The Landscape Award Alliance of the Council of Europe gathers the exemplary achievements presented by the States Parties to the European Landscape Convention, showing that it is possible to promote the territorial dimension of human rights and democracy by improving the landscape features of people’s surroundings.

Depending on the case, these achievements promote landscape protection through measures to preserve the significant and characteristic features of the landscape; landscape management through action from a sustainable development perspective to ensure the regular upkeep of a landscape in order to guide and harmonise change; or landscape planning through forward-looking action to

enhance, restore or create landscapes. They foster landscapes for living, in urban and peri-urban areas; landscapes to discover, through the provision of roads or country paths; landscapes both historical and alive, between nature and culture; or landscapes that enable people to get to know the countryside and take action to support it, by establishing methodologies and other landscape promotion tools.
