved mediation cases (no matter what was the outcome of mediation). The category 1. Civil cases includes family cases. The figure at the category 4. Employment dismissals cases is the number of mediations at the labour and social courts and includes employment dismissals cases.
In 2014, the mediation was offered in 10.854 civil and 2.003 labour cases.
Differences to 2012: in 2012, data was reported by the Ministry of Justice, since 2014 the data source is the Supreme Court`s Data Warehouse.

(2012): The 2012 data show rising trends of readiness of parties to use judicial meditation and capacities of the courts to supply it. The area of judicial mediation and alternative resolution procedures in general has been the focus of legislative changes in 2009 according to which courts of first and second instances had to adopt mediation procedures.

Spain

(2021): Judicial Statistics department (General Council for the Judiciary)

(2020): Given the severe restrictions between March and May of 2020, the pandemic is a possible explanation of the decreased number of court-related mediation proceedings in respect of all legal matters.

(2017): The figures indicate the files transferred by Courts to mediation procedures. There is not data about issues directly solved in mediation before starting the judicial proceeding.
The advancement in the implementation of mediation explains the increase in the number of “civil and commercial cases” on the one hand and “criminal cases” on the other hand. There are no specific reasons explaining the decreases in the number of mediation procedures concerning family law cases and employment dismissal cases.

(2016): A reform of the Civil Procedural Law in 2015, introduced certain obligations of the Court and of the Judge to inform the parties about the possibility to bring the case to mediation. Accordingly, the number of civil and commercial cases, as well as the number of family cases increased in a significant way between 2014 and 2016. No particular explanation can be provided in respect of the decrease in the number of judicial mediation procedures in criminal matters.

(2014): In 2014, regarding labour cases, 460 609 mediation procedures were conducted prior to the initiation of cases before the labour courts, but there is not specific data available about the employment dismissals cases.

(2012): In 2012, regarding labour matters, 12 725 cases were diverted to mediation, 3 464 granted an agreement, but there was no data available on employment dismissals cases. As for criminal matters, 1 166 cases were diverted to mediation during the instruction phase and 16 953 cases were diverted to mediation before the Criminal Court.

Explanatory note to the scheme for evaluating judicial system

Annex 4

Definitions of the Clearance Rate (CR) and the Disposition Time (DT)

The CEPEJ has chosen to develop performance indicators of courts at the European level. The GOJUST Guidelines[1] invite the member states to organise their data collection system so as to be able to provide the relevant information for calculating such indicators. The first indicator is the Clearance Rate. This allows a useful comparison even though the parameters of the cases concerned are not identical in every respect. This indicator can be used to see if the courts are keeping up with the number of incoming cases without increasing their backlog. The second indicator is the calculated Disposition Time. By making use of a specific calculation method, it is possible to generate data concerning the estimated time that is needed to bring a case to an end. This method can provide relevant information on the overall functioning of the courts of a state or entity. Gradually, the report of the CEPEJ will enable a comparative evaluation of the functioning of judicial systems in dealing with case-flows coming in and going out of the courts.

Clearance Rate (CR)

The Clearance Rate is a simple ratio, obtained by dividing the number of resolved cases by the number of incoming cases, expressed in a percentage:

$$Clearance\ Rate\ (\%) = \frac{Resolved\ cases\ in\ a\ period}{Incoming\ cases\ in\ a\ period} \times 100$$

A Clearance Rate close to 100 % indicates the ability of the court or of a judicial system to resolve approximately as many cases as the number of incoming cases within the given time period. A Clearance Rate above 100 % indicates the ability of the system to resolve more cases than those received, thus reducing the number of pending cases at the end of the measurement period, including any existing backlog. Finally, a Clearance Rate below 100 % appears when the number of incoming cases is higher than the number of resolved cases. In this case, the total number of pending cases will increase.

Essentially, the Clearance Rate shows how the court or the judicial system is coping with the in-flow of cases. It allows comparisons even when the parameters of the cases concerned in different countries are not identical in every respect.

Disposition Time (DT)

The calculated Disposition Time measures the theoretical time necessary for a pending case to be solved in court in the light of the current pace of work of the courts in that country or entity.
The Disposition Time is obtained by dividing the number of pending cases at the end of the observed period by the number of resolved cases within the same period multiplied by 365 (days in a year):

$$Calculated\ Disposition\ Time = \frac{Number\ of\ pending\ cases\ at\ the\ end\ of\ a\ period}{Number\ of\ resolved\ cases\ in\ a\ period} \times 365$$

The conversion into days simplifies the understanding of the relation between pending and resolved cases within a period. The calculated Disposition Time would show, for example, that the time necessary for solving a pending case has increased from 120 days to 150 days. This allows comparisons within the same jurisdiction over time and, with some prudence, between judicial systems in different countries or entities. It is also relevant for assessing court efficiency in this regard in the light of established standards for the length of proceedings.

It should be noted that this indicator is not a calculation of the average time needed to process a case but a theoretical estimate of the time needed to process pending cases. However, the indicator fails to show the mix, concentration, or merits of the cases. Thus, for example, if the ratio indicates that pending cases will be processed in 90 days, some cases might be solved on the 10th day and others on the 90th day. Case level data of the actual duration of cases from functional ICT systems is needed in order to review these details and make a full analysis. In the meantime, this formula may offer valuable information on the estimated maximum duration of cases that are still pending.
