

Greece

Inclusiveness of people with disabilities in society remains a priority for policies related. In this context, the Ministry of Labour, Social Security and Social Solidarity implements a number of interventions and activities aimed at reducing unemployment, maintenance of existing jobs, creation of new jobs, integration of young people and vulnerable social groups, including people with disabilities in the labour market.

Also currently developing the National Registry of beneficiaries, a data base in which will be entered type of support and social benefits enjoyed by the individual and provided by the general social security system (public sector, local government, NGOs, etc.) in order to avoid duplication of social resources, as well as to ensure maximum coverage of the target population. The registry will operate at national level and will be inter-operational with other relevant databases.

A single information system and a system of indicators is established in order to monitor the implementation of the National Social Integration Strategy. These indicators will allow monitoring of the progress of each priority of intentional and the efficiency and effectiveness of individual interventions.

Community living and de-institutionalization process is a priority and certain actions carried out in order to safeguard people with disabilities living either on supported living houses or within family environment and care.

Awareness raising is of particular importance in the direction of acceptance of diversity and inclusion of people with disabilities in society. Specific actions through the media and educational material will form a positive image of people with disabilities.
