Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

## Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **BIRDS > GALLIFORMES**

### **Phasianidae**

#### **Tetrao urogallus cantabricus**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## Otididae

### All species of Otididae (*Tetrax tetrax*)

#### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

#### Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

## **Gallinago media**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of old family Phalaropodidae (Phalaropus lobatus)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

Please select only one option

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **BIRDS > STRIGIFORMES**

### **Strigidae**

#### **All species of Strigiformes (Bubo bubo)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Strigiformes (Athene noctua)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

### Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

### No. of licences

>

### Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

### Please specify

>

### How have the activities allowed been controlled and by whom?

>

### How is the selectivity granted?

>

### Impact on population

>

### Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

### The authority empowered to declare that the conditions have been fulfilled

>

### The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

### Information on the conservation status of the derogated species

>

### Justification for derogation for a species in an unfavourable conservation status

>

### Alternative solutions considered and scientific data to compare them

>

### Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

### Comments/notes

>

### Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated

- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **Melanocorypha bimaculata**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

Please select only one option

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

Please select only one option

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

Please select only one option

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify  
>

### **Erithacus rubecula**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)  
>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;

- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Oenanthe finischii (Oenanthe finschii)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## Oenanthe hispanica

### Confirmation of species occurrence

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of old subfamily Sylviinae (Acrocephalus palustris)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of old subfamily Sylviinae (*Iduna pallida*)**

## Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

all forms of deliberate capture and keeping and deliberate killing;

the deliberate damage to or destruction of breeding or resting sites;

the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;

the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;

the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

## Comments/notes

>

### Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of old subfamily Sylviinae (Sylvia curruca)**

## All species of old subfamily Sylviinae (Phylloscopus collybita)

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora / fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Muscicapidae**

### **All species of old subfamily Muscipapinae (Muscicapa striata)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar

as disturbance would be significant in relation to the objectives of this Convention;

- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora / fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## All species of Paridae (Parus cinctus)

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets

- deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;

- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **All species of Laniidae (*Lanius nubicus*)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Carduelis chloris**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait

>

## Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes

- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Emberiza cirius**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora / fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

## MAMMALS > INSECTIVORA

### Erinaceidae

#### Erinaceus algirus (Atelerix algirus)

#### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

#### Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

## **All species of Microchiroptera except Pipistrellus pipistrellus (Barbastella leucomelas)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **All species of Microchiroptera except Pipistrellus pipistrellus (Myotis dasycneme)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora / fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## All species of Microchiroptera except Pipistrellus pipistrellus (Myotis punicus)

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

all forms of deliberate capture and keeping and deliberate killing;

the deliberate damage to or destruction of breeding or resting sites;

the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;

the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;

the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

## Additional details

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

## Comments/notes

>

### Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## All species of Microchiroptera except *Pipistrellus pipistrellus* (*Pipistrellus pygmaeus*)

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **Emballonuridae**

**All species of Microchiroptera except Pipistrellus pipistrellus (Taphozous nudiventris)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Microtus tatricus**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait

- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

Please select only one option

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

### **Caracal caracal**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Eubalaena glacialis**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **Lagenorhynchus acutus**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

Please select only one option

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

Please select only one option

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

Please select only one option

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Hyles hippophaes**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Parnassius apollo**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
>

The authority empowered to declare that the conditions have been fulfilled  
>

The controls involved  
>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species  
>

Justification for derogation for a species in an unfavourable conservation status  
>

Alternative solutions considered and scientific data to compare them  
>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)  
>

Comments/notes  
>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify  
>

### **Calopteryx syriaca**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)  
>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;

- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## Macromia splendens

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted  
>

The authority empowered to declare that the conditions have been fulfilled  
>

The controls involved  
>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species  
>

Justification for derogation for a species in an unfavourable conservation status  
>

Alternative solutions considered and scientific data to compare them  
>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Charonia rubicunda (Charonia lampas)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Geomitra moniziana**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

all forms of deliberate capture and keeping and deliberate killing;

the deliberate damage to or destruction of breeding or resting sites;

the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;

the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;

the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Patella ferruginea**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions where granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

## **ECHINODERMATA > ECHINOIDEA**

### **Diadematoida**

#### **Centrostephanus longispinus**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of specimens involved (when practical)

>

Authorised action (art. 6, a. to f.)

*Please select only one option*

- all forms of deliberate capture and keeping and deliberate killing;
- the deliberate damage to or destruction of breeding or resting sites;
- the deliberate disturbance of wild fauna, particularly during the period of breeding, rearing and hibernation, insofar as disturbance would be significant in relation to the objectives of this Convention;
- the deliberate destruction or taking of eggs from the wild or keeping these eggs even if empty;
- the possession of and internal trade in these animals, alive or dead, including stuffed animals and any readily recognisable part or derivative thereof, where this would contribute to the effectiveness of the provisions of this article.

No. of licences

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted?

>

Impact on population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **ECHINODERMATA > ASTEROIDEA**

## **EXCEPTIONS CONCERNING PROTECTED FAUNA SPECIES (ART. 7 APPENDIX III)**

According to article 7 of the Convention, any exploitation of wild fauna specified in Appendix III shall be regulated in order to keep the populations out of danger.

Measures to be taken shall include:

- i. closed seasons and/or other procedures regulating the exploitation;
- ii. the temporary or local prohibition of exploitation, as appropriate, in order to restore satisfactory population levels;
- iii. the regulation as appropriate of sale, keeping for sale, transport for sale or offering for sale of live and dead wild animals.

Exceptions to species listed in Appendix III concern the use of means of capture and killing specified in Appendix IV.

### **Vertebrates**

#### **FISHES > LAMNIFORMES**

##### **Lamnidae**

##### **Isurus oxyrinchus**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

#### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

#### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Alosa pontica**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **FISHES > SALMONIFORMES**

### **Salmonidae**

#### **Hucho hucho**

- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Coregonus all species (Coregonus bezola)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives

- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Coregonus all species (Coregonus holisatus)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft

- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Coregonus all species (Coregonus nilssonii)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## Coregonus all species (Coregonus trybomi)

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

iv.: for research / education / repopulation / reintroduction / necessary breeding

v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **Phoxinellus hispanicus (Anaecypris hispanica)**

## Confirmation of species occurrence

Please confirm the occurrence of the species in the country

*Please select only one option*

The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

i.: protection of flora /fauna

ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property

iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

### **Chondrostoma lemingi (Iberochondrostoma lemmingii)**

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Leuciscus polylepis**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>  
The authority empowered to declare that the conditions have been fulfilled

>  
The controls involved  
>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species  
>

Justification for derogation for a species in an unfavourable conservation status  
>

Alternative solutions considered and scientific data to compare them  
>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)  
>

Comments/notes  
>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Gobio albipinnatus (Romanogobio albipinnatus)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
- 14. Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
- 15. Aircraft
- 16. Motor vehicles in motion
- 17. Limes
- 18. Hooks
- other means capable of causing local disappearance of, or serious disturbance to, populations of a species

Please specify

>

## **Sabanejewia calderoni (Cobitis calderoni)**

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

*Please select only one option*

- The species occurs in the country

No. of individuals involved (when practical)

>

Exception made

>

Reasons for issuing of licences (art. 9, i. to v.)

*Please select only one option*

- i.: protection of flora /fauna
- ii.: prevention of serious damage to crops, livestock, forests, fisheries, water and other forms of property
- iii.: in the interests of public health and safety, air safety or other overriding public interests (which?)
- iv.: for research / education / repopulation / reintroduction / necessary breeding
- v.: judicious exploitation of certain wild plants in small numbers and under certain conditions

Please specify

>

How have the activities allowed been controlled and by whom?

>

How is the selectivity granted

>

Impact on the population

>

Conditions of risk and the circumstances and the time and place under which exceptions were granted

>

The authority empowered to declare that the conditions have been fulfilled

>

The controls involved

>

### **Additional details**

Where appropriate, please add a text providing information on:

Information on the conservation status of the derogated species

>

Justification for derogation for a species in an unfavourable conservation status

>

Alternative solutions considered and scientific data to compare them

>

Results of derogations (e.g. Cumulative effects and compensation measures where relevant)

>

Comments/notes

>

Where appropriate: indiscriminate means of capture and killing

*Please select only one option*

- 1. Snares
- 2. Live animals used as decoys which are blind or mutilated
- 3. Tape recorders
- 4. Electrical devices capable of killing and stunning
- 5. Artificial light sources
- 6. Mirrors and other dazzling devices
- 7. Devices for illuminating targets
- 8. Sighting devices for night shooting comprising an electronic image magnifier or image converter
- 9. Explosives
- 10. Nets
- 11. Traps
- 12. Poison and poisoned or anaesthetic bait
- 13. Gassing or smoking out
