## THE APPROACH

The EYF approach is based on the development of **partnerships** with NGOs.

The EYF is more than just a donor, offering financial but also elaboration of projects that have a tangible, concrete **impact**.

Two-way communication, flexibility, diversity and respect are the guiding **educational support** to youth NGOs, focusing on the **content and methodology** of projects.

Through feedback, recommendations and questions the EYF hopes to create a reflective process, increasing the **quality** of projects. The focus is on the principles of the Foundation and its staff.

### Feedback from an NGO on its communication with the EYF:

“The communication in the application phase with EYF and during the project was very trustful. We appreciated a lot the flexibility of EYF regarding small changes (participating countries, dates...). The Volunteer Time Recognition (VTR) is very helpful too.”
