# Al as the digital foundation of children's rights

A youth perspective on AI from a UNICEF Youth Ambassador and AI researcher at MIT

# Shaping the Future "Youth may be 10% of today but we are 100% tomorrow."

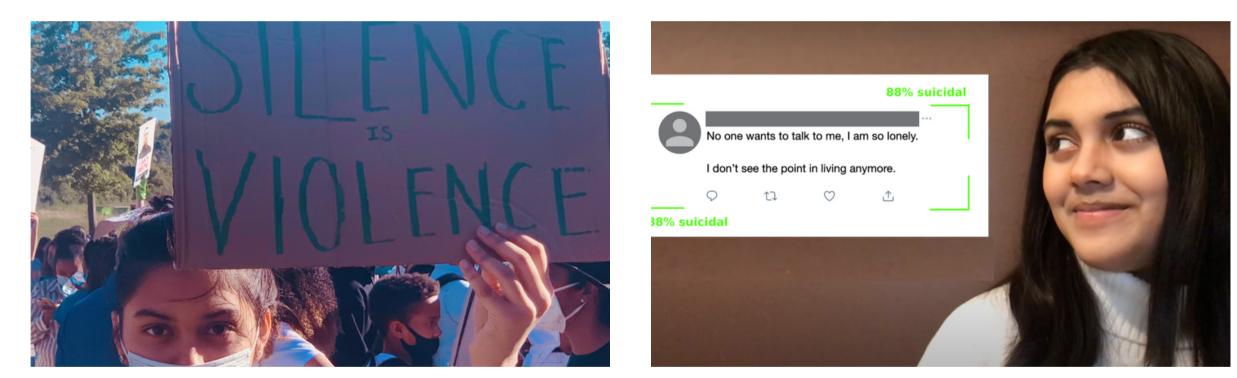

Alisha Arora

# **My Change-Making Journey**

Leveraging AI technology to prevent child suicides

### YOUTH SUICIDE CRISIS

RECOGNIZING TECH AS A SOLUTION

#### USING AI TO SAVE LIVES OF CHILDREN

Improving drug discovery and medical treatments

Detecting safe shelters for Ukraine refugees

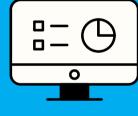

### Automate tasks to reduce CO2 emissions

## **Driving social change with AI**

Focus on children right to privacy and safety

### What is AI? a tool for change

### Using AI for social good

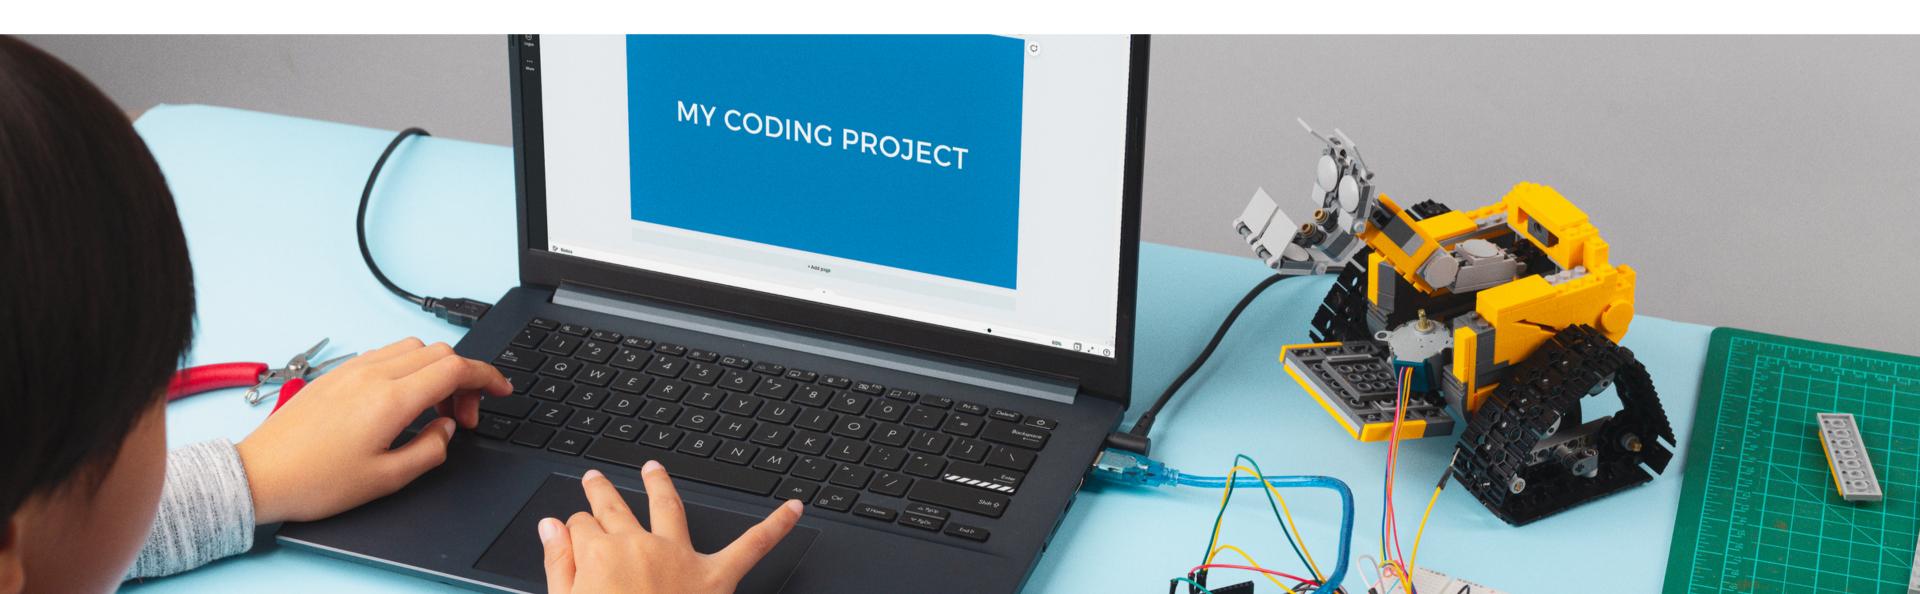

Empowering everyone to leverage AI

# It's time we look at technology and Artificial Intelligence as a tool to combat problems, not create them.

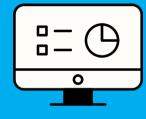

#### Alisha Arora

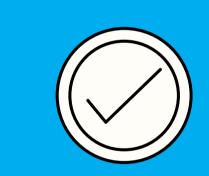

## **Al innovation and Private Sector**

Collaboration is key to protecting children's rights

Restoring violations of Children Rights

Accountability of Private Sector

# Youth Well-being at the **Core of Innovation**

Development of AI should be focused on maximizing the wellbeing of children not

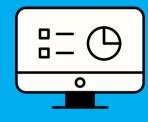

profitability of companies.

Alisha Arora

## **Digital Education around Al**

Educating children on AI and their rights

### Understanding the risks of AI

Bias filtering in online information

Integrating AI into daily routines

# Youth Perceptions on Artificial Intelligence

Almost 65% of youth have no idea what Artificial Intelligence is and how it influences their day to day lives.

### Recommendations

Action points for protecting the rights of children through AI

#### Invest in AI for Social Good Projects

Unite key-stakeholders to make children digital safety a priority

Reimagine the future of digital literacy
