Government Statements

We all recognise that we have world-class parks and areas of outstanding natural beauty, and my second priority is to work with the national parks and AONBs to enhance the value of nature for people across Wales. Our national parks and AONBs are central to enhancing the understanding of the value of our natural landscapes. They have a key educational role to play, which is also about helping people to explore and use those resources sustainably, to ensure environmental, social and economic benefit.
