

**Resolution CM/ResDip(2008)1  
on the revised regulations for the European Diploma for Protected Areas**

*(Adopted by the Committee of Ministers on 20 February 2008  
at the 1018th meeting of the Ministers' Deputies)<sup>1</sup>*

**Annual report for the year 2025**

Annual reports should describe the changes that have taken place since the previous year in dynamic terms of management and function and not be limited to basic data. Any new text or map introducing a change in the situation of the area should be attached to the annual report.

State: Czech Republic

Name of the area: **Bílé Karpaty/White Carpathians Mts. Protected Landscape Area (PLA)**

Year and number of years since the award or renewal of the European Diploma for Protected Areas:  
award 2000 (25 years), renewal 2020 (5 years)

**Central authority concerned:**

Name: Agentura ochrany přírody a krajiny České republiky/Nature Conservation Agency of the Czech Republic (NCA CR)

Address: Kaplanova 1931/1, CZ-148 00 Praha 11-Chodov

Tel: +420 951 421 242

Fax: +420 951 421 241

e-mail: [aopk@nature.cz](mailto:aopk@nature.cz), [aopk@aopk.gov.cz](mailto:aopk@aopk.gov.cz)

www: [www.nature.cz](http://www.nature.cz), [www.aopk.gov.cz](http://www.aopk.gov.cz)

**Authority responsible for its management:**

Name: Bílé Karpaty/White Carpathians Mts. Protected Landscape Area Administration

Address: Nadrazni 318, CZ-763 26 Luhacovice

Tel: +420 577 119 626

Fax: +420 951 421 241

e-mail: [bilekarp@nature.cz](mailto:bilekarp@nature.cz), [bilekarp@aopk.gov.cz](mailto:bilekarp@aopk.gov.cz)

www: [bilekarpaty.aopk.gov.cz](http://bilekarpaty.aopk.gov.cz)

---

<sup>1</sup> As amended by Resolution CM/ResDip(2014)2 on 2 July 2014 at the 1204th meeting of the Ministers' Deputies.  
Internet : <http://www.coe.int/cm>

1. **Conditions:** List here all conditions which were attached to the award or the renewal of the European Diploma. Explain either how the conditions have been totally complied with or detail the progress in complying with the conditions. Please also indicate any unresolved difficulties that you have encountered.

2. **Recommendations:** List here all recommendations which were attached to the award or the renewal of the European Diploma. Explain either how the recommendations have been totally complied with or detail the progress in complying with the recommendations. Please also indicate any unresolved difficulties that you have encountered.

1. ensure that the necessary budget and resources are available for the manifold functions and operational tasks of the Bílé Karpaty Protected Landscape Area's staff, including administration, research, surveillance and habitat management;

2. take strong measures to control non-native species in the national nature reserves and the other strictly protected areas. Continue the necessary negotiations with relevant stakeholders aiming at controlling non-native big game populations in the protected landscape area; ensure that the monitoring of the population of fallow deer in the Radejov hunting reserve is continued and regularly validated by Bílé Karpaty Protected Landscape Area staff;

3. continue to implement nature-based solutions and management in the face of climate change, ensuring the continuation of the current forestry policy of conversion to hardwood stands and encourage the natural regeneration of native hardwood forests;

4. evaluate the need, and take the necessary actions, for having a stronger presence of the Bílé Karpaty Protected Landscape Area during the preparation or review of the urban plans of the major urban areas within or bordering the protected landscape area. Additionally, identify any areas where urban development may become a risk in the near future and evaluate the necessity of drafting an urban plan for these areas (if one does not exist);

5. include the European Diploma logo and information about the European Diploma in all promotion materials produced in the future as well as in any new signposts installed in the Bílé Karpaty Protected Landscape Area. The website of the protected landscape area should also include the logo of the European Diploma with a link to the website of the Council of Europe.

**1. Despite the serious cuts in the Ministry of the Environment of the Czech Republic's budget in 2025, the finances available for the Bílé Karpaty/White Carpathians Mts. Protected Landscape Area (PLA) Administration has been quite stable. In 2025, operational budget reached CZK 1,100,000.00 (EUR 45,300.00), additional CZK 13,800,000.00 (EUR 568,000.00) were spent in the field for nature conservation and landscape management measures.**

**There currently are 30 staff members within the PLA Administration located at three workplaces (Luhačovice, Zlín and Veselí nad Moravou): at Brumov-Bylnice, the PLA Administration runs a special contact point open during office hours serving both for local people and visitors. Similarly to previous years, also in 2025, the Administration consists of the four departments: (i) Department of Operations; (ii) Department of Nature Conservation and Landscape Protection; (iii) Department of Nature and Landscape Management; and (iv) Department of Biodiversity Monitoring.**

**2. The Radejov hunting preserve/game park (1,600 hectares) owned by a private person is the largest private hunting preserve/game park in South Moravia and one of the largest ones across the country. The browsing and overgrazing impact of big game, particularly by the overpopulated non-native fallow deer (*Dama dama*) as well as the red deer (*Cervus elaphus*) on vegetation, especially on forest natural regeneration has been significant there.**

In 2023 the regular monitoring carried out both in forest stands and on meadows/grasslands again revealed serious damage to vegetation including successional forest growths there. Therefore, in 2024 the PLA Administration consequently commenced administrative offence procedures against the owner for breaking Act No. 114/1992 Gazette on Nature Conservation and Landscape Protection, as amended later, namely the prohibition to keep game in the Kútky Natural Reserve. The private owner should pay the fine of CZK 1,600,000.00 (EUR 66,000.00), *i.e.* twice more than the previous one. In 2025, the decision has not been final and lawful yet because the accused appealed against it. At the same time, the issue of reducing big game numbers has been debated with the private owner.

3. Also in 2025, special attention to reducing the proportion of the Norway spruce (*Picea abies*) and to increase the share of broad-leaved deciduous trees as nature-based solution related to climate change mitigation and adaptation, has been paid by the Bílé Karpaty/White Carpathians Mts. PLA Administration. The efforts are financed both from the State Budget and the EU funds following the PLA Management Plan for 2022 – 2032 approved in June 2022, taking into account also the recommendations for the European Diploma holder as well as the scenario analysis of changes in vegetation zones in the Czech Republic caused by climate change developed by the Faculty of Forestry and Wood Technology, Mendel University in Brno.
4. In 2025, the PLA Administration issued 28 legal positions and submissions on land-use/territorial plan documentation, mainly those developed by municipalities within the Bílé Karpaty/White Carpathians Mts. PLA. In addition, five Comprehensive Land Replotting Schemes also designed by municipalities were also approved by the PLA Administration. In accordance with public interest, land replotting arranges lands both in spatial and functional manner, combines or splits them, ensures access to them and their use and modifies their boundaries in order to facilitate conditions for their rational management by land owners.
5. The fact that the PLA has been a holder of a prestige pan-European award is regularly mentioned in publications issued by the PLA Administration. The NCA CR's web pages as well as those of the PLA itself provide the basic information on the European Diploma in Czech (<https://nature.cz/clenstvi-v-mezinarodnich-organizacich>, <https://www.dumprirody.cz/en/information-centre-of-the-bile-karpaty-pla/en/chko-bile-karpaty/>, <https://www.youtube.com/watch?v=3fBAAtA0jf1E>), NCA CR's English pages have been under construction. The information on the European Diploma has been also available in English at <https://peakvisor.com/park/biele-karpaty-protected-landscape-area.html#geography>. Some municipalities within the PLA (<https://www.obecbrezova.cz/obec/informace-o-obci/chko-bile-karpaty/chko-bile-karpaty-340cs.html>., <http://www.mesto-slavicin.cz/redakce/tisk.php?lanG=cs&slozka=23709&xsekce=23710&clanek=24430&>) as well as Lesy ČR/Forest of the Czech Republic, State Enterprise (<https://lesycr.cz/pece-o-les/ochrana-prirody-u-lcr/>) also highlight the fact that the PLA is the European Diploma holder.

**3. Site Management:** List here any changes to the European Diploma holding site management, in relation to both terrestrial and aquatic environments (as appropriate), and in relation to staff and finances, since the last annual report was submitted to the Council of Europe. Please also indicate any unresolved difficulties that you have encountered.

none

**4. Boundaries:** Give details of any changes to the boundaries of the European Diploma holding site since the last annual report was submitted to the Council of Europe. If there are any changes, please attach an appropriate map to this report. Please also indicate any unresolved difficulties that you have encountered.

**In 2025, the PLA Administration has continued the procedure to review the current PLA boundaries to include also some valuable habitats in the PLA's vicinity, to enhance the PLA's zonation and to more effectively protect and conserve the PLA's most valuable parts.**

**5. Other information:** List here any other information about the European Diploma holding site which you consider should be provided to the Council of Europe.

- **The famous elk (*Alces alces*) male called Emil traveling through some parts of the Czech Republic and Austria in 2025 visited also the Bílé Karpaty/White Carpathians Mts. foothills. Therefore, the PLA Administration issued recommendations what to do when meeting the animal asking particularly for not disturbing the popular big mammal.**
- **In the Czech Republic the critically endangered turquoise blue (*Polyommatus dorylas*) had been quite common across the whole country. Nowadays, it occurs only in the Pálava/Pavlov Hills and in the Bílé Karpaty/White Carpathians Mts.: its distribution in the latter area was been mapped in 2018-2022. A few populations of the remarkable insect were found at some sites there. The main driver of the butterfly's decline both in numbers and distribution range has been abandonment of traditional extensive farming practices (e.g. mosaic mowing, grazing). Therefore, the Regional Action Plan/Recovery Programmes for the species was approved by the Nature Conservation Agency of the Czech Republic in 2025, paying special attention to protection, conservation and management of its preferred habitats which should be interconnected to overcome landscape fragmentation there.**

The following sections of the form should only be filled in if your area is in the year before a renewal of its European Diploma for Protected Areas, i.e. year 4 after the award of the European Diploma or year 9 after its renewal.

**6. Natural heritage (general abiotic description: geomorphology, geology and hydrogeology, habitats, flora, fauna, landscape) – State of conservation**

- 6.1. Environment: changes or deterioration in the environment, of natural or anthropic origin, accidental or permanent, actual or anticipated
- 6.2. Flora and vegetation: changes in the plant population and in the vegetational cover; presumed causes
- 6.3. Fauna: changes in the sedentary or migratory populations; congregating, egg-laying and breeding grounds

**7. Cultural heritage and socio-economic context**

- 7.1. Cultural heritage
  - 7.1.1. Changes concerning cultural heritage
- 7.2. Socio-economic context
  - 7.2.1. Changes concerning the socio-economic context

**8. Education and scientific interest**

- 8.1. Visitors – Information policy
  - 8.1.1. Arrangements for receiving and informing the public (building, booklets, maps, cards, etc.)
  - 8.1.2. Frequentation by visitors and behavior (number, distribution in time and space)
  - 8.1.3. Special visits (distinguished persons, groups, etc.)
- 8.2. Scientific research
  - 8.2.1. Current or completed research (observation, experimentation, etc.; identification or inventory of the species listed in the appendices to the Bern Convention, etc.)
  - 8.2.2. Scientific publications

**9. Site description (vulnerability, protection status, ownership, documentation)**

- 9.1. Changes in legislation or regulations
- 9.2. Changes in ownership title (conversion to public property, rentals, etc.)
- 9.3. Extension or transfer, new uses (for example, conversion into total reserve)

**10. Site management (management plans, budget and personnel)**

- 10.1. Improvements made
  - 10.1.1. Ecological action affecting the flora and biotopes; controls of fauna
  - 10.1.2. Protection against the elements (fire, water regime)
  - 10.1.3. Approaches and thoroughfares (paths, roads, car parks, signposting, fencing, etc.)
  - 10.1.4. Field equipment (hides and study facilities)
  - 10.1.5. Waste management
  - 10.1.6. Use of renewable energy systems
- 10.2. Management
  - 10.2.1. Administrative department: changes made
  - 10.2.2. Wardens' department: changes made
  - 10.2.3. Internal policing measures
  - 10.2.4. Infringement of regulations and damage; legal action

**11. Influence of the award of the European Diploma for Protected Areas**
