

Statement of Interpretation on Article 6§2 – Favourability principle

The favourability principle establishes a hierarchy among different legal norms and among collective agreements at different levels. Accordingly, it is generally understood to mean that collective agreements may not weaken the protections afforded under the law and that lower-level collective bargaining may only improve the terms agreed in higher-level collective agreements. The purpose of the favourability principle is to ensure a minimum floor of rights for workers.

The Committee considers the favourability principle a key aspect of a well-functioning collective bargaining system within the meaning of Article 6§2 of the Charter, alongside other features present in the legislation and practice of States Parties, such as the use of erga omnes clauses and extension mechanisms. These features are typically found in comprehensive sectoral bargaining systems with high coverage, usually associated with stronger labour protections.

At the same time, the Committee notes that some States Parties provide for the possibility of deviations from higher-level collective agreements through what may be termed opt- out, hardship, or derogation clauses. The Committee applies strict scrutiny to such clauses, based on the requirements set out in Article G of the Charter. As a matter of principle, the Committee considers that their use should be narrowly defined, voluntarily agreed, and that core rights must be always protected. In any event, derogations must not become a vehicle for systematically weakening labour protections.
