CODE	Any comments - Commentaires éventuels
001	There seems to be considerable overlap between the C sub-categories . We have therefore chose not to break down the assessment of Pragmatic competences (pour le tableau 2.2.2.)
003	<p><i>L'emploi de la couleur rouge intervient lorsqu'un même descripteur est répété sous diverses « rubriques » et elle indique la partie, pour chaque rubrique, ce qui la concerne directement.</i></p> <p><i>La couleur bordeaux est utilisée pour signaler dans les descripteurs (ou similaires) en langues une référence aux autres matières.</i></p> <p><i>(*) Ce signe n'indique pas de descripteurs véritables, mais des citations repérées dans les programmes. Il a été décidé de les signaler car elles pourraient facilement être transformées en descripteurs.</i></p>
004	<p>Communicative competence does not seem to be the most accurate term (there is communication in all the other competences). The division into Linguistic Competence, Sociolinguistic Competence and Pragmatics Competence could be reconsidered – the two last ones are part of the linguistic competence, not separate competences at the same level.</p> <p>Also, within the Linguistic competence, there seems to be mixed plans: grammar competence is not at the same level of the others (lexical, semantic, orthographic, and phonological). Grammar is about the knowledge of the norms concerning these levels and others. We have norms for the lexis, the semantics, the orthography and the phonology. And what about syntax and morphology?</p> <p>We recommend that this organization to be reviewed by a linguistic. We can recommend a Portuguese researcher with a very strong curriculum – Professor João Costa - jcosta@fcs.unl.pt .</p>
005	The following descriptors are adjusted to the curricula aims and goals for each triennium
006	Compétence fonctionnelle et interactionnelle : L'introduction du Plan d'études spécifie que toutes les activités langagières doivent s'inscrire dans un contexte concret, en relation avec le vécu des apprenants.
