## BOSNIA AND HERZEGOVINA

Federation of BiH and Republika Srpska- Compulsory social insurance system financed by contributions from employers and employees and providing earnings related benefits linked to insurance period.

- Funds for pension and invalid insurance are secured by insured people, employers and the budget of Republika Srpska or budget and other resources in Federation of BiH.

District Brčko of BiH

- The people of the District of Brčko do not have their own separate pension system but choose to be affiliated to the scheme in either the Federation of BiH or Republika Srpska

## GEORGIA

Survivor's pensions are granted to children till age of 18, regardless whether bread-winner's death is caused by industrial injury, occupational sickness, or a non-work related sickness or injury. Paid from the State budget.

## MONTENEGRO

Social insurance system is financed from contributions paid by the insured persons, employers, and in special cases funds for social insurance are provided for by the state.

Conditions for becoming entitled are years of age and minimum insurance service period. The amount of the compensation depends on the length of the insurance service period and the realized wage.

## NORTH MACEDONIA

Providing social security to family members in case of the death of the insured person/pensioner within the family, benefit is known as a "Family Pension". The same benefit is paid to those who die due to work-related illness or injury as those who die owing to non-work related circumstances. However, those whose death is work related do not have to satisfy any qualifying period.

## REPUBLIC OF MOLDOVA

Based on a compulsory social insurance scheme. The survivor pension is related and calculated as a percentage of the pension earned by the deceased.

## RUSSIAN FEDERATION

Dependent family members who are incapable of working have a right to a pension in the event of the loss of the breadwinner.

There are two types of survivor pensions: insurance survivor pension and survivor pension under the state pension provision as well as social survivor pension

In addition, from January 1, 2018, children with both unknown parents are entitled to social pension.

## SERBIA

Compulsory social insurance scheme for the active population financed by contributions on a pay as you go basis. Any deficit is covered by the state budget. Benefits depend on age of the survivor and previous earnings and duration of insurance of the deceased. Benefits for work and non-work related death are the same but when the deceased was a victim of work-related incapacity no condition relating to minimum qualifying periods is applied and the benefit is calculated on the basis of 40 years of insurance.

## TURKEY

Civil Servants:

Social insurance based system providing benefits that are indirectly earnings related and that is financed by contributions from the employer state body and the employee; state covers as well the deficits.

Workers:

Social insurance based system providing earnings related benefits financed by contributions from employers and employees; state as third payer covers the deficit.

## UKRAINE

Survivor's pension shall be granted to the dependent members of the deceased breadwinner in case they are unable to work. Furthermore it is required that at the date of his/her death, the breadwinner had an insurance record that would have made him/her eligible for an invalidity pension or was him/herself a pensioner or was belonging to a category of individuals as defined by the Act.

Survivor's pension shall be granted to children irrespective of the fact of whether they were dependents of the deceased person. On the other for parents and the spouse of the deceased it will be verified whether they were depending upon the deceased person.

(last update 2019)

ARMENIA

Survivors Labour Pensions:

$P = BP + F$ ,

where

- P: monthly pension
- BP: basic pension (16000 AMD per month)
- F: Coefficient based on 50 % of the Labor portion of the deceased's calculated pension

Survivors Benefit

Benefit = 26 500 AMD per month

AZERBAIJAN

Survivors labour pension is calculated the same way as the labour pension for disability.

The total pension amount calculated is divided between the eligible family members.

In case for the family the total amount of the survivor's labour pension of family members, unfit to work, is lower than the minimum amount of labour pension, the minimum amount is paid.

- the Presidential allowance for a member of martyr's family of 20th January incident– 300 AZN
- the Presidential allowance for a member of martyr's family– 300 AZN
- Social allowance – 80 AZN

BOSNIA AND HERZEGOVINA

Federation of BiH and Republika Srpska.

Survivors pension is defined according to the number of eligible family members, (including the spouse) and divided equally between all those entitled. The pension is based upon the general invalidity or old-age pension the deceased would have been entitled to at the time of death (see Table V Invalidity and Table VI Old age).

The survivor's pension is calculated as a percentage of the pension to which the deceased would have been entitled, according to the number of eligible survivor's:

- one survivor: 70%,
- two survivors: 80%,
- three survivors: 90%,
- four or more survivors: 100%

#### GEORGIA

None.

#### MONTENEGRO

A survivor's pension shall be determined on the basis of the old-age or disability pension that the insured person would have been entitled to at the time of death, or on the basis of the pension the beneficiary was entitled to at the time of death, in the percentage that is determined based on the number of family members who are entitled to that pension, as follows:

- for one member 70%;
- for two members 80%;
- for three members 90%;
- for four or more members 100%.

If both a spouse and a divorced spouse of a deceased insured person or beneficiary are entitled to a survivor's pension, one survivor's pension shall be determined in the amount that one family member is entitled to and shall be divided in equal shares.

#### NORTH MACEDONIA

The Family Pension is calculated as a percentage of the old age or invalidity pension that the deceased person did or would have received at the time of his or her death, according to the number of eligible survivors:

- one survivor: 70%, and
- two survivors: 80%,
- three survivors: 90%,
- four or more survivors: 100%

This amount is then divided equally between all survivors.

2nd pillar:

In case of a death of a private pension fund member, there are two situations:

\* If the calculated programme withdrawal is less than the amount of the family pension, then the total assets accumulated to the deceased member's account shall be transferred to the first pillar and will be calculated and paid as regular family pension

\* If the amount of the programme withdrawal is higher than or equal to the amount of family pension calculated within the first pillar, the beneficiary (survivor) may choose either to use the whole amount of accumulated assets standing to the account as a pension paid through programmed withdrawals or to have the assets transferred to the first pillar and be paid a regular family pension.

#### REPUBLIC OF MOLDOVA

The amount of Survivor pension is calculated in the amount of 50% or 75% (in case of children) of the old-age or disability pension of the deceased person, for each survivor.

For a parentless orphan, survivor pension amount shall represent total survivor rights calculated for each parent.

#### RUSSIAN FEDERATION

The amount of insurance survivor pension (except for the survivor pension for orphans who lost both parents or for orphans of a deceased single mother), the amount of the insurance survivor pension for each unemployable family member of the deceased breadwinner is determined with the help of the following formula:

$IPs = IPC \times VPC$ ,

IPs – the amount of the insurance survivor pension;

IPC – individual pensionable coefficient of the deceased breadwinner;

VPC - value of one pensionable coefficient defined as of the day the insurance survivor pension was granted.

Thus, a correction factor (K) applies during calculation of IPC. K is equal to the ratio of standard length of pensionable service of deceased breadwinner (in months) as of the day of breadwinner's death to 180 months. Standard length of pensionable service until reaching by the deceased breadwinner the age of 19 years is 12 months and it is increased by 4 months for each full year of age starting from 19 years, however, not more than up to 180 months;

The IPC is calculated with the help of KN. It is the number of unemployable family members of the deceased breadwinner as of the day the insurance survivor pension is granted to the unemployable family members.

Maximum number of individual pensionable coefficients (points) taking into account in the size of amount of pension for calendar year is limited: 2020- not more than 9.57

RiIP - increase rate of the individual pensionable coefficient while calculating the amount of insurance survivor pensions. This rate is used when the deceased breadwinner did not apply for insurance old-age pension (including early) after the creation of the right to the said pension; in case of breadwinner's refusal to get the granted old age pension.

At the same time the insurance survivor pension has a fixed payment (FP). In the abovementioned cases, a multiplying factor is applied to the fixed payment. Moreover, survivor pension and FP have different increase factors.

From 01.01.2020 the fixed payment to the insurance survivor pension is RUB 2,843.13 per month.

From January 1, 2010, the amount of state survivor pension has been established as a percentage of the social pension established by the Federal Law "On State Pensions in the Russian Federation", and depends on category of deceased breadwinner

## SERBIA

Benefit level is determined as a percentage of the pension, which was or would have been granted to deceased at the time of death. Percentage varies depending on number of family members eligible for this benefit:

single member: 70%

two members: 80%

3 members: 90%

four or more members: 100%

These amounts are shared equally among entitled family members.

If members of the extended family are also eligible then the above scale is used just for immediate family members. Members of the extended family may obtain any remaining difference between the money paid to the immediate family and the full pension level.

If divorced spouse, ex-cohabitant, current spouse/cohabitant are eligible at the same time, the pension is determined as 70% of the base and shared equally between them.

The benefit is not means-tested.

"Money amount as pension increase" and other supplements – See Table VI "Old Age".

The amount of Survivor pension is calculated in the amount of 50% or 75% (in case of children) for each survivor.  
For a parentless orphan, survivor pension amount shall represent total survivor rights calculated for each parent.

#### RUSSIAN FEDERATION

The amount of insurance survivor pension is determined by the individual pensionable coefficient (IPC) of the deceased breadwinner which is divided between all non-employed dependants of the deceased breadwinner who are entitled to get this survivor pension.

IPC consists of the individual pensionable coefficient for periods before 01.01.2015 (IPCs) and individual pensionable coefficient for period after 01.01.2015 (IPCn)  
IPCs reflects pension rights of the insured person formed before the Federal Law 400-FZ dd 28.12.2013 has come into force (based on labor length of service and salary of the insured person before 01.01.2002 as well as amount of insurance deductions and other contributions for the insured person to the Pension Fund after the mentioned date) that are transferred into the individual pensionable coefficient.

IPCh reflects pension rights of the insured person formed after 01.01.2015 according to new rules: sum of individual pensionable coefficient calculated for each calendar year based on the ratio of actual insurance contributions for insurance pension accrued during the year for worker and their normative size (The normative size is the product of the maximum tariff for the contributions to the insurance pension and the maximum calculation basis upon which the contributions are calculated).

The calculation of insurance pension summarizes all annual individual pensionable coefficients including coefficients for the "non-insurance" periods (for example, period to attend to a child up to the age of 1.5, period of military service and compulsory military service etc.).

Persons entitled to insurance survivor pension are given a fixed payment which is added to this pension.

When determining the total amount of pension, the amount of the insurance pension and a fixed payment to the insurance pension is summed up.

Furthermore, state pension for loss of breadwinner is calculated as a percentage of the amount of social pension, set by Federal Law "On State Pension Provision in the Russian Federation".

The percentage is subject to the category of the deceased breadwinner and dependent.

#### BOSNIA AND HERZEGOVINA

## GEORGIA

## MONTENEGRO

Pension benefit indexed through indexation of the personal points as of January 1 of the current year, on the basis of statistical data, in relation to the change of the CPI and average wage in Montenegro for the previous year compared to the year prior to it:

- in the percentage representing the sum of 75% of the percentage increase, i.e. decrease in the CPI and 25% of the percentage of increase, i.e. decrease of wages if the rate of change of the CPI is greater than or equal to the rate of change of the wage index ;
- in the percentage representing the sum of 25% of the percentage increase, i.e. decrease in the CPI and 75% of the percentage of increase, i.e. decrease of wages if the rate of change of the CPI is lower than the rate of change of the wage index.

Exceptionally, if the percentage that represents the sum of the percentage of increase, i.e. decrease in the CPI and the percentage of increase, i.e. decrease of wages would lead to a negative indexation, the value of the pension for one personal point and pensions will not be adjusted.

Additional indexation of the minimum pension by 13.16% was implemented in August 2020, retrospectively from January 1, 2020.

Indexation of personal points value was 0,90% in January 2021.
