

# A CSAMfree web

---

No simple solution, but very doable with the right measurements

Arda Gerkens  
CEO

EXPERTISEBUREAU  
ONLINE KINDERMISBRUIK

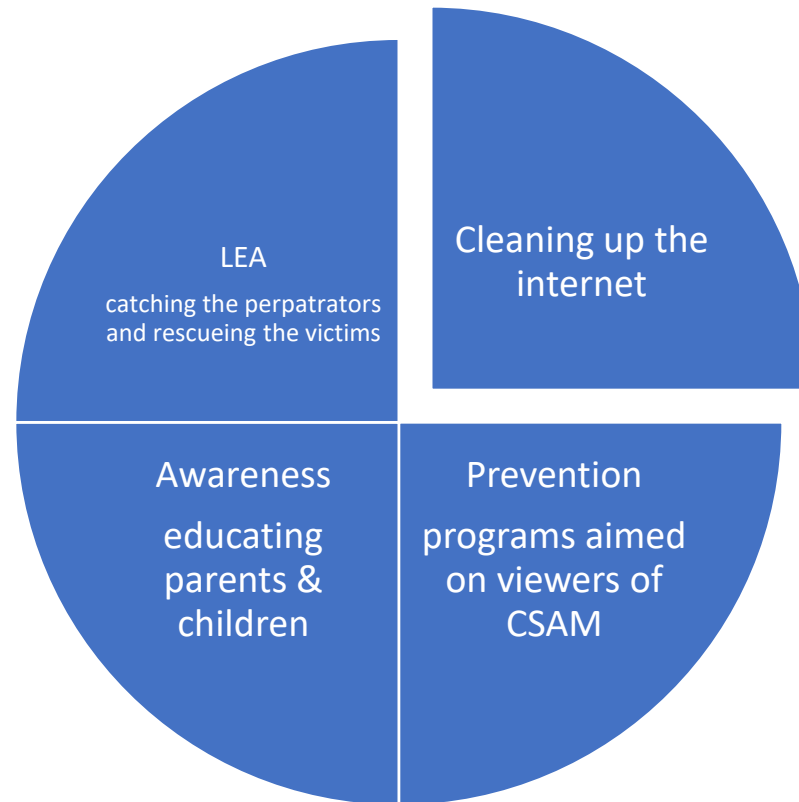

---

# EOKM

- Hotline fighting CSAM
- Helpline for practical support to victims of online sexual abuse
- Helpline for (potential) perpetrators or CSAMviewers

# Just one piece of the pie....

# The EU playingfield

- Spreading of CSAM via Imagehosters (80%), filehosters, cloudhosting versus US social media platforms, chatapps
- Majority of the owners of these websites outside the EU
- Majority of owners small enterprises or individuals
- Majority of websites do not collect personal information
- Imagehosters hosted on the open web are used for images on the Darkweb

Can we offer a GDPR  
proof tool for detecting  
and removing CSAM?

---

Yes we can

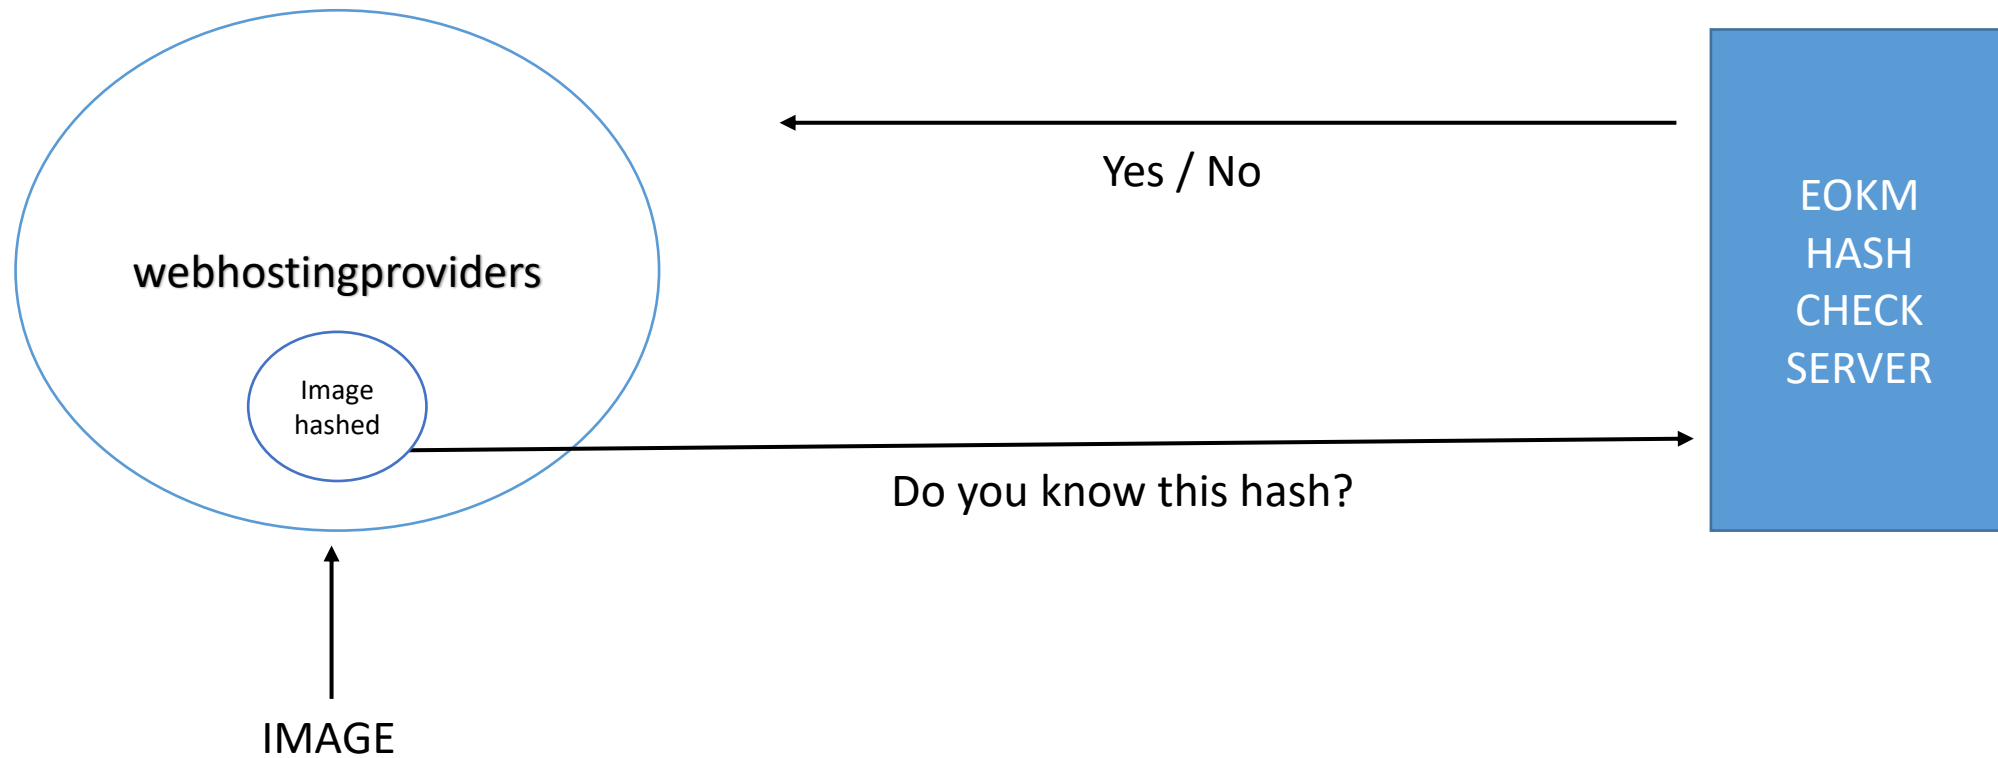

# Hashcheckservice

---

- Hashes from LEA & NGO's
- Goal is to clean up **not** to prosecute
- No personal data (hashes) is shared
- Low threshold for participation
- Free of charge
- Applicable for many different services

# HASHCHECKSERVER

# Results 2021

---

**30 parties connected**  
**2.000.000.000 checks**  
**500.000 hits**

# Swift removal of CSAM project

research by the EU

---

## Outcomes

- Other hashtechiques needed
- Better classificationssystem is needed
- Transparancy reports are needed
- Oversight board is needed
- Auditting is needed

# Future developments implementing the EUreport

---

- Refining the technical specifications and hashtechniques
- Expanding to other services
- Offering support to small enterprises
  
- Establishing an oversight board
- Publish transparency reports
- Yearly audits

# Do's and don'ts for policymakers

---

- Make companies accountable for what they do (or don't)
- Offer tools but do not impose them
- Know your customer (mandatory reporting is only useful in some cases)
- Rather keep companies cleaning up in EU than outside spreading CSAM
- There is no one stop solution, but tailor-made policies will be effective

THANK YOU
