

iPROCEEDS

Project on targeting crime proceeds on the Internet
in South-eastern Europe and Turkey

Case Cybercrime Simulation Exercise investigating cybercrime and online crime proceeds

Provided under iPROCEEDS project
Belgrade, Serbia | 8 – 11 April 2019

Outline

Background and Justification

Cybercrime of today is driven mostly by financial gain and thus rapid detection and action on illegal money flows on the Internet is often a necessity to identify and minimize damages from the criminal activity. Cybercriminals make use of technology for their benefit; they adopt new digital solutions such as cryptocurrencies to add an additional layer of anonymity to their illegal conduct. Online criminal markets on the Dark Web are a safe place for illegal activities that thrive and generate considerable profits for the cybercriminals. The growing threat of cybercrime is further exacerbated by difficulties of access to and securing of electronic evidence, especially if information vital for criminal investigations is in the hands of private companies and is found beyond national borders. However, even where realisation of these threats and challenges by policy makers and professional communities is as strong as ever, successful response to these is often hampered by lack of coordination and common approach of these communities to what should be the ultimate common goal – ensuring safer cyberspace for all.

In order to address the problems of coordination and cooperation in the most practical way, the Cybercrime Simulation Exercise will bring together prosecutors, cybercrime investigators, financial investigation/intelligence and digital forensics specialists and will be managed by a team of experts, as a command and control center and simulate an investigation of cybercrime, money laundering and parallel financial investigations.

Expected Outcome

Carried out under Result 3 of the iPROCEEDS project *Cybercrime Units, financial investigators, prosecutors and financial intelligence units cooperate with each other at the domestic level in the search, seizure and confiscation of online crime proceeds*, the exercise aims to enhance inter-agency cooperation and exchange of information between different professional communities, sometimes even in real time in the search, seizure and confiscation of online crime proceeds. The goal is also to strengthen international cooperation in investigation and prosecution of transnational criminal activity through the use of effective international channels and avenues, and to encourage the use of common approaches and methods on the basis of internationally accepted standards, such as the [Council of Europe Convention on Cybercrime](#) and the [Council of Europe Convention on Laundering, Search, Seizure and Confiscation of the Proceeds from Crime and on the Financing of Terrorism](#).

Funded
by the European Union
and the Council of Europe

COUNCIL OF EUROPE

CONSEIL DE L'EUROPE

Implemented
by the Council of Europe

More specifically, the exercise will involve the following major themes:

- Receiving and handling complaints of cybercrime;
- Receiving and dealing with suspicious transaction reports;
- Establishing multiagency cooperation and creation of inter-agency teams;
- Investigating and gathering evidence of crimes involving virtual currencies;
- Investigating and prosecuting transnational criminal activity;
- Collection and handling of electronic evidence at national and international levels;
- Considerations for and planning of Joint Investigation Teams (JITs) between different countries;
- Making use of various avenues/channels offered by international cooperation mechanisms (including Budapest and Warsaw Conventions);
- Search, seizure and confiscation of proceeds of cybercrime; and
- Cybercrime prevention, disruption and offender management.

By the end of the exercise, participants will be able to establish closer links between professional communities of prosecutors, cybercrime investigators and financial intelligence/investigation officers in a real-time environment at both national and international levels in investigation of cybercrime and its financial gains.

Participants

The event will be attended by the following participants:

- International experts on cybercrime and electronic evidence;
- Cybercrime investigators;
- Cybercrime prosecutors;
- Digital forensics specialists;
- Financial investigators; and
- Financial intelligence specialists.

Administrative arrangements and location

Metropol Palace Hotel, Nikola Tesla A Meeting Room, Belgrade, Serbia

Programme

Monday, 8 April 2019

09h00	<i>Registration</i>
