

Response of the Croatian authorities to the alert Novosti Smeared in Parliament

Freedom of expression for public figures is not only a right and a privilege, but also entails obligations. Politicians have a great responsibility and the Croatian Parliament is the place where society's problems are discussed.

The Minister of Culture and Media, just like other representatives of the Government of the Republic of Croatia, publicly expressed the view that public figures should refrain from commenting on the media.

We condemn the interference of politics in the media, that is, the aforementioned behavior, just like any form of verbal violence against any media.
