

**Resolution CM/ResDip(2008)1  
on the revised regulations for the European Diploma for Protected Areas**

*(Adopted by the Committee of Ministers on 20 February 2008  
at the 1018th meeting of the Ministers' Deputies)<sup>1</sup>*

**Appendix 5: Model plan for annual reports**

**Annual report for the year 2021**

State: Czech Republic

Name of the area: Karlštejn National Nature Reserve

Year and number of years since the award or renewal of the European Diploma for Protected Areas:  
9 years since renewal (2010)

**Central authority concerned:**

Name: Ms. Lucie Hofmanová

Address: Ministry of Environment, Vršovická 65, CZ-100 10 Praha 10, Czech Republic

Tel: +420 267122028

Fax: +420 267122871

e-mail: [lucie.hofmanova@mzp.cz](mailto:lucie.hofmanova@mzp.cz)

www: <http://www.mzp.cz/en/>

**Authority responsible for its management:**

Name: Mr. Tomáš Tichý

Address: Nature Conservation Agency, Regional Office for Central Bohemia, Administration of  
Bohemian Karst Protected Landscape Area, CZ-267 18 Karlštejn 85

Tel: +420 95 142 4548 or +420 725337034 (cell phone)

Fax: not available

e-mail: [tomas.tichy@nature.cz](mailto:tomas.tichy@nature.cz)

<sup>1</sup> As amended by Resolution CM/ResDip(2014)2 on 2 July 2014 at the 1204th meeting of the Ministers' Deputies.  
Internet : <http://www.coe.int/cm>

**1. Conditions:** List here all conditions which were attached to the award or the renewal of the European Diploma. Explain either how the conditions have been totally complied with or detail the progress in complying with the conditions. Please also indicate any unresolved difficulties that you have encountered.

No conditions were attached to the renewal of the European Diploma.

**2. Recommendations:** List here all recommendations which were attached to the award or the renewal of the European Diploma. Explain either how the recommendations have been totally complied with or detail the progress in complying with the recommendations. Please also indicate any unresolved difficulties that you have encountered.

1. continue the restoration of non-forested areas of forest steppes and xerophilous calcareous grasslands through appropriate management; make funding available to conclude contractual agreements with the goatherds and/or shepherds in order to guarantee grazing, and thereby maintenance, in the long term;

Goat and sheep grazing management, shrub and tree removal on dry calcareous grasslands and forest steppe localities continued on similar area compared to previous years (conservation grazing on 44 hectares, shrub removal on 3 hectares). In addition, grazing of 8 hectares is funded from agri-environmental schemes. Constant obstacle for long term contracts is that financial funding is always announced only for the current year.

2. Continue the restoration of the broad-leaved forests by gradually eliminating conifer plantations; in the interests of allowing natural regeneration, avoid reintroducing non-native game species such as mouflon or fallow deer;

Dry period since 2015 followed by bark beetle outbreak almost completely killed mature Norway spruce trees in the reserve; the situation is similar with European larch. Their stands have been afforested with broad-leaved species (beech, oak, and lime). No non-native game species has been introduced.

3. Make it compulsory to draw up land-use plans (spatial development) and explore the possibility of reinforcing the special legal competences of the reserve's staff and other authorities responsible for nature conservation; also stimulate the establishment of regular consultation procedures with relevant local and regional authorities, scientists and NGOs;

All local communities have drawn up land-use plans. The cooperation with big stakeholders and scientific institutions has continued, mainly on enlarging and monitoring of conservation management, such as experimental coppicing. The main partner institutions are Lesy ČR („Forests of the Czech Republic“), Charles University in Prague, Czech University of Life Sciences in Prague and University of Hradec Králové in East Bohemia.

4. Improve signposting, notably by translating the texts into English, and possibly into German, and by displaying the European Diploma logo on the signs;

No changes took place.

5. Stimulate the development of high quality visitors' centres and organise environmental education for the wider public; encourage local authorities to disseminate information on the merits of the nature reserve and its position in Europe in appropriate places (such as railway stations, camping sites, municipal halls, museums, etc.);

The construction of visitor centre started in 2020 and has continued during 2021. During the year 2021, educational excursions for the public were limited due the Covid-19 pandemic situation.

6. Ensure that the necessary budget and resources are available for the manifold functions and operational tasks of the reserve's staff, including administration, research, surveillance, education and training, as well as habitat management.

In 2021, the budget of the Administration, including the budget for active management of target species and habitats, was provided in a regular extent in accordance to needs and capabilities of the office.

**3. Site Management:** List here any changes to the European Diploma holding site management, in relation to both terrestrial and aquatic environments (as appropriate), and in relation to staff and finances, since

the last annual report was submitted to the Council of Europe. Please also indicate any unresolved difficulties that you have encountered.

Site management has not changed.

**4. Boundaries:** Give details of any changes to the boundaries of the European Diploma holding site since the last annual report was submitted to the Council of Europe. If there are any changes, please attach an appropriate map to this report. Please also indicate any unresolved difficulties that you have encountered.

No changes took place.
