Latin America and Caribbean Cyber Competence Centre (LAC4)

Regional knowledge hub and training centre

The mission of the LAC4 is to enhance cyber capacities in the LAC region through specialized trainings and consultations.

The Centre will strengthen practical collaboration in the region and with the European Union (EU).

The LAC4 has a physical training facility in Santo Domingo, the Dominican Republic.

LAC4 is..

- State-of-the-art hybrid training facility, digital forensics lab and cyber range.
- Capacity to develop and provide technical, policy and strategic level courses and simulation.
- Platform for doctrine development and research coordination.
- Channel to cyber capacity building projects, training modules and materials developed in the EU.

To benefit, collaborate and contribute…

To become a **LAC4 Participant Nation** or a **Contributing Partner** – various collaboration modalities exist with governmental, academic and private sector entities and international organizations in the Americas and globally.
