

# Biennial Report

Article 9 to the Bern Convention permits exceptions from the obligations accepted by Contracting Parties in pursuance of Articles 4 to 8. The possibility of derogating from the mentioned articles of the Convention is subject to two very clearly defined general conditions, and some non cumulative specific reasons, listed exhaustively in Article 9.

The two general conditions that must be met are:

- a. that there is no other satisfactory solution; and
- b. that the exception will not be detrimental to the survival of the population concerned.

These two conditions are mandatory and cumulative.

The specific reasons for which the exceptions may be granted are the following:

- i. for the protection of flora and fauna;
- ii. to prevent serious damage to crops, livestock, forests, fisheries, water and other forms of property;
- iii. in the interests of public health and safety, air safety or other overriding public interests (please, specify);
- iv. for the purposes of research and education, of repopulation, of reintroduction and for the necessary breeding;
- v. to permit, under strictly supervised conditions, on a selective basis and to a limited extent, the taking, keeping or other judicious exploitation of certain wild animals and plants in small numbers
- vi. falconry (falconry is dealt with separately)

These specific reasons are mandatory and non cumulative.

According to Article 9§2, Contracting Parties shall report every two years to the Standing Committee on the exceptions made. The reports must specify:

- a. the populations which are or have been subject to the exceptions and, when practical, the number of specimens involved;
- b. the means authorised for the killing or capture;
- c. the conditions of risk and the circumstances of time and place under which such exceptions were granted;
- d. the authority empowered to declare that these conditions have been fulfilled, and to take decisions in respect of the means that may be used, their limits and the persons instructed to carry them out;
- e. the controls involved.

## Respondent details

Country  
> Iceland

Entity  
> Icelandic Institute of Natural History

# EXCEPTIONS CONCERNING STRICTLY PROTECTED FLORA SPECIES (ART. 5 - APPENDIX I)

## ANGIOSPERMAE

### ALISMATACEAE

#### **Alisma wahlenbergii**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No of specimens involved (when practical)

>

No of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

#### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

## **Caldesia parnassifolia**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No of specimens involved (when practical)

>

No of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

Reasons for issuing of licences (art. 9, i. to v.)

## Athamanta cortiana

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No of specimens involved (when practical)

>

No of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## Additional details

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

### **Argyranthemum winteri**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No of specimens involved (when practical)

>

No of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

## **Centaurea dubjanskyi**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No of specimens involved (when practical)

>

No of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

### **Centaurea heldreichii subsp. Heldeichii**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

### **Leontodon filii**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No of specimens involved (when practical)

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Reasons for issuing of licences (art. 9, i. to v.)

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

### **Astragalus tanaiticus**

Reasons for issuing of licences (art. 9, i. to v.)

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

## **Galium globuliferum**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No of specimens involved (when practical)

>

No of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

## **SCROPHULARIACEAE**

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

### **Verbascum degenii**

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

### **Viola cazorlensis**

#### **Confirmation of species occurrence**

# EXCEPTIONS CONCERNING STRICTLY PROTECTED FAUNA SPECIES (ART. 6 - APPENDIX II)

Article 6 of the Convention prohibits the following:

- a) all forms of deliberate capture and keeping and deliberate killing;
- b) the deliberate damage to or destruction of breeding or resting sites;
- c) the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- d) the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- e) the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, (where this would contribute to the effectiveness of the provisions of this article).

## Vertebrates

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **FISHES > PETROMYZONIFORMES**

### **Petromyzonidae**

#### **Lethenteron zanandrai (Lethenteron zanandrei)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;

- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Gobiidae**

### **Pomatoschistus tortonesei**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

all forms of deliberate capture and keeping and deliberate killing;

the deliberate damage to or destruction of breeding or resting sites;

the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;

the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;

the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Alytes muletensis**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

Please select only one option

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Pelobates fuscus**

## Geoemydidae

### Mauremys caspica

#### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora / fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

Please select only one option

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

Please select only one option

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

Please select only one option

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Podarcis taurica**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

## Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes

- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Elaphe lineata**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora / fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## Vipera ammodytes

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Puffinus puffinus**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

all forms of deliberate capture and keeping and deliberate killing;

the deliberate damage to or destruction of breeding or resting sites;

the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;

the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;

the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Pelecanidae (Pelecanus crispus)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **Phalacrocoracidae**

## Phalacrocorax aristotelis

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;

the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;

the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets

- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Accipitridae**

### **All species of Falconiformes (Pernis apivorus)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

### **All species of Falconiformes (Circus aeruginosus)**

## Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

## Comments/notes

>

### Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## All species of Falconiformes (*Circus cyaneus*)

### Confirmation of species occurrence

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Falconiformes (Aquila clanga)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

### Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

### No. of licences

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares

- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## All species of Falconiformes (*Falco vespertinus*)

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>  
The authority empowered to declare that the conditions have been fulfilled

>  
The controls involved  
>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species  
>

Justification for derogation for a species in an unfavourable conservation status  
>

Alternative solutions considered and scientific data to compare them  
>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)  
>

Comments/notes  
>
