RESULTS FACTSHEET

The CyberEast project supports the authorities of the Eastern Partnership in development of policies and legislation in line with Budapest Convention on Cybercrime, strengthening skills of investigators, prosecutors and judges on cybercrime and electronic evidence, and contributing to improved interagency, international and public-private cooperation.

- As part of Inception phase, training needs and opportunities on cybercrime and electronic evidence in Georgia were assessed through series of meetings with national counterparts and summarised in regional Report.
- The project has contributed to the development of the Draft National Strategy of Cybersecurity of Georgia in line with cybercrime policies and requirements of the Budapest Convention.
- The project has trained law enforcement officers in Georgia on cybercrime and electronic evidence and contributed to development of draft development strategy of the cybercrime unit.
- The project provided national authorities with assessment of draft amendments to the Information Security Law of Georgia against requirements of the Budapest Convention on Cybercrime.
- Georgia hoisted the International Meeting on cooperation with foreign service providers, facilitating open discussion on experience of public-private cooperation from across all regions represented during the event.
- Under COVID-19 restrictions, Georgian authorities took part in series of online webinars organized to address cutting-edge topics of cybercrime cooperation, such as elections interference, cooperation with CSIRTs and cyberviolence.
- Under COVID-19 restrictions, Georgian national authorities contributed to regional desktop-based studies and surveys on aspects of data protection, law enforcement/service provider cooperation and data preservation.

A background information sheet on this project is available on the project website.
