

Roadmap

Axis 1: Hate speech

One

1. Propose and create useful resources for training and raising awareness of hate speech from an early age (theoretical part).

Important: resources already identified or produced by the Council need to be better disseminated, according to needs or differences. Big issues of training, of taking stock of what already exists, before duplicating efforts.

→ Creation of a manual of good AND bad practices and disseminate existing ones. Use the Council of Europe's Good Practice Manual as a basis.

→ Survey and hearing of NGOs/associations of experts (table)

Topic: hate speech in the learning and teaching of sport from an early age.

→ Design innovative educational tools to train and raise awareness around sports practice. Draw inspiration from the Council of Europe's "facts sheets", create simplified fiches and visuals.

→ Organize a webinar to publicize our work and give the floor to expert NGOs/associations.

2. Give a voice to the people concerned to establish a diagnosis of needs, deriving better learning (practical part).

→ Organize innovative training/debate days to gather opinions and proposals from the publics concerned during European Sports Week each year.

◆Publicize our work

◆Raise awareness of the week and give a voice through the field and sport

3. Contribute to a recognized, harmonized and stricter application of the rules in force concerning discrimination and doping, as well as the democratization of reporting tools and platforms (legislative part).

a. Using the tools and legal bodies of the Council of Europe, draw up a diagnosis of current sports federation regulations, and if necessary propose a revision.

b. Dissemination of European Charters (Sport and Ethics)
