

**Resolution CM/ResDip(2008)1
on the revised regulations for the European Diploma for Protected Areas**

*(Adopted by the Committee of Ministers on 20 February 2008
at the 1018th meeting of the Ministers' Deputies)¹*

Appendix 5: Model plan for annual reports

Annual report for the year 2022.

Annual reports should describe the changes that have taken place since the previous year in dynamic terms of management and function and not be limited to basic data. Any new text or map introducing a change in the situation of the area should be attached to the annual report.

State: Germany

Name of the area: Berchtesgaden National Park

Year and number of years since the award or renewal of the European Diploma for Protected Areas:
2

Central authority concerned:

Name: Bavarian Ministry for Environment and Consumer protection

Address: Rosenkavalierplatz 2, D-81925 Munich, Germany

Tel: +4989 9214 00

Fax: +4989 9214 2266

e-mail: Poststelle@stmuv.bayern.de

www: www.stmuv.bayern.de

Authority responsible for its management:

Name: Nationalparkverwaltung Berchtesgaden

Address: Doktorberg 6, 83471 Berchtesgaden

Tel: +49 8652 9686-0

Fax: +49 8652 9686-40

e-mail: poststelle@npv-bgd.bayern.de

www: www.nationalpark-berchtesgaden.de

¹ As amended by Resolution CM/ResDip(2014)2 on 2 July 2014 at the 1204th meeting of the Ministers' Deputies.
Internet : <http://www.coe.int/cm>

1. **Conditions:** List here all conditions which were attached to the award or the renewal of the European Diploma. Explain either how the conditions have been totally complied with or detail the progress in complying with the conditions. Please also indicate any unresolved difficulties that you have encountered.

1. accelerate the finalisation of the management plan currently in preparation and attach a scientific research programme to it. The Council of Europe shall be informed upon completion and approval of the document, which should be effective no later than eighteen months after the renewal of the diploma;

The draft of the new National Park Plan was submitted to the Municipal Committee for comment in March of this year. In a meeting of the municipal committee, the changes were discussed and incorporated into the draft plan.

This draft plan was then submitted to the members of the National Park Advisory Council for their comments. These requests for changes were also incorporated into the draft plan.

The draft plan is currently with the Bavarian Ministry for the Environment and Consumer Protection for promulgation.

2. **Recommendations:** List here all recommendations which were attached to the award or the renewal of the European Diploma. Explain either how the recommendations have been totally complied with or detail the progress in complying with the recommendations. Please also indicate any unresolved difficulties that you have encountered.

1. include in the management plan currently in preparation specific provisions dedicated to climate change and how to address this issue in relation to the long-term conservation of threatened or rare species;

In the National Park Plan, climate change is recognised as one of the most important drivers of change with high importance for nature conservation and management.

To collect data on how climate is changing and how this affects ecosystems, the Research Department of the national park is operating a network of weather stations and has initiated a biodiversity monitoring. Moreover, a research project has been started which study effects of climate on biodiversity via a space-for-time approach. On 213 research sites biodiversity was assessed across all trophic levels and 54 of those sites are part of a long-term biodiversity monitoring in close cooperation with Bavarian Forest National Park.

A new research project investigating the effect of disturbances, herbivory and changing snow cover on forest regeneration has been started and will create valuable insights on future forest dynamics and inform forest restoration in the management zone of the park.

Climate change is challenging traditional mountain farming and thus, the research project evaluating whether changes in pasture management affect biodiversity has been continued. Results from these research projects will be implemented in conservation and management strategies of the national park.

2. abstain from any extension of forest and mountain roads and consider dismantling some of these roads, and abstain from installing additional infrastructure in the park, including wastewater pipes. If no alternative solution exists, infrastructure should be developed on the existing forest roads;

No change

3. continue negotiating with landowners and tenants for the replacement of forest grazing by light grazing;

No change

4. search, together with the competent authorities, for alternative locations for the police training centre, and at least abstain from further expansions of it, and continue negotiations with the army to reduce the impact of the army training ground to a minimum;

No change

5. conduct a scientific study on the red deer population and game regulation, including the plausibility of winter enclosures to gain enough data for future management;

The Research project on the interactions of roe deer, chamois and red deer with their environment has been continued. To study the spatio-temporal habitat use and activity patterns of red deer thirty female red deer have been equipped with radio collars. A similar effort is ongoing with regard to chamois.

6. conduct a study on invasive alien species and develop a strategy on how to react to the arrival of these species;

No change

7. ensure that the park administration keeps remains responsible for hunting at regional level;

No change

8. secure an adequate budget and staffing for the park administration to enable effective and efficient management;

Funding belongs to the Bavarian State Ministry of the Environment and Consumer Protection. The budget of the national park is adequate and secure. In addition, specific projects are financed. The headcount has remained constant since 2021. There are still many temporary jobs that are to be converted into permanent positions in the coming years. The management of the park is effective and efficient.

9. limit the spotlights of the Jenner cable car to reduce light pollution and consider the construction of a path that is accessible for people with disabilities and a viewpoint next to the mountain station of the Jenner cable car;

No change

10. pursue consequently the conversion of spruce forests into mixed forests, using natural processes and disturbances, for example bark beetle and wind fall areas as foreseen in the new conceptual framework, without enlargement of the bark beetle control zone;

No change

11. make more extensive use of the European Diploma logo in all information material and brochures, and explain the relevance of the diploma wherever appropriate, first of all in the visitors' centre and on the website.

Berchtesgaden National Park has launched its new, official website in 1st quarter of 2022 (www.nationalpark-berchtesgaden.bayern.de). On the new website the European Diploma has an own sub site (navigation: Natur -> Auszeichnungen -> Europadiplom) with detailed description, logo and link to the official diploma-website.

Berchtesgaden National Park also communicates the European Diploma on appropriate printed material. The original, framed certificate is presented in the entrance hall of the National Park Administration building in Berchtesgaden.

3. **Site Management:** List here any changes to the European Diploma holding site management, in relation to both terrestrial and aquatic environments (as appropriate), and in relation to staff and finances, since the last annual report was submitted to the Council of Europe. Please also indicate any unresolved difficulties that you have encountered.

The number of full staff positions has remained the same.

No change in site management

4. **Boundaries:** Give details of any changes to the boundaries of the European Diploma holding site since the last annual report was submitted to the Council of Europe. If there are any changes, please attach an appropriate map to this report. Please also indicate any unresolved difficulties that you have encountered.

No change

5. **Other information:** List here any other information about the European Diploma holding site which you consider should be provided to the Council of Europe.

The following sections of the form should only be filled in if your area is in the year before a renewal of its European Diploma for Protected Areas, i.e. year 4 after the award of the European Diploma or year 9 after its renewal.

6. Natural heritage (general abiotic description: geomorphology, geology and hydrogeology, habitats, flora, fauna, landscape) – State of conservation

- 6.1. Environment: changes or deterioration in the environment, of natural or anthropic origin, accidental or permanent, actual or anticipated
- 6.2. Flora and vegetation: changes in the plant population and in the vegetational cover; presumed causes
- 6.3. Fauna: changes in the sedentary or migratory populations; congregating, egg-laying and breeding grounds

7. Cultural heritage and socio-economic context

- 7.1. Cultural heritage
 - 7.1.1. Changes concerning cultural heritage
- 7.2. Socio-economic context
 - 7.2.1. Changes concerning the socio-economic context

8. Education and scientific interest

- 8.1. Visitors – Information policy
 - 8.1.1. Arrangements for receiving and informing the public (building, booklets, maps, cards, etc.)
 - 8.1.2. Frequentation by visitors and behavior (number, distribution in time and space)
 - 8.1.3. Special visits (distinguished persons, groups, etc.)
- 8.2. Scientific research
 - 8.2.1. Current or completed research (observation, experimentation, etc.; identification or inventory of the species listed in the appendices to the Bern Convention, etc.)
 - 8.2.2. Scientific publications

9. Site description (vulnerability, protection status, ownership, documentation)

- 9.1. Changes in legislation or regulations
- 9.2. Changes in ownership title (conversion to public property, rentals, etc.)
- 9.3. Extension or transfer, new uses (for example, conversion into total reserve)

10. Site management (management plans, budget and personnel)

- 10.1. Improvements made
 - 10.1.1. Ecological action affecting the flora and biotopes; controls of fauna
 - 10.1.2. Protection against the elements (fire, water regime)
 - 10.1.3. Approaches and thoroughfares (paths, roads, car parks, signposting, fencing, etc.)
 - 10.1.4. Field equipment (hides and study facilities)
 - 10.1.5. Waste management
 - 10.1.6. Use of renewable energy systems
- 10.2. Management
 - 10.2.1. Administrative department: changes made
 - 10.2.2. Wardens' department: changes made
 - 10.2.3. Internal policing measures
 - 10.2.4. Infringement of regulations and damage; legal action

11. Influence of the award of the European Diploma for Protected Areas
