

# DIGITAL PARTNERSHIP

Digitalisation, training and human rights –  
effective mutual enhancement

# COE Digital Agenda 2022- 2025:

(1) The consolidation of existing digital regulation and the **development of new legal instruments** to have a coherent set of effective **legal mechanisms to protect human rights, democracy and the rule of law in the digital environment.**

(2) Responding to the challenges and taking advantage of the opportunities provided by emerging digital technologies to **help member States to meet present and future challenges raised by the digital transition.**

(3) **Accompanying member States** for a digital transition with European values based on Council of Europe standards, **through monitoring and co-operation activities.**

# Cooperation projects

- Digitalisation
- Dialog with private actors (publishers in TJENI project)
- Innovative solutions (Hackathon)
- AI testing
- HELP courses (development and integration)

# Labour Rights as Human Rights

About the course:

 Brief  Video  13 hours

### Right to privacy at the workplace

There is no specific binding legal framework in the EU governing processing of personal data in the context of employment. However, general provisions on data protection are applicable in this respect.

In the EU [General Data Protection Regulation](#), employment relations are specifically referred to only in the context of the processing of **sensitive data**. Member States may adopt in their national legislations more specific rules to ensure the protection of the rights and freedoms in respect of the processing of employees' personal data in employment context.

The processing of personal data in a workplace falls within the scope of Article 8 of the [European Convention on Human Rights](#) protecting *inter alia* the right to private life. Specific rules for data protection in employment relations are also outlined in CoE [Recommendation CM/Rec\(2015\)5 on the processing of personal data in the context of employment](#).

LABOUR RIGHTS AS HUMAN RIGHTS Page 21 of 29

### The right to privacy at the workplace

Many employers apply new tools in the sphere of human resources management, such as 'personnel information systems' and 'personnel surveillance systems'. New techniques allow employers to monitor the conduct of employees. The most common examples are:

Monitoring of phone communications, Internet, e-mail and social media use

Video surveillance
