☒ (X) Yes, please specify how many seizures have been reported in 2024 Seizure data not available, but all seizures of doping substances at the border are recorded and we have access to them. We are currently setting up an automated monthly report from the Department of Home Affairs relating to records regarding seizures of doping substances at the border to replace our monthly requests. These records represent thousands of packages seized per month. We utilise this reporting to undertake checks to identify any athletes/support people potentially subject to the jurisdiction of the WAD Code. We also use the data to do trend analysis (country of origin, substance, consigner,

consignee etc) and provide those insights back to Department of Home Affairs for target development. We also receive ad-hoc reporting through State based Policing and Health regulatory agencies regarding the seizure of doping substances as part of regular law enforcement processes. We have built on these relationships particularly with State based Policing agencies and actively engage with them regarding identified targets involved in the trafficking of doping substances. We continue to look for opportunities to increase the consistency of this ad-hoc reporting

The Board consists of a chairman, a vice-chairman and four members elected by the Swedish Sports Confederation (SSC) General Assembly. The Supreme Sports Tribunal (RIN) is the highest legal body within Swedish sports. RIN consists of a chairman, vice-chairman and six other members elected by the SSC's General Assembly.
