

Debora Moolenaar

I studied econometrics at the Erasmus University Rotterdam and graduated in 1993 on a thesis on the efficiency of public libraries in the Netherlands. From 1994 until 2000 I worked as a PhD student at the E.M. Meijers Institute for legal research which is part of the faculty of law at Leiden University. In 2002 I got my PhD from the University of Amsterdam on a thesis on the supply and demand for agency work. Since 2000 I have been working for Research and Documentation Centre of the Dutch ministry of Justice and Security. My primary fields of interests are the flows through the (criminal) justice system, modelling and forecasting the (criminal) justice system, and cost, benefits, productivity and efficiency within the field of justice. International publications include:

- The Dutch Market for Agency Work (2002, PhD thesis).
- Design and Implementation of a Forecasting Tool of Justice Chains (2007)
- Modelling Criminal Justice System Costs by Offence: Lessons from The Netherlands (2009)
- A Framework to Monitor Public Safety Based on a Data Space approach (2011)
- Motorist's response to an increase in traffic fines (2014)
- CyberDEW: a Distributed Early Warning System for Cyber Security (2015)
- Compressing Large Amounts of NetFlow Data Using a Pattern Classification Scheme (2016)
- Estimating the production, consumption and export of cannabis: The Dutch case (2016)
