- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft

- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Cobitis larvata (Sabanejewia larvata)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

1. Snares

2. Live animals used as decoys which are blind or mutilated

3. Tape recorders

- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## Zingel streber

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### Additional details

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives

- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **FISHES > SCORPAENIFORMES**

### **Cottidae**

#### **Cottus poecilopus**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Amphibians not included in Annex II (*Triturus helveticus*)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives

- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Amphibians not included in Annex II (*Rana pyrenaica*)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Amphibians not included in Annex II (Pelophylax saharicus)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

### Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>  
The authority empowered to declare that the conditions have been fulfilled

>  
The controls involved  
>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species  
>

Justification for derogation for a species in an unfavourable conservation status  
>

Alternative solutions considered and scientific data to compare them  
>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)  
>

Comments/notes  
>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify  
>

## **REPTILES > CHELONIA (TESTUDINES)**

### **Geoemydidae**

#### **All species of Reptiles not included in Annex II (Mauremys rivulata)**

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Reptiles not included in Annex II (*Gallotia atlantica*)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>  
The authority empowered to declare that the conditions have been fulfilled

>  
The controls involved  
>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species  
>

Justification for derogation for a species in an unfavourable conservation status  
>

Alternative solutions considered and scientific data to compare them  
>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)  
>

Comments/notes  
>

Where appropriate: indiscriminate means of capture and killing

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Reptiles not included in Annex II (*Lacerta strigata*)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

### **All species of Reptiles not included in Annex II (Psammodromus jeanneae)**

## Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

1. Snares

2. Live animals used as decoys which are blind or mutilated

3. Tape recorders

4. Electrical devices capable of killing and stunning

5. Artificial light sources

- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Reptiles not included in Annex II (*Psammodromus manuelae*)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Reptiles not included in Annex II (*Eumeces schneideri*)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Reptiles not included in Annex II (*Phrynocephalus mystaceus*)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

Please select only one option

The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

Please select only one option

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Reptiles not included in Annex II (*Hierophis cypriensis*)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Reptiles not included in Annex II (*Vipera aspis*)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
>

The authority empowered to declare that the conditions have been fulfilled  
>

The controls involved  
>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species  
>

Justification for derogation for a species in an unfavourable conservation status  
>

Alternative solutions considered and scientific data to compare them  
>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)  
>

Comments/notes  
>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Birds not included in Appendix II (*Puffinus gravis*)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

- The species occurs in the country

No. of individuals involved (when practical)

> 7

Exception made

> Exception was made in 2011 to hunt 7 individual as a part of a research project on distribution of blood flukes in anseriformes in Iceland in the interest of public health.

## Reasons for issuing of licences (art. 9, i. to v.)

Please select only one option

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

## Please specify

> Blood flukes have been a health problem for people as parasites in some natural bathing areas in Iceland.

## How have the activities allowed been controlled and by whom?

>

## How is the selectivity granted

>

## Impact on the population

> The hunting of 7 individuals is not believed to have any impact on the population.

## Conditions of risk and the circumstances and the time and place under which exceptions where granted

> No special risks where detected in connection with this exception.

## The authority empowered to declare that the conditions have been fulfilled

> Ministry for the Environment and Natural Resources.

## The controls involved

> The hunting was carried out in cooperation with the Icelandic Institute of Natural History

## Additional details

Where appropriate, please add a text providing information on:

### Information on the conservation status of the derogated species

> Anser albifrons is protected in Iceland according to law no 64/1994 on protection, conservation and hunting of wild birds and mammals.

### Justification for derogation for a species in an unfavourable conservation status

> Not relevant

### Alternative solutions considered and scientific data to compare them

> No relevant

### Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

> Not relevant

## Comments/notes

> Indiscriminate means of capture and killing not used.  
(this is not an options in the last mandatory question ?)

## Where appropriate: indiscriminate means of capture and killing

Please select only one option

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets

Alternative solutions considered and scientific data to compare them

> Not relevant

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

> Not relevant

Comments/notes

> Indiscriminate means of capture and killing not used.  
(this is not an options in the last mandatory question ?)

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Birds not included in Appendix II (*Anas penelope*)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives

- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Birds not included in Appendix II (Somateria mollissima)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

> 15

Exception made

> Exception was made in 2013 to hunt 15 individual as a part of a research project on vitamin B deficiency in birds in the Nordic countries.

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

> The hunting of 15 individuals of eider is not believed to have any impact on the population in the light of how big it is, estimated 300.000 breeding pairs, in Iceland.

Conditions of risk and the circumstances and the time and place under which exceptions were granted

> No special risks were detected in connection with this exception.

The authority empowered to declare that the conditions have been fulfilled

> Ministry for the Environment and Natural Resources.

The controls involved

> The hunting was carried out in cooperation with the Icelandic Institute of Natural History

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

> The species is protected in Iceland according to law no 64/1994 on protection, conservation and hunting of wild birds and mammals. Eiderdown is important extra resource for many farmers.

Justification for derogation for a species in an unfavourable conservation status

> Not relevant

Alternative solutions considered and scientific data to compare them

> Not relevant

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

> Not relevant

Comments/notes

> Indiscriminate means of capture and killing not used.  
(this is not an options in the last mandatory question ?)

Where appropriate: indiscriminate means of capture and killing

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Birds not included in Appendix II (Tetraogallus caspius)**

## Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Birds not included in Appendix II (*Limosa lapponica*)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Birds not included in Appendix II (*Larus michahellis*)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

#### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Birds not included in Appendix II (Columba livia)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

## **Turdidae**

### **All species of Birds not included in Appendix II (*Saxicola rubicola*)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora / fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

#### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Birds not included in Appendix II (*Oenanthe deserti*)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives

- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Pycnonotidae**

### **All species of Birds not included in Appendix II (*Pycnonotus xanthopygos*)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

#### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps

- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Birds not included in Appendix II (*Emberiza hortulana*)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Soricidae (Crocidura leucodon)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

### **All species of Soricidae (Sorex caecutiens)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **MAMMALS > RODENTIA**

### **Myoxidae (Gliridae)**

#### **All species of Gliridae (Dryomys nitedula)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

Please select only one option

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

Please select only one option

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks

- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify  
>

### **Mustela erminea**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)  
>

Exception made  
>

Reasons for issuing of licences (art. 9, i. to v.)

Please select only one option

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

Please select only one option

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Cervidae (Capreolus capreolus)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Cetacea not mentioned in Appendix II (*Peponocephala electra*)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

### Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **MOLLUSCA > GASTROPODA**

**(empty)**

**Helix pomatia**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)
