## 4. Performance of courts in Denmark (2022 data)

### • Efficiency indicators

- Clearance Rate (CR) and Disposition Time (DT)

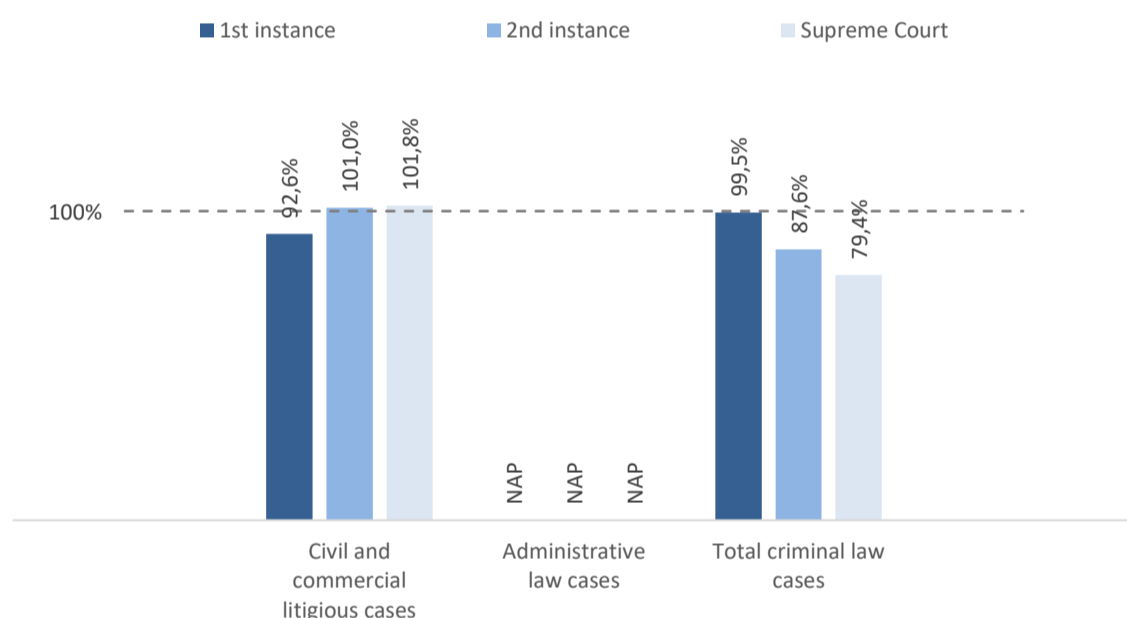

The Clearance Rate shows the capacity of a judicial system to deal with the incoming cases. A Clearance Rate of 100% and higher does not generate backlog.

The Disposition Time determines the estimated number of days necessary for a pending case to be solved in a court.

Disposition Time by instance and by matter in 2022 (days)

It is important to be noted that, administrative courts do not exist in Denmark and administrative cases are usually dealt outside courts by court-like bodies, like appeal boards, committees, or councils. In Danish courts however, administrative cases do not constitute a specific case category. The number of “administrative law cases”, which are litigious, is encompassed in the number of “civil and commercial litigious cases” and they represent 5.5% of incoming cases.

In 2022, criminal law cases appear to be the fastest in Denmark, which is similar to the trend observed in the EU for the reference year. At the same time, third instance civil and commercial litigious cases are the longest in Denmark, and somewhat above the EU median for this type of cases.

At first instance, the Clearance Rate indicator is somewhat below the 100% threshold for civil litigious cases and close to 100% for criminal law cases. The Disposition Time is below the EU median for criminal law cases, but not for civil litigious cases.

At second instance, courts seem to efficiently deal with civil litigious cases as the Clearance rate is above 100%, but seem to face certain challenges in processing criminal law cases, as the Clearance Rate is below the 100% threshold (87,6%). The Disposition Time is below the EU median only for civil litigious cases.

For the third instance, the Clearance Rate indicator is above the 100% threshold for civil litigious cases, but below the 100% threshold for criminal law cases (79,4%), which might imply certain challenges in processing this type of cases. At the same time, the Disposition Time is above the EU median for both types of cases.

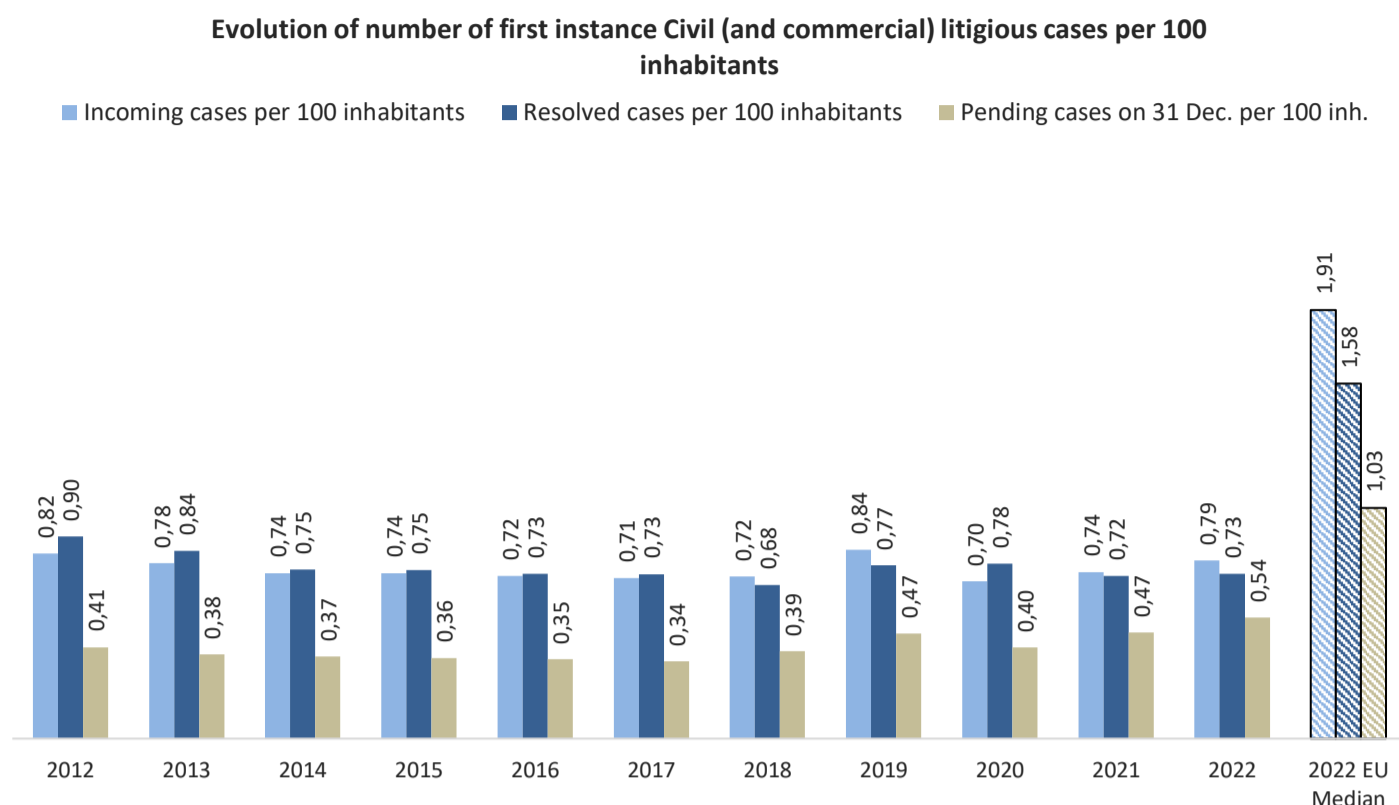

In 2022, according to the information provided by Denmark, there was still an aftermath of the unusual situation of the Covid-19 related to the periods with closing down the courts. It has created more pending cases as the prosecution continued to forward new cases to the courts, that could not deal with them. Land registration is the major source of incoming cases with very large figures as it fluctuates a lot depending on interest rates, loan rescheduling etc.

All prosecutors are subject to a recruitment procedure conducted by the Director of Public Prosecutions' Office on behalf of the Ministry of Justice. A prosecutor can serve within the Local Prosecution Service based in one of the 15 the police districts or within the Central Prosecution Service with one of the Regional State Prosecutors' offices or with the Director of Public Prosecutions' Office.

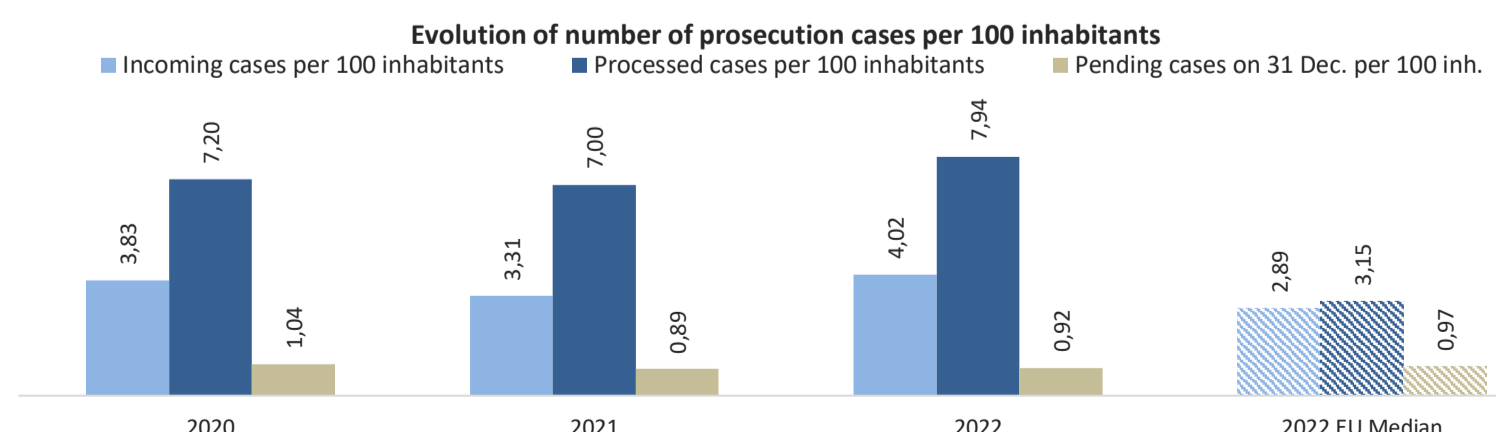

According to the comments provided by Denmark, it is not possible to present the data in the format of the table above (3.1.1. + 3.1.2. + 3.1.4.), as the legal basis in Denmark (sections 721 and 749 of the Administration of Justice Act) is not divided in such subcategories.

Also, regarding the increase in incoming cases, it should be noted that the police is responsible for charging possible perpetrators and hence the number of incoming cases received by the prosecution service. It should be recalled that the number of incoming cases varies from year to year and the amount in 2021 was lower than the previous years.

## 8. Systems for measuring and evaluating the performance of courts and public prosecution services in Denmark (2022 data)

In Denmark, quality standards are not determined for the judicial system at the national level.

### Systems for measuring and evaluating courts' performance

**A regular monitoring system of court activities is in place concerning:**

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the courts)	✗
Length of proceedings (timeframes)	✓	Costs of the judicial procedures	✓
Number of resolved cases	✓	Number of appeals	✓
Number of pending cases	✓	Appeal ratio	✗

According to Denmark, judges are independent and therefore measuring is done focusing on case-flows and economic indicators without identifying the individual judge.

### Systems for measuring and evaluating public prosecution services' performance

**A regular monitoring system of public prosecution services activities is in place concerning:**

Number of incoming cases	✓	Satisfaction of users (regarding the services delivered by the public prosecution)	✗

The prosecution makes monthly reports to the Ministry of Justice on data regarding number of cases, clearance rate, etc.

Disposition time is measured indirectly through a report that measures all steps in a criminal case from arrest to imprisonment. There is no direct measure of disposition time, but it can be read from this report.

The prosecution makes a biannual survey on the satisfaction of the prosecution staff.

In Denmark, there is a system to regularly evaluate the activity of each public prosecution service qualitatively but not quantitatively.
