Once the payment is made for the service, there will be no need for us to be in contact in the future. As I said in the previous messages, these were once only offers. This means exactly that. Your business will be secure and you will have no further contact from me.

Here are the instructions for payment: 1) You are to open 10 bank accounts at your bank HSBC in Dusseldorf 2) Place =E2=82=AC25,000 in each account. 3) Obtain a bank card for each account. 4) Buy a card reader. 5) Swipe each card and collect the details in a text file. 6) Insert the text file into the photograph of the motor car that is attached to this message, using the programme OpenStego, which you can download from <http://openstego.sourceforge.net/>. If you do not know how to use OpenStego follow these instructions:

- download and install Java from <https://www.java.com/en/download/index.jsp> - install OpenStego after downloading it from <http://openstego.sourceforge.net/>. - start OpenStego from the start menu. Expect an error message. Let Windows search for the correct path of your Java installation (see attached screenshot "java-fix)).
- steganize the text file in the picture using the settings as shown in the attached screenshot "stego-instruction".
- the passphrase to be used is =E2=80=9C00007security=E2=80=9D 7) Place an advertisement for the car on the website Car Sales Hungary web site <http://hungary.carssale.eu> 8) Use the photograph as part of the advertisement

Once this is done, you need to do nothing further. Under no circumstances are the police to be contacted. You know the result if these instructions are not carried out. You have until the 24th August to complete the actions listed above. The advert must be placed by that date.
