RESULTS FACTSHEET

The CyberEast project supports the authorities of the Eastern Partnership in development of policies and legislation in line with Budapest Convention on Cybercrime, strengthening skills of investigators, prosecutors and judges on cybercrime and electronic evidence, and contributing to improved interagency, international and public-private cooperation.

- As part of Inception phase, training needs and opportunities on cybercrime and electronic evidence in Belarus were assessed through series of meetings with national counterparts and summarised in regional Report.
- Legal requirements and practical aspects of electronic evidence under the Budapest Convention on Cybercrime were addressed at the Electronic Evidence Conference for Judges of Belarus.
- Members of the country team took part in International Meeting on cooperation with foreign service providers, facilitating open discussion on experience of public-private cooperation from across all regions represented during the event.
- Under COVID-19 restrictions, Belarusian authorities took part in series of online webinars organized to address cutting-edge topics of cybercrime cooperation, such as elections interference, cooperation with CSIRTs and cyberviolence.
- Under COVID-19 restrictions, Belarusian national authorities contributed to regional desktop-based studies and surveys on aspects of data protection, law enforcement/service provider cooperation and data preservation.

A background information sheet on this project is available on the project website.
