Značilnosti pri Cvinger
 To arheološko najdišče pri Cvingerju v Dolenjski Toplici je eno od prvih železarskih središč v Sloveniji. V letih 1960-1970 so tu odkrili železarsko središče starejše železne dobe, ki je bilo delo železarskega obrata. Na najdišču so odkrili številne železne predmete, ki kažejo na visoko stopnjo tehnologije in organizacije. Med drugim so našli železne predmete, ki kažejo na visoko stopnjo tehnologije in organizacije. Med drugim so našli železne predmete, ki kažejo na visoko stopnjo tehnologije in organizacije.

The Cvinger Archaeological Hall
 The archaeological hall at Cvinger is a reconstruction of the original site, showing the layout of the iron smelting area and the surrounding structures. It provides a clear view of the site's location and the surrounding landscape.
