

EMVO and EMVS Update

Sónia Queirós

The EMVS is growing stronger

- Medicines and patients **move across borders.**
- Safety checks must work across borders too.
- **EMVS is a community of EMVO and 30 NMVOs running the national systems in 31 countries**
- 2024 Northern Ireland disconnected
- 2025 Greece
- 2026 Italy

The EMVS is growing stronger

Connected OBPs

1 800+

(representing 3000+ MAHs)

Batches

≈7 millions

Decommissioning

90,01% (Dec 25)

+18% (Jan 23/ Dec 25)

Product Codes

≈400.000

Alert Rate

0,08% (Dec 25)

-56% (Jan 23/ Dec 25)

Connected End Users

145 000+

Transactions

≈ 14 billion/ year

Building a strategy together

- **Optimise basic system performance & how it is measured**
 - Reduce 'false' alerts & guidelines across Europe
- **Managing alerts & Deliver trusted information**
 - NCAs reports that support them in all areas of activity provided for in the Delegated Regulation
- **Secure support & knowledge**
 - Common EMVS communications strategy
 - Cooperate and develop partnerships with other organisations with a similar purpose
- **Future readiness**
 - Common technology standards & new technology uptake
 - Improve Data Quality through robust Product Master Data standards
 - Secure the system and keep ahead of emerging risks
 - Readiness to support evolving regulatory landscape

Building a strategy together

ONGOING PROJECTS

Alert Prevention and Reduction "Programme

- Enhance Reporting
- Root Cause Analysis
- Guidance & Harmonisation
- Addressing software and scanners issues
- Alert Categorisation

NCA reports Improvement

EMVS Security Council

Master Data Office

**EMVS Technology
Readiness**

Expanding EMVS Collaboration with external parties

- Relevant organizations working in the same field (Medicrime, Europol, WHO, WGEO)

**EMVS communication
strategy (joint plan
EMVO & NMVOs)**

Expanding Collaboration with Medicrime

STRENGTHENING EMVS THROUGH CONTINUOUS COLLABORATION

- **Better understanding of falsification risks**
Gain deeper insight into vulnerabilities across the medicines supply chain and how falsifiers operate.
- **Access to diverse expertise and foresight**
Learn from external perspectives to anticipate emerging threats and improve horizon scanning.
- **Strengthening and evolving the EMVS**
Use shared knowledge to identify gaps and enhance the resilience of the EMVS.

SUPPORTING MEDICRIME ACTIVITIES

- **Promotion through collaboration**
Joint efforts/ actions and participation in events to share experiences and raise awareness on falsification.
- **Leveraging networks for greater impact**
Mobilise member networks to amplify outreach and awareness, extending communication impact across the supply chain in particular by raising awareness about Medicrime Convention.
