Ministry of Health of Ukraine

At present, the Ministry of Health does not compile information on cases of domestic violence, since the transfer of paper information within the administrative-territorial units can lead to the disclosure of personal information and the worsening social status of victims.

However, such reporting has not been implemented, because the Ministry of Social Policy of Ukraine, as the national coordinator for the prevention and combating domestic violence, together with the central executive authority, is only developing a draft reporting mechanism and new forms of statistical reporting on cases of domestic violence. The Ministry of Education and Science, educational institutions will be able to record cases of domestic and gender-based violence, as well as report on these issues after the approval of the above regulatory documents in an established manner.

Ministry of Education and Science of Ukraine

INTERMEDIATE CONCLUSIONS

A

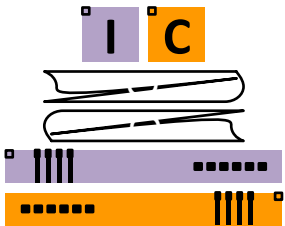

Subjects in the field of preventing and combating domestic violence do not collect disaggregated statistics, and some of them (MoH and MES) do not collect generalized information at all

B

Subjects do not exchange data with each other, which makes it difficult to implement a coordinated policy in the field of preventing and combating domestic and gender-based violence

C

The Ministry of Social Policy of Ukraine does not collect data, analyse and disseminate the results, statistics are not available to the public

Thank you for your attention!
