 **The Russian Ka-52 helicopter downed near Gostomel was probably flown by the squadron commander of the 319th Separate Helicopter Regiment from the Primorsky Krai of the Russian Federation, Airat Safargaleyev.**

Journalists drew their attention to the helicopter pilot's helmet, which Ukrainian security forces had found near the downed Ka-52 helicopter. The helmet of the pilot was marked with the surname — «Safargaleyev».

24 February 2022,
the day of Russian
invasion

In 14 hours after the war
started we have published
our first investigative story.
We found out who was the
pilot of Russian helicopter
which was downed next to
Kyiv

How we investigate war crimes

- 1) Find the crime and victims
- 2) Go into field for reporting, talk to people, collect proofs
- 3) Figuring out what Russian unit was based in the location
- 4) Identifying Russian soldiers, printing their pictures
- 5) Showing pictures to victims and witnesses
- 6) Collecting more proofs about persons who commit the crime
- 7) Call/text Russian militaries with questions
- 8) Publish the story

After publishing a story

- Prosecutors or other official investigators collect information from our stories and use in their criminal cases
- Officials asked us to train their employees how to identify people
- All identified Russian soldiers we put into the special database we released in May - "Russian War Criminals." We also put there the soldiers identified by other Ukrainian outlets
