National selection of the Landscape Award in Latvia

Mrs Dace Granta

Spatial Planning Policy Division
Department of Spatial Planning

Daugavpils, 2018

Ministry of Environmental
Protection and Regional
Development
Republic of Latvia

Basis

The Ministry of Environmental Protection and Regional Development has organised the National Selection of the Landscape Award of the European Council since 2010.

There have been four national selections.

The national selection, ending in October 2018, is currently taking place for the fifth time.

Evaluation of applications

In order to make the applications available to the general public, all submitted applications have been published on the website of our Ministry.

Since 2014, applications have been evaluated by an inter-institutional evaluation committee that includes representatives from different ministries and NGOs (for example, the Association of Latvian Local Governments and the Latvian Landscape Architects' Association)

Criteria of evaluation

Each project is first evaluated in accordance with the four criteria set out in the Resolution of the Council of Europe.

The National evaluation committee has decided that these criteria should be supplemented by specific criteria for Latvia: from this 2018 all applications will be evaluated in the context of landscape planning.

Each member of the evaluation committee has the right to assign one additional point to the project with a specific contribution in the field represented by the member of the commission.
